It will be seen that the bulk of the investments are in stock exchange securities which constitute about 70 per cent of the total assets and amount to Rs. 42 crores after allowing for an investment fluctuation fund of Rs. 86 lakhs provided for in the balance-sheets.

INDIAN ASSETS OF NON-INDIAN COMPANIES.

The total assets in India of non-Indian companies amount to Rs. 49½ crores. The bulk of this amount Rs. 37 2/5 crores represents the Indian assets of companies constituted in the United Kingdom and Rs. 11⅞ crores those of companies constituted in the Dominions and Colonies. The Indian assets of the American companies amount to Rs. 7½ lakhs, those of the Continental companies to Rs. 39 lakhs, of the Japanese to Rs. 8 lakhs and of the Javanese to Rs. 1000 only. Out of this total amount of Rs. 49½ crores, Rs. 44½ crores represent Indian assets of companies which carry on life assurance business in India either solely or along with other insurance business.

VALUATIONS.

There were 186 Life Offices which submitted their accounts and business returns for the year 1938 under the provisions of the Indian Life Assurance Companies Act. The Insurance Year Book contains the results of the latest valuations of 130 of these Life Offices about half of which have undergone more than one valuation. Of the remaining 56 Life Offices with the exception of about half a dozen whose business is not susceptible of an actuarial valuation none has yet reached the stage of having a valuation.

The results of these valuations show that the Life Offices concerned had in the aggregate 1,115,000 policies in force on the valuation dates assuring a sum of Rs. 184½ crores including bonus additions and annuities of Rs. 2¼ lakhs. The life assurance funds of these Life Offices amounted to Rs. 42½ crores and they received an annual premium income of Rs. 9¼ crores.

The valuations disclosed a surplus in the case of 95 companies and deficit in the case of 34 companies, while in the case of one company there was a surplus in the Ordinary Life Section and a deficit in the Dividing Section. The total surplus of these companies amounted to Rs. 468 lakhs of which Rs. 421 lakhs was allocated to the policy-holders and Rs. 31 lakhs to the shareholders and the balance was either set aside as an additional reserve or was carried forward unappropriated. The deficit in the case of the remaining companies amounted to Rs. 14¼ lakhs. Of these, the deficit in the case of 25 companies was covered by the available paid-up capital. In the case of the remaining 9 companies, the deficit was not so covered.

Finance.

The gradual evolution of the present financial organisation of India is in many respects a reflection of her constitutional development. In the earliest days of British rule, the Provinces, and especially the older Presidencies, were for all practical purposes independent of the central government and responsible only to the authority sitting in London. After the middle of the nineteenth century the process was reversed, and the Government of India was all-powerful, controlling the Provinces down to the smallest items of their expenditure. This centralisation reached its highest point during the long Viceroyalty of Lord Curzon, who was so jealous of his supreme authority that he sought to deprive the Presidency Governors of their right to correspond direct with the Secretary of State for India. This system was found top-heavy in the days of his successors, and a continuous process of devolution set in. In the matter of finance the measures took the form of long-term "contracts" with the Provincial Governments, and later in the assignment of definite heads of revenue to the Provincial Governments, thus removing the dual authority and responsibility which had clogged progress. A much clearer cut was made when the great reform scheme embodied in the Government of India Act of 1919 was passed. Here, for all practical reasons, Provincial finance was entirely separated from the finances of the Government of India, and with one reservation the Local Governments were made masters in their own financial houses. The reservation arose from the circumstance that the funds of the Government of India did not then permit them to do entirely without contributions from the Provinces. These contributions were fixed in the shape of definite sums, which the Provincial Governments had to find from their own resources and pay to the Government of India in cash. They varied between Province and Province, on a scale which at first sight seemed inequitable, but which had a definite logical basis. The total of these contributions was a little less than ten crores of rupees. This was admittedly a temporary expedient, to last only so long as was necessary for the Government of India to reduce its post-war expenditure and develop its revenues to the point when they would balance without drawing from the Provinces. They were an open sore, each Province claiming that it paid an undue proportion of the total contribution, and that it was starved in consequence. There was no possibility of adjusting these differences, so the contributions were reduced as fast as the finances of the Government of India permitted. They finally disappeared from the Budget in 1928-29.

But this did not end the discussion; indeed it was only the first phase. The Government of India had taken the growing heads of revenue—those which issue from taxes on income and customs. The Provinces were left with resources either almost static, like land revenue, or actually declining, as with excise where steps are being taken to reduce the consumption of alcoholic liquor in response to the strong Indian sentiment towards prohibition. At the same time the Provinces were confronted with the great growing sources of expenditure, like those on education and sanitation, which bulk largely in Provincial budgets.

Federal Finance Committee.

The financial organisation was, of course, reviewed as part of the work of the Round Table Conference. A sub-committee of the Federal Structure Committee was appointed under the chairmanship of Lord Peel to examine the question of federal finance and the principles embodied in the sub-committee's report were endorsed by the parent Committee as a suitable basis. A Federal Finance Committee with Lord Eustace Percy as Chairman was appointed at the end of 1931 to subject to the test of figures the suggested classification of revenues by the Peel Committee and to estimate the probable financial position of the Federal and of the Provincial Governments under the proposed scheme. In the course of their report the Federal Finance Committee said that the transfer to the Provinces of taxes on income though defensible in principle would leave the Centre in deficit. Therefore the Peel Committee suggested a method of transferring to each Province a percentage of the share of income tax estimated to be attributable to it. But in view of the incomplete data on which the estimates were made a special review was held to be necessary at the time federation is established in order to fix the initial percentages. A strict allocation on a percentage basis would still leave some Provinces in deficit and so as to right their finances the committee suggested spreading the charge over the other Provinces by giving them back less in income tax than they were entitled to.

Regarding possible new sources of revenue, Federal or Provincial, the Federal Finance Committee reported as follows:—

Federal.

Excise on Tobacco.—The present position in regard to this tax appears to be that a substantial revenue may be expected from a system of vend licenses and fees, but that an excise duty imposed in the near future could not be relied on to yield a substantial revenue. There is general agreement that such a duty could not be imposed on the cultivator, and it is doubtful whether a duty on the manufactured product could be successful while manufacture continues to be so largely carried on in small establishments and even as a domestic industry. Vend licenses and fees can obviously be imposed only by the Governments of the Units, and their imposition by the Provincial Governments is now being encouraged by the Government of India.

Excise on Matches—The imposition of an excise duty on matches is already under active consideration, and we feel justified in contemplating the existence of such a duty from the outset of federation. We are advised that the probable net yield of the tax for all-India at a reasonable rate, with due allowance for reduced consumption, would be about 3 crores, of which at least 2,50 crores would be raised in British India. (Here it may be noted that an excise duty on matches made in British India was first imposed in the 1934-35 Budget and has continued since.)

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Other Excises.—It is possible that other excise duties may occupy an important place in the fiscal policy of India in the future, but we do not feel warranted in relying upon the introduction of such measures in the early years of federation. (Here it may be noted that an excise duty on sugar made in India was first imposed in the 1934-35 Budget and has continued at varying rates since then.)

Monopolies.—We have examined the suggestion, made at the Round Table Conference, that federal revenues should be augmented by a few selected monopolies. From the fiscal point of view it is only in very special circumstances that a monopoly, whether of production, manufacture or sale, is to be preferred to an excise duty as a means of raising revenue. Except in so far as the proposals already noticed in regard to tobacco may be regarded as a monopoly, we can suggest no new commodity to which the monopoly method could be applied with advantage. The manufacture of arms and explosives, which has been suggested as a possible monopoly, is already subject to licence. Public utility monopolies stand on rather a different footing; but the only new federal monopoly of this kind that has been suggested to us is broadcasting, the revenue from which must be entirely problematical.

Commercial Stamps.—In the Peel Report it was observed that "There is much to be said for federalising Commercial Stamps on the lines of various proposals made in the past," but no definite recommendation was made. We have examined this suggestion, but on the whole we cannot recommend it, at least as an immediate measure.

In proposing that the proceeds of commercial stamps should be assigned to the Units, we have to some extent been influenced by a doubt whether the problems arising from the imposition of federal stamp duties in the States might not be disproportionate to the revenue involved. We do not, however, wish to prejudge the possibility that, as part of the general federation settlement with the States, it might be found desirable to include these duties among the sources of federal revenue. This consideration might well outweigh the reasons which have led us to recommend that commercial stamps should not be made a source of federal revenue.

Corporation Tax.—From the financial point of view, it seems clear that, if a corporation tax were imposed on companies registered in the States on the same basis as the present super-tax on companies in British India, the yield at present would be negligible.

Provincial.

Taxation of Tobacco.—We have already dealt briefly with this question and have suggested that the taxation of tobacco, otherwise than by excise on production or manufacture, should rest with the Units, but that the Federal Government should be given the right to impose a general federal excise. This distinction is, we think, justified by the fact that *ex hypothesi* the introduction of excise duties on manufacture will be difficult, if not impossible, until manufacture becomes more highly industrialised; and as that development takes place an excise levied at the factory by one Unit of the Federation would be a tax on consumers in other Units. It will be seen from our later proposals in regard to powers of taxation that the federalisation of tobacco excise would not preclude the Federal Government from assigning the proceeds to the Units, if it so desired. (Here it may be noted that a sales tax on Tobacco has since been imposed by the provinces of Bombay and Madras, in their 1939-40 Budget).

There is, unfortunately, no material which would enable us to estimate the yield of any of these forms of taxation. The provincial taxes will take some time to mature, but eventually they may be expected to form at least a very useful additional source of provincial revenue.

Succession Duties.—Bombay is, we believe, the only Provincial Government which has attempted legislation for the imposition of succession duties, and the attempt was unsuccessful. We understand that even that Government would have preferred that legislation should have been undertaken by the Government of India. We propose elsewhere that succession duties should be classed among taxes leviable by the Federal Government for the benefit of the Units; but clearly the facts would not justify reliance on them as a source of revenue in the near future. (Here it may be noted that in 1938 the Government of India deputed a special officer, Sir Alan Lloyd, of the Central Board of Revenue, to conduct an investigation into the possibilities of instituting a system of death duties in India. The upshot of the investigation was that the Government of India decided not to proceed with the proposal to impose death duties, as most provincial Governments were opposed to it.)

Terminal Taxes.—We have been asked to weigh the issues which arise from the proposal to introduce terminal taxes generally as an additional source of revenue for the Provinces. We are not prepared to regard terminal taxes as a normal source of revenue.

Taxation of Agricultural Incomes.—We have not considered the broad issues of policy involved in the taxation of agricultural incomes, but we have considered, as we were commissioned to do, the more limited question of "the possibility of empowering individual Provinces, if they so desire, to raise, or appropriate the proceeds of a tax on agricultural incomes." In view of the close connection between this subject and land revenue, we agree that the right to impose such taxation should rest with the Provinces. For the same reason, we think that this right should be restricted to the taxation of income originating in the Province concerned. There will presumably be no difficulty in drafting into the constitution a definition of agricultural income which has so long been recognised in Indian income-tax law and practice.

We are not prepared to express a final opinion as to whether agricultural and non-agricultural income should be aggregated for the purpose of determining the right of the assessee to exemption and the rate of taxation to which he is liable on either section of his income; and we doubt whether any provision need be inserted in the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

constitution on this point since we are advised that, in practice, it would scarcely be possible for either the Federal or a Provincial Government to take into consideration income not liable to taxation by it, except with the consent and co-operation of the other Government. We are aware of no reliable data for estimating the yield of such taxation.

Niemeyer Report.

A necessary prelude to the introduction of the Constitutional Reforms was an investigation of their safety in the light of the financial situation and prospects of India. The investigation was carried out by Sir Otto Niemeyer whose report was published in April 1936. The Report proposed immediate financial assistance from the beginning of provincial autonomy to certain provinces partly in the form of cash subventions, partly in the form of cancellation of the net debt incurred previous to April 1, 1936, and partly in the form of distribution to the jute growing provinces of a further 12½ per cent. of the jute tax.

Annual cash subventions are as follows: To the U. P. Rs. 25 lakhs for 5 years only, to Assam Rs. 30 lakhs, to Orissa Rs. 40 lakhs, to the N.-W. F. Province Rs. 100 lakhs (subject to reconsideration after 5 years), and to Sind Rs. 105 lakhs to be reduced by stages after 10 years.

The total approximate annual relief in lakhs aimed at by Sir Otto Niemeyer is as follows:— Bengal Rs. 75, Bihar Rs. 25, C. P. Rs. 15, Assam Rs. 45, N.-W. F. Province Rs. 110, Orissa Rs. 50, Sind Rs. 105, and U. P. Rs. 25, extra recurrent cost to the centre Rs. 192 lakhs.

Orissa is to get a further non-recurrent grant of Rs. 19 lakhs and Sind of Rs. 5 lakhs by six equal steps beginning from the sixth year from the introduction of provincial autonomy, but subject to the proviso to section 138 (2) of the Act. The Centre is to distribute the income-tax to the provinces so that finally 50 per cent. of the distributable total has been relinquished in the intermediate five years, so long as the portion of the distributable sum remaining with the Centre, together with any contribution from the Railways, aggregates 13 crores.

As regards the provincial share of the proceeds from income-tax, Sir Otto Niemeyer recommended that half of the proceeds should remain with the Centre, while the other half should be distributed among the provinces on the following percentage division:—Madras 15, Bombay 20, Bengal 20, U. P. 15, Punjab 8, Bihar 10, C. P. 5, Assam 2, N.-W. F. Province 1, Orissa 2 and Sind 2.

Sir Otto Niemeyer suggested that the Centre would not be in a position to distribute any part of income-tax proceeds for the first five years from the beginning of provincial autonomy but that it might be in a position to distribute some of the proceeds, though not necessarily the percentage allocated, within the first ten years of provincial autonomy. But this, he said, largely depended on the financial condition of the railways and their ability once again to contribute to general revenues. His remarks on this point were:—

"The position of the railways is frankly disquieting. It is not enough to contemplate that in five years' time the railways may merely cease to be in deficit. Such a result would also tend to prejudice or delay the relief which the provinces are entitled to expect.

"I believe that both the early establishment of effective co-ordination between the various modes of transport and the thorough going overhaul of railway expenditure in itself are vital elements in the whole provincial problem."

RECENT INDIAN FINANCE.

India, in common with other countries of the world, felt the full force of the economic blizzard which began in 1930 and attained its maximum the following year. The net result from the Government of India's point of view was the introduction during 1931 of two Budgets, the ordinary Budget in the spring of the year and a supplementary Budget containing fresh taxation proposals in September.

The 1932-33 Budget.—Presenting the 1932-33 budget on March 7, 1932, the Finance Member explained that the circumstances were somewhat unusual. The supplementary budget had been introduced only six months earlier. He did not, therefore, propose to ask the House at the present stage to approve any extensions or modifications of the plan for raising revenue put forward in September 1931.

The 1933-34 Budget.—In introducing the budget, the Finance Member summarised the results for the two previous years. He estimated the general position for 1933-34 to be the same as for the current year, neither better nor worse, and in particular that India would be able to maintain the same purchasing power for commodities imported from abroad.

The 1934-35 Budget.—In order to provide an even balance for 1934-35 it was necessary to find means of improving the position to the extent of Rs. 153 lakhs. The Finance Member announced the imposition of an excise duty on sugar, a reduction in the silver import by 2½ annas to 5 annas per ounce and the abolition of the export duty on raw hides. Announcing that the Government intended to hand over half the jute export duty to the jute producing Provinces, the Finance Member said that the Government of India would recoup their losses by imposing an excise duty on matches.

The 1935-36 Budget.—This Budget was expected to show a surplus of Rs. 150 lakhs available for tax reduction. The Silver duty was reduced to 2 annas an ounce. The export duty on raw skins was abolished. The remaining surplus of Rs. 1,42 lakhs was disposed of, first, in restoring the emergency cuts in pay, and second, in taking off some of the surcharge on income-tax. This surcharge was reduced by one-third; the cost was Rs. 1,36 lakhs, leaving a nominal surplus of Rs. 6 lakhs.

The 1936-37 Budget.—The surplus for 1936-37 was estimated at Rs. 2,05 lakhs, and this was

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

disposed of in two ways. First, the remaining surcharge on income-tax and super-tax was cut by a half, leaving it at one-twelfth of the original figure; further, income-tax on incomes between Rs. 1,000 and Rs. 2,000 a year was abolished. Second, a postal concession was made by increasing the weight of the one-anna letter from half to one tola, and adopting a scale of an additional half-anna for every additional tola. The effect of these changes was to reduce the surplus to Rs. 7 lakhs.

The 1937-38 Budget.—The prospective deficit for 1937-38 (due to trade depression and consequent smaller receipts from customs and income-tax) was Rs. 158 lakhs, which would have been Rs. 342 lakhs but for an amount available in the Revenue Reserve Fund. The deficit was met by a series of imposts: import and excise duties on silver were raised from two annas to three annas an ounce, while the sugar duties were raised on a graduated scale. Changes were made in the postal rates for parcels, book-patterns and samples, and the existing rates of salt duty, income-tax and super-tax were continued.

The 1938-39 Budget.—This Budget was generally regarded as preserving the *status quo*, since no changes in the taxation system were introduced and a surplus of Rs. 9 lakhs was anticipated. But there were special features in regard to Defence, for which an extra Rs. 80 lakhs was to be expended. A further feature of the 1938-39 Budget was the financing of Provincial Autonomy in its inaugural stages. While the separation of Burma caused a loss of Rs.250 lakhs, payments to the Provinces under the Niemeyer Award amounted to Rs.198 lakhs. To start the Provinces in a sound state the following steps were taken: their existing debts to the Centre were partly cancelled and partly consolidated at a lower rate of interest; additional grants-in-aid were made to deficit provinces: a larger share of the jute excise duty was disbursed and with the improvement in railway revenues, a start was made on the distribution of income-tax receipts to the provinces.

The 1939-40 Budget.—On the basis of the maintenance of existing taxation and the adoption of the new system of income-tax embodied in the Income-Tax (Amendment) Act of 1939 and the "slab system" of assessment (for details of which see under "Income-Tax"), the position was as follows: Estimated Revenue, Rs. 82,15 lakhs; Estimated Expenditure, Rs. 82,65 lakhs; Estimated Deficit, Rs. 50 lakhs. Both revenue and expenditure were down on the previous year, the former because of trade recession which would result in lower receipts from customs, and the latter because of economies under interest charges and Defence.

To meet the prospective deficit the Finance Member proposed an increase of 100 per cent. in the tariff duty on imported raw cotton, from six pies per lb. to one anna per lb. This was estimated to yield Rs. 55 lakhs, thus converting the deficit into a small estimated surplus of Rs. 5 lakhs. Other changes embodied in the Budget were the new rates of income-tax and super-tax drawn up on the "slab system" and modifications in the excise duty on sugar, estimated to yield an extra Rs.51 lakhs.

The 1940-41 Budget.—A fortunate surplus for the previous financial year (1939-40) of Rs. 91 lakhs, but the necessity of finding new revenue to meet a prospective deficit of Rs. 7,16 lakhs in 1940-41 were the basic features of India's first War Budget presented by the Finance Member Sir Jeremy Raisman. That the previous year had ended with a substantial surplus was indeed gratifying, seeing that the country had already been at war for seven months. By applying the surplus of Rs. 91 lakhs towards the coming year, the prospective deficit was reduced to Rs. 6,25 lakhs.

This short fall Sir Jeremy Raisman proposed to meet in three ways. The first was an Excess Profits Tax, already announced to the country but subsequently altered in its incidence so as to provide for an impost of 50 per cent. on all abnormal war profits, above a taxable minimum of Rs. 30,000, earned since September 1, 1939, these excess profits to be calculated on the basis of a standard year which might be, at the assessee's option, any financial year between 1935-36 and 1939-40. This was estimated to produce a net accession to revenue of Rs. 3,00 lakhs. The second means was a further increase of two annas per gallon in the duty on motor spirit (petrol), estimated to yield Rs. 1,40 lakhs, while the third impost was an increase from two rupees to three rupees in the excise duty on refined sugar with a corresponding increase in the import duty, calculated to yield Rs. 1,90 lakhs. The three changes together were expected to produce Rs.6,30 lakhs and to convert the prospective deficit of Rs. 6,25 lakhs into a small surplus of Rs. 5 lakhs.

On the expenditure side, the main feature was naturally the Defence Budget, which provided for an increase of Rs. 5,11 lakhs on the previous year's estimate and stood at the sum of Rs. 49,29 lakhs. That this figure was not higher was due principally to a settlement reached with the British Government on the division of obligations for defence. Under the settlement India was to be liable only for the normal peace time cost of the Army in India, adjusted in relation to the rise in prices, plus the cost of India's own immediate war measures, plus a lump sum of Rs. 1,00 lakhs towards the maintenance of external defence troops overseas. The Finance Member held that this settlement was favourable to India and was conceived by His Majesty's Government in a generous spirit. In terms of figures it worked out as follows: (1) Normal peace Defence Budget, Rs. 36,77 lakhs; (2) effect of rise of prices on (1), Rs. 25 lakhs; (3) Indian war measures, Rs. 3,80 lakhs; (4) Non-effective charges, Rs. 8,41 lakhs; Total Rs. 49,29 lakhs.

The 1940-41 Supplementary Budget.—As was only to be expected, the rapidly mounting expenditure on defence, coupled with the dislocation of trade caused by the war and consequent loss of Customs revenue, led to a deterioration in India's financial position which impelled the Finance Member to introduce a Supplementary Budget in November 1940. He had to meet an increase of at least Rs.14¼ crores in defence and nearly Rs.7 crores in Civil expenditure, coupled with a drop of Rs.3 crores in revenue. He therefore supplemented the Finance Act, 1940 by two measures of fresh taxation designed to bring in Rs.6 crores in a full year, leaving the position to

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

be fully surveyed in the following February. The first measure was a 25 per cent. surcharge on all taxes on income including Super-tax and Corporation Tax. The second measure was an increased in postal rates, telegram and telephone charges, designed to bring in Rs.1 crore in a full year.

The 1941-42 Budget.—Presenting the Budget for 1941-42, the Finance Member said that while Government's expenditure was expected to rise by Rs.15 crores to a total of Rs.1,26 crores, its revenue was expected to rise by Rs.3 crores to a total of Rs.1,06 crores, leaving a prospective deficit of Rs.20 crores. One-third of this was proposed to be met by fresh taxation and the remainder from Defence Loans. For the previous year 1940-41, instead of the deficit being Rs.13 crores as estimated in November, the deficit was expected to be no more than Rs.8 crores; this was due to an increased contribution from the railways and a surplus over from the year before.

The additional taxation intended to raise a further Rs.6,61 lakhs in order to meet a share of the cost of India's war measures took the following forms: The Excess Profits Tax was raised from 50 per cent. to 66⅔ per cent. to yield Rs.250 lakhs, and the Central surcharge on Income-tax and Super-tax from 25 per cent. to 33⅓ per cent. to produce a further Rs. 190 lakhs. Other proposals were to double the match duty, to raise the import duty on artificial silk yarn and thread from 3 annas to 5 annas per pound, and to levy an excise duty on pneumatic tyres and tubes, to yield together Rs. 221 lakhs.

Defence.—The main purpose of these fresh imposts was to strengthen all arms of India's Defence Services, and for this a total expenditure of Rs.84 crores was envisaged in 1941-42. Rs.35 crores of this was for India's own war measures, while His Majesty's Government in Britain were paying separately for all supplies and services rendered to them by India and were also providing free of charge much of the equipment needed for the modernisation of the Army in India. The strength of India's armed forces, already well over half a million, was to be further expanded. New regiments of mechanised cavalry, artillery and infantry were being raised, as also Signal and Sapper and Miner Units. New ships for the Royal Indian Navy were being built and more officers and men to man them were being trained. For the Air Force, aircraft and equipment were being obtained from America and the first "made-in-India" aeroplanes were expected to be manufactured in the current year. Civil expenditure had increased by Rs.2,61 lakhs, mainly on account of schemes connected with the war. The Supply Department's expenditure on placing orders for Indian products for allied Governments, the value of which had already exceeded Rs.82 crores. was expected to be Rs.58 lakhs.

Redemption of Sterling Debt.

A major financial operation successfully carried out in 1940-41, to the mutual advantage of India and Great Britain, was the redemption and repatriation of the former's sterling debt and its replacement by rupee obligations. The effect of this operation was to reduce the Government of India's external debt by Rs.120 crores and its interest charges payable in London by as much as 50 per cent. over the previous six years. To enable it to carry out this, the largest single operation of its kind in the history of Indian finance, Government had to exercise its war-time powers of compulsory acquisition of holdings of sterling securities in this country, as also enlist the aid of the British Government for the issue of similar orders under its special war powers compelling holders resident in the United Kingdom to sell their stocks for delivery to the Indian Government at the market prices prevailing at the time of the order.

The methods whereby this notable transaction was carried out were simple. Owing to the continued improvement in the country's balance of trade, the Reserve Bank had been able to purchase large amounts of sterling which in the first ten months of the financial year 1940-41 amounted to £47 millions. At the same time, with large payments being received in the United Kingdom on account of recoverable war expenditure and the cost of supplies made to His Majesty's Government, the amount of remittance required by the Government of India diminished to vanishing point. For the next year 1941-42, instead of having to remit funds to London, the Government of India expected a refund of £26 million. It had further made considerable open market purchases in London, to the extent of £28½ million of its sterling stocks. In these circumstances, the financing of the debt redemption scheme was facilitated, especially by the exercise of compulsory powers of acquisition in both England and India which enabled the authorities to make their purchases at a fair market price without undue speculative influence being brought to bear. In the words of the Finance Member, "The immediate object of the transaction was the replacement of sterling by rupee obligations and the real gain to the country lay in the liquidation of external obligations which might prove an embarrassment in the future.... Another aspect of the operations was the manner in which they assisted His Majesty's Government to finance the prosecution of the war. If India repaid her creditors in London.....the greater part of the sums so disbursed would be re-lent to His Majesty's Government probably in the form of investment in Defence Loans."

WAYS AND MEANS.

The following is a summary of the estimates of ways and means in India during 1940-41 and 1941-42 :—

	Budget, 1940-41.	Revised, 1940-41.	Budget, 1941-42.
Excess of Revenue over Expenditure	5	—8,42	13,85
New Loan	....	53,40	34,50
Treasury Bills issued (net)	—8,00	8,00	11,50
Ways and Means Advances	....	20,00	—20,00
Post Office Cash Certificates (net)	—1,50	—10,00	—6,00
Defence Saving Certificates	....	2,34	3,50
Post Office Savings Bank Deposits (net)	3,17	—19,00	—2,00
Other Unfunded Debt (net)	3,42	2,91	3,83
Discount Sinking Fund	1,15	1,15	1,03
Reduction or Avoidance of Debt	3,00	3,00	3,00
Railway Depreciation Fund	5,66	4,38	5,88
Railway Reserve Fund	2,99	3,64	1,65
Posts and Telegraphs Renewals Reserve Fund	....	4	2
Telephone Development Fund	—14	—36	—20
Repayment of loans by Provinces	1,27	—1,93	2,14

THE LAND REVENUE.

The principle underlying the Land Revenue system in India has operated from time immemorial. It may be roughly formulated thus—the Government is the supreme landlord and the revenue derived from the land is equivalent to rent. On strict theoretical grounds, exception may be taken to this statement of the case. It serves, however, as a substantially correct description of the relation between the Government and the cultivator. The former gives protection and legal security. The latter pays for it according to the value of his holding. The official term for the method by which the Land Revenue is determined is "Settlement." There are two kinds of settlements in India—Permanent and Temporary. Under the former the amount of revenue has been fixed in perpetuity, and is payable by the landlord as distinguished from the actual cultivator. The Permanent Settlement was introduced into India by Lord Cornwallis at the close of the eighteenth century. It had the effect intended of converting a number of large revenue farmers in Bengal into landlords occupying a similar status to that of landowners in Europe. The actual cultivators became the tenants of the landlords. While the latter became solely responsible for the payment of the revenue, the former lost the advantage of holding from the State. This system has prevailed in Bengal since 1795 and in the greater part of Oudh since 1859. It also obtains in certain districts of Madras. Incidentally, the Bengal system was the subject of an exhaustive examination by a Commission under the chairmanship of Sir Francis Floud in 1939-40, which produced a radical report—a minority dissenting—in favour of State purchase of land, thus challenging the Bengal system of land tenure based on the Permanent Settlement.

Elsewhere the system of Temporary Settlements is in operation. At intervals of thirty years, more or less, the land in a given district is subjected to a thorough economic survey, on the basis of the trigonometrical and topographic surveys carried out by the Survey Department of the Government of India. Each village area, wherever the Temporary Settlement is in vogue, has been carefully mapped, property-boundaries accurately delineated, and records of rights made and preserved. Under the Permanent Settlement in Bengal the occupant does not enjoy these advantages. The duty of assessing the revenue of a district is entrusted to Settlement Officers, members of the Indian Civil Service specially delegated for this work. The duties of a Settlement Officer are thus described in Strachey's *India* (revised edition, 1911):—"He has to determine the amount of the Government demand and to make a record of all existing rights and responsibilities in the land. He has a staff of experienced subordinates, almost all of whom are natives of the country, and the settlement of the district assigned to him is a work which formerly required several years of constant work. The establishment of agricultural departments and other reforms have however led to much simplification of the Settlement Officer's Proceedings, and to much greater rapidity in the completion of the Settlements All the work of the Settlement Officer is liable to the supervision of superior officers, the assessments proposed by him require the sanction of the Government before they become final in binding: and his judicial decisions may be reviewed by the Civil Courts. It is the duty of the Settlement Officer to make a record of every right which may form the subject of future dispute, whether affecting the interests of the State or of the people. The intention is to alter nothing, but to maintain and place on record that which exists."

The Two Tenures.

Under the Temporary Settlement and tenures fall into two classes—peasant-holdings and landlord-holdings, or *Ryotwari* and *Zemindari* tenures. Broadly speaking, the difference between the two in a fiscal sense is that in Ryotwari tracts the *ryot* or cultivator pays the revenue direct; in *Zemindari* tracts the landlord pays on a rental assessment. In the case of the former, however, there are two kinds of *Ryotwari* holdings—those in which each individual occupant holds directly from Government, and those in which the land is held by village communities, the heads of the village being responsible for the payment of revenue on the whole village area. This latter system prevails in the North. In Madras, Bombay, Burma and Assam, *Ryotwari* tenure is on an individual basis, and the Government enters into a separate agreement with every single occupant. The basis of assessment on all classes of holdings is now more favourable to the cultivator than it used to be. Formerly what was believed to be a fair average sum was levied on the anticipated yield of the land during the ensuing period of settlement. Now the actual yield at the time of assessment alone is considered, so that the cultivator gets the whole of the benefit of improvements in his holding subsequently brought about either by his own enterprise or by "unearned increment." The Government, however, may at a new settlement re-classify a holding so as to secure for itself a fair share in an increment that may have resulted from public works in the vicinity, such as canals and railways, or from a general enhancement of values. But the principle that improvements effected by private enterprise shall be exempt from assessment is now accepted by the Government and provided for in definite rules.

Incidence of the Revenue.

The incidence of the revenue charges varies according to the nature of the settlement, the class of tenure, and the character and circumstances of the holding. Under the Permanent Settlement in Bengal Government derive rather less than £3,000,000 from a total rental estimated at £12,000,000. Under Temporary Settlements, 50 per cent. of the rental in the case of *Zemindari* land may be regarded as virtually a maximum demand. In some parts the impost falls as low as 35 and even 25 per cent. and only rarely is the proportion of on

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

half the rental exceeded. In regard to *Ryotwari* tracts it is impossible to give any figure that would be generally representative of the Government's share. But one-fifth of the gross produce is the extreme limit, below which the incidence of the revenue charge varies greatly. About sixteen years ago, the Government of India were invited in an influentially signed memorial to fix one-fifth of the gross produce as the maximum Government demand. In reply to this memorial and other representations the Government of India (Lord Curzon being Viceroy) issued a Resolution in defence of their Land Revenue Policy. In it was stated that "under the existing practice the Government is already taking much less in revenue than it is now invited to exact" and "the average rate is everywhere on the down grade." This Resolution, together with the statements of Provincial Governments on which it was based, was published as a volume; it is still the authoritative exposition of the principles controlling the Land Revenue Policy of the Government of India. In a series of propositions claimed to be established by this Resolution the following points are noted:—(1) In *Zemindari* tracts progressive moderation is the keynote of the Government's policy, and the standard of 50 per cent. of the assets is more often departed from on the side of deficiency than excess; (2) In the same areas the State does not hesitate to interfere by legislation to protect the interests of the tenants against oppression at the hands of the landlords; (3) In *Ryotwari* tracts the policy of long-term settlements is being extended, and the proceedings in connection with new settlements simplified and cheapened; (4) local-taxation (of land) as a whole is neither immoderate nor burdensome; (5) over-assessment is not, as alleged, a general or widespread source of poverty, and it cannot fairly be regarded as a contributory cause of famine. At the same time the Government laid down as principles for future guidance—(*a*) large enhancements of revenue, when they occur, to be imposed progressively and gradually, and not *per saltum*; (*b*) greater elasticity in revenue collection, suspensions and remissions being allowed according to seasonal variations and the circumstances of the people; (*c*) a more general resort to reduction of assessments in cases of local deterioration.

Protection of the Tenants.

In regard to the second of the five propositions noted above, various Acts have been passed from time to time to protect the interests of tenants against landlords, and also to give greater security to the latter in possession of their holdings. The Oudh Tenancy Act of 1886 placed important checks on enhancement of rent and eviction, and in 1900 an Act was passed enabling a landowner to entail the whole or a portion of his estate, and to place it beyond the danger of alienation by his heirs. The Punjab Land Alienation Act, passed at the instance of Lord Curzon, embodied the principle that it is the duty of a Government which derives such considerable proportion of its revenue from the land, to interfere in the interests of the cultivating classes. This Act greatly restricted the credit of the cultivator by prohibiting the alienation of his land in payment of debt. It had the effect of arresting the process by which the Punjab peasantry were becoming the economic serfs of money-lenders. A good deal of legislation affecting land tenure has been passed from time to time in other provinces; and it has been called for more than once in Bengal where the problems arising out of the Permanent Settlement have been examined by a Royal Commission under Sir Francis Floud which visited Bengal in 1939-40, and whose proposals are still under consideration.

Government and Cultivator.

While the Government thus interferes between landlord and tenant in the interests of the latter, its own attitude towards the cultivator is one of generosity. Mention has already been made of the great advantage to the agricultural classes generally of the elaborate systems of Land Survey and Records of Rights carried out and maintained by Government. In the Administration Report of Bombay for 1911-12, it is stated:—"The Survey Department has cost the State from first to last many lakhs of rupees. But the outlay has been repaid over and over again. The extensions of cultivation which have occurred (by allowing cultivators to abandon unprofitable lands) have thus been profitable to the State no less than to the individual; whereas under a *Zemindari* or kindred system the State would have gained nothing, however much cultivation had extended throughout the whole of 30 years' leases." On the other hand, the system is of advantage to the *ryots* in reducing settlement operations to a minimum of time and procedure. In the collection of revenue the Government consistently pursues a generous policy. In times of distress, suspensions and remissions are freely granted after proper inquiry.

Land revenue is now a provincial head of revenue and is not shown in the All-India accounts. It may be taken roughly at £28 million, as compared with £84 million said to have been raised annually by Aurungzebe from a much smaller Empire.

Since the coming into operation of provincial autonomy in April 1937, there has been a great impetus towards land revenue reform in most provinces, the primary object being to better the lot of the tenant by modifying *Zemindari* rights and usages, and by altering the system of land revenue assessment. To this end, legislation has been introduced in practically all the autonomous provinces during the years 1937 to 1939 and widespread changes are in process of being made everywhere.

The literature on the subject is considerable. The following should be consulted by readers who require fuller information:—"Land Revenue Policy of the Indian Government," 1902 (Superintendent of Government Printing); Baden Powell's "Land Systems of British India": Sir John Strachey's "India, its Administration and Progress, 1911," (Macmillan & Co.); M. Joseph Chailley's "Administrative Problems of British India" (Macmillan & Co.; 1910), and the Annual Administration Reports of the respective Provincial Governments.

EXCISE.

The Excise revenue in British India is derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and opium. It is a common place amongst certain sections of temperance reformers to represent the traffic in intoxicating liquors as one result of British rule. There is, however, abundant evidence to show that in pre-British days the drinking of spirituous liquors was commonly practised and was a source of revenue.

The forms of intoxicating liquor chiefly consumed are country spirit; fermented palm juice; beer made from grain; country brands of rum, brandy, etc., locally manufactured malt beer and imported wine, beer and spirits. Country spirit is the main source of revenue, except in the Madras Presidency, and yields about two-thirds of the total receipts from liquors. It is usually prepared by distillation from the Mhowra flower, molasses and other forms of unrefined sugar, fermented palm juice and rice. In Madras a very large revenue is derived from fresh toddy. The British inherited from the Native Administration either an uncontrolled Out-Still System or in some cases a crude Farming System and the first steps to bring these systems under control were the limitation of the number of shops in the area farmed, and the establishment of an improved Out-Still System under which the combined right of manufacture and sale at a special shop was annually granted. This of course was a kind of control, but it only enabled Government to impose haphazard taxation on the liquor traffic as a whole by means of vend fees. It did not enable Government to graduate the taxation accurately on the still-head duty principle nor to insist upon a standard of purity or a fixed strength of liquor. Moreover for political and other reasons the extent of control could not at first be complete.

There were tribes of aborigines who regarded the privilege of making their own liquor in their private homes as a long established right and who believed that liquor poured as libations to their god should be such as had been made by their own hands. The introduction of any system amongst those peoples had to be worked very cautiously. Gradually as the Administration began to be consolidated the numerous native pot-stills scattered all over the country under the crude arrangements then in force began to be collected into Central Government enclosures called Distilleries, thus enabling Government to perfect its control by narrowing the limits of supervision; and to regularize its taxation by imposing a direct still-head duty on every gallon issued from the Distillery. Under Distillery arrangements it has also been possible to regulate and supervise thoroughly the manufacture of its liquor and its disposal subsequent to leaving the Distillery by means of a system of transport passes, establishment supervision, improved distribution and vend arrangements.

Various Systems.

The Out-Still System may be taken to include all systems prior in order of development to the imposition of Still-head duty. Briefly stated the stages of development have been—First: farms of large tracts; Second: farms of smaller areas; Third: farms of the combined right to manufacture and sell at particular places without any exclusive privilege over a definite area; Fourth: farms of similar right subject to control of means and times for distilling and the like. The Provincial Governments have had to deal with the subject in different ways suited to local conditions, and so the order of development from the lower forms of systems to the higher has not been always everywhere identical in details. Yet in its essence and main features the Excise Administration in most provinces of British India has progressed on uniform lines the keynote lying in attempts, where it has not been possible to work with the fixed duty system in its simplest forms, to combine the farming and fixed duty systems with the object of securing that every gallon of spirit should bear a certain amount of taxation. The Out-Still System has in its turn been superseded by either the Free-supply system or the District Monopoly system. The Free-supply system is one of free competition among the licensed distillers in respect of manufacture. The right of vend is separately disposed of. The District monopoly system on the other hand is one in which the combined monopoly of manufacture and sale in a district is leased to a farmer subject to a certain amount of minimum still-head duty revenue in the monopoly area being guaranteed to the State during the term of the lease.

Reforms.

The recommendations of the Indian Excise Committee of 1905-06 resulted in numerous reforms in British India, one of them being that the various systems have been or are gradually being superseded by the Contract Distillery System under which the manufacture of spirit for supply to a district is disposed of by tender, the rate of still-head duty and the supply price to be charged are fixed in the contract and the right of vend is separately disposed of. This is the system that now prevails over the greater portion of British India. The other significant reforms have been the revision of the Provincial Excise Laws and Regulations, and the conditions of manufacture, vend, storage and transport, an improvement in the quality of the spirit, an improved system of disposal of vend licenses, reductions and re-distributions of shops under the guidance and control of Local Advisory Committees and gradual enhancement of taxation with a view to checking consumption.

Excise was made over entirely to the Provincial Governments, and the duties vary from province to province. The governing principle in fixing these rates is the highest duty compatible with the prevention of illicit distillation.

Sap of the date, palmyra, and cocoanut palms called toddy, is used as a drink either fresh or after fermentation. In Madras and Bombay the revenue is obtained from a fixed fee on every tree from which it is intended to draw the liquor and from shop license fees. In Bengal and Burma

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the sale of shop licenses is the sole form of taxation. Country brands of rum, and so-called brandies and whiskies, are distilled from grape juice, etc. The manufacture is carried out in private distilleries in various parts of India. A number of breweries has been established, mostly in the hills, for the manufacture of a light beer.

PROHIBITION.

After the introduction of provincial autonomy in April 1937, it became the avowed policy in principle of all provincial Governments to discourage the consumption of alcoholic beverages; but the Congress administrations which held office in seven provinces until September 1939 went further and, before they resigned, adopted an active policy of enforcing prohibition within a period of years. The measures taken by them varied from province to province, but generally speaking, they took the form of declaring certain areas, either urban or rural, "dry," and within those areas the production, sale and consumption of liquor were banned. Thus in Madras four districts were declared "dry"; a special excise regime was set up and active steps were taken to wean the populace from the use of liquor. Early reports indicated that a considerable measure of success had been attained, but later it was officially admitted that enthusiasm for prohibition was waning. In the United Provinces, Bihar, Orissa, the Central Provinces, Sind and Assam similar steps were taken to prevent the people of certain areas from drinking alcohol. In Bengal and the Punjab (where Coalition Governments were in office), on the other hand, there was no actual prohibition but only temperance propaganda.

In Bombay, the Congress scheme went further than elsewhere. The capital city Bombay and the second largest city Ahmedabad were declared "dry," subject to an elaborate system of personal "permits" for Europeans, Parsees and "confirmed addicts." In Bombay, as in Madras, newspapers and magazines published in the province were forbidden to publish liquor advertisements—a ban which persisted after the Congress administrations had resigned and the prohibition drive had lost most of its force. In April 1941, however, the Government of Bombay withdrew the ban on newspaper advertisements of liquor. In Bombay, successive judgments of a full bench of the High Court held that both the original Congress legislation and the subsequent "Governor's Act" were *ultra vires* the provincial administration, and refused to allow that administration to appeal to the Federal Court on the question of the validity or otherwise of the prohibition law. The ban on sales of foreign liquor was accordingly withdrawn as from July 2, 1940, and that on country liquor was modified subject to severe restrictions.

Difficulties of Enforcement.—Even on the limited and "permissive" scale adopted, the enforcement of prohibition had been by no means free from abuses and difficulties. It placed a severe strain on the authorities and numerous cases were reported of evasion and defiance of the law on an organised basis. In addition to smuggling into the "dry" areas and illicit distillation, a considerable exodus of workers and others not entitled to permits used to take place every week-end and holiday from the cities to adjacent areas where prohibition was not in force, and much drinking to excess was known to occur. Although Congress and orthodox opinion continued to support prohibition, it gave rise to popular resentment among certain classes and communities, as also to grave legal anomalies. Thus in Bombay, after several hundreds of persons had been convicted for breaches of the prohibition rules in the first eight months of their introduction, the validity of the rules was successfully challenged in the courts of law.

Despite the efforts of the Governor of Bombay (the Congress Ministry having in the meantime resigned office) to avoid administrative chaos and legalise the position, the experiment may be said to have failed because it lacked both legal sanction and general approval. The position in all the erstwhile Congress provinces was then somewhat as follows: Governors and their advisers while not committed to prohibition in principle and while reserving the right to make such further changes as might seem fit, refrained from reversing the policy of their former ministries. On the other hand, they did not extend the policy, even in its modified form, to new areas, but left the whole future of prohibition open, to be settled by whatever popular regime might later assume office. And here it is pertinent to note that apart from the moral issue, the financial implication of prohibition was far-reaching. In some provinces it involved a sacrifice of anything up to a quarter of the total provincial income and the imposition of new and burdensome taxation. A further complication was caused by the existence of Indian States whose territories are inextricably mixed with British India, and which have not yet adopted a prohibitionist policy any more than the Government of India has done. Thus the whole future of the prohibition experiment is problematical.

Drugs.—The narcotic products of the hemp plant consumed in India fall under three main categories, namely, ganja or the dry flowering tops of the cultivated female hemp plant charas, or the resinous matter which forms an active drug when collected separately; and bhang, or the dried leaves of the hemp plant whether male or female cultivated or uncultivated. The main features of the existing system are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative duty before issue, retail sale under licenses and restriction on private possession. Licenses to retail all forms of hemp drugs are usually sold by auction. The sale of charas has been prohibited in the Bombay Presidency from the 1st April 1922.

Opium.—Opium is consumed in all provinces in India. The drug is commonly taken in the form of pills; but in some places, chiefly on social and ceremonial occasions, it is drunk dissolved in water. Opium smoking also prevails in the City of Bombay and other large towns. The general practice is to sell opium from the Government Treasury, or a Central Warehouse, to licensed vendors. The right of retail to the public is sold by annual auction to one or several sanctioned shops. Further legislation against opium smoking in clubs and dens is now under contemplation.

The revenue from opium is derived mainly from exports of what is called provision opium

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

to foreign countries and from the sale to Provincial Governments of excise opium for internal consumption in India. The entire quantity is now exported under the system of direct sales to Foreign and Colonial governments, the system of auction sales in Calcutta to traders for export to foreign countries having been stopped with effect from 7th April 1926. In no case are exports permitted without an import certificate by the Government of the country of import as prescribed by the League of Nations.

It was decided to reduce the total of the opium exported since the calendar year 1926 by 10 per cent. annually in each subsequent year until exports were totally extinguished at the end of 1935.

Excise opium is sold to Provincial Governments for internal consumption in India at a fixed price based on the cost of production. This opium is retailed to licensed vendors at rates fixed by the Provincial Governments and varying from Province to Province.

SALT.

The salt revenue was inherited by the British Government from Native rule, together with a miscellaneous transit dues. These transit dues were abolished and the salt duty consolidated and raised. There are four great sources of supply; rock salt from the Salt range and Konat Mines in the Punjab; brine salt from the Sambhar Lake in Rajputana; salt brine condensed on the borders of the lesser Rann of Cutch; and sea salt factories in Bombay, Madras and at the mouth of the Indus.

The Salt Range mines contain an inexhaustible supply. They are worked in chambers excavated in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet high. The Rajputana supply chiefly comes from the Sambhar Lake where brine is extracted and evaporated by solar heat. In the Rann of Cutch the brine is also evaporated by solar heat and the product is known as Baragara salt. Important works for the manufacture of that salt were opened in Dhrangadhra State in 1923. In Bombay and Madras sea water is let into shallow pans on the sea-coast and evaporated by solar heat and the product sold throughout India. In Bengal the damp climate together with the large volume of fresh water from the Ganges and the Brahmaputra into the Bay of Bengal render the manufacture of sea-salt difficult and the bulk of the supply, both for Bengal and Burma, is imported from Liverpool, Germany, Aden, Bombay and Madras. Broadly, one-half of the indigenous salt is manufactured by Government Agency, and the remainder under license and excise systems. In the Punjab and Rajputana the salt manufactories are under the control of the Northern India Salt Department, a branch of the Commerce and Industry Department. In Madras and Bombay the manufactories are under the supervision of Local Governments. Special treaties with Native States permit of the free movement of salt throughout India, except from the Portuguese territories of Goa and Damaun, on the frontiers of which patrol lines are established to prevent the smuggling of salt into British India.

From 1888-1903 the duty on salt was Rs. 2-8 per maund of 82 lbs. In 1903, it was reduced to Rs. 2; in 1905 to Rs. 1-8-0; in 1907 to Re. 1 and in 1916 it was raised to Rs. 1-4-0. The successive reductions in duty have led to a largely increased consumption, the figures rising by 25 per cent. between 1903-1908. In 1923 the duty was doubled bringing it again to Rs. 2-8. In 1924 it was reduced to Re. 1-4-0. The duty remained at Rs. 1-4-0 from March 1924 to 29th September 1931. It was raised to Rs. 1-9-0 with effect from 30th September 1931. Prior to 17th March 1931, the excise duty and import duty on salt were always kept similar, but by the Indian Salt (Additional Import Duty) Act XIV of 1931, a temporary additional customs duty of 4½ annas per maund was imposed on foreign salt. In March 1933 the customs duty was reduced by 2 annas. In April 1936 the import duty was reduced to 1½ annas per maund, while the excise duty remained the same.

CUSTOMS.

The import duties have varied from time to time according to the financial condition of the country. Before the Mutiny they were five per cent.; in the days of financial stringency which followed they were raised to 10 and in some cases 20 per cent. In 1875 they were reduced to five per cent.; but the opinions of Free Traders, and the agitation of Lancashire manufacturers who felt the competition of the Indian Mills, induced a movement which led to the abolition of all customs dues in 1882. The continued fall in exchange compelled the Government of India to look for fresh sources of revenue and in 1894 five per cent. duties were reimposed.

The Customs Schedule was completely recast in the Budget of 1916-17 in order to provide additional revenue to meet the financial disturbance set up by the war.

The Customs Tariff was further raised in the Budget of 1921-22 in order to provide for the big deficit which had then to be faced.

The Senior Collectors were Covenanted Civilians specially chosen for this duty, before the introduction of the Imperial Customs Service in 1906. Since that date, of the five Collectorship at the principal ports (Calcutta, Bombay, Madras, Rangoon, and Karachi) three are ordinarily reserved for Members of the I. C. S. (*i.e.*, "Covenanted Civilians"). The other two are reserved for members of the Imperial Customs Service.

Assistant Collectors in the Imperial Customs Service are recruited in two ways: (*a*) from members of the Indian Civil Service—3 vacancies, and (*b*) by the Secretary of State—19 vacancies. There are in addition a few Gazetted Officers in what is known as the Provincial Customs Service. These posts are in the gift of the Government of India, and are usually filled by promotion from the subordinate (in the Government sense of the word) service. The "subordinate" staff is recruited entirely in India.

INCOME TAX.

The income tax was first imposed in India in 1860, in order to meet the financial dislocation caused by the Mutiny. It was levied at the rate of four per cent. or a little more than 9½d. in the pound on all incomes of five hundred rupees and upwards. Many changes have from time to time been made in the system, and the present schedule was consolidated in the Act of 1886. This imposed a tax on all incomes derived from sources other than agriculture which were exempted. On incomes of 2,000 rupees and upwards it fell at the rate of five pies in the rupee, or about 6¼d. in the pound; on incomes between 500 and 2,000 rupees at the rate of four pies in the rupee or about 5d. in the pound. In March 1903 the minimum taxable income was raised from 500 to 1,000 rupees. The income-tax schedule was completely revised, raised, and graduated in the Budget of 1916-17 in the general scale of increased taxation imposed to meet the deficit arising out of war conditions.

Since then the process has been almost continuous and in every financial difficulty the authorities turn to the Income-Tax as a means of raising fresh revenue.

The Supplementary Finance Bill of 1931 imposed surcharges on income-tax and super-tax to meet the emergency of that year. The surcharges were subsequently scaled down in succeeding years, but were not completely abolished until after the passage of the Income-Tax (Amendment) Act of 1939. That Act itself was the sequel to an exhaustive inquiry from 1935 onwards by a committee consisting of Khan Bahadur J. B. Vachha, C.I.E., Commissioner of Income-Tax in Bombay, and Messrs. C. W. Ayers and S. P. Chambers of the British Inland Revenue Department. Their report covered a wide field and made numerous recommendations, most of which were incorporated in the Act of 1939, a summary of which is given below. Among other recommendations was that for the adoption of the "slab" system instead of the "step" system, and this was duly done in the India Budget for 1939. After the outbreak of the War in September 1939, the Finance Member made no changes in the basic rates of income-tax in his Budget for 1940-41, but he introduced an Excess Profits Tax, which was further increased in the 1941-42 Budget to 66⅔ per cent. In the same Budget, the surcharge on basic rates of income-tax and super-tax, which had been 25 per cent. since November 1940, was increased to 33⅓ per cent. Details of these changes will be found in the section on "Recent Indian Finance."

RATES OF INCOME-TAX.

BASED ON SLAB SYSTEM.

INCOME-TAX

(a) *Individuals, Unregistered Firms, Hindu Undivided Families and Associations of persons (other than Companies).*—

		Rate.
First Rs. 1,500	of income	*Nil.*
Next ,, 3,500	,, ,,	9 pies in the rupee.
,, ,, 5,000	,, ,,	1 anna 3 pies in the rupee.
,, ,, 5,000	,, ,,	2 annas in the rupee.
Balance of income		2 annas 6 pies in the rupee.

No tax payable on incomes not exceeding Rs. 2,000; Income-Tax on incomes just above Rs. 2,000 to be restricted to half the excess of the income above Rs. 2,000.

(b) *Rate for Companies and local authorities*—2 annas 6 pies in the rupee.

SUPER-TAX.

(a) *Assessees other than Companies.*—

	Rate.
First Rs. 25,000	*Nil.*
Next ,, 10,000	1 anna in the rupee.
,, ,, 20,000	2 annas in the rupee.
,, ,, 70,000	3 annas in the rupee.
,, ,, 75,000	4 annas in the rupee.
,, ,,1,50,000	5 annas in the rupee.
,, ,,1,50,000	6 annas in the rupee.
Balance of income	7 annas in the rupee.

(b) *Companies and local authorities.*—

1 anna in the rupee on the whole income (no exempted slab).

A Central surcharge of 33⅓ per cent. is levied in respect of both Income-Tax and Super-Tax.

INCOME-TAX REFORMS.

As already mentioned, the publication of the Income-Tax Inquiry Report in 1936 was followed by important reforms and far-reaching legislation. Among the reforms was the bringing into force, as from April 1, 1939, of the "slab" system of income-tax assessment, details of which are given in the foregoing table. The post of Income-Tax Officer to the Government of India was created and Mr. S. P. Chambers was appointed to it. He later resigned in the middle of 1940.

The new Income-Tax (Amendment) Act of 1939, which was passed after protracted debate in and much modification by the Central Legislature, was intended to bring up to date the procedure of the Income-Tax Department and to render its methods more efficient. It embodied provisions designed to stop up existing loopholes and prevent evasion of income-tax law; also to adjust categories of income-tax payers so as to mulct the wealthy minority more while giving relief to the small man. The chief operative clause was Clause 4, the provisions of which are :—

In respect of foreign income, persons who are not resident in British India pay on income arising or received in British India only. Persons who are resident but not ordinarily resident in British India pay on income arising in British India and on foreign income brought into British India. Persons who are resident and ordinarily resident in British India pay on income arising in British India, on foreign income brought into British India, and also on foreign income not brought into India, with a deduction of Rs. 4,500 on the last mentioned class of income. Where foreign income-tax is payable on income arising abroad, one-half of the Indian tax, or one-half of the foreign tax, whichever is the lower, is allowed as a deduction from the tax payable. Where foreign income cannot be brought into India owing to exchange restrictions, the income-tax on that income is not collected until such time as it can be brought in.

As to the definitions of "residence," they are as follows: To be resident, a person must either be in British India for at least half the year or have a house maintained in British India and visit it at least once during the year, or have been in British India for at least 365 days out of the previous four years and visited British India at least once during the year. To be ordinarily resident, a person must have been resident for nine out of the previous ten years and must also have been in British India for 730 days in the previous seven years. A company is deemed to be resident in India if it is controlled in India or if more than half its income arises in British India.

Other important provisions of the Act are those providing for the setting up of an Appellate Tribunal (to start functioning after two years) whose personnel will consist of an equal number of judicial members and accountant members and whose purpose will be to hear appeals by assessees from the findings of the Assistant Commissioner of Income-Tax; relief to be granted in respect of life insurance premiums, provident fund contributions and superannuation contributions fund with special concessions to Hindu undivided families; the abolition of the previous exemption of leave salary, that is, salary earned in India but payable out of India to assessees while they are on leave out of the country; a changed system of depreciation allowance from the former prescribed percentage of the original cost of the asset to a prescribed percentage of the "written down value" of the asset; and finally, a most important change, extension of the liability to pay income-tax from all persons called upon by an income-tax officer to make a return, to all persons whose total income exceeded Rs. 2,000 in the previous year. This liability to pay income-tax becomes obligatory upon those whose incomes exceeded Rs. 2,000 in the previous year and failure to ask for and fill in a return form without reasonable cause involves a liability which may be as much as one and a half times the tax payable.

HISTORY OF THE COINAGE.

The Indian mints were closed to the unrestricted coinage of silver for the public from the 26th June 1893, and Act VIII of 1893, passed on that date, repealed Sections 19 to 26 of the Indian Coinage Act of 1870, which provided for the coinage at the mints for the public of gold and silver coins of the Government of India. After 1893 no Government rupees were coined until 1897, when, under arrangements made with the Native States of Bhopal and Kashmir, the currency of those States was replaced by Government rupees. The re-coinage of these rupees proceeded through the two years 1897 and 1898. In 1899 there was no coinage of rupees; but in the following year it seemed that coinage was necessary, and it was begun in February 1900, the Government purchasing the silver required, and paying for mainly with the gold accumulated in the Paper Currency Reserve. In that and the following month a crore of rupees was coined and over 17 crores of rupees in the year ending the 31st March 1910 including the rupees issued in connection with the conversion of the currencies of Native States. From the profit accruing to Government on the coinage it was decided to constitute a separate fund called the Gold Reserve Fund as the most effective guarantee against temporary fluctuations of exchange. The whole profit was invested in sterling securities, the interest from which was added to the fund. In 1906 exchange had been practically stable for eight years, and it was decided that of the coinage profits devoted to this fund, six crores should be kept in rupees in India, instead of being invested in gold securities. The Gold

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Reserve Fund was then named the Gold Standard Reserve. It was ordered in 1907 that only one-half of the coinage profits should be paid into the reserve, the remainder being used for capital expenditure on railways.

Gold.

Since 1870 there had been no coinage of double mohurs in India and the last coinage of single mohurs before 1918 in which year coinage was resumed, was in the year 1891-92.

A Royal proclamation was issued in 1918 establishing a branch of the **Royal Mint at Bombay.** Pending the completion of the arrangements at the Branch, Royal Mint, power was taken by legislation to coin in India gold mohurs of the same weight and fineness as the sovereign. Altogether 2,109,703 pieces of these new coins of the nominal value of Rs. 3,16,45,545, were struck at the Bombay Mint. The actual coinage of sovereigns was begun in August, 1918, and 1,295,372 sovereigns were coined during the year. This branch of the Royal Mint was closed in April, 1919, owing to difficulties in supplying the necessary staff.

The Indian Currency Act of 1927 established a new ratio of the rupee to gold. It established this ratio at one shilling and six pence by enacting that Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government, sterling, for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombay to London. A rate of one shilling and five pence forty-nine sixty-fourths was notified as Government's selling rate for sterling to meet these obligations. Great Britain and India left the gold standard in September 1931 but the buying and selling rates for sterling are still maintained.

With the receipt of large consignments of gold, the Bombay Mint made special arrangements for the **refining of gold** by the chlorine process and at the end of the year 1919-20 the Refinery Department was capable of refining a daily amount of 6,000 ounces of raw gold.

Silver.

The weight and fineness of the silver coin are :—

—	Fine Silver grains.	Alloy grains.	Total grains.
Rupee	90	90	180
Half-rupee	45	45	90
Quarter-rupee or 4-anna piece	22½	22½	45
Eighth of a rupee or 2-anna piece .. (not minted since 1939).	20⅝	1⅞	22½

One rupee = 90 grains of fine silver.
One shilling = $80\frac{4}{11}$ grains of fine silver.

During 1940 the Government of India considered it necessary in view of the rapid absorption of rupee coin for hoarding, to conserve silver resources as far as possible. Despite the fact that Government has large stocks of silver in hand, it was felt to be wasteful to turn out large quantities of rupees, half rupees and quarter rupees of the previous fineness of eleven-twelfths silver and one-twelfth alloy. It was therefore decided that the fineness of one-half silver and one-half alloy should be adopted for all three coins. The new coins bore the date 1940 and were exactly similar in weight and appearance to the old coins, except that the ring was somewhat duller. Incorporated in the new rupee, however was a new security edge device consisting of the insertion of a shallow re-entrant groove in the centre of the milled edge which was considered to be a virtually absolute safeguard against counterfeiting. Coins of the old fineness were no longed minted but continued to be legal tender to the same extent as before.

Copper and Bronze.

Copper coinage was introduced into the Bengal Presidency by Act XVII of 1835 and into the Madras and Bombay Presidencies by Act XXII of 1844.

The weight of the copper coins struck under Act XXIII of 1870 remained the same as it was in 1835. It was as follows :—

	Grains troy.
Double pice or half-anna	200
Pice or quarter-anna	100
Half-pice or one-eighth of an anna ..	50
Pie being one-third of a pice or one-twelfth of an anna	33⅓

The weight and dimensions of bronze coins are as follows :—

	Standard weight in grains troy.	Diameter in millimetres.
Pice	75	25·4
Half-pice	37½	21·15
Pie	25	17·45

Nickel.

The Act of 1906 also provided for the coinage of a nickel coin. It was directed that the nickel one-anna piece should thenceforth be coined at the Mint and issued. The notification also prescribed the design of the coin, which has a waved edge with twelve scollops, the greatest diameter of the coin being 21 millimetres and its least diameter 19·8 millimetres. The desirability of issuing a half-anna nickel coin was considered by the Government of India in 1909, but after consultation with Local Governments it was decided not to take action in this direction until the people had become thoroughly familiar with the present one-anna coin. The two-anna nickel coin was introduced in 1917-18 ; and the four-anna and eight-anna nickel coins in 1919. The eight-anna nickel has been withdrawn from circulation.

The Currency System.

I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono-metallic system, with silver as the standard of value and a circulation of silver rupees and notes based thereon. But with the opening of new and very productive silver mines in the United States of America the supply of silver exceeded the demand and it steadily receded in value. The result was that the gold value of the rupee, which was nominally two shillings, fell continuously until it reached the neighbourhood of a shilling. These disturbances were prejudicial to trade, but they were still more prejudicial to the finances of the Government. The Government of India has to meet every year in London a substantial sum in the form of payment of interest on the debt, the salaries of officials on leave, the pensions of retired officials, as well as large payment for stores required for State enterprises. As the rupee fell in its gold value the number of rupees required to satisfy these payments rose. The total reached a pitch which seriously alarmed the Government, which felt that it might be called upon to raise a sum in rupees which would necessitate a considerable increase in taxation, which should be avoided if possible. It was therefore decided to take measures to raise and fix the gold value of the rupee for the purposes of exchange.

Closing the Mints.—The whole question was examined by a strong committee under the presidency of Lord Herschell, whose report is commonly called the Herschell Report. It was decided in 1893 to close the mints to the unrestricted coinage of silver. This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content. Government ceased to add rupees to the circulation. Rupees remained unlimited legal tender and formed the standard of value for all internal transactions. Since Government refused, and no-one else had the power to coin rupees, as soon as circumstances led to an increased demand for rupees, the exchange value of the rupee began to rise. By 1898 it had approached the figure of one shilling and four pence. Meantime, in response to the undertaking of Government to give notes or rupees for gold at the rate of fifteen rupees to the pound sterling, gold began to accumulate in the Paper Currency Reserve. These purposes having been attained, a second committee was appointed under the chairmanship of Sir Henry Fowler to consider what further steps should be adopted in the light of these conditions. The report of the Fowler Committee as it was called marked the second stage in Indian currency policy.

II. THE NEW STANDARD.

The Fowler Committee rejected the proposal to re-open the Mints to the free coinage of silver. They proposed that the exchange value of the rupee should be fixed at one shilling and fourpence, or fifteen rupees to the sovereign. They further suggested that the British sovereign should be made a legal tender and a current coin in India: that the Indian mints should be thrown open to the unrestricted coinage of gold; so that the rupee and the sovereign should freely circulate side by side in India. The goal which the Committee had in view was a gold standard supported by a gold currency. Now under the condition which compelled the Government of India to give either rupees or rupee notes for gold tendered in India, at the rate of fifteen rupees to the sovereign, it was impossible for the rate of exchange to rise above one shilling and four pence, save by the fraction which covered the cost of shipping gold to India. But if the balance of trade turned against India, it was still possible for the rate of exchange to fall. To meet this the Fowler Committee recommended that the profits on coining rupees should not be absorbed in the general revenues, but should be set aside in a special reserve, to be called the Gold Standard Reserve. Inasmuch as the cost of coining rupees was approximately elevenpence halfpenny, and they were sold to the public at one and four pence, the profits were considerable; they were to have been kept in gold, so as to be freely available when required for the support of exchange.

A 16 pence Rupee.—The Government of India professed to accept all the recommendations of the Fowler Committee; actually only a portion of them was put in practice. The official rate of exchange was fixed at one and fourpence. The sovereign and the half sovereign were declared unlimited legal tender in India. But after a first attempt, when sovereigns soon came back to the treasuries, no effort was made to support the gold standard by an active gold currency. The gold mint was not set up. The Gold Standard Reserve was established, but, instead of holding the Reserve in gold, it was invested in British securities. These practices gave rise to conditions which were never contemplated by the Fowler Committee. Reference has been made to the Home Charges of the Government of India, which at the time amounted to about seventeen millions sterling a year. These are met by the sale of what are called Council Bills. That is to say, the Secretary of State, acting on behalf of the Government of India, sold Bills against gold deposited in the Bank of England in London. These Bills when presented in India were cashed at the Government Treasuries. Now if the Secretary of State sold Council Bills only to meet his actual requirements, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of credits. It is a fact that owing to the failure of the policy of encouraging an active gold

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

circulation to support the gold standard, gold tended to accumulate in India in embarrassing quantities. In 1904 therefore the Secretary of State declared his intention of selling Council Bills on India without limit at the price of one shilling fourpence one-eighth—that is to say gold import point. The effect of this policy was to limit the import of gold to India, for it was generally more convenient to deposit the gold in London and to obtain Council Bills against it, than to ship the gold to India. Nevertheless as the Egyptian cotton crop was very largely financed in sovereigns it was sometimes cheaper and more convenient to ship sovereigns from Egypt, or even from Australia, than to buy Council Bills. Considerable quantities of sovereigns found their way into India and circulated freely, particularly in the Bombay Presidency, the Punjab and parts of the Central Provinces.

Sterling Remittance.—This system worked until 1907-08. A partial failure of the rains in India in 1907, and the general financial stringency all over the world which followed the American financial crisis in the autumn, caused the Indian exchange to become weak in November. This was one of the occasions contemplated, in a different form, by the Fowler Committee when it proposed the formation of the Gold Standard Reserve. There had been very heavy coining of rupees in India and the amount in the Reserve was ample. But the Reserve was in securities not in gold, and was therefore not in a liquid form, nor was the time an opportune one for the realisation of securities. Moreover the authorities did not realise that a reserve is for use in times of emergency. It had been assumed that in times of weakness it would be sufficient for the Secretary of State to stop selling Council Bills, and it would firm up; meantime he would finance himself by drawing on the funds in the Gold Standard Reserve. But it was apparent that the stoppage of the sales of Councils was not enough; there was an insistent demand for the export of gold, or the equivalent of gold. The Government of India refused and exchange fell to one and threepence twenty-three thirty-seconds. Ultimately the authorities had to give way. It was decided to sell in India a certain quantity of sterling bills on London at one and threepence twenty-nine thirtyseconds, representing gold export point, and the equivalent of the export of gold. These were met in London from the funds in the Gold Standard Reserve. Bills to the extent of between eight and nine millions sterling were sold, which regularised the position and the Indian export trade recovered. Thus were gradually evolved the main principles of the Indian currency system. It consisted of silver rupees and rupee notes in India, with the sovereign and half sovereign unlimited legal tender at the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of exchange was prevented from rising above gold import point by the unlimited sale of Council Bills at gold point in London; it was prevented from falling below gold point by the sale of Sterling Bills (commonly called Reverse Councils) at gold export point in India. But it was not the system proposed by the Fowler Committee, for there was no gold mint and only a limited gold circulation; some people invented for it the novel term of the gold exchange standard, a term unknown to the law of India. It was described by one of the most active workers in it as a "limping standard."

III. THE CHAMBERLAIN COMMITTEE.

This brings us to the year 1913. There were many critics of the system. Some hankered for a return to the open mints; others objected to the practice of unlimited sales of Council Bills as forcing rupees into circulation in excess of the requirements of the country. But the general advantages of a fixed exchange were so great as to smother the voices of the critics, and the trade and commerce of the country adjusted itself to the one and fourpenny rupee. But there gradually grew up a formidable body of criticism directed against the administrative measures taken by the India Office. These criticisms were chiefly directed at the investment of the Gold Standard Reserve in securities instead of keeping it in gold in India; at a raid on that reserve in order temporarily to relieve the Government of the difficulty of financing its railway expenditure; at the transfer of a solid block of the Paper Currency Reserve from India to London; at the holding of a portion of the Gold Standard Reserve in silver in order to facilitate the coining of rupees; and at the unlimited sales of Council Bills at rates which prevented the free flow of gold to India, thus forcing token rupees into circulation in quantities in excess of the requirements of the country. The cumulative effect of this policy was to transfer from India to London an immense block of India's resources, aggregating over seventy millions, where they were lent out at low rates of interest to the London bankers, whilst India was starved of money until at one point money was not available for loans even against Government securities and the bank rate was artificially high. All these things were done, it was contended, on the *obiter dicta* of a small Finance Committee of the India Office, from which all Indian influence was excluded, and on which London banking influence was supreme. The India Office for long ignored this criticism, until it was summarised in a series of articles in *The Times*, and public opinion was focussed on the discussion through the action of the India Office in purchasing a big block of silver for coining purposes from Messrs. Montagu & Co., instead of through their recognised and constituted agents, the Bank of England. The Government could no longer afford to stand aloof and yet another Currency Committee was appointed under the chairmanship of Mr. Austen Chamberlain. This was known as the Chamberlain Committee.

New Measures.—The conclusions of this Commission were that it was unnecessary to support the Gold Standard by a gold currency; that it was not to the advantage of India to encourage the internal use of gold as currency; that the internal currency should be supported by a thoroughly adequate reserve of gold and sterling; that no limit should be fixed to the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

amount of the Gold Standard Reserve, one-half of which should be held in gold; that the silver branch of the Gold Standard Reserve should be abolished; that Reverse Councils should be sold on demand; that the Paper Currency should be made more elastic; and that there should be two Indian representatives out of three on the Finance Committee of the India Office. The Committee dealt in conclusively with the accumulation of excessive balances in London, the general tenor of their recommendations being "not guilty, but do not do it again." They gave a passing commendation to the idea of a State Bank. Sir James Begbie, the only Indian banker on the Committee, appended a vigorous minute of dissent, in which he urged that the true line of advance was to discourage the extension of the token currency by providing further facilities for the distribution of gold when increases to the currency became necessary, including the issue of an Indian gold coin of a more convenient denomination than the sovereign or the half sovereign.

IV. CURRENCY AND THE WAR OF 1914-18.

The report was in the hands of the Government of India before the outbreak of the last war. Some immediate steps were taken, like the abolition of the silver branch of the Gold Standard Reserve, but before the Government could deal entirely with the temporising recommendations of the Commission, the war broke out. The early effects of the war were precisely those anticipated. There was a demand for sterling remittance which was met by the sale of Reverse Councils, 68,707,000 being sold up to the end of January 1915. There were withdrawals from the Post Office Savings Banks, and a net sum of Rs. 8 crores was taken away. There was some lack of confidence in the Note issue, and a demand for gold; Notes to the extent of Rs. 10 crores were presented for encashment and the Government were obliged to suspend the issue of gold. But these were transient features and did not demand a moratorium; confidence was soon revived and Exchange and the Note issue continued strong. The difficulties which afterwards arose were from causes completely unanticipated by all students of the Indian currency. They arose from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade from these countries; a heavy expenditure in India on behalf of the British Government; and a phenomenal rise in the price of silver. If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennium. The disbursements in India on behalf of the Government of the United Kingdom and the Allies were by December 1919 £240,000,000. This balance of trade and expenditure for Imperial purposes could not be financed either by the import of the precious metals, owing to the universal embargo on the movement of gold and silver nor by credits in India. It could be financed only by the expansion of the Note issue, against sterling securities in the United Kingdom, chiefly Treasury Bills, and the issue of coined rupees. But simultaneously there was a reduction in the output of the silver mines of the world coinciding with an increased demand for the metal. The price of silver in 1915 was 27¼ pence per standard ounce. In May 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main difficulties in India were not therefore the prevention of the rupee from falling below the ratio of 15 to one, but to keep it within any limits and to provide a sufficiency to meet the demand.

Rise in Exchange.—The measures adopted by the Government of India in these emergencies were to bring exchange under rigid control confining remittance to the finance of articles of national importance. The next step was to raise the rate for the sale of Council Bills, so that silver might be purchased at a price which would allow rupees to be coined without loss. The following table shows how rates were raised from one shilling fourpence to two shillings fourpence:—

Date of Introduction.	Minimum Rate for Immediate Telegraphic Transfers.
3rd January 1917 ..	1 4¼
28th August 1917 ..	1 5
12th April 1918 ..	1 6
13th May 1919 ..	1 8
12th August 1919 ..	1 10
15th September 1919 ..	2 0
22nd November 1919 ..	2 2
12th December 1919 ..	2 4

V. THE 1919 COMMITTEE.

The effect of these measures however was to jettison the currency policy pursued from 1893 to 1915, the main object of which was to stabilise the rupee at one and fourpence. The war being over, a Committee was appointed to advise in regard to the future of Indian exchange and currency. It sat in 1919 and reported towards the end of the year. Its main recommendations are summarised below:—

(*i*) It is desirable to restore stability to the rupee and to re-establish the automatic working of the Indian currency system.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(*ii*) The reduction of the fineness or weight of the rupee, the issue of 2 or 3-rupee coins of lower proportional silver content than the present rupee, or the issue of a nickel rupee, are expedients that cannot be recommended.

(*iii*) The maintenance of the convertibility of the note issue is essential, and proposals that do not adequately protect the Indian paper currency from the risk of becoming inconvertible cannot be entertained.

(*iv*) The rise in exchange, in so far as it has checked and mitigated the rise in Indian prices, has been to the advantage of the country as a whole, and it is desirable to secure the continuance of this benefit.

(*v*) Indian trade is not likely to suffer any permanent injury from the fixing of exchange at a high level.

If, contrary to expectation, a great and rapid fall in world prices were to take place, and if the costs of production in India fail to adjust themselves with equal rapidity to the lower level of prices, then it might be necessary to consider the problem afresh.

(*vi*) The development of Indian industry would not be seriously hampered by a high rate of exchange.

(*vii*) The gain to India of a high rate of exchange for meeting the Home charges is an incidental advantage that must be taken into consideration.

(*viii*) To postpone fixing a stable rate of exchange would be open to serious criticism and entail prolongation of Government control.

(*ix*) The balance of advantage is decidedly on the side of fixing the exchange value of the rupee in terms of gold rather than in terms of sterling.

(*x*) The stable relation to be established between the rupee and gold should be at the rate of Rs. 10 to one sovereign, or, in other words at the rate of one rupee for 11·30,016 grains of fine gold, both for foreign exchange and for internal circulation.

(*xi*) If silver rises for more than a brief period above the parity of 2s. (gold), the situation should be met by all other available means rather than by impairing the convertibility of the note issue. Such measures might be (*a*) reduction of sale of Council Bills; (*b*) abstention from purchase of silver; (*c*) use of gold to meet demands for metallic currency. If it should be absolutely necessary to purchase silver, the Government should be prepared to purchase even at a price such that rupees would be coined at a loss.

(*xii*) Council Drafts are primarily sold not for the convenience of trade but to provide for the Home charges in the wider sense of the term. There is no obligation to sell drafts to meet all trade demands; but, if without inconvenience or with advantage the Secretary of State is in a position to sell drafts in excess of his immediate needs, when a trade demand for them exists, there is no objection to his doing so, subject to due regard being paid to the principles governing the location of the reserves.

Council Drafts should be sold as now by open tender at competitive rates, a minimum rate being fixed from time to time on the basis of the sterling cost of shipping gold to India. At present this rate will vary, but when sterling is again equivalent to gold, it will remain uniform.

The Government of India should be authorised to announce, without previous reference to the Secretary of State on each occasion, their readiness to sell weekly a stated amount of Reverse Councils (including telegraphic transfers) during periods of exchange weakness at a price based on the cost of shipping gold from India to the United Kingdom.

(*xiii*) The import and export of gold to and from India should be free from Government control.

(*xiv*) The statutory minimum for the metallic portion of the Paper Currency Reserve should be 40 per cent. of the gross circulation.

As regards the fiduciary portion of the reserve, the holding of securities issued by the Government of India should be limited to 20 crores. The balance should be held in securities of other Governments comprised within the British Empire, and of the amount so held not more than 10 crores should have more than one year's maturity and all should be redeemable at a fixed date. The balance of the invested portion above these 30 crores should be held in short-dated securities, with not more than one year's maturity, issued by Government within the British Empire.

The sterling investments and gold in the Paper Currency Reserve should be revalued at 2s. to the rupee. The depreciation which will result from this revaluation, cannot be made good at once, but any savings resulting from the rise in exchange will afford a suitable means of discharging this liability in a limited number of years.

(*xv*) With a view to meeting the seasonal demand for additional currency, provision should be made for the issue of notes up to five crores over and above the normal fiduciary issue as loans to the Presidency Banks on the security of export bills of exchange.

Minority Report.—The main object of the Committee, it will be seen, was to secure a stable rate of exchange, without impairing the convertibility of the Note issue, and without debasing the standard silver rupee in India, or substituting another coin of inferior metallic content, which would be debasement in another form. In order to attain these ends it was imperative to fix a ratio for the rupee in relation to gold which would ensure that the Government was able to purchase silver for coining purposes without more than temporary loss. For reasons given in the report they fixed this point at two shillings gold: all other recommendations are subsidiary thereto. But in this they were not unanimous; an important member of the Committee, Mr. Dadiba Dalal, of Bombay, appended a minority report in which he urged the adoption of the following courses:—

(*a*) The money standard in India should remain unaltered; that is, the standard of the sovereign and gold mohur with rupees related thereto at the ratio of 15 to 1.

(*b*) Free and unfettered imports and exports by the public of gold bullion and gold coins.

(*c*) Free and unfettered imports and exports by the public of silver bullion and silver coins.

(*d*) The existing silver rupees of 165 grains of fine silver at present in circulation to continue full legal tender.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(*e*) As long as the price of silver in New York is over 92 cents, Government should not manufacture silver rupees containing 165 grains fine silver.

(*f*) As long as the price of silver is over 92 cents Government should coin 2 rupee silver coins of reduced fineness compared with that of the present silver rupee and the same to be unlimited legal tender.

(*g*) Government to sell Council Bills by competitive tenders for the amount defined in the Budget as required to be remitted to the Secretary of State. The Budget estimate to show under separate headings the amount of Council Bills drawn for Home Charges, for Capital Outlay and Discharge of Debt. Council Bills to be sold for Government requirements only and not for trade purposes, except for the purpose mentioned in the next succeeding recommendation.

(*h*) "Reverse" drafts on London to be sold only at 1s. 329-32d. The proceeds of "Reverse" drafts to be kept apart from all other Government funds and not to be utilised for any purpose except to meet drafts drawn by the Secretary of State at a rate not below 1s. 43-32d. per rupee.

VI. THE TWO SHILLING RUPEE.

The fundamental recommendation of the Committee was that the rupee should be linked to gold and not to sterling, in view of the decline in the value of sterling; that it should be linked at the rate of two shillings instead of the standard value, one and fourpence: all other recommendations were ancillary to this. But it is very important to bear in mind the twofold problem which confronted the Committee. It would be quite easy to fix any low ratio provided the paper currency were made inconvertible, or the rupee debased to such a point that the Government in providing rupee currency, were independent of the price of silver. But if the convertibility of the rupee were to be maintained, and if the rupee were not to be debased, it was essential that the new ratio should be one at which the Government could reasonably rely on purchasing without loss the silver necessary to meet the heavy demands for rupee in India. For reasons set out in the Report, the Committee came to the conclusion that the Government could reckon on purchasing silver for coining at a little under two shillings gold, and that powerfully influenced them in fixing the new ratio at two shillings gold.

The Report Adopted.—The Currency Committee's Report was signed in December 1919, but it was not until February 1920 that action was taken thereon. In the first week of that month a Notification was issued in India accepting the principal recommendations in the Report and notifying that the necessary official action would be taken thereon. This action covered a wide field, but for the sake of clarity in this narrative we shall concentrate on the main issue, the changing of the official monetary standard from fifteen rupees to the sovereign to ten rupees to the sovereign and its effect on Indian currency and trade. That may be summarised in a sentence. A policy which was avowedly adopted to secure fixity of exchange produced the greatest fluctuations in the exchanges of any solvent country and widespread disturbance of trade, heavy losses to Government, and brought hundreds of big traders to the verge of bankruptcy.

Financial Confusion.—This result was produced by many causes. It has been explained above that the essential features of the Indian currency system are the free sales of Council Bills at gold export point in London to prevent exchange from rising above the official standard and the sale of Reverse Councils in India at gold export point to prevent exchange from falling below the official standard. Now when the Currency Report was signed the Indian exchanges were practically at two shillings gold. But between the signing of the Report and the taking of official action, there was a sensational fall in the sterling exchanges, as measured in dollars, the dollar-sterling rate, inasmuch as America was the only free gold market, being the dominating factor in the situation. Consequently the Indian exchanges were considerably below the two shillings gold rate when the Notification accepting the Currency Committee's Report was issued. The Indian exchanges were two shillings and fourpence, and weak at that; the gold rate was about two shillings ninepence. There was an immediate and prodigious demand for Reverse Councils, to take advantage of this high rate of exchange; the market rate jumped up to two shillings eight pence.

Effect of the Rise.—The effect of a rise in exchange has been well described in the words of the Currency Committee's Report; it is that a rising exchange stimulates imports and impedes exports, the effect of a falling exchange is the reverse.

Now when the official notification of the two shilling rupee was made the Indian export trade was weak. The great consuming markets of Great Britain and America were glutted with Indian produce. The continent of Europe, which was starved of Indian produce and in urgent need of it, had not the wherewithal to pay for it nor the means of commanding credit. The only Indian staples which were in demand were foodstuffs, and as the rains of 1920 failed over a wide area, the Government were not able to lift the embargo on the export for foodstuffs, save to a limited extent in the case of wheat. On the other hand, the import trade was strong. Orders had been placed for machinery and other manufactured goods during the war and after the Armistice for delivery at the discretion of manufacturers. These began to come forward.

Difficulties Accentuated.—In accordance with the principles laid down by the Currency Committee these difficulties were accentuated by the action of Government in raising exchange by an administrative act. The weak export trade was almost killed. At the same time the temptation of a high exchange gave powerful stimulus to the import trade and orders were placed for immense quantities of manufactured goods, in which textiles filled a important place. Afterwards other forces intervened which accentuated the difficulties of the situation. There was a severe commercial crisis in Japan and this

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

checked the export of Indian cotton. Japan is the largest buyer of Indian cotton, and when her merchants not only stopped buying but began to re-sell in the Indian markets, the trade was severely shaken and stocks accumulated at a great rate. Even before the 1920 crop came into the market the stocks in Bombay were double those in the corresponding period of the previous year. The expectations of a revival in the buying power of the Continent which were held in many quarters were disappointed and throughout the year there was a heavy balance of trade against India, which made the stabilisation of exchange at the high ratio attempted a hopeless proposition.

Confession of Failure.—Government struggled long against these conditions in the desperate hope that a revival of the export trade would come to their assistance, but they were further handicapped by the variations of the sterling-dollar exchange, which at one time took the rate for Reverse Councils to two shillings tenpence halfpenny. They sold two millions of Reverse Councils a week, then five millions, then dropped down to a steady million. But their policy only aggravated the situation. In addition to arresting the export trade and stimulating the import trade at a time when the precise converse was demanded, their action created an artificial movement for the transfer of capital from India to England. Large war profits accumulated in India since 1914 were hurriedly liquidated and transferred to England. Then the difference between the Reverse Council rate and the market rate, which on some occasions was several pence, induced gigantic speculations. The Exchange Banks set aside all their available resources for the purpose of bidding for Bills, and at once sold their allotments at substantial profits. Considerable groups of speculators pooled their resources and followed the same course. In this way the weekly biddings for the million of Reverse Councils varied from a hundred and 20 millions to a hundred and thirty millions and the money market was completely disorganised. The biddings assumed such proportions that it was necessary to put up fifty lakhs of rupees to obtain the smallest allotment made, five thousand pounds, and Reverse Councils and the large profits thereon came under the entire control of the Banks and the wealthy speculators. Various expedients were tried to remedy the situation but without the slightest effect.

Sterling for Gold.—The first definite break from the recommendations of the Currency Committee came at the end of June, when the Government announced that instead of trying to stabilise the rupee at two shillings gold they would aim at stabilising it at two shillings sterling, leaving the gap between sterling and gold to be closed when the dollar-sterling rate became par. The effect of this was to alter the rate at which Reverse Councils were sold from the fluctuating rate involved in the fluctuations of dollar sterling exchange to a fixed sterling rate, namely, one shilling elevenpence nineteen-thirty seconds. But this had little practical effect. The biddings for Reverse Councils continued on a very big scale and the market rate for exchange was always twopence or threepence below the Reverse Council rate. This practice continued until the end of September, when it was officially declared that Reverse Councils would be stopped altogether. Exchange immediately slumped to between one and sixpence and one and sevenpence, and it continued to range between these narrow points until the end of the year. The market made its own rate; it made a more stable rate than the efforts of Government to attain an administrative stability.

Other Measures.—Apart from the effort to stabilise exchange, which had such unfortunate results, the policy of Government had certain other effects. During the year all restrictions on the movement of the precious metals were removed, in accordance with the recommendations of the Currency Committee. This included the abandonment of the import duty on silver, always a sore point with Indian bullionists. Legislative action was taken to alter the official ratio of the sovereign from fifteen to one to ten to one; due notice of this intention was given to holders of sovereigns and of the gold mohurs which were coined as an emergency measure in 1918, and they were given the option of tendering them at fifteen rupees. As the gold value of these coins was above fifteen rupees only a limited number was tendered, although there was extensive smuggling of sovereigns into India to take advantage of the premium. Then measures were adopted to give greater elasticity to the Note issue. Under the old law the invested proportion of the Note issue was fixed by statute and it could be altered only by altering the law or by Ordinance. An Act was passed fixing the metallic portion of the Paper Currency Reserve at fifty per cent. of the Note Issue, the invested portion being limited to Rs. 20 crores in Indian securities and the balance in British securities of not more than twelve months' currency. The invested portion of the Paper Currency Reserve was revalued at the new rate of exchange, and an undertaking was given that the profits on the Note issue would be devoted to writing off the depreciation, as also would be the interest on the Gold Standard Reserve when the total had reached £40 millions. Further, in order to give greater elasticity to the Note issue, power was taken to issue Rs. 5 crores of emergency currency in the busy season against commercial bills. These measures, save the alteration of the ratio, were generally approved by the commercial public.

Results.—It remains to sum up the results of these measures. In a pregnant sentence in their report the Currency Committee say that whilst a fixed rate of exchange exercises little influence on the course of trade, a rising exchange impedes exports and stimulates imports, a falling exchange exercises a reverse influence. Here we have the key to the failure of the currency policy attempted. At the moment when it was sought suddenly and violently to raise the rate of exchange by the introduction of the new ratio of two shillings gold, the export trade was weak and the import trade in obedience to the delivery of long deferred orders was strong. The very principle enunciated by the Currency Committee wrecked the policy which they recommended. The rising rate of exchange scotched the weak export trade and gave a great stimulus to imports. Unexpected forces, such as the financial crisis in Japan, the lack of buying power on the Continent, and the movement for the transfer of capital from India to England at the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

artificially high rate of exchange stimulated these forces, but they had their origin in the attempt by administrative action artificially and violently to raise the rate of exchange. If let alone, the natural fall in exchange would have tended to correct the adverse balance of trade; the official policy exaggerated and intensified it. The effects on Indian business were severe. Exporters found themselves loaded with produce for which there was no foreign demand; importers found themselves loaded up with imported goods, bought in the expectation of the continuance of a high rate of exchange, delivered when it had fallen one and fourpence from the highest point reached. Immense losses were incurred by all importers. The Government sold £55 millions of Reverse Councils before abandoning their effort to stabilise exchange at the new ratio; the loss on these—that is the difference between the cost of putting the funds down in London and in bringing them back to India—was Rs. 35 crores of rupees. Government sold £53 millions of gold, without breaking or seriously affecting the premium on gold. The Secretary of State, in the absence of any demand for Council Bills, was able to finance his expenditure in England only through the lucky chance of heavy expenditure on behalf of the Imperial Government for the forces in Mesopotamia—this expenditure being made in India and set off by payments in London. The only advantages were a considerable contraction of the Note issue and the silver token currency.

VII. COMMISSION OF 1925-26.

These unfortunate experiments induced a period of great caution in dealing with Indian currency. The currency quacks having had their way, and proved their ignorance, went out of the field, and the wholesome policy of leaving Exchange alone, to find its natural level, followed. Left alone Exchange established itself round about the old ratio of fifteen to one, that is one shilling and fourpence to the rupee. Meantime great improvements were made in the organisation of Indian credit. The three Presidency Banks were merged in the Imperial Bank of India, a State Bank in all but name, and the Bank entered into a contract with Government to open a hundred new branches in the first five years of its existence. The Bank mobilised and strengthened and widened Indian credit. The metallic backing of the Paper Currency was strengthened and the fiduciary portion of the Reserve brought within negligible proportions. Greater elasticity was established in the currency by the power to issue emergency currency up to Rs. 12 crores against commercial paper endorsed by the Imperial Bank when there is a tightness of money, and the practice of also issuing emergency currency against sterling in England. The Government of India now purchases sterling in India to meet its Home Charges when the conditions are favourable, instead of relying entirely on the sales of Council Bills in London. A notable feature in Exchange history was the rise of Exchange, of its own strength, above the one and fourpenny figure. Towards the close of 1924 it gradually rose to one shilling and sixpence and stayed there.

At this figure Exchange was maintained by Government, though the state of trade might have led to a higher figure. But as the wholly artificial ratio of the two shilling rupee remained on the statute book, the demand for an authoritative inquiry to fix the ratio of the rupee to gold or sterling was insistent, and a Committee was appointed in the autumn of 1925. Of this Commander Hilton Young was chairman, with Sir Henry Strakosch as the chief gold expert. The personnel of the Committee was strongly criticised in India, on the ground that the Indian membership was inadequate, and that the individuals selected were not authoritative; a resolution was passed in the Assembly hostile to the whole body. Nevertheless the Committee arrived in India in November 1925 and took evidence in Delhi, Bombay and Calcutta. It sailed for England in February 1926, and resumed its hearings in London, and reported on July 1st, 1926.

The main recommendations of this Commission are summarised in the actual report in the following terms, and they are textually reproduced in order that they may be above question:—

(*i*) The ordinary medium of circulation should remain the currency note and the silver rupee and the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold, but gold should not circulate as money.

(*ii*) The necessity of unity of policy in the control of currency and credit for the achievement of monetary stability involves the establishment of a Central Banking system.

(*iii*) The Central Banking functions should be entrusted to a new organisation, referred to as the Reserve Bank.

(*iv*) Detailed recommendations are made as to the constitution and functions and capacities of the Bank.

(*v*) The outlines of a proposed charter are recommended to give effect to the recommendations which concern the Reserve Bank.

(*vi*) Subject to the payment of limited dividends and the building up of suitable reserve funds, the balance of the profits of the Reserve Bank should be paid over to the Government.

(*vii*) The Bank should be given the sole right of note issue for a period of (say) 25 years. Not later than five years from the date of the charter becoming operative, Government notes should cease to be legal tender except at Government Treasuries.

(*viii*) The notes of the Bank should be full legal tender, and should be guaranteed by Government. The form and material of the note should be subject to the approval of the Governor-General in Council. A suggestion is made as to the form of the note.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(*ix*) An obligation should be imposed by statute on the Bank to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required.

(*x*) The conditions which are to govern the sale of gold by the Bank should be so framed as to free it in normal circumstances from the task of supplying gold for non-monetary purposes. The method by which this may be secured is suggested.

(*xi*) The legal tender quality of the sovereign and the half-sovereign should be removed.

(*xii*) Government should offer "on tap" savings certificates redeemable in 3 or 5 years in legal tender money or gold at the option of the holder.

(*xiii*) The paper currency should cease to be convertible by law into silver coin. It should, however, be the duty of the Bank to maintain the free interchangeability of the different forms of legal tender currency, and of the Government to supply coin to the Bank on demand.

(*xiv*) One-rupee notes should be re-introduced and should be full legal tender.

(*xv*) Notes other than the one-rupee note should be legally convertible into legal tender money, *i.e.*, into notes of smaller denomination or silver rupees at the option of the currency authority.

(*xvi*) No change should be made in the legal tender character of the silver rupee.

(*xvii*) The Paper Currency and Gold Standard Reserves should be amalgamated, and the proportions and composition of the combined Reserve should be fixed by statute.

(*xviii*) The proportional reserve system should be adopted. Gold and gold securities should form not less than 40 per cent. of the Reserve, subject to a possible temporary reduction, with the consent of Government, on payment of a tax. The currency authority should strive to work to a reserve ratio of 50 to 60 per cent. The gold holding should be raised to 20 per cent. of the Reserve as soon as possible and to 25 per cent. within ten years. During this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape. Of the gold holding at least one-half should be held in India.

(*xix*) The silver holding in the Reserve should be very substantially reduced during a transitional period of ten years.

(*xx*) The balance of the Reserve should be held in self-liquidating trade bills and Government of India securities. The "created" securities should be replaced by marketable securities within ten years.

(*xxi*) A figure of Rs. 50 crores has been fixed as the liability in respect of the contractibility in the rupee circulation. Recommendations are made to secure that an amount equal to one-fifth of the face value of any increase or decrease in the number of silver rupees in issue shall be added to or subtracted from this liability, and the balance of profit or loss shall accrue to or be borne by the Government revenues.

(*xxii*) The Issue Department of the Reserve Bank should be kept wholly distinct from its Banking Department.

(*xxiii*) The Reserve Bank should be entrusted with all the remittance operations of the Government. The Secretary of State should furnish in advance periodical information as to his requirements. The Bank should be left free, at its discretion, to employ such method or methods of remittance as it may find conducive to smooth working.

(*xxiv*) During the transition period the Government should publish a weekly return of remittances made. A trial should be made of the system of purchase by public tender in India.

(*xxv*) The cash balances of the Government (including any balances of the Government of India and of the Secretary of State outside India), as well as the banking reserves in India of all banks operating in India, should be centralised in the hands of the Reserve Bank. Section 23 of the Government of India Act should be amended accordingly.

(*xxvi*) The transfer of Reserve assets should take place not later than 1st January 1929, and the Bank's obligation to buy and sell gold should come into operation not later than 1st January 1931.

(*xxvii*) During the transition period the currency authority (*i.e.*, the Government until the transfer of Reserve assets and the Bank thereafter) should be under an obligation to buy gold and to sell gold or gold exchange at its option at the gold points of the exchange. This obligation should be embodied in statutory form, of which the outline is suggested.

(*xxviii*) Stabilisation of the rupee should be effected forthwith at a rate corresponding to an exchange rate of 1*s.* 6*d.*

(*xxix*) The stamp duty on bills of exchange and cheques should be abolished. Bill forms, in the English language and the vernacular in parallel, should be on sale at post offices.

(*xxx*) Measures should be taken to promote the development of banking in India.

(*xxxi*) Every effort should be made to remedy the deficiencies in the existing body of statistical data.

A Minute of Dissent.—Whilst all the members of the Commission signed the report, one of their numbers, Sir Purshotamdas Thakordas, did so subject to a minute of dissent. In the first part of this Minute Sir Purshotamdas subjected the long correspondence between the Government of India and the India Office on currency policy to a detailed analysis. The conclusions to which he came were that throughout the Government of India had striven for a system following the Fowler Report—a gold standard based on a gold currency, and that the efforts were emasculated by successive Secretaries of State, who had in view some which was often called the Gold

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Exchange Standard, but which was in effect no standard at all. On the question of the Gold Standard, he stressed the importance of the free movement of gold in India, but subject to this condition accepted the Gold Bullion Standard recommended by his colleagues. As for the proposed Reserve Bank, Sir Purshotamdas, whilst recognising that the scheme proposed might be the ideal, to be attained in process of time, thought that the best immediate course was to develop the Imperial Bank into a central bank for India. The chief point of difference with his colleagues was however the ratio.

Dealing with the ratio of the rupee to gold Sir Purshotamdas said that in September 1924 the rate was approximately one and fourpence gold. At that time the Government was pressed to stabilise at the then ratio, and thus legally to restore the long current legal standard of money payments. This it declined to do, and by limiting the supply of currency, the ratio was raised to one and sixpence gold by April 1925. He declined therefore to attach any importance to a ratio reached by such measures. Proceeding to analyse the course of prices and wages, he combated the conclusion of his colleagues that prices had adjusted themselves in a preponderant degree to one shilling and sixpence. For these reasons he recommended that the rupee should be stabilised at the rate which was current for nearly twenty years, namely one and fourpence. His conclusions were summarised in the following terms :—

"I look upon the question of the ratio in this Report as being no less important than the question of the standard to be adopted for the Indian Currency System. I am convinced that if the absolute necessity of the free inflow of gold, which I have emphasised, is recognised, and steps taken to ensure it, the gold bullion standard proposed will be the correct one, and the likelihood of its breaking down under the strain of any convulsions in the future will be as remote as it can reasonably be. But I have very grave apprehensions that if the recommendation of my colleagues to stabilise the rupee at 1*s.* 6*d.* is accepted and acted upon, India will be faced during the next few years with a disturbance in her economic organisation, the magnitude of which is difficult to estimate, but the consequences of which may not only hamper her economic development but may even prove disastrous. Such a disturbance and its consequences my colleagues do not foresee to-day. But the possibility of their occurring cannot be ignored. Until adjustment is complete, agriculture threatens to become unattractive and less remunerative than it is to-day, and industries will have to undergo a painful process of adjustment, unnatural, unwarranted and avoidable—an adjustment which will be much to their cost, and affect not only their stability and their progress, but in certain cases, their very existence. And should Nature have in store for India a couple of lean years after the four good harvests that we have had, during the period of forced adjustment to a rate of 1*s.* 6*d.*, the steps that the Currency Authority will have to take to maintain exchange at this rate may deplete the gold resources of the country to an extent that may seriously shake the confidence of the people in the currency system recommended."

A Survey.—The official summary of the Report, and the summary of the minute of dissent, given above, do not however convey an idea of the far-reaching proposals embodied therein. These can be appreciated only if they are examined in close relation to the currency system of India in its various phases since 1899. This was done in an article contributed to *The Bankers' Magazine* by Sir Stanley Reed, which was recognised to be a fair presentation of the position. The main features thereof are reproduced below. There is here some re-treading of the path laid out in the introductory section, but this is unavoidable, if the full bearing of the measures proposed by the Commission are to be appreciated. After describing the standard in force Sir Stanley Reed asked :—

"What was the standard thus established? It is generally described in London as the Gold Exchange Standard. That status was never claimed for it by its principal protagonist, the late Sir Lionel Abrahams, who described it as a 'limping standard.' The Royal Commission declares that 'in truth in so far as it amounted to a definite standard at all, it was a standard of sterling exchange.' Later they show that 'the automatic working of the exchange standard is thus not adequately provided for in India, and never has been. The fundamental basis of such a standard is provision for the expansion and contraction of the volume of currency.....Under the Indian system, contraction is not, and never has been, automatic.'

"However, the standard limped along until the third year of the war. The exchange value of the rupee was stable ; prices adjusted themselves to the ratio; Indian trade and industry developed. From the narrow standpoint of profit and loss, the investment of the reserves, instead of keeping them in gold, resulted in a considerable gain to the finances estimated in 1925 at £17,962,466. But it had three great disadvantages: it did not inspire public confidence; it placed the Indian currency at the mercy of the silver market which was on occasion deliberately cornered against it; and it left the control of currency by the Government divorced from the contro of credit by the Presidency Banks, afterwards amalgamated in the Imperial Bank of India. On this the Commission make a very suggestive comment: 'when allowance has been made for all misunderstandings and misapprehensions, the fact remains that a large measure of distrust in the present system is justified by its imperfections.'

"There is, I think, an inadequate appreciation of the influence on the Indian currency and exchange of the war, and the action taken thereafter. The first break in the permanent ratio of one shilling and fourpence did not occur until 1917, when the full effect of dependence on the silver market was revealed. Faced by the unprecedented rise in the price of silver the Government of India had either to raise the price of Council Drafts or else abandon the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

convertibility of the Note Issue. Wisely, it took the former alternative; the price of Council Drafts followed the price of silver. The effect of this would have been transitory, but for the attempt in 1920, on the advice of the Babington Smith Committee, to stabilise the rupee at a new ratio of two shillings gold when all gold prices were crashing. It is easy to be wise after the event, but if the Government had followed silver down, as it followed silver up, there is no room to doubt that the rupee would have returned to its 'permanent' ratio with no more disturbance than was inevitable under war conditions. However, this was not done. The vain effort to stabilise the new ratio was abandoned in September, 1920, and the two shilling rupee has since been a legal fiction. Left free from administrative action, the rupee fell below one shilling and threepence sterling and one shilling gold in 1921. Since under the influence of good harvests, it has climbed upwards, and has been in the neighbourhood of one shilling and sixpence gold for the past twelve months. But it is not always realised in London that under these vicissitudes the Indian standard has legally perished. In the words of the report, 'The stability of the gold value of the rupee is thus based upon nothing more substantial than a policy of the Government, and at present that policy can be found defined in no notification or undertaking by the Government. It has to be implied from the acts of the Government in relation to the currency, and those acts are subject to no statutory regulation or control.'

"The responsibility remitted to the Commission was not therefore the mere stabilisation of the rupee, but the establishment of a standard which would command reasoned confidence in India, to link the rupee to that standard, and to provide for its statutory control, automatic working and stability; to bring the control of currency and of credit under a single authority and to free the Indian currency and exchange system from the dominance of the silver market. In short, it was to establish the rule of law in place of the practice of administrative discretion.

Scheme for Gold Currency.—"In the course of their inquiries in India the Commission had placed before them a scheme for the immediate establishment of a gold bullion standard, and its early conversion into the gold standard supported by the gold currency which a large body of Indian opinion has insistently demanded. The scheme was presented by the officials of the Finance Department, but it is known to be the work of the Finance Member, Sir Basil Blackett, whose work in India is of the greatest value.

"The essential features of this Scheme were the undertaking of a statutory obligation by Government to buy and sell gold bullion in 400 oz. bars; as soon as sufficient gold was available to put a gold coin in circulation; after a period tentatively fixed at five years to undertake to give gold coin in exchange for notes and rupees, and after a further period, also tentatively fixed at five years, make the silver rupee legal tender only for sums up to a small fixed amount. The scheme involved the disposal of 200 crores of silver rupees, or 667 million fine ounces, in ten years; the acquisition in all of £103 millions of gold; and the establishment of credits in London or New York. The cost was estimated at one and two-thirds crores of rupees per annum during the first five years and thereafter from two-thirds of a crore to 1·12 crore.

"This scheme is subjected by the Commission to a detailed examination, and rejected on grounds which are convincing. The main grounds for this decision are that the estimates of the amount and time of the gold demand are uncertain, and the absorption by India of this £103 millions of gold, in addition to the normal absorption for the arts, hoards, etc., would powerfully react on the supplies of credit, the rates of interest, and gold prices, throughout the world. The reaction on the silver market from the dethronement of the rupee and realisation of this large quantity of silver bullion would be even more marked, with severely prejudicial effects on the silver hoards of the people of India and the exchanges with China, where India still does a large business. Moreover, the capacity to raise the required credits is doubtful, and the cost is placed by the India Office at Rs. 3 crores a year.

"The evidence of the highest financial authorities in London and New York established beyond doubt that it is not in the interests of India to precipitate any currency reform that would violently disturb the gold and silver markets, however desirable that reform might be in itself. Also, that whilst London, working in close harmony with New York, would strain every nerve to supply India with the funds she might require for her own development, it could hardly be expected to provide credits for a scheme which would upset the gold and silver markets. But whilst on these grounds the Commission were not able to endorse Sir Basil Blackett's scheme, there is no doubt that they were profoundly influenced by it in their own recommendations. The ultimate evolution of a policy which promises a cure for India's currency bills is therefore in large measure due to the courage and resolution with which the Finance Authorities in that country faced them.

A Gold Bullion Standard.—"The currency system recommended by the Commission is a gold bullion standard. They propose that an obligation shall be imposed by statute on the currency authority to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee, but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required. The essence of this proposal is "that the ordinary medium of circulation in India should remain as at present the currency note and the silver rupee, and that the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold for all purposes, but that gold should not circulate as money. It must not circulate at first, and it need not circulate ever." In breaking adrift from any idea of a sterling exchange, or gold exchange standard, the Commission were powerfully influenced by two factors—the necessity of safeguarding the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Indian system from the price of silver rising above the melting point of the rupee and the desirability of establishing confidence by giving the country not only a real, but conspicuously visible link between the currency and gold.

"This reasoning is eminently sound, and the scheme in its broad outlines should command the unhesitating support not only of India, but of all interested in Indian trade. India will have nothing to do with any exchange standard; its experience has been too painful. Proposals to that end would be rejected by the legislature and prolong the currency controversies it is desired to close. The gold bullion standard satisfies all the country's real needs. True, it will not give it the gold mint and the gold currency which have long been demanded; it involves the demonetization of the sovereign to which a sentimental influence attaches. But whilst it does not do these things, it keeps the door open. No-one contends that a gold standard and a gold currency are immediately practicable. The most rapid progress thereto is embodied in Sir Basil Blackett's scheme, which is full of uncertainties and risks. But when the gold reserves are strengthened to the requisite point, the proposals leave India perfectly free to decide, through her legislature, where a gold currency is worth the expense.

"We must, however, face the obligation which a gold bullion standard imposes on the currency authority in India; indeed the Commission do not attempt to burke it. 'The obligation is to convert the currency, not merely into foreign exchange, but into metallic gold, and it is an obligation that is not, as formerly, conditional and circumscribed, but absolute and unlimited. Nevertheless. . . . it has been undertaken by every other country that has adopted an effective gold standard; and we have satisfied ourselves that the present resources in the form of reserves at the disposal of the Government of India are adequate to enable the currency authority safely to undertake the obligation, with the measures of fortification, and at the time, which we specify.' It is important, therefore, to examine the reserves and the procedure thereat.

"The reserves held for the purpose of maintaining the value of the token currency are two-fold—the Paper Currency Reserve and the Gold Standard Reserve. Their constitution on April 30, 1926 (the date taken by the Commission), was as follows:—

Paper Currency Reserve.

	Rs. Crores.
Silver coin	77·0
Silver bullion	7·7
Gold coin and bullion	22·3
Rupee securities	57·1
Sterling securities	21·0
	185·1

(The gold coin and bullion and the sterling securities are converted at the legal fiction ratio of two shillings per rupee.)

"The Gold Standard Reserve amounts at present to £40,000,000 invested in Gold and in British Treasury Bills and other sterling securities.

"In theory the two reserves fulfil entirely different functions. The Paper Currency Reserve is the backing for the Note Issue. The Gold Standard Reserve, accumulated from the profits on coining, is designed to maintain the external value of the rupee. In practice their action is closely interlocked, and the first line of defence in the event of a demand for remittance from India is the gold in the paper currency reserve. This invisible line of demarcation will disappear if the Commission's proposals are adopted. The Commission are justified in recommending that the two shall be amalgamated. Their further proposals are that the proportions and composition of the combined Reserve should be fixed by statute; that gold and gold securities should form not less than 40 per cent. of the whole, with 50 to 60 per cent. as the ideal; and that the holding of gold, which now stands at about 12·8 per cent. should be raised to 20 per cent. as soon as possible, and to 25 per cent. in ten years. Generally, they are of opinion that during this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape.

"The proposal to bring the combined Reserve under statutory control is wise; an arguable case could be made out for the thesis that the currency difficulties of India have arisen in the main from the decision of Lord Curzon's Government not to invest the official acceptance of the Fowler Report with legislative authority. The strengthening of the gold reserves is in entire accord with Indian needs.

The Ratio.—"The majority of the Commission, Sir Purshotamdas Thakordas being the only dissentient, recommend that the rupee be stabilised in relation to gold at a rate corresponding to an exchange rate of one shilling and sixpence to the rupee. Round this point controversy in India will be concentrated; it is worth while to refresh our memories of the history of the ratio. The Fowler Committee recommended that the rupee should be permanently stabilised at one shilling and fourpence; the Secretary of State for India accepted their recommendations without qualification. The rupee was substantially steady at this point until August 1917.

"One principle advanced in Sir Dadiba Dalal's prophetic minority report in 1919, that the legal standard of money payments should be, and usually is, regarded as less open to repeal or modification than any other legislative Act, will command general acceptance. But when Sir Dadiba went on to suggest that the Government of India might have avoided this measure by larger borrowings in India and encouraging investment abroad he was on ground where no one in touch with Indian conditions can follow him. In the circumstances of the day the Government had no alternative to raising the rate of exchange save in declaring the rupee inconvertible, which during the war would have been disastrous. I must reiterate the belief that the real mischief was done not when the rate of exchange was raised to meet the rise in silver, but when it was not lowered as silver fell; the attempt to stabilise the rupee

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

at the two shilling rate caused the Government of India large losses, and inflicted a terrible blow on trade; after it was abandoned in September, 1920, the rupee fell below one shilling and threepence sterling and one shilling gold. Thereafter, under the influence of a succession of abundant harvests, it recovered. In 1923, it was one shilling and fourpence sterling; in October, 1924 one and sixpence sterling and one and four gold. With the rise in the pound to gold parity, the rupee reached one and sixpence gold in June, 1925, and has remained there.

"It is not, I think, open to doubt that if the vain attempt to stabilise the rupee at two shillings had not been made in 1920, or if advantage had been taken of its return to one and four, the permanent standard might have been re-established without undue disturbance. Sir Purshotamdas Thakordas asserts in his minute of dissent that 'the Executive had made up their minds to work up to a one shilling and sixpence ratio long before this Commission was appointed to examine the question. Indeed, they have presented to us the issue in this regard as a *fait accompli*, achieved by them, not having hesitated by manipulation to keep up the rate even while we were in session. I cannot conceive of any parallel to such a procedure in any country.'

"It is to my mind a great misfortune that the opportunity of restoring the permanent ratio of one and four was not seized when it offered. Not because there is any special sanctity in a ratio as such but because there is a sanctity in the legal standard of money payments. If this had been done the Commission's scheme would have received practically unanimous support in India; as it is a violent controversy will rage round this secondary issue, obscuring the great merit of the Commission's basic recommendation a true gold standard, statutory in its composition and automatic in action, with the coalescence of the currency and credit authorities. However, we have to deal with facts as we find them. The majority of the commission base their recommendation on the 'conviction, which has been formed and cumulatively reinforced during the progress of our inquiry, that at the present exchange rate of about one shilling and sixpence, prices in India have already attained a substantial measure of adjustment with those in the world at large, and as a corollary, that any change in the rate would mean a difficult period of readjustment, involving widespread economic disturbance, which it is most desirable in the interests of the people to avoid, and which would in the end be followed by no countervailing advantage.' Sir Purshotamdas Thakordas, in a closely-reasoned minute of dissent, supported by a wealth of figures, avers—and to my mind with conclusive force that the adjustments are far from complete, and cannot be completed in regard to wages without disastrous labour disputes. Both sides admit that their conclusions are weakened by the unreliability of the Indian index figures.

"The truth, I suggest, lies between these two contentions. There have been very substantial adjustments to one shilling and sixpence; no ratio could be operative for over a year without inducing this result. But it is clear that the adjustments, especially in regard to wages in Western India, are not complete. In the matter of the indebtedness of the agricultural classes of India—seventy per cent. of the whole population there has been no adjustment, not in relation to the land revenue they pay to Government. The ratio therefore cannot be determined as a question of academic principle, but is a matter of expediency.

"Here, it seems to me, the decisive factor is the economic consequence of a return to one shilling and fourpence. There is no half-way house; the rate must be either the *de facto* one of one and sixpence, or the old permanent ratio of one and fourpence. The change would be immediate not a matter of weeks or months, but of hours or minutes. There would be an immediate rise in prices of twelve and a half per cent., with a consequent reduction of real wages by that proportion; there would be convulsive disturbance of the foreign trade; there would be violent speculation. I omit all calculation of the effect of the lower rate on the finances of the Government of India, because this is an influence which has been over-valued in the past; it is infinitesimal in comparison with the industrial and commercial interests involved. No one who realises the sensitiveness of the Indian market, and the proneness to speculation, can contemplate these violent disturbances without a feeling akin to dismay. The balance of advantage lies with stabilisation at one and six; the controversy which must ensue is part of the price to be paid for the neglect to re-establish the permanent ratio when it was practicable.

The Note Issue.—"Before the war there was a considerable and growing circulation of sovereigns. On the outbreak of hostilities these disappeared as currency; the actual currency of India is a token, the silver rupees and another token, the note convertible into rupees. Ever since the breakway from the accepted gold standard this obligation has imposed serious difficulties on the currency. It drove it into the very heavy coining which followed recovery from the famine of 1899-1900; it compelled heavy purchases of silver, which invariably rose in prices as the Government came into the market; and it placed the Indian currency system, as occurred during the war, at the mercy of the silver market. The maintenance of the convertibility of the note into silver rupees of the present fineness is only possible so long as silver does not rise above 48*d.* an ounce. The removal of this anomalous provision, the Commission say, is an essential step in Indian currency reform which must be taken sooner or later. 'No opportunity for the termination of this obligatory convertibility is likely to be so favourable at the present when, by making the notes convertible into gold bars for all purposes, a more solid right of convertibility is attached to them than they have ever had since silver ceased to be a reliable standard of value.' Both propositions can be accepted in their entirety.

"The rise in the volume of the paper currency is one of the most remarkable features in Indian financial history. It developed from no change in the status of the note itself; it was always convertible on demand; but from increased facilities for the encashment of notes, beginning with the introduction of universal notes of small de-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

nomination and steadily progressing as experience was gained. We can therefore endorse the conclusion of the Commission that the best way to foster the use of currency notes is to establish confidence in their practical convertibility, 'and this confidence has been secured not so much by a legal obligation to encash them at currency offices as by making rupees readily available to the public at centres where there is a demand for them.'

"The Commission therefore propose that whilst the legal obligation to convert into rupees all the notes in circulation shall remain, this obligation should not attach to the new notes to be issued by the Central Bank, and coincidentally the one-rupee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be re-issued. The legal obligation on the Central Bank will be to give legal tender money, either notes of smaller denominations or silver rupees, at its option; but it will be the duty of the Bank to supply rupees freely in such quantities as may be required for circulation, and of the Government to furnish the Bank with such coin. The currency position is such that the change in the legal status of the note will be unfelt. India is suffering from a surfeit of rupees, the total volume of which is estimated at approximately Rs. 400 crores. There are Rs. 85 crores of silver coin and bullion in reserve. The whole tendency will be in the direction of a return of rupees to the reserve rather than to an appetite therefor. Not only will there exist the fullest capacity to supply rupees on demand, but there will be a positive inducement to the currency authority to encourage a demand for rupees in order to get rid of its redundant stock. It is clear that the present opportunity of freeing the currency authority from the dependence on the silver market which has hampered India for so many years is exceptionally favourable, and should be seized without hesitation."

The reception of the Report followed very closely the lines indicated as probable in the article in *The Bankers' Magazine* which we have quoted extensively above. There was a considerable protest, strongest in Western India but shared in other parts of the country, against the proposal to stabilise the rupee at one shilling and sixpence and a demand for a reversion to one and fourpence. There was, particularly in Bombay, a reluctance to agree to the establishment of the Reserve Bank, coupled with the desire that the Imperial Bank of India should be re-moulded in order to make it the Central Bank, with the functions proposed to be remitted to the Reserve Bank. These voices were so loud that they overbore the consideration of the basic recommendations of the Report, a true gold standard, and the establishment of an organisation which would link currency with credit.

In August 1926 the Government published the text of a Bill designed to fix the ratio at one and six, and to support it by the sale of bullion on the lines laid down in the Report. At the request of a large body of opinion in the Legislative Assembly, which urged that there had not been time to study the Report and that the papers were not available, the discussion of this measure was postponed until the 1927 session. On November 18th the Government of India issued a notification to the following effect:—

"After considering the report of the Royal Commission on Indian Currency and Finance, the Secretary of State for India in Council in agreement with the Government of India, is prepared to accept as a whole the recommendations of the Commission, subject to such further consideration of details as may prove to be necessary. The necessary legislation to give effect to these recommendations will be introduced in the Indian Legislature during the forthcoming session."

The New Ratio.—So far from closing the discussion, this notification intensified it. Feeling ran high on the subject of the ratio, considerable interests in the country being convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment. These found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February-March 1927. The Indian Currency Bill was however accepted by the Assembly by a small majority, and adopted by the Council of State. It established the ratio of one shilling and sixpence by enacting that the Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government, sterling for immediate delivery in London at the same price after allowing for the normal cost or transport from Bombay to London. A rate of one shilling five pence forty-nine sixty-fourths was notified as Government's selling rate for sterling to meet these obligations.

Exchange has since remained stable at the one and sixpenny rate. World trade depression in the slump of 1930 made it increasingly difficult for the Government of India to maintain the statutory ratio, but their difficulties were solved when Great Britain went off the Gold standard in September 1931, and the rupee was linked to sterling. Since then, large exports of commercial and hoarded gold from India have served to keep the exchange ratio stable, despite much agitation for a reversion to the 1s. 4d. ratio by interested parties. Generally speaking, the tendency in the last ten years has been for the rupee to be worth more than 1s. 6d., and thus Government have found no difficulty in maintaining a stable exchange. Since the outbreak of the war in September 1939, official restrictions on exchange operations have perforce increased and caused some inconvenience to businessmen. But the rupee continues to maintain its strength and there is little doubt that, left to itself, it would appreciate in terms of foreign currencies rather than depreciate.

THE RESERVE BANK.

The following Act of the Indian Legislature received the assent of the Governor-General on March 6, 1934, and is known as the Reserve Bank of India Act, 1934 :—

Whereas it is expedient to constitute a Reserve Bank for India to regulate the issue of bank notes and the keeping of reserves with a view to securing monetary stability in British India and generally to operate the currency and credit system of the country to its advantage ;

And whereas in the present disorganisation of the monetary systems of the world it is not possible to determine what will be suitable as a permanent basis for the Indian monetary system ;

But whereas it is expedient to make temporary provision on the basis of the existing monetary system, and to leave the question of the monetary standard best suited to India to be considered when the international monetary position has become sufficiently clear and stable to make it possible to frame permanent measures;

It is hereby enacted as follows :—

(1) A Bank to be called the Reserve Bank of India shall be constituted for the purposes of taking over the management of the currency from the Governor-General in Council and of carrying on the business of banking in accordance with the provisions of this Act.

(2) The Bank shall be a body corporate by the name of the Reserve Bank of India, having perpetual succession and a common seal, and shall by the said name sue and be sued.

Share Capital.—(1) The original share capital of the Bank shall be five crores of rupees divided into shares of one hundred rupees each, which shall be fully paid up.

(2) Separate registers of shareholders shall be maintained at Bombay, Calcutta, Delhi, Madras and Rangoon, and a separate issue of shares shall be made in each of the areas served by those registers, as defined in the First Schedule, and shares shall be transferable from one register to another.

(3) A shareholder shall be qualified to be registered as such in any area in which he is ordinarily resident or has his principal place of business in India, but no person shall be registered as a shareholder in more than one register ; and no person who is not—

(*a*) domiciled in India and either an Indian subject of His Majesty, or a subject of a State in India, or

(*b*) a British subject ordinarily resident in India and domiciled in the United Kingdom or in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty or

(*c*) a company registered under the Indian Companies Act, 1913, or a society registered under the Co-operative Societies Act, 1912, or any other law for the time being in force in British India relating to co-operative societies or a scheduled bank, or a corporation or company incorporated by or under an Act of Parliament or any law for the time being in force in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty, and having a branch in British India, shall be registered as a shareholder or be entitled to payment of any dividend on any share, and no person, who, having been duly registered as a shareholder, ceases to be qualified to be so registered, shall be able to exercise any of the rights of a shareholder otherwise than for the purpose of the sale of his shares.

(4) The Governor-General in Council shall, by notification in the Gazette of India, specify the parts of His Majesty's Dominions which shall be deemed for the purposes of clauses (*b*) and (*c*) of sub-section (3) to be the Parts of His Majesty's Dominions in which no discrimination against Indian subjects of His Majesty exists.

(5) The nominal value of the shares originally assigned to the various registers shall be as follows, namely :—

(*a*) to the Bombay register—one hundred and forty lakhs of rupees :

(*b*) to the Calcutta register—one hundred and forty-five lakhs of rupees :

(*c*) to the Delhi register—one hundred and fifteen lakhs of rupees.

(*d*) to the Madras register—seventy lakhs of rupees.

(*e*) to the Rangoon register—thirty lakhs of rupees :

Provided that if at the first allotment the total nominal value of the shares on the Delhi register for which applications are received is less than one hundred and fifteen lakhs of rupees, the Central Board shall, before proceeding to any allotment, transfer any shares not applied for up to a maximum nominal value of thirty-five lakhs of rupees from that register in two equal portions to the Bombay and the Calcutta register.

A Committee consisting of two elected members of the Assembly and one elected member of the Council of State to be elected by non-official members of the respective Houses shall be associated with the Central Board for the purpose of making public issue of shares and looking after the first allotment of shares.

(6) In allotting the shares assigned to a register, the Central Board shall, in the first instance, allot five shares to each qualified applicant who has applied for five or more shares ; and, if the number of such applicants is greater than one-fifth of the total number of shares assigned to the register, shall determine by lot the applicants to whom the shares shall be allotted.

(7) If the number of such applicants is less than one-fifth of the number of shares assigned to the register, the Central Board shall allot the remaining shares firstly, up to the limit of one-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

half of such remaining shares, to those applicants who have applied for less than five shares, and thereafter as to the balance to the various applicants in such manner as it may deem fair and equitable, having regard to the desirability of distributing the shares and the voting rights attached to them as widely as possible.

(8) Notwithstanding anything contained in sub-sections (6) and (7), the Central Board shall reserve for and allot to Government shares of the nominal value of two lakhs and twenty thousand rupees to be held by Government for disposal at par to Directors seeking to obtain the minimum share qualification required under sub-section (2) of section 11.

(9) If, after all applications have been met in accordance with the provisions of sub-sections (6), (7) and (8), any shares remain unallotted, they shall, notwithstanding anything contained in this section, be allotted to and taken up by Government, and shall be sold by the Governor-General in Council as soon as may be, at not less than par, to residents of the areas served by the register concerned.

(10) The Governor-General in Council shall have no right to exercise any vote under this Act by reason of any shares allotted to him under sub-section (8) or under sub-section (9).

(11) A Director shall not dispose of any shares obtained from Government under the provisions of sub-section (8) otherwise than by re-sale to Government at par, and Government shall be entitled to re-purchase at par all such shares held by any Director on his ceasing from any cause to hold office as Director.

Increase and reduction of share capital —(1) The share capital of the Bank may be increased or reduced on the recommendation of the Central Board, with the previous sanction of the Governor-General in Council and with the approval of the Central Legislature, to such extent and in such manner as may be determined by the Bank in general meeting.

(2) The additional shares so created shall be of the nominal value of one hundred rupees each and shall be assigned to the various registers in the same proportions as the shares constituting the original share capital.

(3) Such additional shares shall be fully paid up, and the price at which they may be issued shall be fixed by the Central Board with the previous sanction of the Governor-General in Council.

(4) The provisions of section 4 relating to the manner of allotment of the shares constituting the original share capital shall apply to the allotment of such additional shares, and existing shareholders shall not enjoy any preferential right to the allotment of such additional shares.

The Bank shall, as soon as may be, establish offices in Bombay, Calcutta, Delhi, Madras and Rangoon and a branch in London, and may establish branches or agencies in any other place in India or, with the previous sanction of the Governor-General in Council, elsewhere.

The general superintendence and direction of the affairs and business of the Bank shall be entrusted to a Central Board of Directors which may exercise all powers and do all acts and things which may be exercised or done by the Bank and are not by this Act expressly directed or required to be done by the Bank in general meeting.

(1) The Central Board shall consist of the following Directors namely :—

(*a*) a Governor and two Deputy Governors, to be appointed by the Governor-General in Council after consideration of the recommendations made by the Board in that behalf.

(*b*) four Directors to be nominated by the Governor-General in Council.

(*c*) eight Directors to be elected on behalf of the shareholders on the various registers, in the manner provided in section 9 and in the following numbers, namely :—

(*i*) for the Bombay register—two Directors;
(*ii*) for the Calcutta register—two Directors;
(*iii*) for the Delhi register—two Directors;
(*iv*) for the Madras register—one Director;
(*v*) for the Rangoon register—one Director, and

(*d*) one government official to be nominated by the Governor-General in Council.

(2) The Governor and Deputy Governors shall devote their whole time to the affairs of the Bank, and shall receive such salaries and allowances as may be determined by the Central Board, with the approval of the Governor-General in Council.

(3) A Deputy Governor and the Director nominated under clause (*d*) of sub-section (1) may attend any meeting of the Central Board and take part in its deliberations but shall not be entitled to vote.

Provided that when the Governor is absent a Deputy Governor authorized by him in this behalf in writing may vote for him.

(4) The Governor and a Deputy Governor shall hold office for such term not exceeding five years as the Governor-General in Council may fix when appointing them, and shall be eligible for re-appointment.

A Director nominated under clause (*b*) or elected under clause (*c*) of sub-section (1) shall hold office for five years, or thereafter until his successor shall have been duly nominated or elected, and, subject to the provisions of section 10, shall be eligible for re-nomination or re-election.

A Director nominated under clause (*d*) of sub-section (1) shall hold office during the pleasure of the Governor-General in Council.

(5) No act or proceeding of the Board shall be questioned on the ground merely of the existence of any vacancy in, or any defect in the constitution of the Board.

Local Boards.—(1) Local Board shall be constituted for each of the five areas specified in the First Schedule, and shall consist of—

(*a*) five members elected from amongst themselves by the shareholders who are registered on the register for that area and are qualified to vote, and

(*b*) not more than three members nominated by the Central Board from amongst the shareholders registered on the register for that area, who may be nominated at any time.

Provided that the Central Board shall in exercising this power of nomination aim at securing the representation of territorial or economic interests not already represented, and in particular the representation of agricultural interests and the interests of co-operative banks.

(2) At an election of members of a Local Board for any area, any shareholder who has been registered on the register for that area, for a period of not less than six months ending with the date of the election, as holding five shares shall have one vote, and each shareholder so registered as having more than five shares shall have one vote for each five shares, but subject to a maximum of ten votes, and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an employee of the Bank.

(3) The members of a Local Board shall hold office until they vacate it under sub-section (6) and, subject to the provisions of section 10 shall be eligible for re-election or re-nomination as the case may be.

(4) At any time within three months of the day on which the Directors representing the shareholders on any register are due to retire under the provisions of this Act, the Central Board shall direct an election to be held of members of the Local Board concerned, and shall specify a date from which the registration of transfer from and to the register shall be suspended until the election has taken place.

(5) On the issue of such direction the Local Board shall give notice of the date of the election and shall publish a list of shareholders holding five or more shares, with the dates on which their shares were registered, and with their registered addresses, and such list shall be available for purchase not less than three weeks before the date fixed for the election.

(6) The names of the persons elected shall be notified to the Central Board which shall thereupon proceed to make any nominations permitted by clause (*b*) of sub-section (1) it may then decide to make, and shall fix the date on which the outgoing members of the Local Board shall vacate office, and the incoming members shall be deemed to have assumed office on that date.

(7) The elected members of a Local Board shall as soon as may be after they have been elected, elect from amongst themselves one or two persons, as the case may be, to be Directors representing to the shareholders on the register for the area for which the Board is constituted.

(8) A Loca Board shall advise the Central Board on such matters as may be generally or specifically referred to it and shall perform such duties as the Board may by regulations, delegate to it

(1) No person may be a Director or a member of a Local Board who—

(*a*) is a salaried government official or a salaried official of a State in India, or

(*b*) is, or at any time has been, adjudicated an insolvent, or has suspended payment or has compounded with his creditors, or

(*c*) is found lunatic or becomes of unsound mind, or

(*d*) is an officer or employee of any bank, or

(*e*) is a director of any bank, other than a bank which is a society registered or deemed to be registered under the Co-operative Societies Act, 1912, or any other law for the time being in force in British India relating to co-operative societies.

(2) No two persons who are partners of the same mercantile firm, or are directors of the same private company, or one of whom is the general agent of or holds a power of procuration from the other, or from a mercantile firm of which the other is a partner, may be Directors or members of the same Local Board at the same time.

(3) Nothing in clause (*a*), clause (*d*) or clause (*e*) of sub-section (1) shall apply to the Governor, or to a Deputy Governor or to the Director nominated under clause (*d*) of sub-section (1) of section 8.

(1) The Governor-General in Council may remove from office the Governor, or a Deputy Governor or any nominated or elected Director.

Provided that in the case of a Director nominated or elected under clause (*b*) or clause (*c*) of sub-section (1) of section 8 this power shall be exercised only on a resolution passed by the Central Board in that behalf by a majority consisting of not less than nine Directors.

(2) A Director nominated or elected under clause (*b*) or clause (*c*) of sub-section(1) of section 8, and any member of a Local Board shall cease to hold office if, at any time after six months from the date of his nomination or election, he is not registered as a holder of unencumbered shares of the Bank of a nominal value of not less than five thousand rupees, or if he ceases to hold unencumbered shares of that value, and any such Director shall cease to hold office if without leave from the Governor-General in Council he absents himself from the consecutive meetings of the Central Board convened under sub-section (1) of section 13.

(3) The Governor-General in Council shall remove from office any Director, and the Central Board shall remove from office any member of a Local Board, if such Director or member becomes subject to any of the disqualifications specified in sub-section (1) or sub-section (2) of section 10.

(4) A Director or member of a Local Board removed or ceasing to hold office under the foregoing sub-sections shall not be eligible for re-appointment either as Director or as member of a Local Board until the expiry of the term for which his appointment was made.

(5) The appointment, nomination or election as Director or member of a Local Board of any person who is a member of the Indian Legislature or of a local Legislature shall be void,

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

unless, within two months of the date of his appointment, nomination or election, he ceases to be such member, and, if any Director or member of a Local Board is elected or nominated as a member of any such Legislature, he shall cease to be a Director or member of the Local Board as from the date of such election or nomination, as the case may be.

(6) A Director may resign his office to the Governor-General in Council, and a member of a Local Board may resign his office to the Central Board, and on the acceptance of the resignation the office shall become vacant.

(1) If the Governor or a Deputy Governor by infirmity or otherwise is rendered incapable of executing his duties or is absent on leave or otherwise in circumstances not involving the vacation of his appointment, the Governor-General in Council may, after consideration of the recommendations made by the Central Board in this behalf, appoint another person to officiate for him, and such person may, notwithstanding anything contained in clause (*d*) of sub-section (1) of section 10, be an officer of the Bank.

(2) If an elected Director is for any reason unable to attend a particular meeting of the Central Board, the elected members of the Local Board of the area which he represents may elect one of their number to take his place, and for the purposes of that meeting the substitute so elected shall have all the powers of the absent Director.

(3) Where any casual vacancy in the office of any member of a Local Board occurs otherwise than by the occurrence of a vacancy in the office of a Director elected by the Local Board, the Central Board may nominate thereto any qualified person recommended by the elected members of the Local Board.

(4) Where any casual vacancy occurs in the office of a Director other than the vacancies provided for in sub-section (1), the vacancy shall be filled, in the case of a nominated Director by nomination, and in the case of an elected Director by election held in the manner provided in section 9 for the election of Directors.

Provided that before such election is made the resulting vacancy, if any, in the Local Board and any vacancy in the office of an elected member of such Board which may have been filled by a member nominated under sub-section (3) shall be filled by election held as nearly as may be in the manner provided in section 9 for the election of members of a Local Board.

(5) A person nominated or elected under this section to fill a casual vacancy shall, subject to the proviso contained in sub-section (4), hold office for the unexpired portion of the term of his predecessor.

(1) Meetings of the Central Board shall be convened by the Governor at least six times in each year and at least once in each quarter.

(2) Any three Directors may require the Governor to convene a meeting of the Central Board at any time and the Governor shall forthwith convene a meeting accordingly.

(3) The Governor, or in his absence the Deputy Governor authorized by the Governor under the proviso to sub-section (3) of section 8 to vote for him, shall preside at meetings of the Central Board, and, in the event of an equality of votes, shall have a second or casting vote.

General Meetings.—(1) A general meeting (hereinafter in this Act referred to as the annual general meeting) shall be held annually at a place where there is an office of the Bank within six weeks from the date on which the annual accounts of the Bank are closed, and a general meeting may be convened by the Central Board at any other time:

Provided that the annual general meeting shall not be held on two consecutive occasions at any one place.

(2) The shareholders present at a general meeting shall be entitled to discuss the annual accounts, the report of the Central Board on the working of the Bank throughout the year and the auditors' report on the annual balance-sheet and accounts.

(3) Every shareholder shall be entitled to attend at any general meeting and each shareholder who has been registered on any register, for a period of not less than six months ending with the date of the meeting, as holding five or more shares shall have one vote and on a poll being demanded each shareholder so registered shall have one vote for each five shares, but subject to a maximum of ten votes and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an officer or employee of the Bank.

(1) The following provisions shall apply to the first constitution of the Central Board, and, notwithstanding anything contained in section 8, the Central Board as constituted in accordance therewith shall be deemed to be duly constituted in accordance with this Act.

(2) The first Governor and the first Deputy Governor or Deputy Governors shall be appointed by the Governor-General in Council on his own initiative, and shall receive such salaries and allowances as he may determine.

(3) The first eight Directors representing the shareholders on the various registers shall be nominated by the Governor-General in Council from the areas served respectively by those registers, and the Directors so nominated shall hold office until their successors shall have been duly elected as provided in sub-section (4).

(4) On the expiry of each successive period of twelve months after the nomination of Directors under sub-section (3) two Directors shall be elected in the manner provided in section 9 until all the Directors so nominated have been replaced by elected Directors holding office in accordance with section 8. The register in respect of which the election is to be held shall be selected by lot from among the registers still represented by nominated Directors, and for the purposes of such lot the Madras and Rangoon registers shall be treated as if they comprised one register only.

As soon as may be after the commencement of this Act, the Central Board shall direct elections to be held and may make nominations, in order to constitute Local Boards in accordance with the provision of section 9, and the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

members of such Local Boards shall hold office up to the date fixed under sub-section (6) of section 9 but shall not exercise any right under sub-section (7) of that section.

Business.—The Bank shall be authorized to carry on and transact the several kinds of business hereinafter specified, namely :—

(1) the accepting of money on deposit without interest from, and the collection of money for, the Secretary of State in Council, the Governor-General in Council, Local Governments, States in India, local authorities, banks and any other persons ;

(2) (*a*) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn on and payable in India and arising out of *bona fide* commercial or trade transactions bearing two or more good signatures, one of which shall be that of a scheduled bank, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace ;

(*b*) the purchase, sale and rediscount of bills of exchange and promissory notes, drawn and payable in India and bearing two or more good signatures, one of which shall be that of a scheduled bank, or a provincial co-operative bank, and drawn or issued for the purpose of financing seasonal agricultural operations or the marketing of crops, and maturing within nine months from the date of such purchase or rediscount, exclusive of days of grace ;

(*c*) the purchase, sale and rediscount of bills of exchange and promissory notes drawn and payable in India and bearing the signature of a scheduled bank, and issued or drawn for the purpose of holding or trading in securities of the Government of India or a Local Government, or such securities of States in India as may be specified in this behalf by the Governor-General in Council on the recommendation of the Central Board, and maturing within ninety days from the date of such purchase or rediscount, exclusive of days of grace ;

(3) (*a*) the purchase from and sale to scheduled banks of sterling in amounts of not less than the equivalent of one lakh of rupees ;

(*b*) the purchase, sale and rediscount of bills of exchange (including treasury bills) drawn in or on any place in the United Kingdom and maturing within ninety days from the date of purchase, provided that no such purchase, sale or rediscount shall be made in India except with a scheduled bank ; and

(*c*) the keeping of balances with banks in the United Kingdom ;

(4) the making to States in India, local authorities, scheduled banks and provincial co-operative banks of loans and advances, repayable on demand or on the expiry of fixed periods not exceeding ninety days, against the security of—

(*a*) stocks, funds and securities (other than immovable property) in which a trustee is authorized to invest trust money by any Act of Parliament or by any law for the time being in force in British India ;

(*b*) gold or silver or documents of title to the same;

(*c*) such bills of exchange and promissory notes as are eligible for purchase or rediscount by the Bank ;

(*d*) promissory notes of any scheduled bank or a provincial co-operative bank, supported by documents of title to goods which have been transferred, assigned, or pledged to any such bank as security for a cash credit or overdraft granted for *bona fide* commercial or trade transactions, or for the purpose of financing seasonal agricultural operations or the marketing of crops ;

(5) the making to the Governor-General in Council and to such Local Governments as may have the custody and management of their own provincial revenues of advances repayable in each case not later than three months from the date of the making of the advance ;

(6) the issue of demand drafts made payable at its own offices or agencies and the making, issue and circulation of bank post bills ;

(7) the purchase and sale of Government securities of the United Kingdom maturing within ten years from the date of such purchase;

(8) the purchase and sale of securities of the Government of India or of a Local Government of any maturity or of such securities of a local authority in British India or of such States in India as may be specified in this behalf by the Governor-General in Council on the recommendation of the Central Board :

Provided that securities fully guaranteed as to principal and interest by the Government of India, a Local Government, a local authority or a State in India shall be deemed for the purposes of this clause to be securities of such Government, authority or State ;

Provided further that the amount of such securities held at any time in the Banking Department shall be so regulated that—

(*a*) the total value of such securities shall not exceed the aggregate amount of the share capital of the Bank, the Reserve Fund and three-fifths of the liabilities of the Banking Department in respect of deposits ;

(*b*) the value of such securities maturing after one year shall not exceed the aggregate amount of the share capital of the Bank, the Reserve Fund and two-fifths of the liabilities of the Banking Department in respect of deposits ; and

(*c*) the value of such securities maturing after ten years shall not exceed the aggregate amount of the share capital of the Bank and the Reserve Fund and one-fifth of the liabilities of the Banking Department in respect of deposits ;

(9) The custody of monies, securities and other articles of value, and the collection of the proceeds, whether principal, interest or dividends, of any such securities ;

(10) the sale and realisation of all property, whether movable or immovable, which may in any way come into the possession of the Bank in satisfaction, or part satisfaction, of any of its claims ;

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(11) the acting as agent for the Secretary of State in Council, the Governor-General in Council or for any Local Government or local authority of State in India in the transaction of any of the following kinds of business, namely :—

(a) the purchase and sale of gold or silver ;

(b) the purchase, sale, transfer and custody of bills of exchange, securities or shares in any company ;

(c) the collection of the proceeds, whether principal, interest or dividends, of any securities or shares ;

(d) the remittance of such proceeds, at the risk of the principal, by bills of exchange payable either in India or elsewhere ;

(e) the management of public debt ;

(12) the purchase and sale of gold coin and bullion ;

(13) the opening of an account with or the making of an agency agreement with, and the acting as agent or correspondent of a bank, which is the principal currency authority of any country under the law for the time being in force in that country or any international bank formed by such banks, and the investing of the funds of the Bank in the shares of any such international bank ;

(14) the borrowing of money for a period not exceeding one month for the purposes of the business of the Bank, and the giving of security for money so borrowed :

Provided that no money shall be borrowed under this clause from any person in India other than a schedule bank, or from any person outside India other than a bank which is the principal currency authority of any country under the law for the time being in force in that country :

Provided further that the total amount of such borrowings from persons in India shall not at any time exceed the amount of the share capital of the Bank ;

(15) the making and issue of bank notes subject to the provision of this Act ; and

(16) generally, the doing of all such matters and things as may be incidental to or consequential upon the exercise of its powers or the discharge of its duties under this Act.

When, in the opinion of the Central Board or, where the powers and functions of the Central Board under this section have been delegated to a committee of the Central Board or to the Governor, in the opinion of such committee or of the Governor as the case may be, a special occasion has arisen making it necessary or expedient that action should be taken under this section for the purpose of regulating credit in the interests of Indian trade, commerce, industry and agriculture, the Bank may, notwithstanding any limitation contained in sub-clauses (a) and (b) of clause (2) or sub-clause (a) or (b) of clause (3) or clause (4) of section 17.—

(1) purchase, sell or discount any of the bills of exchange or promissory notes specified in sub-clause (a) or (b) of clause (2) or sub-clause (b) of clause (3) of that section though such bill or promissory note does not bear the signature of a scheduled bank or a provincial co-operative bank ; or

(2) purchase or sell sterling in amounts of not less than the equivalent of one lakh of rupees ; or

(3) make loans or advances repayable on demand or on the expiry of fixed periods not exceeding ninety days against the various forms of security specified in clause (4) of that section :

Provided that a committee of the Board or the Governor shall not, save in cases of special urgency, authorized action under this section without prior consultation with the Central Board and that in all cases action so authorized shall be reported to the members of the Central Board forthwith.

Forbidden Business.—Save as otherwise provided in sections 17, 18 and 45, the Bank may not

(1) engage in trade or otherwise have a direct interest in any commercial, industrial or other undertaking, except such interest as it may in any way acquire in the course of the satisfaction of any of its claims ; provided that all such interests shall be disposed of at the earliest possible moment ;

(2) purchase its own shares or the shares to any other bank or of any company, or grant loans upon the security of any such shares ;

(3) advance money on mortgage of, or otherwise on the security of, immovable property or documents of title relating thereto, or become the owner of immovable property, except so far as is necessary for its own business premises and residences for its officers and servants;

(4) make loans or advances ;

(5) draw or accept bills payable otherwise than on demand ;

(6) allow interest on deposits or current accounts.

Central Banking Functions.

The Bank shall undertake to accept monies for account of the Secretary of State in Council and the Governor-General in Council and such Local Governments as may have the custody and management of their own provincial revenues and such States in India as may be approved of and notified by the Governor-General in Council in the Gazette of India, and to make payments up to the amount standing to the credit of their accounts respectively, and to carry out their exchange, remittance and other banking operations, including the management of the public debt.

(1) The Governor-General in Council and such Local Governments as may have the custody and management of their own provincial revenues shall entrust the Bank, on such conditions as may be agreed upon, with all their money, remittance, exchange and banking transactions in India and, in particular, shall deposit free of interest all their cash balances with the Bank:

Provided that nothing in this sub-section shall prevent the Governor-General in Council or any Local Government from carrying on

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

money transactions at places where the Bank has no branches or agencies, and the Governor General in Council and Local Governments may hold at such places such balances as they may require.

(2) The Governor-General in Council and each Local Government shall entrust the Bank on such conditions as may be agreed upon, with the management of the public debt and with the issue of any new loans.

(3) In the event of any failure to reach agreement on the conditions referred to in this section the Governor-General in Council shall decide what the conditions shall be.

(4) Any agreement made under this section to which the Governor-General in Council or any Local Government is a party shall be laid, as soon as may be after it is made, before the Central Legislature and in the case of a Local Government before its local Legislature also.

Bank Notes.—(1) The Bank shall have the sole right to issue bank notes in British India, and may, for a period which shall be fixed by the Governor-General in Council on the recommendation of the Central Board, issue currency notes of the Government of India supplied to it by the Governor-General in Council, and the provisions of this Act applicable to bank notes shall, unless a contrary intention appears, apply to all currency notes of the Government of India issued either by the Governor-General in Council or by the Bank in like manner as if such currency notes were bank notes, and references in this Act to bank notes shall be construed accordingly.

(2) On and from the date on which this Chapter comes into force the Governor General in Council shall not issue any currency notes.

Issue Department.—(1) The issue of bank notes shall be conducted by the Bank in an Issue Department which shall be separated and kept wholly distinct from the Banking Department, and the assets of the Issue Department shall not be subject to any liability other than the liabilities of the Issue Department as hereinafter defined in section 34.

(2) The Issue Department shall not issue bank notes to the Banking Department or to any other person except in exchange for other bank notes or for such coin, bullion or securities as are permitted by this Act to form part of the Reserve.

Bank notes shall be of the denominational values of five rupees, ten rupees, fifty rupees, one hundred rupees, five hundred rupees, one thousand rupees and ten thousand rupees, unless otherwise directed by the Governor-General in Council on the recommendation of the Central Board.

The design, form and material of bank notes shall be such as may be approved by the Governor General in Council after consideration of the recommendations made by the Central Board.

(1) Subject to the provisions of sub-section (2), every bank note shall be legal tender at any place in British India in payment or on account for the amount expressed therein, and shall be guaranteed by the Governor-General in Council.

(2) On recommendation of the Central Board the Governor-General in Council may, by notification in the Gazette of India, declare that with effect from such date as may be specified in the notification, any series of bank notes of any denomination shall cease to be legal tender save at an office or agency of the Bank.

The Bank shall not re-issue bank notes which are torn, defaced or excessively soiled.

Notwithstanding anything contained in any enactment or rule of law to the contrary, no person shall of right be entitled to recover from the Governor-General in Council or the Bank the value of any lost, stolen, mutilated or imperfect currency note of the Government of India or bank note:

Provided that the Bank may, with the previous sanction of the Governor-General in Council, prescribe the circumstances in and the conditions and limitations subject to which the value of such currency notes or bank notes may be refunded as of grace and the rules made under this proviso shall be laid on the table of both Houses of the Central Legislature.

The Bank shall not be liable to the payment of any stamp duty under the Indian Stamp Act, 1899, in respect of bank notes issued by it.

(1) If in the opinion of the Governor-General in Council the Bank fails to carry out any of the obligations imposed on it by or under this Act, he may, by notification in the Gazette of India, declare the Central Board to be superseded, and thereafter the general superintendence and direction of the affairs of the Bank shall be entrusted to such agency as the Governor General in Council may determine, and such agency may exercise the powers and do all acts and things which may be exercised or done by the Central Board under this Act.

(2) When action is taken under this section the Governor-General in Council shall cause a full report of the circumstances leading to such action and of the action taken to be laid before the Central Legislature at the earliest possible opportunity and in any case within three months from the issue of the notification superseding the Board.

No person in British India other than the Bank or, as expressly authorized by this Act, the Governor-General in Council shall draw, accept, make or issue any bill of exchange, hundi, promissory note or engagement for the payment of money payable to bearer on demand or borrow, owe or take up any sum or sums of money on the bills, hundis or notes payable to bearer on demand of any such person:

Provided that cheques or drafts, including hundis, payable to bearer on demand or otherwise may be drawn on a person's account with a banker, shroff or agent.

(1) Any person contravening the provisions of section 31 shall be punishable with fine which may extend to the amount of the bill, hundi, note or engagement in respect whereof the offence is committed.

(2) No prosecution under this section shall be instituted except on complaint made by the Bank.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Assets of the Issue Department.

(1) The assets of the Issue Department shall consist of gold coin, gold bullion, sterling securities, rupee coin and rupee securities to such aggregate amount as is not less than the total of the liabilities of the Issue Department as hereinafter defined.

(2) Of the total amount of the assets, not less than two-fifths shall consist of gold coin, gold bullion or sterling securities:

Provided that the amount of gold coin and gold bullion shall not at any time be less than forty crores of rupees in value.

(3) The remainder of the assets shall be held in rupee coin, Government of India rupee securities of any maturity and such bills of exchange and promissory notes payable in British India as are eligible for purchase by the Bank under sub-clause (*a*) or sub-clause (*b*) of clause (2) of section 17 or under clause (1) of section 18:

Provided that the amount held in Government of India rupee securities shall not at any time exceed one-fourth of the total amount of the assets or fifty crores of rupees, whichever amount is greater, or, with the previous sanction of the Governor-General in Council, such amount plus a sum of ten crores of rupees.

(4) For the purposes of this section, gold coin and gold bullion shall be valued at 8.47512 grains of fine gold per rupee, rupee coin shall be valued at its face value, and securities shall be valued at the market rate for the time being obtaining.

(5) Of the gold coin and gold bullion held as assets, not less than seventeen-twentieths shall be held in British India, and all gold coin and gold bullion held as assets shall be held in the custody of the Bank or its agencies:

Provided that gold belonging to the Bank which is in any other bank or in any mint or treasury or in transit may be reckoned as part of the assets.

(6) For the purposes of this section, the sterling securities which may be held as part of the assets shall be securities of any of the following kinds payable in the currency of the United Kingdom, namely:—

(*a*) balances at the credit of the Issue Department with the Bank of England;

(*b*) bills of exchange bearing two or more good signatures and drawn on and payable at any place in the United Kingdom and having a maturity not exceeding ninety days;

(*c*) government securities of the United Kingdom maturing within five years:

Provided that, for a period of two years from the date on which this Chapter comes into force, any of such last mentioned securities may be securities maturing after five years, and the Bank may, at any time before the expiry of that period, dispose of such securities notwithstanding anything contained in section 17.

Liabilities of the Issue Department.—(1) The liabilities of the Issue Department shall be an amount equal to the total of the amount of the currency notes of the Government of India and bank notes for the time being in circulation.

(2) For the purposes of this section any currency note of the Government of India or bank note which has not been presented for payment within forty years from the 1st day of April following the date of its issue shall be deemed not to be in circulation, and the value thereof shall, notwithstanding anything contained in sub-section (2) of section 23, be paid by the Issue Department to the Governor-General in Council or the Banking Department, as the case may be; but any such note, if subsequently presented for payment, shall be paid by the Banking Department, and any such payment in the case of a currency note of the Government of India shall be debited to the Governor-General in Council.

On the date on which this Chapter comes into force the Issue Department shall take over from the Governor-General in Council the liability for all the currency notes of the Government of India for the time being in circulation and the Governor-General in Council shall transfer to the Issue Department gold coin, gold bullion, sterling securities, rupee coin and rupee securities to such aggregate amount as is equal to the total of the amount of the liability so transferred. The coin, bullion and securities shall be transferred in such proportion as to comply with the requirements of section 33:

Provided that the total amount of the gold coin, gold bullion and sterling securities so transferred shall not be less than one-half of the whole amount transferred, and that the amount of rupee coin so transferred shall not exceed fifty crores of rupees:

Provided further that the whole of the gold coin and gold bullion held by the Governor-General in Council in the gold standard reserve and the paper currency reserve at the time of transfer shall be so transferred.

(1) After the close of any financial year in which the minimum amount of rupee coin held in the assets, as shown in any of the weekly accounts of the Issue Department for that year prescribed under sub-section (1) of section 53, is greater than fifty crores of rupees or one-sixth of the total amount of the assets as shown in that account, whichever may be the greater the Bank may deliver to the Governor-General in Council rupee coin up to the amount of such excess but not without his consent exceeding five crores of rupees, against payment of legal tender value in the form of bank notes, gold or securities:

Provided that if the Bank so desires and if the amount of gold coin, gold bullion and sterling securities in the assets does not at that time exceed one-half of the total assets, a proportion not exceeding two-fifths of such payment shall be in gold coin, gold bullion or such sterling securities as may be held as part of the assets under sub-section (6) of section 33.

(2) After the close of any financial year in which the maximum amount of rupee coin held in the assets, as so shown, is less than fifty crores of rupees or one-sixth of the total amount of the assets, as so shown, whichever may be

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the greater the Governor General in Council shall deliver to the Bank rupee coin up to the amount of such deficiency, but not without its consent exceeding five crores of rupees, against payment of legal tender value.

(1) Notwithstanding anything contained in the foregoing provisions, the Bank may, with the previous sanction of the Governor General in Council, for periods not exceeding thirty days in the first instance, which may, with the like sanction, be extended from time to time by periods not exceeding fifteen days, hold as assets gold coin, gold bullion or sterling securities of less aggregate amount than that required by sub-section (2) of section 33 and, whilst the holding is so reduced, the proviso to that sub-section shall cease to be operative:

Provided that the gold coin and gold bullion held as such assets shall not be reduced below the amount specified in the proviso to sub-section (2) of section 33 so long as any sterling securities remain held as such assets.

(2) In respect of any period during which the holding of gold coin, gold bullion and sterling securities is reduced under sub-section (1), the Bank shall pay to the Governor General in Council a tax upon the amount by which such holding is reduced below the minimum "prescribed by sub-section (2) of section 33; and such tax shall be payable at the bank rate for the time being in force, with an addition of one per cent. per annum when such holding exceeds thirty-two and a half per cent. of the total amount of the assets and of a further one and a half per cent. per annum in respect of every further decrease, of two and a half per cent. or part of such decrease:

Provided that the tax shall not in any event be payable at a rate less than six per cent. per annum.

The Governor General in Council shall undertake not to re-issue any rupee coin delivered under section 36 nor to put into circulation any rupees, except through the Bank and as provided in that section; and the Bank shall undertake not to dispose of rupee coin otherwise than for the purposes of circulation or by delivery to the Governor General in Council under that section.

(1) The Bank shall issue rupee coin on demand in exchange for bank notes and currency notes of the Government of India, and shall issue currency notes or bank notes on demand in exchange for coin which is legal tender under the Indian Coinage Act, 1906.

(2) The Bank shall, in exchange for currency notes or bank notes of five rupees or upwards, supply currency notes or bank notes of lower value or other coins which are legal tender under the Indian Coinage Act, 1906, in such quantities as may, in the opinion of the Bank, be required for circulation; and the Governor General in Council shall supply such coins to the Bank on demand. If the Governor General in Council at any time fails to supply such coins, the Bank shall be released from its obligations to supply them to the public.

Obligation to sell sterling.—The Bank shall sell, to any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon and pays the purchase price in legal tender currency, sterling for immediate delivery in London, at a rate not below one shilling and five pence and fortynine sixty-fourths of a penny for a rupee:

Provided that no person shall be entitled to demand to buy an amount of sterling less than ten thousand pounds.

Obligation to buy sterling.—The Bank shall buy, from any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon, sterling for immediate delivery in London, at a rate not higher than one shilling and six pence and three-sixteenths of a penny for a rupee:

Provided that no person shall be entitled to demand to sell an amount of sterling less than ten thousand pounds:

Provided further that no person shall be entitled to receive payment unless the Bank is satisfied that payment of the sterling in London has been made.

Cash reserves of scheduled banks.—(1) Every bank included in the Second Schedule shall maintain with the Bank a balance the amount of which shall not at the close of business on any day be less than five per cent. of the demand liabilities and two per cent. of the time liabilities of such bank in India as shown in the return referred to in sub-section (2).

Explanation.—For the purposes of this section liabilities shall not include the paid-up capital or the reserves, or any credit balance in the profits and loss account of the bank of the amount of any loan taken from the Reserve Bank.

(2) Every scheduled bank shall send to the Governor General in Council and to the Bank a return signed by two responsible officers of such bank showing—

(*a*) the amounts of its demand and time liabilities, respectively, in India,

(*b*) the total amount held in India in currency notes of the Government of India and bank notes,

(*c*) the amounts held in India in rupee coin and subsidiary coin, respectively,

(*d*) the amounts of advances made and of bills discounted in India, respectively and

(*e*) the balance held at the Bank,

at the close of business on each Friday or if Friday is a public holiday under the Negotiable Instruments Act, 1881, at the close of business on the preceding working day; and such return shall be sent not later than two working days after the date to which it relates:

Provided that where the Bank is satisfied that the furnishing of a weekly return under this sub-section is impracticable in the case of any scheduled bank by reason of the geographical position of the bank and its branches, the Bank may require such bank to furnish in lieu of a weekly return a monthly return to be dispatched not later than fourteen days after the end of the month to which it relates giving the details specified in this sub-section in respect of such bank at the close of business for the month.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(3) If at the close of business on any day before the day fixed for the next return, the balance held at the Bank by any scheduled bank is below the minimum prescribed in sub-section (1), such scheduled bank shall be liable to pay to the Bank in respect of each such day penal interest at a rate three per cent. above the bank rate on the amount by which the balance with the Bank falls short of the prescribed minimum, and if on the day fixed for the next return such balance is still below the prescribed minimum as disclosed by this return, the rates of penal interest shall be increased to a rate five per cent. above the bank rate in respect of that day and each subsequent day on which the balance held at the Bank at the close of business on that day is below the prescribed minimum.

(4) Any scheduled bank failing to comply with the provisions of sub-section (2) shall be liable to pay to the Governor General in Council or to the Bank, as the case may be, or to each, a penalty of one hundred rupees for each day during which the failure continues.

(5) The penalties imposed by sub-sections (3) and (4) shall be payable on demand made by the Bank, and, in the event of a refusal by the defaulting bank to pay on such demand, may be levied by a direction of the principal Civil Court having jurisdiction in the area where an office of the defaulting bank is situated, such direction to be made only upon application made in this behalf to the Court by the Governor General in Council in the case of a failure to make a return under sub-section (2) to the Governor General in Council, or by the Bank with the previous sanction of the Governor General in Council in other cases.

(6) The Governor General in Council shall, by notification in the Gazette of India, direct the inclusion in the Second Schedule of any bank not already so included which carries on the business of banking in British India and which—

(*a*) has a paid-up capital and reserves of an aggregate value of not less than five lakhs of rupees, and

(*b*) is a company as defined in clause (2) of section 2 of the Indian Companies Act, 1913, or a corporation or a company incorporated by or under any law in force in any place outside British India,

and shall by a like notification direct the exclusion from that Schedule of any scheduled bank the aggregate value of whose paid-up capital and reserve becomes at any time less than five lakhs of rupees, or which goes into liquidation or otherwise ceases to carry on banking business.

The Bank shall compile and shall cause to be published each week a consolidated statement showing the aggregate of the amounts under each clause of sub-section (2) of section 42 exhibited in the returns received from scheduled banks under that section.

The Bank may require any provincial co-operative bank with which it has any transactions under section 17 to furnish the return referred to in sub-section (2) of section 42, and if it does so, the provisions of sub-sections (4) and (5) of section 42 shall apply so far as may be to such co-operative bank as if it were a scheduled bank.

Agreement with the Imperial Bank—(1) The Bank shall enter into an agreement with the Imperial Bank of India which shall be subject to the approval of the Governor General in Council, and shall be expressed to come into force on the date on which this Chapter comes into force and to remain in force for fifteen years and thereafter until terminated after five years' notice on either side, and shall further contain the provisions set forth in the Third Schedule:

Provided that the agreement shall be conditional on the maintenance of a sound financial position by the Imperial Bank and that if, in the opinion of the Central Board, the Imperial Bank has failed either to fulfil the conditions of the Agreement or to maintain a sound financial position, the Central Board shall make a recommendation to the Governor General in Council, and the Governor General in Council, after making such further enquiry as he thinks fit, may issue instructions to the Imperial Bank with reference either to the agreement or to any matter which in his opinion involves the security of the Government monies or the assets of the Issue Department in the custody of the Imperial Bank, and in the event of the Imperial Bank disregarding such instructions may declare the agreement to be terminated.

(2) The agreement referred to in sub-section (1) shall, as soon as may be after it is made, be laid before the Central Legislature.

General Provisions.

The Governor General in Council shall transfer to the Bank rupee securities of the value of five crores of rupees to be allocated by the Bank to the Reserve Fund.

After making provision for bad and doubtful debts, depreciation in assets, contributions to staff and superannuation funds, and such other contingencies as are usually provided for by bankers, and after payment out of the net annual profits of a cumulative dividend at such rate not exceeding five per cent. per annum on the share capital as the Governor General in Council may fix at the time of the issue of shares, a portion of the surplus shall be allocated to the payment of an additional dividend to the shareholders calculated on the scale set forth in the Fourth Schedule and the balance of the surplus shall be paid to the Governor General in Council:

Provided that if at any time the Reserve Fund is less than the share capital, not less than fifty lakhs of rupees of the surplus, or the whole of the surplus if less than that amount shall be allocated to the Reserve Fund.

(1) Notwithstanding anything contained in the Indian Income-tax Act, 1922, or any other enactment for the time being in force relating to income-tax or super-tax, the Bank shall not be liable to pay income-tax or super-tax on any of its income, profits or gains.

Provided that nothing in this section shall affect the liability of any shareholder in respect of income-tax or super-tax.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(2) For the purposes of section 18 of the Indian Income-tax Act, 1922, and of any other relevant provision of that Act relating to the levy and refund of income-tax any dividend paid under section 47 of this Act shall be deemed to be "Interest on Securities."

The Bank shall make public from time to time the standard rate at which it is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under this Act.

(1) Not less than two auditors shall be elected and their remuneration fixed at the annual general meeting. The auditors may be shareholders, but no Director or other officer of the Bank shall be eligible during his continuance in office. Any auditor shall be eligible for re-election on quitting office.

(2) The first auditors of the Bank may be appointed by the Central Board before the first annual general meeting and, if so appointed, shall hold office only until that meeting. All auditors elected under this section shall severally be, and continue to act as, auditors until the first annual general meeting after their respective elections:

Provided that any casual vacancy in the office of any auditor elected under this section may be filled by the Central Board.

Without prejudice to anything contained in section 50, the Governor General in Council may at any time appoint the Auditor General or such auditors as he thinks fit to examine and report upon the accounts of the Bank.

Every auditor shall be supplied with a copy of the annual balance-sheet, and it shall be his duty to examine the same, together with the accounts and vouchers relating thereto; and every auditor shall have a list delivered to him of all books kept by the Bank, and shall at all reasonable times have access to the books, accounts and other documents of the Bank, and may, at the expense of the Bank if appointed by it or at the expense of the Governor General in Council if appointed by him, employ accountants or other persons to assist him in investigating such accounts, and may, in relation to such accounts, examine any Director or officer of the Bank.

(2) The auditors shall make a report to the shareholders or to the Governor General in Council, as the case may be, upon the annual balance-sheet and accounts, and in every such report they shall state whether, in their opinion, the balance-sheet is a full and fair balance-sheet containing all necessary particulars and properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, and, in case they have called for any explanation or information from the Central Board, whether it has been given and whether it is satisfactory. Any such report made to the shareholders shall be read together with the report of the Central Board, at the annual general meeting.

Returns.—(1) The Bank shall prepare and transmit to the Governor General in Council a weekly account of the Issue Department and of the Banking Department in the form set out in the Fifth Schedule or in such other form as the Governor General in Council may, by notification in the Gazette of India, prescribe. The Governor General in Council shall cause these accounts to be published weekly in the Gazette of India.

(2) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Governor General in Council a copy of the annual accounts signed by the Governor, the Deputy Governors and the Chief Accounting Officer of the Bank, and certified by the auditors, together with a report by the Central Board on the working of the Bank throughout the year, and the Governor General in Council shall cause such accounts and report to be published in the Gazette of India.

(3) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Governor General in Council a statement showing the name, address and occupation of, and the number of shares held by, each shareholder of the Bank.

Agricultural Credit Department.—The Bank shall create a special Agricultural Credit Department the functions of which shall be—

(*a*) to maintain an expert staff to study all questions of agricultural credit and be available for consultation by the Governor General in Council, Local Governments, provincial co-operative banks, and other banking organisations.

(*b*) to co-ordinate the operations of the Bank in connection with agricultural credit and its relations with provincial co-operative banks and any other banks or organisations engaged in the business of agricultural credit.

(1) the Bank shall, at the earliest practicable date and in any case within three years from the date on which this Chapter comes into force, make to the Governor General in Council a report, with proposals, if it thinks fit, for legislation, on the following matters, namely:—

(*a*) the extension of the provisions of this Act relating to scheduled banks to persons and firms, not being scheduled banks, engaged in British India in the business of banking, and

(*b*) the improvement of the machinery for dealing with agricultural finance and methods for effecting a closer connection between agricultural enterprise and the operations of the Bank.

(2) When the Bank is of opinion that the international monetary position has become sufficiently clear and stable to make it possible to determine what will be suitable as a permanent basis for the Indian monetary system and to frame permanent measures for a monetary standard it shall report its views to the Governor General in Council.

(1) The Local Board of any area may at any time require any shareholder who is registered on the register for that area to furnish to the Local Board within a specified time, not being less than thirty days, a declaration, in such form as the Central Board may by regulations prescribe, giving particulars of all shares on the said register of which he is the owner,

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(2) If it appears from such declaration that any shareholder is not the owner of any shares which are registered in his name, the Local Board may amend the register accordingly.

(3) If any person required to make a declaration under sub-section (1) fails to make such declaration within the specified time, the Local Board may make an entry against his name in the register recording such failure and directing that he shall have no right to vote, either under section 9 or section 14, by reason of the shares registered in his name on that register.

(4) Whoever makes a false statement in any declaration furnished by him under sub-section (1) shall be deemed to have committed the offence of giving false evidence defined in section 191 of the Indian Penal Code, and shall be punishable under the second paragraph of section 193 of that Code.

(5) Nothing contained in any declaration furnished under sub-section (1) shall operate to affect the Bank with notice of any trust, and no notice of any trust expressed, implied or constructive shall be entered on the register or be receivable by the Bank.

(6) Until Local Boards have been constituted under section 9 the powers of a Local Board under this section shall be exercised by the Central Board in respect of any area for which a Local Board has not been constituted.

(1) Nothing in the Indian Companies Act, 1913, shall apply to the Bank, and the Bank shall not be placed in liquidation save by order of the Governor General in Council and in such manner as he may direct.

(2) In such event the Reserve Fund and surplus assets, if any, of the Bank shall be divided between the Governor General in Council and the shareholders in the proportion of seventy-five per cent. and twenty-five per cent. respectively:

Provided that the total amount payable to any shareholder under this section shall not exceed the paid-up value of the shares held by him by more than one per cent. for each year after the commencement of this Act subject to a maximum of twenty-five per cent.

(1) The Central Board may, with the previous sanction of the Governor General in Council, make regulations consistent with this Act to provide for all matters for which provision is necessary or convenient for the purpose of giving effect to the provisions of this Act.

(2) In particular and without prejudice to the generality of the foregoing provision, such regulations may provide for all or any of the following matters, namely:—

(a) the holding and conduct of elections under this Act, including provisions for the holding of any elections according to the principle of proportional representation by means of the single transferable vote;

(b) the final decision of doubts or disputes regarding the qualifications of candidates for election or regarding the validity of elections;

(c) the maintenance of the share register, the manner in which and the conditions subject to which shares may be held and transferred, and, generally, all matters relating to the rights and duties of shareholders;

(d) the manner in which general meetings shall be convened, the procedure to be followed thereat and the manner in which votes may be exercised;

(e) the manner in which notices may be served on behalf of the Bank upon shareholders or other persons;

(f) the manner in which the business of the Central Board shall be transacted, and the procedure to be followed at meetings thereof;

(g) the conduct of business of Local Boards and the delegation to such Boards of powers and functions;

(h) the delegation of powers and functions of the Central Board to the Governor, or to Deputy Governors, Directors or officers of the Bank;

(i) the formation of Committees of the Central Board, the delegation of powers and functions of the Central Board to such Committees, and the conduct of business in such Committees;

(j) the constitution and management of staff and superannuation funds for the officers and servants of the Bank;

(k) the manner and form in which contracts binding on the Bank may be executed;

(l) the provision of an official seal of the Bank and the manner and effect of its use;

(m) the manner and form in which the balance-sheet of the Bank shall be drawn up and in which the accounts shall be maintained;

(n) the remuneration of Directors of the Bank;

(o) the relations of the scheduled banks with the Bank and the returns to be submitted by the scheduled banks to the Bank;

(p) the regulation of clearing-houses for the scheduled banks;

(q) the circumstances in which, and the conditions and limitations subject to which the value of any lost, stolen, mutilated or imperfect currency note of the Government of India or bank note may be refunded; and

(r) generally, for the efficient conduct of the business of the Bank.

(3) Copies of all regulations made under this section shall be available to the public on payment.

In the Indian Coinage Act, 1906, for section 11 the following section shall be substituted, namely:—

"11. Gold coins, coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall not be legal tender in British India in payment or on account, but such coins shall be received

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

by the Reserve Bank of India at its offices, branches and agencies in India at the bullion value of such coins calculated at the rate of 8.47512 grains troy of fine gold per rupee."

The Indian Paper Currency Act, 1923, the Indian Paper Currency (Amendment) Act, 1923, the Indian Paper Currency (Amendment) Act, 1925, and the Currency Act, 1927 are hereby repealed.

In sub-section (3) of section 11 of the Indian Companies Act, 1913, after the word "Royal" the words "Reserve Bank" shall be inserted.

The Reserve Bank began work with the opening of the financial year 1935-36. The Bank made a net profit of Rs. 53,42,100 for the year ended December 31, 1936.

REPORT FOR HALF-YEAR ENDED JUNE 30th, 1940

The report of the Central Board of Directors of the Reserve Bank of India for the half-year ended June 30th, 1940 (consequent upon a change in the accounting year) states that after payment of expenses of administration and provision for sundry liabilities and contingencies, the net profit for the half-year amounts to Rs.29,28,971. Of this amount, the sum of Rs.8,75,000 is utilised for payment to shareholders of a dividend at the rate of 1¾ per cent., being the cumulative rate fixed by the Central Government in accordance with Section 5 of the Reserve Bank of India (Closing of Annual Accounts) Act, 1940, read with Section 47 of the Reserve Bank of India Act, 1934, leaving a surplus of Rs.20,53,971 for payment to the Central Government in accordance with the said sections.

Number of Shareholders.

The total number of shareholders decreased from 57,192 to 56,057 during the half-year, as a result of which the average number of shares held by each shareholder increased from 8.7 to 8.9. Thus the tendency for the Bank's shares to become concentrated in fewer hands, already referred to in previous reports, continued. To remedy this undesirable tendency, the Reserve Bank Act was amended in March 1940. Under this amendment no person can be registered as a shareholder in respect of any additional shares acquired after March 26th, 1940 by him whether in his own name or jointly with another person or persons, so as to bring the total to more than twenty thousand rupees. Further, no shareholder is entitled to any dividend on any such additional share held by him nor can he exercise any rights in respect of such shares except for the purpose of selling them.

No new denominations of India or Burma bank notes were issued during the half-year nor was any change made in the prevailing pattern of the notes. (In the latter part of 1940, however, in consequence of the increased hoarding of silver rupees induced by ill-informed doubts as to the course of the war, Government resorted to the issue of one rupee notes in large quantities in order to counteract the shortage of silver rupees in circulation). With the growth in the currency requirements of the country consequent on the war and its stimulus to trade and industry, currency continued to expand rapidly during the half-year and the total amount of notes in circulation at the end of June 1940 amounted to Rs.247.73 crores as compared with Rs.184.62 crores at the corresponding period of the previous year.

Loan Programme.

On June 4th, 1940, the Government of India announced their first Defence borrowing programme to help finance the increased cost of the War and India's rapidly growing defence expenditure. It consisted of the issue of 10 year Defence Savings Certificates, six-year-Defence Bonds and 3 year Interest-free Defence Bonds. These last were issued for people who wished to help Government in the emergency but who for patriotic or religious reasons were unwilling to accept interest on their money. This loan programme met with a ready response from the investing public, so much so that in his Budget speech in February 1941 the Finance Member was able to announce that total receipts within a period of eight months had amounted to over Rs.50 crores—a figure which testified to the strength of India's credit structure. As from February 1st, 1941 Government issued on terms slightly more favourable to the tax-payer a second 3 per cent. Defence Loan with a slightly longer currency and repayable at par, the first series having been closed with a total of nearly Rs.45 crores. By the end of April 1941, total subscriptions to all Defence Loans exceeded Rs. 55 crores.

Scheduled Banks.

The development of the scheduled banks continued during the first half-year of 1940. There was no addition to the schedule, but two banks were excluded in terms of Section 42(6) of the Act, thereby reducing the total number of scheduled banks from 61 to 59. One of these banks was excluded as it amalgamated with another scheduled bank while the other went out of schedule on being wound up by the Court. In view of certain difficulties experienced by them in including banks in the second schedule, the Government of India reviewed the procedure for inclusion of banks in the schedule and decided that the words "aggregate value of paid-up capital and reserves" occurring in Section 42(6) of the Reserve Bank Act should be interpreted to mean the real or the exchangeable value of the paid-up capital and reserves and not merely book value as shown in the balance sheet. In pursuance of this decision a new procedure for inclusion was drawn up under which the Reserve Bank agreed to co-operate with Government in valuing the paid-up capital and reserves, and also in inspecting the applying bank's books if deemed desirable.

India is pre-eminently an agricultural country, and that fact dominates the course of its trade. The great export staples are the produce of the soil—cotton, jute and seeds. If we look back on the course of Indian trade over a long period of years we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such years as 1896-97 and 1899-1900. Much of the cultivable area of the Punjab is under irrigation, and huge new works have utilised the waters of the Sutlej, and of the Indus in Sind. Whilst these great works have been carried out to spill on the land the floods of the snowfed rivers of the North, other works of a less imposing character have safeguarded the arid tracts of the South. A chain of storage lakes arrests the rains of the Western Ghats and through canals spreads them over the parched lands of the Deccan. The rivers of the South like the Cauvery are harnessed to preserve their flood waters for Madras.

But whilst India is pre-eminently an agricultural country, she ranks as one of the eight greatest industrial countries of the world. Her manufacturing industries, formerly few in number and concentrated in a few areas, have of recent years multiplied and spread. The war, moreover, has given a great impetus to industrial initiative, with the result that many new enterprises have been added to the staple industries. Of these latter, the largest is the cotton textile industry, which has its home in the town and Island of Bombay, with important subsidiary centres at Ahmedabad, Sholapur and Nagpur. Next in importance is the jute industry. Raw jute is a virtual monopoly of Bengal, and the jute mills are concentrated in and near Calcutta. The metallurgical industry is of more recent growth. The principal centre is Jamshedpur, the seat of the works of the Tata Iron and Steel Company where subsidiary industries have sprung up to utilise the products of the blast furnaces and mills. A very large proportion of the jute manufactures is exported. The cotton textile industry has markets overseas in the Far East, East Africa and the Middle East, but the mills find their principal outlet in India itself, and even there they are subject to severe competition from Japan. The iron and steel industry is for the most part a home industry though large quantities of Indian pig iron are shipped to the Far East. Since the war the steel industry has made great strides and produces armaments for the Empire's campaigns in several theatres of war. The sugar manufacturing industry has grown by leaps and bounds in recent years. Therefore, whilst India is still in the main an agricultural country, three-quarters of her population drawing their sustenance from the soil, her manufacturing industries are of large and growing importance, and their prosperity every year affects in an increasing degree the general prosperity of the people.

I.—GENERAL.

Agricultural Conditions in India.—In spite of her rapid industrialization in the last twenty-five years India still remains predominantly an agricultural country and her well-being greatly depends on the prosperity of her large agricultural population. That prosperity was naturally greatly affected by the outbreak of war in September 1939. The war had begun to cast its shadow for several months before it actually broke out. The economic system had begun to feel the shocks and jerks of the trouble that was brewing in the underworld long before the explosion took place. A period in which the chances of peace and war were so delicately balanced was hardly conducive to economic recovery. Business conditions, therefore, continued to be in the grip of the recession which had started in the latter half of 1937 and which was only temporarily interrupted in June 1938. Commodity prices in India no doubt showed a slight recovery in the first five months of 1939-40, but with the exception of a few commodities like jute, sugar and tea, the prices of agricultural produce in general still remained on a low level up to August 1939. The foreign trade position with regard to many staple articles of export was satisfactory as compared with the previous year, but its effect was largely nullified by the growing tension in the international sphere and the consequent deterioration in industrial conditions. The situation, however, was radically altered by the outbreak of war in September 1939, and the whole outlook was transformed from pessimism and nervousness into optimism. There was a sudden rise in prices accompanied by a spate of speculative activity in commodity markets A slight reaction was noticeable in October, but by the end of November the upward movement again gathered force and by December the prices of many agricultural commodities reached levels which were untouched for many years past. This boom of the last quarter of 1939 was, however, largely an outcome of speculative influences and was, therefore, essentially of a temporary character. By the latter half of January, prices began to come down, as natural tendencies to reaction asserted themselves, aggravated by special circumstances including the announcement regarding the Excess Profits Tax, so that speculators began to unload their holdings. During the last quarter of 1939-40, the prices of many agricultural commodities assumed a sharp downward trend, thus wiping out a large part of the gain made in the preceding quarter, though the levels prevailing at the end of the year were still substantially higher than those before the outbreak of war.

It would appear that of all the agricultural commodities in India, raw jute experienced the most violent fluctuations during the year under review. The average price of jute, ready firsts, rose from Rs.35-14-9 in 1938-39 to Rs.62-7-8 in 1939-40 or a rise of 74 per cent. The price of jute reached its peak in December 1939 and remained generally on a high level in the next two months, but fell precipitously in March 1940 and yet the quotation in that month was Rs.66-4-0 which was 40 per cent. higher than what it was a year before. The price of raw cotton also fluctuated widely. By the beginning of January 1940, the quotation for Broach M. G. F. G., had more than doubled itself as compared with March

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

1939, though the gain was reduced to 60 per cent. by the end of the year under review. Over the year 1939-40 as a whole, the price of raw cotton averaged 36 per cent. higher than in the preceding year. In the case of wheat, the effects of war conditions were reinforced by the continued drought in the wheat growing areas in India till December 1939 when the quotation for white wheat at Lyallpur stood at Rs.3-9-0 per maund as compared with Rs.2-4-3 in March 1939, or a rise of nearly 57 per cent. The widespread rainfall in January 1940, however, changed the crop outlook and the bearish world situation also adversely affected the price of wheat. The quotation, therefore, dropped down to Rs.3-1-3 in March 1940, still showing an advance of 36 per cent. as compared with the same month of the preceding year. On an average, the price of wheat was 27 per cent. higher in 1939-40 than in 1938-39. Oilseeds also participated in this general upward movement but the rise in their case was not so conspicuous as in the case of jute, cotton or wheat, because the severe reduction in exports acted as a constant drag on their price level. The average price of groundnuts rose from Rs.24-8-10 per candy of 500 lbs. in 1938-39 to Rs.29-5-4 in 1939-40 or a rise of 20 per cent. and that of linseed from Rs.7-1-3 per cwt. in the preceding year to Rs.8-6-8 in the year under review or a rise of 20 per cent. Rice continued to be a steady market almost throughout the year. A gradual rise since the beginning of the year which was due to the short crop of 1938-39 took the quotation for Ballam No. 1 to Rs.5-6-0 per maund in December 1939 as compared with Rs.4-0-0 in preceding March and though it fell in the next three months, the closing level of Rs.4-12-0 in March 1940 was still 19 per cent. higher than what it was a year before. Thus, the war was responsible for a fairly general and substantial rise in the prices of agricultural produce in India, though it is difficult to say to what extent the actual tillers of the soil received the benefit of the rise in prices.

Balance of Trade:—The turnover of India's overseas trade in merchandise for the year 1939-40 recorded a substantial improvement as compared with the preceding year. There was an increase of Rs.44 crores, or of 26 per cent. in exports and of Rs.13 crores, or 9 per cent. in imports, resulting in an improvement of about Rs.31 crores in the favourable balance of trade in merchandise in the year under review. The surplus of exports over imports in 1939-40 was nearly Rs.48 crores as compared with about Rs. 17½ crores in 1938-39. A survey of the monthly figures shows that, with the exception of April, 1939, exports in each month of the year under review exceeded imports.

The following table shows in detail the items entering into the balance of trade.

(In lakhs of Rupees.)

	India excluding Burma.			India including Burma.		
	1937-38.	1938-39.	1939-40.	1937-38.	1938-39.	1939-40.

Cotton manufactures (Rs. 14,05 lakhs.)—Imports of cotton manufactures into British India were valued at Rs.14,05 lakhs during 1939-40 as compared with Rs.14,15 lakhs in the preceding year and showed a decline of Rs.10 lakhs. Imports of twist and yarn advanced in quantity from 36 million lbs. in 1938-39 to 41 million lbs. in 1939-40, or by 14 per cent., the corresponding increase in value being from Rs.2,93 lakhs to Rs. 3,52 lakhs, or 20 per cent. The average declared value per lb. of imported twist and yarn rose from 12 as. 10 ps. in 1938-39 to 13 as. 8 ps. in the year under review.

Imports consisted largely of two-folds (doubles) arrivals of which totalled 29.5 million lbs. and represented 72 per cent. of the total quantity of twist and yarn imported during the year under review as against 24.0 million lbs. or 66 per cent. in 1938-39. Imports of counts above No. 40 were also on a larger scale, while those of counts No. 31-40 were very much reduced. Imports of other descriptions of twist and yarn are comparatively small. The increase in Indian production, noticed in the preceding year's Review, received a slight set-back in 1939-40, the total output being 1,234 million lbs. as compared with 1,303 million lbs. in 1938-39. With the exception of unspecified descriptions of yarn, all other classes shared in this decline. Of the total imports, Japan supplied 66 per cent. as aginst 58 per cent. in the preceding year, while the shares of China and the United Kingdom dropped from 8 and 13 per cent. to 26 and 7 per cent. respectively.

Imports of cotton piecegoods into British India totalled 579 million yards in 1939-40 and showed a decrease of 68 million yards or 11 per cent. as compared with the preceding year. The value of these imports declined by 6 per cent. from Rs.10,27 lakhs to Rs.9,65 lakhs. The decrease was distributed over all the three main descriptions of piecegoods, the fall in white and grey goods being comparatively greater than in coloured goods. The United Kingdom sustained heavy losses in each of the main classes. The decrease in the case of imports from Japan was mostly confined to white goods. Expressed in percentages, imports of grey goods from the United Kingdom fell by 70 per cent. over those in 1938-39, the corresponding decline in the case of Japan being only 2 per cent. In the case of white goods, which are largely imported from the United Kingdom, Japan reduced her supplies by 39 per cent. and the United Kingdom by 20 per cent. Under coloured goods, imports from the United Kingdom fell by 26 per cent. and those from Japan, by barely 1 per cent.

All the descriptions under grey and white goods, with the exception of a relatively unimportant item, drills and jeans under white, recorded decreases. In the coloured sections, however, there were appreciable increases under shirtings, drills and jeans and twills, while all other classes showed a decline.

The following table gives the percentage shares of the United Kingdom and Japan in the imports of piecegoods during the last three years :—

	Grey		White		Coloured, etc.	
	United Kingdom.	Japan.	United Kingdom.	Japan.	United Kingdom.	Japan.
1937-38 ..	18·0	81·8	63·6	32·1	44·6	51·8
1938-39 ..	11·6	88·0	57·0	39·1	34·8	61·0
1939-40 ..	3·8	94·7	61·4	32·2	25·6	60·6

The United Kingdom retained the position as the leading supplier in bleached goods, but she lost considerable ground in grey and coloured goods, the two lines in which Japanese competition was more effective than in the other.

Imports of fents declined from 4.9 million lbs. valued at Rs.35 lakhs in 1938-39 to 4.1 million lbs. valued at Rs.31 lakhs in the year under review. These consisted largely of cotton fents, imports of which totalled 4.0 million lbs. (20.2 million yards) as against 4.8 million lbs. (23.7 million yards) in 1938-39. Imports of fents of silk or artificial silk or mixture thereof were prohibited throughout the year 1939-40, while fents of other materials were imported to the extent of 74,000 lbs. as against 99,000 lbs. in 1938-39. Supplies of fents of all descriptions from Japan and the United States of America were on a reduced scale being valued at Rs.14 lakhs and Rs.6 lakhs as compared with Rs.15 lakhs and Rs.9 lakhs, respectively, in 1938-39. Imports from the United Kingdom, amounting to 1.2 million lbs. showed a small decline in quantity, the value remaining steady at Rs.10 lakhs.

Wool, raw and manufactured (Rs. 2,16 lakhs).—There was a decline of Rs.66 lakhs in the imports of wool and woollens which were valued at Rs.2,16 lakhs in 1939-40, as compared with Rs.2,82 lakhs in the preceding year. Imports of raw wool, generally for consumption in Indian mills, totalled 7.7 million lbs. valued at Rs.75 lakhs as compared with 7.3 million lbs. valued at Rs.62 lakhs in 1938-39. Supplies from Australia advanced from 4.4 million lbs. (36 lakhs) to 4.9 million lbs. (Rs.49 lakhs), while those from the United Kingdom declined from 2.5 million lbs. (Rs.25 lakhs) to 1.9 million lbs. (Rs.23 lakhs). Yarn and knitting wool was, however, in less demand and imports fell from 3.4 million lbs. to 2.9 million lbs. Japan was the leading supplier in this line and sent 1.7 million lbs. of worsted yarn and 893,000 lbs. of knitting wool in 1939-40. Arrivals from the United Kingdom consisted mainly of 150,000 lbs. of knitting wool. Imports of woollen and worsted piecegoods declined to 2.3 million yards (1.1 million lbs.) valued at Rs.35 lakhs from 2.5

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

million yards (1.4 million lbs.) valued at Rs.45 lakhs in 1938-39. Receipts from Japan advanced from 1,254,000 yards to 1,535,000 yards, but the value of the consignment fell from Rs.15 lakhs to Rs.14 lakhs. There were reduced imports from the United Kingdom which amounted to 651,000 yards valued at Rs.18 lakhs. Arrivals from other countries included Rs. 2 lakhs from Italy as against Rs.4 lakhs in the preceding year, while German contribution fell from Rs. 2 lakhs to Rs.¼ lakh. Imports of woollen goods mixed with other materials also fell from 2.3 million yards valued at Rs.32 lakhs to 1.2 million yards valued at Rs.16 lakhs in the year under review, of which the United Kingdom supplied 698,000 yards valued at Rs.9 lakhs as against 1.7 million yards valued at Rs.22 lakhs in 1938-39. Supplies from Japan and Italy were smaller than in the preceding year and were valued at Rs. 3 lakhs and Rs. 2½ lakhs respectively, in the year under review. Imports from Germany were practically insignificant.

Imports of foreign carpets and floor rugs were valued at Rs.2 lakhs in 1939-40 as in the preceding year. Of the total value of these imports in the year under review, the United Kingdom supplied to the extent of Rs.1 lakh or 50 per cent. The remainder came mainly from Iran and France.

Imports of shawls and lohis numbered 148,000 valued at Rs.4 lakhs as against 479,000 valued at Rs.14 lakhs in the preceding year. Japan almost monopolised the trade in 1939-40 displacing Germany whose share fell from 28 per cent. to 6 per cent. in value.

Imports of blankets and rugs, other than floor rugs, declined sharply from 4.1 million lbs. valued at Rs.32 lakhs to 1.7 million lbs. valued at Rs.12 lakhs in 1939-40. Italy was, as usual, the largest supplier, consignments from that country being valued at Rs.11 lakhs as against Rs.30 lakhs in the preceding year.

Of the total imports of woollen hosiery valued at Rs.10 lakhs in 1939-40 as against Rs.13 lakhs in the preceding year, Japan supplied Rs.5 lakhs and the United Kingdom, Rs. 4 lakhs.

Artificial Silk (Rs. 4,59 lakhs).—The total value of the imports of artificial silk and manufactures advanced sharply from Rs.2,24 lakhs in 1938-39 to Rs.4,59 lakhs in the year under review. Artificial silk yarn was imported to the extent of 30.8 million lbs. valued at Rs.2,12 lakhs as compared with 17.2 million lbs. valued at Rs.96 lakhs in the preceding year, showing an improvement of 79 per cent. in quantity and 121 per cent. in value. Japan regained her leading position and supplied 21.9 million lbs. as against 6.5 million lbs. in 1938-39, while imports from Italy dropped from 10.5 million lbs. to 8.7 million lbs. The average declared value per lb. of imports from Japan and Italy during 1939-40 was 11 as. 5 p. and 9 as. 8 p., the respective figures for the preceding year being 10 as. 2 p. and 8 as. 1 p. Imports of piecegoods, made entirely of artificial silk, also rose from 28.6 million yards valued at Rs. 98 lakhs in 1938-39 to 54.3 million yards valued at Rs.2,11 lakhs in the year under review. Of these, Japan supplied 51.6 million yards or 95 per cent. (Rs.1,95 lakhs) as against 26.3 million yards or 92 per cent. (Rs.87 lakhs) in the preceding year. The remainder came chiefly from the United Kingdom, imports from that country being valued at Rs.7 lakhs as against Rs.6 lakhs in 1938-39. The declared value, per yard, of imports from Japan was 6 as. 1 p. as compared with 5 as. 4 p. in 1938-39. Imports of goods of artificial silk mixed with other materials totalled 6.7 million yards valued at Rs.28 lakhs as compared with 5.0 million yards valued at Rs.22 lakhs a year ago. Japan increased her supplies to 5.9 million yards (Rs.20 lakhs) from 4.3 million yards (Rs.14 lakhs) in 1938-39. The remainder came mainly from the United Kingdom (Rs.4 lakhs) and Germany and Italy (Rs.1 lakh each). The average declared value per yard, of the imports from Japan was 5 as. 7 p. and of those from the United Kingdom, 12 as. 9 p., as compared with 5 as. 2 p. and 13 as. 2 p., respectively, in the preceding year.

Silk, raw and manufactured (Rs. 1,82 lakhs).—The total value of the imports of silk, raw and manufactured, receded further to Rs.1,82 lakhs in the year under review. Imports of raw silk declined in quantity from 2.2 million lbs. in 1938-39 to 2.0 million lbs. in the year under review, but rose in value from Rs.62 lakhs to Rs.63 lakhs. China continued to be the principal source of supply and increased her contribution from 1.2 million lbs. (Rs.32 lakhs) to 1.4 million lbs. (Rs.42 lakhs). Japan was practically out of the market consignments from that country having been valued at Rs.12 lakhs in 1938-39. As a result of the imposition of duty on the imports of raw silk from Burma in the previous year, arrivals from that country dropped from 418,000 lbs. to 3,000 lbs. Arrivals from other countries included 643,000 lbs. of raw silk valued at Rs.21 lakhs from Hongkong as against 223,000 lbs. valued at Rs.6 lakhs in the preceding year. There was a decrease in the imports of silk yarn which amounted to 910,000 lbs. (Rs.24 lakhs) as compared with 1,120,000 lbs. (Rs.32 lakhs) in 1938-39. Supplies from Japan fell from 588,000 lbs. valued at Rs.22 lakhs to 257,000 lbs. valued at Rs.11 lakhs. The remainder came chiefly from China (Rs.9 lakhs) and Italy (Rs.2 lakhs). Imports of silk piecegoods also declined from 16.9 million yards valued at Rs.67 lakhs to 9.1 million yards valued at Rs.54 lakhs in 1939-40 of which Japan supplied 4.9 million yards (Rs.31 lakhs) as against 11.8 million yards (Rs.45 lakhs). Imports from China were valued at Rs.19 lakhs as compared with Rs.17 lakhs in the preceding year. There were however, increased imports of goods of silk mixed with other materials amounting to 8.1 million yards valued at Rs.39 lakhs in 1939-40 as against 5.9 million yards valued at Rs.31 lakhs in 1938-39. China increased her contribution from 1.6 million yards (Rs.9 lakhs) to 5.0 million yards (Rs.21 lakhs), while Japan reduced her supplies from 3.8 million yards (Rs. 18 lakhs) to 2.7 million yards (Rs.14 lakhs) in 1939-40.

Iron and Steel (Rs. 6,09 lakhs).—In the beginning of the year 1939 the conditions in the iron and steel industry remained somewhat quiet, but with the growth of armament requirements production of both pig iron and steel in the United Kingdom, as far as could be judged from available information, reached very high levels. At the outbreak of the war, the industry was placed under State control and deliveries to exporters were licensed. Production in Belgium, Luxemburg and in the United States of America also showed marked increases during the year.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The output of pig iron in India advanced from 1,576,000 tons in 1938-39 to 1,838,000 tons in 1939-40 or by 17 per cent. and that of steel ingots from 977,000 tons to 1,070,000 tons or by 10 per cent. The production of finished steel, which excludes the production of some re-rolling mills using either imported or Tata's *semis*, also showed an increase from 726,000 tons to 804,000 tons, the improvement being noticeable in almost all the descriptions under this class.

Imports of foreign pig iron into India, mostly from the United Kingdom, declined from 2,800 tons valued at Rs.3 lakhs in 1938-39 to 1,600 tons valued at Rs.2 lakhs in the year under review. The declared value, per ton, of imported pig iron was Rs.110 as against Rs.124 in 1938-39. Imports of ferro-alloys rose from 4,200 tons valued at Rs.14 lakhs in 1939-40. Manufactured iron and steel (excluding pig iron and old iron and steel) recorded a further decrease from 264,000 tons to 255,000 tons in quantity and from Rs.6,62 lakhs to Rs.6,05 lakhs in value. The declared value, per ton, was Rs.237 during 1939-40 as compared with Rs.251 in the preceding year.

As regards the classes of iron and steel goods imported into India, the largest decreases were in beams, channels, pillars, etc., sheets and plates, nails, rivets etc., and bolts and nuts, while there were increases under hoops and strips and fencing materials. Galvanised sheets and plates were imported to the extent of 15,600 tons valued at Rs.38 lakhs as against 25,700 tons valued at Rs.59 lakhs in 1938-39. There was also a decrease in the imports of tin plates which amounted to 6,500 tons valued at Rs.25 lakhs in 1939-40 as compared with 14,000 tons valued at Rs.49 lakhs in the preceding year. Imports of sheets and plates, not galvanised or tinned, declined from 26,000 tons to 16,700 tons, the corresponding decrease in value being from Rs.52 lakhs to Rs.34 lakhs. Construction materials—beams, channels, pillars, girders and bridgework—came in smaller quantities, imports having totalled 10,000 tons valued at Rs.16 lakhs in 1939-40 as compared with 18,700 tons valued at Rs.31 lakhs in 1938-39. There was also a decrease in the imports of steel angles and tees which amounted to 6,200 tons valued at Rs.10 lakhs as against 9,400 tons valued at Rs.15 lakhs in the preceding year. On the other hand, imports of steel bars, chiefly from the United Kingdom, advanced from 17,000 tons in 1938-39 to 21,000 tons in 1939-40, but with a decrease in value from Rs.44 lakhs to Rs.42 lakhs. Imports of hoops and strips improved from 24,000 tons to 33,200 tons, and increase of about 36 per cent. in quantity, the corresponding rise in value being from Rs.49 lakhs to Rs.73 lakhs of 49 per cent. Among other items, imports of bolts and nuts; nails, rivets and washers and rails, chairs and fishplates, showed decreases, while wire nails recorded an increase over the preceding year.

A feature of the year's trade is the very large importation of *semis*—ingots, blooms, billets and slabs—from Australia amounting to 37,000 tons as compared with 12,000 tons in 1938-39. As might be expected, there was a heavy reduction in the imports from the United Kingdom from 136,000 tons in 1938-39 to 96,000 tons in 1939-40 and concurrently her relative share in total imports dropped from 50.0 to 36.9 per cent. Imports from Germany and Belgium also fell from 30,000 tons (or 11 per cent.) and 33,000 tons (or 12.1 per cent.) to 17,000 tons (or 6.5 per cent.) and 30,000 tons (or 11.5 per cent.), respectively. France, on the other hand, increased her share from 10,000 tons (or 3.7 per cent.) to 13,000 tons (or 5 per cent.) Imports from the United States of America also rose from 9,000 tons in 1938-39 to 13,000 tons in 1939-40, her percentage share in the total trade having risen from 3.3 to 5.0. Among other countries, imports from Japan, consisting largely of galvanized sheets, rose from 17,000 tons to 24,000 tons. These imports represented 9.2 per cent. of the total trade as against 6.2 per cent. in 1938-39.

The following table shows the quantities and values of the principal descriptions of iron and steel imported into British India during the last three years :—

	Quantity Ton (000)			Value Rs. (lakhs).		
	1937-38.	1938-39.	1939-40.	1937-38.	1938-39.	1939-40.

Machinery and Millwork (Rs. 15,37 lakhs).—There was a sharp decline in the imports of machinery and millwork including beltings and printing machinery in 1939-40 which were valued at Rs.15,37 lakhs as compared with Rs.19,72 lakhs in 1938-39. The following table shows the details for the last three years :—

—	1937-38.	1938-39.	1939-40.
	Rs. (lakhs)	Rs. (lakhs)	Rs. (lakhs)
Prime-movers	1,70	1,87	1,69
Electrical	2,69	3,72	2,36
Agricultural machinery	11	14	19
Boilers	117	1,40	85
Metal working (chiefly machine tools)	36	39	50
Mining	17	25	48
Oil crushing and refining	23	44	29
Paper mill	45	28	13
Refrigerating	28	14	21
Rice and flour mill	9	7	6
Saw mill	4	4	4
Sewing and knitting machines and parts	82	57	73
Sugar machinery	69	61	51
Tea machinery	21	23	17
Cotton machinery	2,92	2,67	1,96
Jute mill machinery	1,06	71	46
Wool machinery	3	2	3
Typewriters, including parts and accessories	22	15	21
Printing and lithographing presses	23	19	18
Belting for machinery	60	49	53

Motor Vehicles (Rs. 5.18 lakhs).—In recent years the United Kingdom and the United States of America were the largest suppliers of motor vehicles to India, the former concentrating more on motor cars than on heavier motor vehicles. Despite expansion in military demand in the United Kingdom, imports of motor cars from that country into India showed no slackening during the year under review. The total number of motor cars imported into British India declined from 11,058 valued at Rs.2,17 lakhs in 1938-39 to 9,972 valued at Rs.2,07 lakhs in the year under review. The table below shows the number of motor cars imported during the past three years indicating the principal sources of supply :—

Number of motor cars imported.

—	United Kingdom.	United States of America.	Canada.	France.	Italy.	Other Countries.	TOTAL.
1937-38	6,419	4,876	1,612	98	281	2,411	15,697
1938-39	5,117	3,170	972	66	232	1,501	11,058
1939-40	5,344	2,969	963	64	232	400	9,972

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Imports from all the principal countries, with the exception of the United Kingdom, recorded decreases. Consignments from the United Kingdom, numbered 5,344 in 1939-40 as compared with 5,117 in the preceding year. Imports from the United States of America and Canada, on the other hand, fell from 3,170 and 972 to 2,969 and 963, respectively, in 1939-40. Arrivals from Italy, however, remained unchanged at 232 but, as might be expected, German supplies declined from 1,253 to 255. Imports from other countries included 64 from France as compared with 66 in 1938-39.

The number of motor omnibuses, vans, and lorries imported during the yar under review advanced from 7,808 in 1938-39 to 14,537 in 1939-40, the corresponding increase in value being from Rs.1,18 lakhs to Rs.2,05 lakhs. The growth in imports of these vehicles was stim lated to some extent by India's military requi ments. These imports, consisting largely chassis, are mainly consigned from the Unit States of America and Canada. Imports fr these two sources numbered 10,362 and 3,531 1939-40 as compared with 5,095 and 1,958, r spectively, in 1938-39. There was however, decrease in the imports from the United Kingdo which numbered 563 as against 607 in the pr ceding year. The average declared value of chass imported from the United Kingdom in 1939-4 was lower than in the preceding year and amount ed to Rs.2,048, the corresponding figures for th United States of America and Canada being Rs.1,263 and Rs.1,534, respectively. The fo lowing table shows the total number of moto omnibuses, vans, etc. imported during the pas three years :—

Imports of motor omnibuss, vans, etc.

—	United Kingdom.	United States of America.	Canada.	Other Countries.	TOTAL.
1937-38	2,337	10,035	2,197	508	15,077
1938-39	607	5,095	1,958	148	7,808
1939-40	563	10,362	3,531	81	14,537

Hardware (Rs. 2,27 lakhs).—Owing mainly to reduced imports during the latter half of the year under review, there was a decline of 12 per cent. in the value of the imports of hardware which amounted to Rs.2,27 lakhs as compared with Rs.2,57 lakhs in 1938-39.

Mineral oils (Rs. 17,13 lakhs).—No reliable statistics relating to production or consumption of mineral oils are available from any country, but it may be safely assumed that, despite higher prices, there was a moderate increase during the year under review in consumption of petroleum products which are so important in modern mechanised warfare. In Burma, which supplies the bulk of India's requirements, the production of kerosene and motor spirit (including aviation petrol), as far as could be judged from the figures up to February, 1940, was higher by 8 per cent. and 5 per cent., respectively, than in 1938-39.

The total imports of mineral oils of all kinds into British India advanced from 439 million gallons to 463 million gallons in the year under review.

Chemicals (Rs. 4,52 lakhs.)—Prices of chemicals in 1939-40, specially after the outbreak of war, were generally higher than in the preceding year. The total imports of chemicals into British India advanced in value from Rs. 3,05 lakhs in 1938-39 to Rs.452 lakhs in 1939-40. Sodium compounds represented 46 per cent. of this total, imports of which were valued at Rs.2,09 lakhs as compared with Rs.1,34 lakhs in the preceding year. Imports of sodium carbonate and caustic soda, chiefly from the United Kingdom, rose from Rs.61 lakhs and Rs.45 lakhs to Rs.78 lakhs and Rs.72 lakhs, respectively. All other descriptions of sodium compounds also showed increases. Acids, as a class, of which acetic, citric, oxalic and tartaric are the most important, were imported to the value of Rs. 19 lakhs as compared with Rs. 11 lakhs in the preceding year. Imports of potassium compounds also improved from Rs.11 lakhs to Rs.23 lakhs ; of bleaching powder, from Rs.12 lakhs to Rs.18 lakhs and of magnesium compounds, from Rs.3 lakhs to Rs.5 lakhs. Calcium compounds, valued at Rs.11 lakhs, showed an increase of Rs.4 lakhs, while zinc compounds, at Rs.7 lakhs recorded a decrease of Rs.5 lakhs as compared with 1938-39. Of the total imports of sulphur valued at Rs.45 lakhs in 1939-40 as compared with Rs.22 lakhs in the preceding year, the United States of America supplied 58 per cent. and Japan 20 per cent. as against 18 per cent. each in 1938-39, while the contribution of Italy dropped from 55 per cent. to 20 per cent. Among other chemicals, muriate of ammonia and copper sulphate showed increases, while copperas, glycerine and liquid chlorine recorded decreases. The share of the United Kingdom in the total imports receded from 56.5 per cent. in 1938-39 to 51.6 per cent. in the year under review. The participation of Germany and Italy also fell from

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

13 and 5 per cent. to 5 and 3 per cent., respectively. On the other hand, the United States of America and Japan considerably improved their position and supplied 18.6 per cent. and 8.2 per cent. as against 6.5 and 5.2 per cent., respectively, in 1938-39. The shares of other countries remained practically unchanged during the year.

Drugs and Medicines (Rs. 2,61 lakhs).—The total value of imported drugs and medicines advanced from Rs.2,21 lakhs to Rs.2,61 lakhs in 1939-40. Imports of proprietory and patent medicines were valued at Rs.89 lakhs as compared with Rs.61 lakhs in the preceding year. The United Kingdom accounted for Rs.49 lakhs Germany, for Rs.9 lakhs and the United States of America, for Rs.18 lakhs, their respective contribution in 1938-39 being Rs.27 lakhs, Rs. 12 lakhs and Rs.13 lakhs. Camphor came, as usual, in large quantities from Japan, which supplied 1,147,000 lbs. valued at Rs.21 lakhs out of a total of 1,737,000 lbs. valued at Rs. 29 lakhs. Imports of quinine salts were valued at about Rs.25 lakhs almost the same as in the preceding year. The United Kingdom increased her share from Rs.7 lakhs to Rs. 8 lakhs and Java, from Rs.1 lakh to Rs.5 lakhs ; while the contribution of Germany fell from Rs.14 lakhs to Rs. 5 lakhs.

Paper and Pasteboards (Rs. 3,46 lakhs).—Imports of paper and pasteboard declined in quantity from 3.1 million cwts. in 1938-39 to 2.7 million cwts. in 1939-40, but higher prices accounted for a rise in value from Rs.3,23 lakhs to Rs.3,46 lakhs. The total quantity of paper of all kinds imported fell by 12 per cent. from 2.5 million cwts. to 2.2 million cwts., the value showing an increase from Rs.2,78 lakhs to Rs.2,89 lakhs, or by 4 per cent. Printing paper is always the chief item and recorded an increase from 922,000 cwts. valued at Rs.93 lakhs to 934,000 cwts. valued at Rs.1,06 lakhs. Sweden and Norway together supplied 409,000 cwts. or 83,000 cwts. more than in 1938-39, while the supplies from Germany declined from 305,000 cwts. to 206,000 cwts. Consignments from Finland also fell from 109,000 cwts. to 85,000 cwts. There were, however, increased supplies from Canada and Japan which amounted to 61,000 cwts. and 23,000 cwts. as against 5,000 cwts. and 4,000 cwts., respectively, in 1938-39. Arrivals from the United Kingdom also rose from 18,000 cwts. to 21,000 cwts. Imports of writing paper and envelopes declined from 181,000 cwts. (valued at Rs.45 lakhs) in 1938-39 to 135,000 cwts. (valued at Rs.34 lakhs) in the year under review, to which Norway and Sweden together contributed 66,000 cwts. ; the United Kingdom, 25,000 cwts.; and Germany, 14,000 cwts. as against 60,000 cwts. and 22,000 cwts. respectively, in 1938-39. Packing and wrapping paper was imported to the extent of 378,000 cwts. valued at Rs.82 lakhs in 1939-40 as compared with 387,000 cwts. valued at Rs.67 lakhs in the preceding year. Supplies from the United Kingdom, Sweden and Norway advanced from 39,000 cwts., 177,000 cwts., and 15,000 cwts. to 42,000 cwts., 214,000 cwts., and 20,000 cwts., respectively, while those from Germany fell from 64,000 cwts. to 55,000 cwts. Imports of old newspapers in bales and bags, chiefly from the United Kingdom, fell from 948,000 cwts. to 667,000 cwts., but the value remained almost steady at about Rs.38½ lakhs. The value of paper manufactures, imported mainly from the United Kingdom, showed a decrease from Rs.16 lakhs to Rs.13 lakhs. Imports of pasteboard, millboard and cardboard including manufactures thereof, declined in quantity from 541,000 cwts. in 1938-39 to 512,000 cwts. in 1939-40 but advanced in value from Rs.45 lakhs to Rs.56 lakhs. Of these, strawboards accounted for 307,000 cwts. valued at Rs.26 lakhs as compared with 338,000 cwts. valued at Rs.17 lakhs in the preceding year.

Liquors (Rs. 2,19 lakhs).—The total imports of liquors declined in quantity from 4.7 million gallons in 1938-39 to 4.3 million gallons in 1939-40, but the value rose by Rs.8 lakhs to Rs.2,19 lakhs. Bengal took the largest quantity—1.6 million gallons (Rs.79 lakhs) as against 1.5 million gallons (Rs.68 lakhs) and was followed by Bombay with 1.4 million gallons (Rs.71 lakhs) against 1.7 million gallons (Rs.75 lakhs). The requirements of Sind and Madras were comparatively small amounting to 732,000 gallons (Rs.46 lakhs) and 596,000 gallons (Rs.24 lakhs) as compared with 863,000 gallons (Rs.43 lakhs) and 682,000 gallons (Rs. 25 lakhs), respectively, in the preceding year. Nearly 72 per cent. of the total quantity of imported liquors consisted of ale, beer, and porter, which showed a decline from 3.6 million gallons valued at Rs.74 lakhs in 1938-39 to 3.1 million gallons valued at Rs.67 lakhs in 1939-4 Imports from the United Kingdom totalled 1.9 million gallons or 100,000 gallons less than in 1938-39, but her percentage share rose from 56 to 61. Imports from Germany and the Netherlands were considerably reduced and amounted to 189,000 gallons and 319,000 gallons, respectively. Supplies from Japan also fell from 549,000 gallons to 514,000 gallons. Spirits accounted for 26 per cent. of the total quantity of liquors imported and wines 2 per cent. There was an increase in the imports of spirits which amounted to 1.1 million gallons valued at Rs.1,38 lakhs from 1.0 million gallons valued at Rs.1,23 lakhs.

Sugar (Rs. 3,32 lakhs).—The area under sugarcane in India in 1939-40 was 3,618,000 acres as compared with 3,130,000 acres in the preceding year. The production in terms of *gur* in 1939-40 is estimated at 4,547,000 tons or 1,159,000 tons more than in 1938-39. The total number of sugar factories manufacturing direct from cane during the cane crushing season 1939-40 was 145 as against 139 factories, actually in operation, in the preceding year.

The increase in the imports of sugar, 16 D.S. and above, mentioned in the preceding year's Review, continued almost throughout the year under review and arrivals into India including the Kathiawar States totalled 332,000 tons valued at Rs.4,26 lakhs as compared with 55,000 tons valued at Rs.63½ lakhs in 1938-39, Java contributing 3,18,000 tons or 96 per cent. as against 50,000 tons or 91 per cent. in the preceding year. A feature of the trade in 1939-40 was that, world prices being above parity, a part of these imports was re-exported from India to the neighbouring territories in Africa and Asia, such as Egypt, Iran, Palestine, Arabia, Ceylon and the Straits Settlements. These shipments, which were mainly effected in the last quarter of 1939 amounted to 24,000 tons.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

There was also an increase in the imports of beet sugar which amounted to 5,500 tons valued at about Rs.7½ lakhs as compared with 4,400 tons valued at Rs.5½ lakhs in 1938-39. The consignments in 1939-40 came almost entirely from the United Kingdom. According to the Director, Imperial Institute of Sugar Technology, the quantity of sugar available for consumption in India during the period 1st November 1938 to 31st October 1939 is estimated at 1,083,000 tons approximately, as against 1,159,000 tons in the preceding crop year.

Salt (Rs. 62 lakhs).—Imports of foreign salt, chiefly for consumption in Bengal, advanced from 312,000 tons valued at Rs.38 lakhs in 1938-39 to 314,000 tons valued at Rs.62 lakhs in 1939-40. Aden continued to be the chief source of supply and her contribution rose from 157,000 tons to 225,000 tons. Imports from Egypt, however, declined from 78,000 tons to 30,000 tons and those from Germany, from 32,000 tons to 10,000 tons. Arrivals from other countries included 41,000 tons from Italian East Africa as compared with 17,000 tons in the preceding year. The production of Indian salt in 1939 amounted to 1,498,000 tons as against 1,538,000 tons in 1938. The coastwise imports of Indian salt into Bengal in 1939-40 totalled 306,000 tons, such imports in the preceding year being 194,000 tons.

Other Articles.—The following table shows the course of trade in some of the other articles of importance in imports :—

——	1937-38.	1938-39.	1939-40.

The conditions arising from the war exercised a profound influence on India's export trade. For a large number of her principal articles of export the war created a new and unparalleled demand, and shipments of such articles during the year attained very high levels; but behind these favourable developments was a sombre background, with deepening shadows, such factors as lack of adequate shipping facilities, loss of valuable Continental markets owing to enemy aggression, and the uncertainties attaching to trading with neutral countries adjacent to enemy territories, contributing to make the general trading position one of increasing difficulty.

Jute and Jute Manufactures (Rs. 68,42 lakhs).—The total exports of raw and manufactured jute during the year under review amounted to 1,651,000 tons as compared with 1,647,000 tons in 1938-39, showing an increase of 4,000 tons or 0.2 per cent. There was, however, a greater increase in the value of these shipments which advanced from Rs.39,66 lakhs to Rs.68,42 lakhs or by 73 per cent. It may be noted that the prices of jute and jute manufactures during 1939-40, particularly in the latter half of the year, were much higher than in the preceding year.

Exports of raw jute declined in quantity from 690,000 tons in 1938-39 to 568,000 tons in 1939-40 or a decrease of 18 per cent., while the value advanced from Rs.13,40 lakhs to Rs.19,73 lakhs, showing a rise of 47 per cent. The United Kingdom and France increased their purchases from 181,000 tons and 76,000 tons to 194,000 tons and 85,000 tons, respectively. Most of the other principal European countries reduced their takings in 1939-40. Exports to Germany, Belgium, the Netherlands and Italy fell from 132,000 tons, 51,000 tons, 13,000 tons and 46,000 tons to 35,000 tons, 33,000 tons, 7,000 tons and 28,000 tons, respectively; while the U. S. S. R. and Czechoslovakia were practically out of the market in 1939-40, their respective purchases in the preceding year being 19,000 tons and 21,000 tons. Shipments to Spain and Sweden, however, rose from 11,000 tons and 7,000 tons to 16,000 tons and 8,000 tons, respectively. There were also increased shipments to the American countries. The United States of America took 51,000 tons as against 31,000 tons; the Argentine Republic, 16,000 tons as against 10,000 tons and Brazil, 34,000 tons as against 25,000 tons in 1938-39. Exports to Japan declined from 15,000 tons to 14,000 tons, while those to China and Australia rose by 2,000 tons and 1,000 tons to 8,000 tons and 3,000 tons, respectively. Manchuria, which was responsible for 13,000 tons in 1938-39, took only 1,000 tons in the year under review.

As might be expected from the withdrawal of restrictions on mill production coupled with war demand for sand bags, the consumption of raw jute in Indian mills recorded an improvement in 1939-40 as compared with the preceding season. Under hessians, there was a striking increase in the number of bags manufactured in 1939-40, due mainly to defence orders for sand bags, though a part of this increase is attributable to the reduction in the average size of the bags in relation to that in the preceding year, while the output of cloth recorded a decrease. The production of both sacking bags and cloth showed a moderate rise.

Exports of jute bags and cloth in the past three years are shown in the following table:—

—	1937-38	1938-39	1939-40
Bags (in millions)	612	598	1,210
Cloth (in million yards)	1,643	1,550	1,560

The number of gunny bags shipped more than doubled in 1939-40 and totalled 1,210 million as compared with 598 million in the preceding year. The value also showed a similar rise and amounted to Rs.25,44 lakhs as against Rs.12,46 lakhs in 1938-39. Of the exports in 1939-40, sacking bags accounted for 465 million valued at Rs.16,77 lakhs and hessian gunny bags, 746 million valued at Rs.8,66 lakhs. The United Kingdom, always the principal purchaser of gunny bags, multiplied its takings nearly tenfold to the colossal figure of 685 million (more than the usual total of exports to all countries combined) owing to the war demand for sand bags. Exports to other European countries taken together totalled 21 million in number as compared with 36 million in 1938-39. Next to the United Kingdom, the largest single purchaser of Indian gunny bags was Australia which took 71 million bags in 1939-40 as against 66 million in the preceding year.

Cotton (Rs. 30,11 lakhs).—Shipments of raw cotton from British India advanced from 2,703,000 bales in 1938-39 to 2,948,000 bales in 1939-40, or an increase of 9 per cent. The value of the exports rose by 26 per cent. from Rs.23,86 lakhs to Rs.30,11 lakhs. Japan, the best customer of Indian raw cotton, reduced her takings from 1,211,000 bales to 1,056,000 bales in 1939-40. The total imports of raw cotton into Japan from all sources, as recorded in the Japanese trade returns, showed an increase from 553,000 tons in 1938 to 596,000 tons in 1939, of which India accounted for about 34 per cent. as in the preceding year. There were, however, increased shipments of Indian cotton to China which totalled 681,000 bales in 1939-40 as against 193,000 bales in the preceding year. Exports to the United Kingdom also recorded an improvement and amounted to 472,000 bales as compared with 411,000 bales in 1938-39. France and the United States of America also increased their purchases from 169,000 bales and 58,000 bales to 229,000 bales and 122,000 bales, respectively. Shipments to Belgium, on the other hand, declined from 142,000 bales to 68,000 bales and those to Germany and Italy, from 192,000 bales and 92,000 bales to 52,000 bales each. Exports to other countries in 1939-40 included 41,000 bales to Korea, 38,000 bales to French Indo-China and 25,000 bales to the Netherlands.

Cotton Manufactures (Rs.8,58 lakhs).—The production and exports of the different classes of piece-goods during the past three years are shown below :—

(In million yards)

	MILL PRODUCTION.			EXPORTS.		
	1937-38.	1938-39.	1939-40.	1937-38.	1938-39.	1939-40.

Chadars	67·3	74·6	70·6	} 5·4	4·0	3·5
Dhuties	1,215·4	1,454·8	1,230·3			
T. cloth, domestics and sheetings	191·3	183·3	173·2	0·1	..	0·1
Drills and jeans ..	152·9	135·2	122·3	1·8	1·0	1·6
Other sorts	479·3	449·1	478·3	76·9	61·4	76·8
Total ..	3,190·7	3,337·1	3,086·3	106·0	78·8	93·4
Coloured piece-goods ..	893·6	932·2	926·2	135·2	98·2	128·0
Total piece-goods ..	4,084·3	4,269·3	4,012·5	241·2	177·0	221·4

While cotton mill production showed a decline, exports of cotton piece-goods, which had reached the low level of 177 million yards in 1938-39, improved by 25 per cent. to 221 million yards in 1939-40, the corresponding increase in value being from Rs.4,79 lakhs to Rs.6,11 lakhs, or 28 per cent. This increase was distributed over all the three principal categories; grey goods advanced by 11 million yards to 80 million yards; bleached goods, by 3 million yards to 13 million yards and coloured goods, by 30 million yards to 128 million yards. Of the total exports of piece-goods, 110 million yards or 50 per cent. went to Burma as compared with 87 million yards or 49 per cent. in the preceding year. Exports to Ceylon and the Straits Settlements also advanced from 19 million yards and 17 million yards to 23 million yards each. Exports to Egypt declined from 3 million yards to about 2 million yards. Shipments to Nigeria also fell by about 2½ million yards to 5 million yards, while those to the East African ports recorded an increase from 19 million yards to 14 million yards. There were increased shipments to Arabia, the Bahrein Islands, and the Federated Malay States; while those to Iraq, Aden and Thailand showed decreases. Iran practically took nothing in 1939-40, though she had purchased about 2 million yards in the preceding year. Bombay, as usual, had the bulk of the trade and accounted for 66 per cent. of the total exports, while Madras had 31 per cent. of the trade as compared with 70 per cent. and 27 per cent., respectively, in the preceding year.

Tea (Rs. 26,08 lakhs).—The total production of tea in India in 1939-40 has been estimated at 452 million lbs. which is practically the same as in the preceding season. As usual, Assam contributed the largest quantity and produced 253 million lbs. or 56 per cent. of the total Indian production in 1939-40 season. Production in the rest of Northern India amounted to 121 million lbs., or 27 per cent. Southern India accounted for 78 million lbs. or 17 per cent. Exports abroad rose in quantity from 348 million lbs. in 1938-39 to 357 million lbs. in 1939-40 or by 3 per cent. the corresponding increase in value being from Rs.23,29 lakhs to Rs.26,08 lakhs, or 12 per cent. The total quantity exported in the year under review represented 79 per cent. of the total production as compared with 77 per cent. in the preceding year.

Of the total exports of 357 million lbs., in 1939-40, the United Kingdom took 287 million lbs. or 80 per cent. as compared with 304 million lbs., or 87 per cent. of the total of 348 million lbs. in the preceding year. On the outbreak of the war, the Government of the United Kingdom took over all the bonded stock in that country and the re-export trade was practically closed for the time being. As a result, there were larger shipments from India direct to such markets as Canada and the United States of America which obtained their supplies also from the United Kingdom. Exports to Eire totalled 2.1 million lbs. or 1.3 million lbs. less than in 1938-39. Shipments to Canada and the United States of America advanced to 27.1 million lbs. and 13.4 million lbs. from 15.5 million lbs. and 8.1 million lbs., respectively, in the preceding year. All the principal countries in the nearer markets also took more than in the preceding year. Iran required 6.1 million lbs. as against 5.1 million lbs.; Ceylon, 7.0 million lbs. as against 3.9 million lbs. and Burma 2.7 million lbs. as against 2.0 million lbs. in 1938-39. Exports to Australia rose from

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

1.3 million lbs. to 3.7 million lbs. in 1939-40. The share of Calcutta in the total exports of tea in 1939-40 was 59 per cent. and of Chittagong, 24 per cent., the remainder being shipped mostly from Madras. Shipments from Calcutta in 1939-40 amounted to 212 million lbs. (206 million lbs.) and from Chittagong 87 million lbs. (88 million lbs.); while those from Madras totalled 57 million lbs. (56 million lbs.)—the corresponding figures for the preceding year being shown in brackets.

Food grains and flour (Rs. 5.07 lakhs).—The total exports of grain, pulse and flour declined from 742,000 tons in 1938-39 to 408,000 tons in 1939-40, or by 45 per cent. in quantity, the corresponding fall in value being from Rs.7,74 lakhs to Rs.5,07 lakhs, or by 34 per cent. All the principal classes of food grains participated in this decline which was most noticeable in the case of exports of wheat. The statement below shows the exports of food grains during the past three years :—

——	1937-38.	1938-39.	1939-40.
	Tons (000)	Tons (000)	Tons (000)
Rice not in the husk	227	282	262
Rice in the husk	1	3	4
Wheat	460	279	8
Wheat flour	62	61	50
Pulse	86	81	73
Barley	35	9	..
Jowar and bajra	4	24	7
Other sorts	3	3	4
Total ..	878	742	408
Value Rs. (lakhs) ..	9,49	7,74	5,07

Oilseeds (Rs. 11,84 lakhs).—The total exports of oilseeds, consisting largely of groundnuts and linseed, from British India declined by 29 per cent. in quantity and 21 per cent. in value and amounted to 849,000 tons valued at Rs.11,84 lakhs as compared with 1,199,000 tons valued at Rs.15,06 lakhs in 1938-39. Supplies were generally normal, but the war brought about a dislocation in the oilseed crushing industry of Europe and, as a result, exports were much smaller in the second half than in the first.

The Indian linseed crop of the season 1938-39 which was mostly marketed in the year under review was estimated at 442,000 tons as against 461,000 tons in the preceding season. The Argentine crop of 1938-39 was smaller by 8 per cent. than the preceding one, the official estimate of the outturn being 1,388,000 tons. Shipments from India dropped by 31 per cent. in quantity from 318,000 tons in 1938-39 to 219,000 tons in 1939-40, and by 28 per cent. in value from Rs.4,40 lakhs to Rs. 3,18 lakhs. As usual, the United Kingdom was the best customer and took 172,000 tons as against 271,000 tons in 1938-39. With the exception of the Netherlands, all the principal Continental countries reduced their purchases. Exports to Germany, France and Italy dropped from 10,000 tons, 9,000 tons and 900 tons to 6,000 tons, 2,000 tons and 400 tons; while Belgium, who had taken 700 tons in 1938-39, was practically out of the market in the year under review. The Netherlands required 1,300 tons—twice as much as in 1938-39, while Greece took 3,000 tons as in the preceding year. There was an increase in the shipments to Australia which amounted to 31,000 tons in 1939-40 as against 21,000 tons in the preceding year. American countries, *viz.*, the United States and Canada, continued to show practically no interest in this trade.

The production of groundnuts in 1939-40 has been estimated at 3,002,000 tons of nuts in shell as against 3,219,000 tons in the preceding season. Exports of groundnut seeds from British India totalled 549,000 tons valued at Rs.7,19 lakhs in 1939-40 as compared with 835,000 tons valued at Rs.9,93 lakhs in 1938-39. Shipments to the United Kingdom advanced from 96,000 tons in 1938-39 to 108,000 tons in the year under review. Exports to France declined from 150,000 tons to 99,000 tons in 1939-40 and those to Germany, from 115,000 tons to 53,000 tons. Belgium and the Netherlands together took 173,000 tons as against 297,000 tons in 1938-39, while Italy required 19,000 tons or 15,000 tons less than in the preceding year. Shipments to other countries included 6,000 tons to Portugal and 12,000 tons to Palestine, their respective takings in the preceding year being 5,000 tons and 8,000 tons.

Hides and Skins (Rs. 11,07 lakhs).—Exports of raw hides and skins declined by 10 per cent. in quantity from 35,300 tons in 1938-39 to 31,700 tons in 1939-40, but due to a rise in the prices, the value advanced by 7 per cent. from Rs.3,81 lakhs to Rs.4,06 lakhs. Of the total quantity

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

exported in 1939-40, raw hides represented 23 per cent. and recorded a decrease from 15,400 tons valued at Rs.1,02 lakhs to 11,900 tons valued at Rs.79 lakhs. Shipments in the year under review consisted of 10,200 tons of raw cow hides; 1,500 tons of buffalo hides and 200 tons of calf skins which are classified under raw hides.

Raw Wool (Rs. 3,23 lakhs).—Exports of raw wool declined in quantity from 55.4 million lbs. in 1938-39 to 53.2 million lbs. in 1939-40, but, due to a rise in prices, advanced in value from Rs.2,99 lakhs to Rs.3,23 lakhs. Exports of raw wool to the United Kingdom declined from 45.0 million lbs. in 1938-39 to 33.3 million lbs. in the year under review. On the other hand, there were increased shipments to the United States of America which totalled 19.2 million lbs. as against 9.0 million lbs. in 1938-39. Exports to other countries were comparatively small. Re-exports of foreign wool showed an advance from 10.6 million lbs. valued at Rs.31 lakhs to 16.4 million lbs. valued at Rs.57 lakhs

Metals and Ores (Rs.6,45 lakhs).—There was an increase in the exports of metals and ores, the total shipments of which amounted to 1,545,000 tons valued at Rs.6,45 lakhs in 1939-40 as compared with 1,509,000 tons valued at Rs.4,91 lakhs in the preceding year. Exports of manganese ore, representing 46 per cent. of the total quantity shipped in 1939-40, rose from 456,000 tons to 719,000 tons or an increase of 58 per cent. over 1938-39. The United Kingdom was, as usual, the largest purchaser and took 267,000 tons as against 115,000 tons in the preceding year. Japan came next, taking 194,000 tons, or 84,000 tons more than in 1938-39. Exports to the United States of America and Belgium also showed increases and amounted to 141,000 tons and 30,000 tons as against 67,000 tons and 10,000 tons, respectively, in 1938-39. On the other hand, shipments to France and Italy declined from 87,000 tons and 48,000 tons to 50,000 tons and 3,000 tons respectively. There were no exports of ferro-manganese ore and those of ferruginous manganese ore amounted to 3,300 tons as against 3,500 tons in 1938-39.

Exports of pig iron totalled 569,000 tons valued at Rs.2,84 lakhs in 1939-40 as compared with 514,000 tons valued at Rs.2,56 lakhs in 1938-39. Japan took the largest quantity, *viz.*, 289,000 tons against 330,000 tons in the preceding year, and was followed by the United Kingdom which increased her purchases from 109,000 tons in 1938-39 to 223,000 tons in 1939-40. There was also a noticeable increase in the exports to the United States of America which amounted to 24,000 tons as against 8,000 tons in the preceding year. Shipments to other countries in 1939-40 included 10,000 tons to Sweden; 6,000 tons to China and 5,000 tons to France.

Lac (Rs. 1,89 lakhs).—There was an improvement in the exports of lac, total shipments advancing from 644,000 cwts. valued at Rs.1,27 lakhs in 1938-39 to 755,000 cwts. valued at Rs.1,89 lakhs in the year under review.

Exports of shellac rose by 12 per cent. in quantity from 384,000 cwts. in 1938-39 to 430,000 cwts. in 1939-40 and by 42 per cent. in value from Rs.86 lakhs to Rs.1,22 lakhs. Exports to the United States of America more than doubled those in the preceding year and amounted to 265,000 cwts. as against 128,000 cwts. in 1938-39. Brazil and Australia also required more than in the preceding year,—shipments to these countries totalling 7,000 cwts. each in 1939-40. The United Kingdom, on the other hand, curtailed her takings from 121,000 cwts. to 44,000 cwts. Exports to Germany fell from 34,000 cwts. to 16,000 cwts. There were also reduced shipments to Japan, France and Italy which amounted to 15,000 cwts., 8,000 cwts., and 2,000 cwts. in 1939-40 as against 25,000 cwts., 9,000 cwts. and 4,000 cwts., respectively, in the preceding year.

Other Articles.—The following is a summary of the course of trade in the more important of the remaining articles of export :—

	1937-38	1938-39	1939-40
	Rs. (lakhs).	Rs. (lakhs).	Rs. (lakhs).

Motor Vehicles in British India and The Indian States.

The number of motor vehicles on Indian roads, which had increased steadily until on January 1, 1939, there were 177,188 vehicles in British India and the Indian States, has since declined. The actual figure of motor vehicles in operation throughout the country on March 31, 1940, was 174,077.

This decline is undoubtedly the result of war-time conditions. Since the outbreak of war the motor import trade has been seriously affected, shipments from the United Kingdom being held up, while deliveries of vehicles from the United States of America are affected by dollar exchange difficulties. Furthermore, the price of petrol has risen appreciably since the outbreak of war and this has doubtless driven a number of older vehicles off the roads.

The total number of vehicles in British India on March 31, 1940, was 141,577 out of which 89,253 were private cars, 5,535 taxis, 23,851 buses, 14,336 lorries and 8,602 motorcycles.

The general decline in the number of motor vehicles in operation was not, however, distributed evenly throughout the provinces. Thus, while in Bombay the number declined from 31,736 to 27,880, in Bengal it rose from 28,375 to 29,760. This province had the largest number of vehicles in operation. Madras, which had the third largest number, remained practically stationary with a total of 21,585. The United Provinces fell sharply from 17,119 to 14,600 while the Punjab rose from 12,950 to 13,372.

Motor Vehicles in Indian States.

Complete figures showing the number of motor vehicles in Indian States are not available. The States vary in size from 19 sq. miles, to States like Hyderabad with an area of 82,698 sq. miles (as large as Italy). Hyderabad State still heads the list of motor vehicles, but its total dropped sharply from 8,232 to 5,739. Travancore, on the other hand, rose from 3,900 to 5,307. It must be emphasised that these figures are unofficial and not necessarily complete.

The following tables show the number of motor vehicles of all classes in operation in the different provinces of British India and in the Indian States as on March 31, 1940 :—

——	Cars	Taxis	Buses	Lorries	M/Cycles	Total
Assam	3,110	172	614	(*a*)1,390	192	5,478

(*a*) Includes passenger-cum-goods vehicles. (*b*) Included in buses.
(*c*) Latest figures available. Some figures relate to 1939.
† These are taxis in the regional area of Bombay. Taxis in other regions are included in buses.
* Included in cars.
** In addition 2,071 vehicles, not re-registered during the year are believed to be in use.

Index Numbers of Prices.

The Director-General of Commercial Intelligence and Statistics, Calcutta, publishes from time to time an addendum to the publication Index Numbers of Indian Prices 1861-1931 which brings up-to-date (1) the unweighted index numbers of 28 exported articles; (2) the unweighted index numbers of 11 imported articles; (3) the general unweighted index number for 39 articles and (4) the weighted index numbers of 100 articles.

The following table contains these index numbers since the year 1925 :—

(Price in 1873 = 100)

Year.	Exported articles 28 (unweighted).	Imported articles 11 (unweighted).	General Index No. for all (39) articles (unweighted).	Weighted Index No. (100 articles)
1925	233	211	227	265
1926	225	195	216	260
1927	209	185	202	258
1928	212	171	201	261
1929	216	170	203	254
1930	177	157	171	213
1931	125	134	127	157
1932	120	139	126	149
1933	118	128	121	139
1934	117	122	119	136
1935	128	122	127	149
1936	127	122	125	150
1937	133	144	136	155
1938	128	142	132	147
1939	133	137	134	157
1940	158*	183*	164*	Not available.

* Provisional.

Besides the above wholesale price index numbers, the Director-General of Commercial Intelligence and Statistics, Calcutta, compiles a wholesale price index number for Calcutta while the Commissioners of Labour, Bombay and Sind, compile similar statistics for Bombay and Karachi.

The following table gives these index numbers since 1925 :—

Wholesale price index numbers for Calcutta, Bombay and Karachi (*Base July* 1914 = 100).

Year.	Calcutta.	Bombay.	Karachi.
1925	159	163	151
1926	148	149	140
1927	148	147	137
1928	145	146	137
1929	141	145	133
1930	116	126	108

Wholesale price index numbers for Calcutta, Bombay and Karachi (Base July 1914 =100).—Contd.

Year.	Calcutta.	Bombay.	Karachi.
1931	96	109	95
1932	91	109	99
1933	87	98	97
1934	89	95	96
1935	91	99	99
1936	91	96	102
1937	102	106	108
1938	95	101	104
1939	108	109	108
1940	120	118	116

About the end of the year 1929 there began a sharp decline in wholesale prices which continued during 1930 and 1931. This downward trend, although somewhat checked in 1932, continued during 1933 and 1934 when the prices reached their lowest level. The prices, however, showed some improvement during the next two years and registered a sharp rise during 1937. The prices registered a perceptible fall in the following year but they soon recovered and registered a further rise in Calcutta and Bombay during 1939.

With the outbreak of the war the wholesale prices began to soar up. This tendency continued till December, 1939, but thereafter there was a gradual fall till June, 1940, when they again showed a partial recovery. The prices during 1940 were thus 8 to 12 points higher than in 1939 and 12 to 25 points higher than in 1938.

The various Provincial Governments publish in their respective *Gazettes* fortnightly and monthly statements of retail and wholesale prices of certain important commodities. In addition to these, however, some of the Provincial Governments also publish working class cost of living index numbers. Such index numbers are being published regularly every month for the following centres: for Bombay, Ahmedabad, and Sholapur by the Labour Office of the Government of Bombay; for Nagpur and Jubbulpore by the Department of Industries, Central Provinces and Berar; for six centres in Bihar by the Department of Industries, Bihar; for Madras, by the office of the Director of Industries and Commerce, Madras; for Lahore, by the office of the Director of Industries, Punjab; for Cuttack, by the Government of Orissa and for Rangoon by the Labour Commissioner, Burma, Rangoon.

The working class *cost of living* index number for Bombay, which was hitherto compiled on a pre-war base, was revised during 1937, the base adopted for the new series being July 1933 to June 1934=100. The revised index number stood at 115 in December 1940, the average for 1940 being 112. The Ahmedabad cost of living index number with base August 1926 to July 1927-100 stood at 79 in December 1940 while the Sholapur cost of living index number with base February 1927 to January 1928-100 stood at 76 in December 1940. The Nagpur cost of living index number on base January 1927-100 was 72 in December 1940 while the Jubbulpore Index on the same base was 69. The Madras cost of living index number with base July 1935 to June 1936-100, was 110 in December 1940. The Lahore cost of living index number, with 1931-35 prices equated to 100, was 129 in September 1940. For Rangoon, four different index numbers with base 1931-100 are compiled for (*a*) Burmese, (*b*) Tamils, Telugus and Oriyas, (*c*) Hindustanis and (*d*) Chittagonians. The Index Numbers in December 1940 for these were 102, 104, 103 and 106 respectively.

The catastrophic fall in retail prices which commenced at the end of 1929 continued during 1930 and 1931. In 1932 prices ruled at a slightly lower level than in 1931. In 1933 and 1934 the downward tendency of prices continued. This downward tendency was somewhat checked during 1935 and 1936. The prices showed a definite rise in 1937, remained more or less steady during 1938-39 and registered an appreciable rise in 1940.

The inadequacy as also the general unreliability of Indian price statistics has been the subject of comment by many committees and commissions of enquiry and the majority of the Indian Economic Enquiry Committee of 1925 made many suggestions for the improvement of price statistics and advocated the passing of Census and Statistics Act. This latter suggestion was also endorsed by the Whitley Commission on Indian Labour and the Government of India have already taken up the recommendation which is under their consideration. Messrs. Bowley and Robertson who were invited by the Government of India to advise them on the question of obtaining more accurate and detailed statistics have also made certain recommendations for improving Indian price statistics. As regards the General Index number of wholesale prices in India they suggest the construction of a new index number on the model of that of the Board of Trade in England. With regard to index numbers of retail prices they recommend that the data should be compiled for India as a whole, and not for separate Provinces, and that they should not be initiated till certain preliminary steps of improvement of the data suggested by them have been taken.

The Indian Stores Department.

A detailed account of the organisation of the Indian Stores Department at Government of India headquarters and of the successive orders issued by Government to assure as far as possible the purchase of stores of Indian manufacture or in India is to be found in earlier issues of the "Indian Year Book." The current rules to regulate stores purchase prescribe that preference in making purchases shall be given in the following order :—

First, to articles which are produced in India in the form of raw materials or are manufactured in India from raw materials produced in India, provided that the quality is sufficiently good for the purpose ;

Second, to articles wholly or partially manufactured in India from imported materials, provided that the quality is sufficiently good for the purpose ;

Third, to articles of foreign manufacture held in stock in India provided that they are of suitable type and requisite quality ;

Fourth, to articles manufactured abroad which need to be specially imported.

The year 1939-40 has been the most eventful in the annals of the Indian Stores Department since its constitution in 1922. The Department was able to bear successfully the brunt of the initial war efforts of India in respect of the supply of materials of varied character. The textile Industry (particularly Jute and Wool) and the Steel Industry were, by their primary importance, responsible for the major portion of the increase in the value of purchases. The heavy purchases made by this Department, added to which were claims for revision of rates due to difficulties in replenishment of stocks, rises in freight and Insurance rates, attempts at holding up stocks, inability of contractors to quote against tenders without restrictions and safeguards—contributed in a large measure to the heavy increase in the volume of Purchase work and this necessitated a considerable increase in the strength of both the superior and subordinate staff of the Department.

Owing to the war, the number of overseas indentors who utilised the services of this Department, increased to a great extent and the value of purchases made on their behalf was also considerably increased.

The Industrial Intelligence and Research Bureau attached to this Department has now been renamed the Board of Scientific and Industrial Research. This Board has its Head Quarters at Calcutta and is now placed under the control of the Commerce Department.

(*b*) In any other case	10	0
Release—that is to say, any instrument whereby a person renounces a claim upon another person or against any specified property—		
(*a*) If the amount or value of the claim does not exceed Rs. 1,000—The same duty as a Bond for such amount or value as set forth in the Release.		
(*b*) In any other case	10	0
Respondentia Bond—The same duty as a Bond for the amount of the loan secured.		
Security Bond—(*a*) When the amount secured does not exceed Rs. 1,000—The same duty as a Bond for the amount secured.		
(*b*) In any other case	10	0
Settlement—The same duty as a Bond (but in its application to the cities of Bombay, Ahmedabad, Poona, Sholapur, Surat, and other urban areas the same duty as a conveyance if the property set apart is immoveable and the purpose is one other than charitable or religious) for the sum equal to the amount or value of the property —settled. Provided that—where an instrument of settlement contains any provision for the revocation of settlement, the amount or value of the property settled shall, for the purposes of duty, be determined as if no such provision were contained in the instrument.		
Revocation of Settlement.—The same duty as a Bond (but in its application to the cities of Bombay, Ahmedabad, and Poona the same duty as a conveyance if the property set apart is immoveable and the purpose is one other than charitable or religious) for a sum equal to the amount or value of the property concerned as set forth in the instrument of revocation but not exceeding ten rupees.		
Share-warrant to bearer issued under the Indian Companies Act.—One and a half times the duty payable on a conveyance for a consideration equal to the nominal amount of the shares specified in the warrant.		
Shipping Order	0	1
Surrender of Lease—When duty with which lease is chargeable does not exceed Rs. 5—The duty with which such Lease is chargeable.		
In any other case	5	0
Transfers of Shares—12 annas for every Rs. 100 or part thereof of the value of the shares.		
Transfer of debentures, being marketable securities whether the debenture is liable to duty or not, except debentures provided for by section 8—12 annas for every Rs. 100 or part thereof of the face amount of the debenture.		
Transfer of any Interest secured by a Bond, Mortgage-deed, or Policy of Insurance—If duty on such does not exceed Rs. 10—The duty with which such Bond, &c., is chargeable.		
In any other case	10	0
—of any property under the Administrator General's Act, 1874, Section 31.	10	0
—of any trust property without consideration from one trustee to another trustee or from a trustee to a beneficiary—Five rupees or such smaller amount as may be chargeable for transfer of shares.		
Transfer of Lease by way of assignment and not by way of under-lease—The same duty as a conveyance for a consideration equal to the amount of the consideration for the transfer.		
Trust, Declaration of—Same duty as a Bond for a sum equal to the amount or value of the property concerned, but not exceeding	15	0
Revocation of—Ditto, but not exceeding	10	0
Warrant or Goods	0	8

The Indian National Congress.

For a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the *Indian Year Book*. The Congress was founded in 1885 by Mr. Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year, the fundamental principles of the Congress were laid down to be:—

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India;

Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved; and

Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country.

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances, and in providing a training ground for Indian politicians. But in 1907 the extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split which had long been seen to be imminent. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that—

"The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country."

For some years following 1907 efforts were made to heal the split and these were without avail until 1916 when a re-united Congress met at Lucknow under the presidency of Babu Ambica Charan Muzumdar of Faridpur in Bengal. But the union then effected was purely superficial; the difference between the moderates and the extremists was fundamental; the extremists captured the machinery of the Congress and from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr. Gandhi and his lieutenants. In 1927 the Congress actually adopted independence as the goal of India. In the following two years the Congress made what the extremists left described as a climbdown, while the Liberals moved towards the left, with the result that for a time there appeared to be a commonness of purpose between the Liberals and Congressmen. At its 1928 session the Congress, while adhering to Independence, agreed to accept Dominion Status, if granted, before the end of 1929. Things were tending towards a satisfactory settlement when in the latter half of 1929 the Congress insisted on the immediate grant of Dominion Status or an assurance that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in England between representatives of England, British India and the Indian States. Here was the parting of the ways. The Liberals went their way and the Congress its own. In fulfilment of the "ultimatum" issued at its previous session, the Congress, at its 1929 session, declared for complete independence or "Purna Swaraj." Throughout the year 1930 the Congress was engaged in a defiance of the law of the land which, it was hoped, would help India, to attain complete independence. Early next year the Congress actually suspended civil disobedience by virtue of an agreement arrived at with the Government, but the fulfilment of the terms of this agreement gave rise to trouble and another agreement was concluded.

As a result of this Mr. Gandhi, on behalf of the Congress, went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Government bent all its efforts to making it impossible for the Congress to carry on its subversive activities and succeeded fully in its object. Congress was crushed and all forms of Congress work throughout the country were successfully prevented. In fact as well as in law Congress ceased to exist. In the middle of 1934 the civil disobedience movement, which had rendered the Congress illegal, was withdrawn. In the autumn of that year Mr. Gandhi retired from the Congress and politics, although he remains in practice the virtual dictator of Congress policy. During the next four or five years, the Congress was a constitutional organisation and was actually in charge of His Majesty's Government for more than two years in eight provinces under the 1935 constitution. (See past issues of the *Indian Year Book* for a history of the non-co-operation and the civil disobedience movements, and for the parliamentary phase of Congress activity.

This parliamentary phase proved to be short-lived. Shortly after the declaration of the present war the Congress withdrew its Ministers in the majority of the provinces. Attempts were made in the succeeding eleven months not only to get back to office in the provinces but also to acquire a share of power at the centre, but these were fruitless. Eventually the Congress gave supreme command of the organisation and its members to Mr. Gandhi who launched another campaign of civil disobedience —this time on the issue that Congressmen should have the right non-violently to preact

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

against India's war effort. Thousands of Congressmen answered Mr. Gandhi's call, uttered anti-war slogans and courted jail. The latest civil disobedience not of the mass type, but restricted to individuals carefully chosen by Mr. Gandhi himself.

Indian States Subjects—In 1938 and 1939 Mr. Gandhi took a great deal of interest in the affairs of the States subjects and supported their demand for civil liberties, the reign of law and responsible government under the aegis of their respective rulers. At first, the States people were told that they should keep their movements apart from that of the Congress in British India and that they should rely more on their own strength than on the help of the Congress. This led to intense political activity in most of the States and an unprecedented awakening among the comparatively backward people of the States. In several States the movement took the form of direct action, disobedience of laws, refusal to pay taxes, etc., exactly on the lines of the civil disobedience movement in British India.

This led to numerous complications. In the first place, the people of the States were not qualified by tradition or training to conduct the fight for more political rights, so that in many a State the movement collapsed through the weakness of the instruments. In the second place, the States people not having been grounded in the discipline of British Indian populations, the campaigns in more than one State led to outbreaks of violence and had therefore to be suspended. These movements also led to unexpected and undesirable consequences beyond the boundaries of the States. The Princes naturally grew hostile to the Congress and became suspicious of Congress leaders in particular and British Indian politicians in general. Undoubtedly this development in the States further diminished the prospect of an early inauguration of the federal scheme, as the Rulers of States became apprehensive of their future in a federation in which the British Indian and Congress influence would certainly be considerable. Indirectly speaking, the Princes began to think in terms of devising measures which would protect them in any future arrangements for the governance of India as a whole.

On the credit side, it must be admitted that this new activity aroused a great deal of consciousness among the people of the States which cannot fail to add to their political education and widen their outlook. Either in response to their subjects' clamour or with a view to anticipating their demands some Rulers liberalised their administrations. The Viceroy, too, advised the Princes gradually to associate their subjects in the conduct of the affairs of their States. All these were to the good, but the movements in the States were much ahead of their time. At all events the soil had not been properly prepared.

CONGRESS MINISTRIES.

After the general elections under the 1935 constitution the Congress hesitated for a while but eventually decided to shoulder the responsibility for the administration. The leaders of the Congress Parties in the provincial legislatures assumed office with confidence and discharged their duties with skill and ability. Almost everyone of the new Ministries had an initial handicap in the shape of financial stringency, but by means of economy and retrenchment they managed to produce budgets which were, generally speaking, applauded. In the field of law and order, they behaved with exemplary firmness and put down every attempt to disturb public peace and tranquillity. This was particularly so in Bombay and the United Provinces, where within a few weeks of assuming office the Ministries were faced with a serious labour situation. The Madras Ministry was called upon to tackle the activities of some extremist Congressmen who went about preaching violence and they met the situation with commendable promptitude and firmness. Similarly, in Bihar the Ministry was faced with attack from two camps: the zemindars threatened *satyagraha* owing to certain land tenure reform measures proposed by Government, while the peasants showed fight on the ground that the remedy proposed was not adequate. It was a delicate situation, but the Government, aided by right-wing leaders, tided over the difficulty by carrying the zemindars and peasants with them, although the peasant leaders, who were extremist Congressmen continued to give trouble to the Ministry.

It is not possible in a short survey to recount the activities of all the Governments run by Congressmen. Broadly speaking, most of them undertook beneficent measures calculated to help the under-dog, although in an attempt to do so and in pursuance of a policy of Prohibition some Congress Ministries levied taxation, which bore unduly heavily on trade and industry, especially on those who provide the capital for the economic regeneration of the country. A few Governments sought to increase their revenue by levying a tax on agricultural incomes. Most of them undertook more or less drastic measures to reduce and remove the burden of debt on the agricultural population. Prohibition of alcoholic liquor and drugs in small areas an experiment preliminary to the proclamation of total prohibition throughout the province was introduced in most of the Congress provinces. The Bihar and the United Provinces Governments took concerted measures to rationalise the sugar industry from top to bottom and tried to ensure for the grower of sugar-cane a minimum economic price for his produce. Attempts were made to reform education, local self-government and several branches of public activity.

Barring a few cases here and there, the Services, both in the Secretariats and in the districts, co-operated willingly with their new masters. The Governors too acted in conformity with the spirit of the assurance given by His Excellency the Viceroy, except for a crisis which occurred early in 1938 in Bihar and the United Provinces (see later). On the whole provincial autonomy was worked by the Congress and the representatives of the British Governments with a great deal of cordiality and efficiency.

Communal Peace Efforts.——During the years 1938-40 several attempts were made by Mr. Gandhi and the Congress leaders to bring about an agreement between the Congress and the all-India Muslim League. The failure of the negotiations embittered the already strained relationship between the Hindu and Muslim communities. Numerous communal disturbances occurred in the Congress-governed provinces. Most of them could be traced to complaints against Congress Governments; the Muslims contended that the Congress Governments were unjust to them while the Hindus protested that they were sacrificed in an attempt to placate the Muslims. The Governments themselves were in a very unenviable position; if they took action against those who spread malicious propaganda they were accused of invading civil liberties, while if they allowed the propagandists to do what they liked, life and property were placed in serious jeopardy.

On the political plane spokesmen of the Muslim League complained that the interests of that community were not adequately looked after and more than one individual and committee toured the country and collected data in this behalf and published them as so many charge sheets against the Congress Governments. To these the Governments concerned issued lengthy replies purporting to substantiate their claim that they were more than just and generous to the minority community.

On the communal plane, the Muslim League's charge against the Congress ministries and the latter's downright repudiation thereof produced a state of affairs which did not conduce to public peace. There was many a disturbance between the Hindus and Muslims in several parts of the country. The strained relationship led to riots which in their turn worsened public feelings. Thus, the vicious circle went on thoroughly vitiating the atmosphere.

Not even the resignation of the Congress ministries which occurred towards the end of October 1939 helped the situation. It was thought for the time that the removal of the objects of Muslim League attack would put an end to the League campaign. But subsequent events showed that far from producing this result the controversy increased in intensity. Out of office, the Congress appeared to have become more exposed to the League attack—at any rate, less in a position to defend itself against the League charges.

The withdrawal of the Congress ministries was hailed by the Muslim League as God-send and Mr. Jinnah announced a day of thanksgiving in celebration of the "deliverance" of the Muslims from the "tyranny" of the Congress. The "Deliverance Day" further accentuated the feeling against the Congress whose spokesmen, however, stoutly denied the charges.

Such was the virulence of the campaign against the Congress that all past efforts to bring about a reconciliation and working arrangement between the Congress and the League had perforce to be abandoned. The Muslim League under Mr. Jinnah struck a new path; and, arguing that the Muslim minorities could not be safe under a system of government in which the Hindu majority would be perpetual, the League proceeded to demand the establishment of separate autonomous Muslim States in Upper India functioning as an equal and respected partner with the Hindu autonomous State in a central government for the whole of geographical India. (For details see chapter headed Muslim League.)

Congress and the War.—Shortly after the declaration of war Mr. Gandhi made a public statement, in his individual capacity, immediately after an interview with the Viceroy. Therein he revealed that he had told His Excellency that his sympathies were with England and France from the purely humanitarian standpoint and that he could not contemplate the destruction of London. "I am not just now thinking of India's deliverance," he said; "it will come; but what will it be worth if England and France fall or if they come out victorious over Germany ruined and humbled?"

This statement created quite a favourable impression in India as well as in Britain but the Congress Working Committee which met about a week later chose to make India's support to Britain in war conditional on a declaration by Britain that the latter's policy towards this country involved the recognition of Indian independence. The resolution said *inter alia*:

"As a first step to dissociate themselves from the policy of the British Government, the Committee called upon the Congress members of the Central Legislative Assembly to refrain from attending the next session. Since then the British Government have declared India as a belligerent country, promulgated ordinances, passed the Government of India Act Amending Bill and taken other far-reaching measures which affect the Indian people vitally and circumscribe and limit the powers and activities of the Provincial Governments.

"This has been done without the consent of the Indian people, whose declared wishes in such matters have been deliberately ignored by the British Government. The Working Committee must take the gravest view of these developments.

"The Congress has repeatedly declared its entire disapproval of the ideology and practice of Fascism and Nazism and their glorification of war and violence and the suppression of the human spirit. It has condemned the aggression in which they have repeatedly indulged and their sweeping away of well-established principles and recognised standards of civilised behaviour. It has seen in Fascism and Nazism the intensification of the principle of Imperialism, against which the Indian people have struggled for many years. The Working Committee must, therefore, unhesitatingly condemn the latest aggression of the Nazi Government in Germany against Poland and sympathise with those who resist it.

"The Congress has further laid down that the issue of war and peace for India must be decided by the Indian people. No outside authority can impose this decision upon them, nor can the Indian people permit their resources to be exploited for Imperialist ends. Any imposed decision or attempt to use Indian resources for purposes not approved by them, will necessarily have to be opposed by them.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"If co-operation is desired in a worthy cause, this cannot be obtained by compulsion and imposition, and the Committee cannot agree to the carrying out by the Indian people of orders issued by an external authority. Co-operation must be between equals, by mutual consent, for a cause which both consider to be worthy.

"The people of India have in the recent past faced great risks and willingly made great sacrifices to secure their own freedom and establish a free democratic State to India, and their sympathy is entirely on the side of democracy and freedom; but India cannot associate herself in a war said to be for democratic freedom when that very freedom is denied to her, and such limited freedom as she possesses is taken away from her.

"If the war is to defend the *status quo* of Imperialist possessions, Colonies, vested interests and privileges, then India can have nothing to do with it. If, however, the issue is democracy and a world order based on democracy, then India is intensely interested in it. The Committee are convinced that the interests of Indian democracy do not conflict with the interests of British democracy or of world democracy.

"But, there is an inherent and ineradicable conflict between democracy for India or elsewhere and Imperialism and Fascism. If Great Britain fights for the maintenance and extension of democracy, then she must necessarily end Imperialism in her own possessions, and establish full democracy in India. The Indian people must have the right of self-determination, the right to frame their own constitution through a Constituent Assembly, without external interference, and the right to guide their own policy.

"A free, democratic India will gladly associate herself with other free nations for mutual defence against aggression and for economic co-operation. We will work for the establishment of a real world order based on freedom and democracy, utilising the world's knowledge and resources for the progress and advancement of humanity.

"The crisis that has overtaken Europe is not of Europe only, but of humanity, and will not pass like other crises or wars, leaving the essential structure of the present-day world intact. It is likely to refashion the world for good. Politically, socially and economically, this crisis is the inevitable consequence of the social and political conflicts and contradictions which have grown alarmingly since the last Great War, and it will not be finally resolved till those conflicts and contradictions are removed and a new equilibrium is established. That equilibrium can only be based on the ending of the domination and exploitation of one country by another and the reorganisation of economic relations on a justice basis for the common good of all.

"India is the crux of the problem, for India has been the outstanding example of modern Imperialism, and no re-fashioning of the world can succeed which ignores this vital problem. With her vast resources she must play an important part in any scheme of world reorganisation.

"The Working Committee have noted that many Rulers of Indian States have offered their services and resources and expressed their desire to support the cause of democracy in Europe. If they must make their profession in favour of democracy abroad, the Committee would suggest that their first concern should be the introduction of democracy within their own States, in which, today, undiluted autocracy reigns.

"The British Government in India are more responsible for this autocracy than even the Rulers themselves, as has been made painfully evident during the past year. This policy is the very negation of democracy and of the new world order for which Great Britain claims to be fighting in Europe. As they (the Working Committee) view past events in Europe, Africa and Asia, and, more particularly, past and present occurrences in India, they fail to find any attempt to advance the cause of democracy or self-determination, or any evidence that the present war declarations of the British Government are being, or are going to be, acted upon.

"The true measure of democracy is the ending of Imperialism and Fascism alike, and the aggression that has accompanied them in the past and the present. Only on that basis can a new order be built up. In the struggle for that new world order the Committee are eager and desirous to help in every way, but the Committee cannot associate themselves or offer any co-operation in a war which is conducted on Imperialist lines, and which is meant to consolidate Imperialism in India and elsewhere.

"In view, however, of the gravity of the occasion, the Committee desire to take no final decision at this stage so as to allow for the full elucidation of the issues at stake, the real objectives aimed at and the position of India in the present and in the future. But the decision cannot long be delayed as India is being committed from day to day to a policy to which she is not a party, and of which she disapproves.

"The Working Committee, therefore, invite the British Government to declare in unequivocal terms what their war aims are in regard to democracy and Imperialism and the new order that is envisaged, in particular, how these aims are going to apply to India and to be given effect to in the present. Do they include the elimination of Imperialism and the treatment of India as a free nation whose policy will be guided in accordance with the wishes of her people?

"A clear declaration about the future, pledging the Government to the ending of Imperialism and Fascism alike, will be welcomed by the people of all countries, but it is far more important to give immediate effect to it to the largest possible extent, for only this will convince the people that the declaration is meant to be honoured. The real test of any declaration is its application in the present, for it is the present that will govern action today and give shape to the future.

"The Working Committee wish to declare that the Indian people have no quarrel with the German people or the Japanese people or any other people, but they have a deep-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

rooted quarrel with systems which deny freedom and are based on violence and aggression. They do not look forward to a victory of one people over another or to a dictated peace, but to a victory of real democracy for all the people of all countries and a world freed from the nightmare of violence and Imperialist oppression."

Although it did not fully represent Mr. Gandhi's views embodied in his statement referred to earlier, he approved of the Working Committee's resolution. He revealed that he was alone in thinking that whatever support was to be given to the British should be given unconditionally. "This could only be done on a purely non-violent basis. It could not take the purely non-violent attitude. It felt that the nation had not imbibed the non-violent spirit requisite for the possession of the strength which disdains to take advantage of the difficulty of the opponent. But in stating the reasons for its conclusion the Committee desired to show the greatest consideration for the English."

In support of the resolution, Mr. Gandhi said that it compelled India "to think not merely for her own freedom but of the freedom of all the exploited nations of the world." He added: "Recognition of India, and for that matter of all those who are under the British Crown, as free and independent nations seems to be the natural corollary of British professions about democracy. If the war means anything less, the co-operation of dependent nations can never be honestly voluntary, unless it were based on non-violence.

"All that is required is a mental revolution on the part of British statesmen. To put it still more plainly, all that is required is honest action to implement the declaration of faith in democracy made on the eve of the war, and still being repeated from British platforms. Will Britain have an unwilling India dragged into the war or a willing ally co-operating with her in the prosecution of a defence of true democracy? The Congress support will mean the greatest moral asset in favour of England and France. For the Congress has no soldiers to offer. The Congress fights not with violent but with non-violent means, however imperfect, however crude the non-violence may be."

British Attitude.—In October 1939, the Viceroy held consultations with leaders of the Congress, the League and a number of other political and communal organisations in the country. It was at first expected that something tangible would emerge from these negotiations but eventually it proved to be a miniature Round Table Conference, with this difference that the Indian representatives were not present at one and the same time. These negotiations formed the basis of a statement of policy made by the Viceroy in the middle of October. His Excellency said :—

"I have had the advantage of a full and frank discussion with no fewer than 52 people—with Mr. Gandhi, with the President and members of the Congress Working Committee, with Mr. Jinnah and with representative members of the Muslim League organisation, with the Chancellor of the Chamber of Princes, and with a great variety of persons prominent in the political life of British India.

"As was only to be expected, conversations with representatives of so many different points of view revealed marked differences of outlook, markedly different demands, and markedly different solutions for the problems that lie before us. Again, and that too was what might have been expected at a time such as the present, reservations or demands for special protection on one side have tended to be balanced by proposals for still more marked constitutional changes on another.

"The essential matters on which a clarification of the position is desired are :—

"First, what are the objectives of His Majesty's Government in the war? To what extent are they of such a character that India with her long history and great traditions can, with a clear conscience, associate herself with them?

"Second, what is the future that is contemplated in the constitutional sphere for the Indian continent? What are the intentions of His Majesty's Government? Is it possible to define those intentions more precisely and in such a manner as to leave the world in no doubt as to the ultimate status envisaged for India as far as the British Commonwealth is concerned?

"Third, in what way can the desire of India and of Indian public opinion for a closer association, and an effective association, with the prosecution of the war be satisfied?

"I do not propose to touch on the question of our objectives for India. That is a matter which I will deal with separately in answering the second question which I have mentioned above. His Majesty's Government have not themselves yet defined with any ultimate precision their detailed objectives in the prosecution of the war. It is obvious that such a definition can come only at a later stage in the campaign, and that when it does come, it cannot be a statement of the aims of any single ally. We are fighting to resist aggression whether directed against ourselves or others. Our general aims have been stated by the Prime Minister within the last few days as follows:—'We are seeking no material advantage for ourselves. We are not aiming only at victory, but looking beyond it to laying the foundation of a better international system which will mean that war is not to be the inevitable lot of each succeeding generation. We, like all the peoples of Europe, long for peace; but it must be a real and settled peace, not an uneasy truce interrupted by constant alarms and threats.' This statement, I think, clearly establishes the nature of the cause for which we are fighting, and justifies, if justification is needed, the extension by India of her moral support and her goodwill to the prosecution of that cause.

"What are the intentions and aims of His Majesty's Government in relation to India? I cannot do better in reply to that question than to refer to the statement made on behalf of His Majesty's Government, and with their full authority, by the late Secretary of State for India in the House of Commons on the 6th February, 1935. That statement makes the position clear beyond a shadow of doubt. It

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

refers to the pledge given in the Preamble of the Act of 1919, and it makes it clear that it was no part of the plan of His Majesty's Government to repeal that pledge. It confirms equally the interpretation placed in 1929 by Lord Irwin as Viceroy, again on the authority of the Government of the day, on that Preamble, that 'the natural issue of India's progress as there contemplated is the attainment of Dominion Status.' I need not dilate on the words of that statement. They are clear and positive. They are enshrined in the Parliamentary record. They stand as a definite and categorical exposition of the policy of His Majesty's Government to-day, and of their intentions to-day in this end—the future constitutional development and position of India. I would add only that the Instrument of Instructions issued to me as Governor-General by His Majesty the King-Emperor in May 1937 lays upon me as Governor-General a direction so to exercise the trust which His Majesty has reposed in me 'that the partnership between India and the United Kingdom within our Empire may be furthered to the end that India may attain its due place among our Dominions'."

The following is the relevant portion of Sir Samuel Hoare's statement made in the House of Commons on February 6, 1935 :—

"The position of the Government is this : They stand firmly by the pledge contained in 1919 Preamble (which it is not part of their plan to repeal) and by the interpretation put by the Viceroy in 1929 on the authority of the Government of the day on that Preamble that 'the natural issue of India's progress as there contemplated is the attainment of Dominion Status.' The declaration of 1929 was made to remove doubts which had been felt as to the meaning of the Preamble of 1919. There is, therefore, no need to enshrine in an Act words and phrases which would add nothing new to the declaration in the Preamble. In saying that we stand by our pledges I include, of course, not only pledges given to British India and to Burma as part of British India, but also our engagements with the Indian States."

"His Majesty's Government recognise that when the time comes to resume consideration of the plan for the future Federal Government of India, and of the plan destined to give effect to the assurances given in Parliament by the late Secretary of State, to which I have just referred, it will be necessary to reconsider in the light of the then circumstances to what extent the details of the plan embodied in the Act of 1935 remain appropriate. And I am authorised now by His Majesty's Government to say that at the end of the war they will be very willing to enter into consultation with representatives of the several communities, parties, and interests in India, and with the Indian Princes, with a view to securing their aid and co-operation in the framing of such modifications as may seem desirable.

"The scheme of government embodied in the Act of 1935 was designed as an essential stage in that process. But I have made clear in what I have just said that His Majesty's Government will, at the end of the war, be prepared to regard the scheme of the Act as open to modification in the light of Indian views. And I would make it clear, too, that it will be their object, as at all times in the past it has been, to spare no pains to further agreement by any means in their power in the hope of contributing to the ordered and harmonious progress of India towards her goal.

"Let me in that connection add that in the conversations I have had representatives of the minorities have urged most strongly on me the necessity of a clear assurance that full weight would be given to their views and to their interests in any modifications that may be contemplated. On that I need say no more than that over more than a decade at the three Round Table Conferences, and at the Joint Select Committee, His Majesty's Government consulted with and had the assistance or the advice of representatives of all parties and all interests in this country. It is unthinkable that we should now proceed to plan afresh or to modify in any respect any important part of India's future constitution without again taking counsel with those who have in the recent past been so closely associated in a like task with His Majesty's Government and with Parliament.

"I am convinced that having regard to the extent of agreement which in fact exists in the constitutional field, and on this most difficult and important question of the nature of the arrangements to be made for expediting and facilitating the attainment by India of her full status, there is nothing to be gained by phrases which, widely and generally expressed, contemplate a state of thing which is unlikely to stand at the present point of political development the test of practical application, or to result in that unified effort by all parties and all communities in India on the basis of which alone India can hope to go forward as one and to occupy the place to which her history and her destinies entitle her. I would ask that these words of caution be not taken as indicating any lack of sympathy on the part of His Majesty's Government for the aspirations of India, or any indifference to the pace of her advance; and I would repeat that His Majesty's Government are, but concerned to use their best endeavours, now as in the past to bring about that measure of agreement and understanding between all parties and all interests in this country which is so essential a condition of progress towards India's goal.

"In the light of my conversations and of the views (by no means always in accord) of representatives of the great parties and of the Princes, I am of opinion that the right solution would be the establishment of a consultative group, representative of all major political parties in British India and of the Indian Princes, over which the Governor-General would himself preside, which would be summoned at his invitation, and which would have as its object the association of public opinion in India with the conduct of the war and with questions relating to war activities.

"This group, for practical reasons, would inevitably be limited in size. But His Majesty's Government contemplate that it should be fully representative, and in particular that its personnel should be drawn by the Governor-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

General from panels prepared by the various major political parties, from which a selection of individuals to attend meetings of the group would be made by the Governor-General. I hope in the very near future to enter into consultation with political leaders and with the Princes on this question. I have no doubt whatever that an arrangement of this nature will most materially contribute to associating the Indian States and British India with the steps which are being taken for the prosecution of the war and with the arrangements that are being made in that connection.

"And I am confident, too, that in an association of this nature of representatives of all parties and all interests, there lies the germ of that fuller and broader association of all points of view in this country which contain in it the seeds of such advantage for the future of India as a whole.

"Even if on certain points I have not, to my knowledge, been able to give assurances so comprehensive as those which would, I know, have been welcomed in certain political quarters in India, I would urge insistently that this is not a moment at which to risk the splitting of the unity of India on the rock of particular phrases, and I would press that we should continue to aim at the unity of India even if differences of greater or less significance continue to exist."

Congress Reply.—The offer made by the Viceroy was rejected out of hand by Mr. Gandhi who described the Viceregal declaration as profoundly disappointing. "It would have been better if the British Government had declined to make any declaration whatsoever. The long statement made by the Viceroy simply shows that the old policy of divide and rule is to continue. So far as I can see, the Congress will be no party to it, nor can the India of the Congress conception be a partner with Britain in her war with Herr Hitler. The declaration shows clearly that there is to be no democracy in India if Britain can prevent it. Another Round Table Conference is promised at the end of the war. Like its predecessor, it is bound to fail. The Congress asked for bread and it has got a stone. What the future has in store for India I dare not foretell. I do not blame the Viceroy or the leaders of Britain for the unfortunate result. The Congress will have to go into the wilderness again before it becomes strong and pure enough to reach its objective. I have no doubt that Congressmen will await the Working Committee's decision."

Within a week the Congress Working Committee met again and generally endorsed the views expressed by Mr. Gandhi above. It said: "In the circumstances the Working Committee cannot possibly give any support to Great Britain, for it would amount to an endorsement of the Imperialist policy which the Congress has always sought to end. As a first step in this direction, the Committee calls upon the Congress ministries to tender their resignations."

Lest it should be thought that the Congress had closed its doors to negotiations, Mr. Gandhi explained that the Congress had left the door open to Britain "to mend the mistake." He added: "Further action by the Congress will wholly depend upon Britain's handling of the crisis. The Congress has demanded no constitutional change during the war. Its demand is for a declaration that Britain's war aims necessarily include India's independence according to the charter framed by her elected representatives after war. This declaration should be acted up to during war to the utmost extent possible. The minorities question is a bogey. Not that it does not exist, but its proper solution can only come out of the proposed Constituent Assembly. The burden of solving the tangle rests not on Britain but on the Constituent Assembly. According to Indian opinion, the Hindu-Muslim question at the direct product of British rule. The least the Congress could do was to withdraw the Congress ministers from the provincial administration."

Acting on the directions of the Congress Working Committee the legislatures in the provinces administered by the Congress passed resolutions regretting that the British Government had made India a participant in the war without the consent of the people of India and had further "in complete disregard of Indian opinion," passed laws and adopted measures "curtailing the powers and activities of the Provincial Governments." The resolution recommended to the Provincial Governments to convey to the Government of India and to the British Government that "in consonance with the avowed aims of the present war, it is essential in order to secure the co-operation of the Indian people that the principles of democracy be applied to India and her policy be guided by her people; and that India should be regarded as an independent nation entitled to frame her own constitution providing, among other things, adequate safeguards for the protection of the rights and liberty of the members of all minority communities in India, and further that suitable action should be taken insofar as it is possible in the immediate present to give effect to that principle in regard to the present governance of India, giving at the same time a voice to important minorities in the machinery that may be devised for the purpose."

The legislatures of the Punjab and Bengal, which are not under Congress rule however, voiced the support of those provinces to the Allied cause in the war. The resolution in these two provincial legislatures demanded that it should forthwith be made absolutely clear that "the constitution of India shall be examined *de novo* at the end of the war with a view to the immediate attainment of the objective of, Dominion Status with effective protection of the due rights of the minorities and other sections and in consultation with, and agreement of, all parties concerned."

After the passage of the resolutions quoted above the various ministries in the Congress governed provinces tendered their resignations. They were accepted in the first week of November when the Governors of those provinces suspended the Constitution and assumed the whole governmental power under section 93 of the Government of India Act.

Another Attempt.—Yet another attempt was made early in November to bring about an understanding between the Congress and the British Government, but it led to nothing as the Viceroy's offer respecting representation in the Executive Council at the Centre, if a basis of agreement could be reached between the Congress and the League in the provincial field, was rejected by the Congress.

Lord Linlithgow urged the wisdom of reaching an understanding on general lines for the purposes of joint co-operation in the existing organisation of the Central Government for the duration of the war, pending later re-examination of the whole constitutional issue.

To this Dr. Rajendra Prasad, as President of the Indian National Congress and Mr. Jinnah, as President of the All-India Muslim League, found themselves unable to do other than send independent replies.

On behalf of the Congress the reply was based on the stand-point that the demand for a declaration affirming India's right to a self-determined constitution by means of a constituent assembly, for which an agreed formula for minority representation would be found, was the main point at issue. This claim, it was asserted, had nothing to do with the "domestic" communal difficulty and its satisfaction was advanced as an essential preliminary to any other considerations.

From the other angle, Mr. Jinnah has quietly contented himself with pointing out that his discussions with the Congress merely confirmed their disinclination to discuss the questions propounded by the Viceroy until and unless the demand embodied in the Congress resolution regarding war aims is conceded.

Lord Linlithgow's earnest attempt to reach a political understanding thus ended in a deadlock.

The Congress spokesmen insisted on pressing their demand for a declaration from His Majesty's Government of India's independent right to produce a self-governing constitution by a democratic process. This in itself was unacceptable to Mr. Jinnah because the constituent assembly machinery had been unequivocally rejected by the Muslim League Working Committee.

In the result independent replies on behalf of the two parties were submitted to the Viceroy.

In a letter addressed jointly to the Congress and the Muslim League leaders, the Viceroy suggested that "given the great importance of ensuring harmonious working at the Centre, you should enter upon discussions between yourselves with a view to discovering whether you could reach a basis of agreement between yourselves in the provincial field, consequent on which you could let me have proposals which would result in representatives of your two organisations immediately participating in the Central Government as members of my Executive Council. In my judgment, it ought not to be necessary absolutely to resolve every detail of such differences as may exist in the provinces. What is required is a degree of agreement in respect of the provinces, such as to make it possible for my visitors, and the organisations which they represented, to put forward a scheme which could be considered for the Centre."

By way of specific proposals, His Excellency said: "First, that one would hope that it might be found practicable to include also one or possibly more representatives of other important groups, and that that was a question on which I should value your advice when we came to grapple with the details.

Secondly, that the arrangement which I invited you to consider for the Centre would be an *ad hoc* arrangement for the period of the war, and quite distinct from the much wider question of constitutional reform at the end of the war.

Thirdly, that the position of any one appointed to my Executive Council as a member of a political party would be identical, in privileges and in obligations, with that of the existing members of my Council.

And, fourthly, that the arrangement would be within the general scheme of the existing law. It would be admittedly and inevitably a makeshift arrangement for the duration of the campaign. What is required now, if we could get a workable scheme together, is to put it into operation, with as little delay as possible, pending the more general review of the whole constitutional position which His Majesty's Government have expressed their readiness to undertake after the conclusion of hostilities."

In reply, the Congress President said that both Mr. Gandhi and he "missed at the interview any reference to the main and moral issue raised by the Congress about clarification of war aims," without which it was impossible for the Congress to consider any subsidiary proposal. "Subsequent statements made on behalf of the British Government in Parliament have not made any essential difference to the policy outlined in the Viceregal statement. I am afraid it is quite impossible for us to accept this policy or to consider any steps to further co-operation unless the policy of the British Government is made clear in a declaration on the lines suggested by the Congress.

"It has pained us to find the communal question being dragged in in this connection. It has clouded the main issue. It has been repeatedly said on behalf of the Congress that it is our earnest desire to settle all points of communal controversy by agreement, and we propose to continue our efforts to this end. But I would point out that this question does not in any respect come in the way of a declaration of Indian freedom as suggested above.

"Such a declaration applies to the whole of India and not to any particular community, and the Constituent Assembly which will frame India's constitution, will be formed on the widest possible basis of franchise and by agreement in regard to communal representation. We are all agreed that there must be full protection of minority rights and interests, and this protection should be by agreement between the parties concerned.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"The British Government, taking or sharing the burden has, in our opinion, made a settlement of the question much more difficult than it should have been. It should allay all real anxiety on the part of the British Government when the Congress declares that it contemplates no constitution which does not carry with it the protection of real minorities to their satisfaction.

"It seems to us that a clear declaration of the kind suggested is an essential preliminary to any further consideration of the matter. I should like to add that recent developments in the European war have made it all the more necessary for a clear enunciation of war aims. If a satisfactory declaration is made, a discussion of the proposal made by Your Excellency will be appropriate and useful and we shall gladly discuss it with you."

Mr. Jinnah's reply pointed out that the Congress leaders could not discuss any questions relating to the provincial field or the Centre until the British Government had complied with their demand for a declaration and that therefore the Viceroy's proposals were not considered by them.

Late in November the Working Committee reiterated its earlier resolutions and approved of the Congress President's reply to the Viceroy.

Communal Issue.—The Muslim League's campaign against the Congress had by now increased in vigour and Mr. Jinnah announced the observance of a "Deliverance Day" to celebrate the resignation of the Congress Ministries.

About this time, Lord Zetland made a statement in Parliament emphasising His Majesty's Government's determination to pay due heed to the demands and rights of the Muslim and other minorities.

In answer to this the Congress Working Committee observed that "Lord Zetland's reference to the communal question merely clouds the issue and takes the public mind off the central theme that the British have failed to define their war aims especially with regard to India's freedom. In the opinion of the Working Committee, the communal question will never be satisfactorily solved so long as the different parties are to look to a third party, through whose favour they expect to gain special privileges even though it may be at the expense of the nation.

"The rule of a foreign power over a people involves a division among the elements composing it. The Congress has never concealed from itself the necessity of uniting the various divisions. It is one organisation which, in order to maintain its national character, has consistently tried, not always without success, to bring about unity. The Working Committee is convinced that lasting unity will only come when foreign rule is completely withdrawn. The Working Committee is aware that the independence of India cannot be maintained if there are warring elements within the country. The Committee is, therefore, entitled to read in the British Government raising the communal question as reluctance to part with power.

"The constituent assembly as proposed by the Congress is the only way to attain a final settlement of the communal question. The proposal contemplates the fullest representation of the minorities, with separate electorates where necessary. It has already been made clear on behalf of the Congress that minority rights will be protected to the satisfaction of the minorities concerned, differences, if any, being referred to an impartial tribunal.

"Congressmen by now realise that independence is not to be won without very hard work. Since the Congress is pledged to non-violence, the final sanction behind it is civil resistance, which is but a part of *satyagraha*. *Satyagraha* means good-will to all, especially towards opponents. Therefore, it is the duty of individual Congressman to promote and seek good-will. Success of the programme of *khaddar* as an accepted symbol of non-violence, harmony and economic independence, is indispensable. The Working Committee, therefore, hopes that all Congress organisations will, by the increased prosecution of the constructive programme, prove themselves fit to take up the call, when it comes."

Orient Club Speech.—The next stage in the political negotiations was a speech made by the Viceroy in January 1940, known as the Orient Club Speech, declaring that Dominion Status was the goal of British policy in India, to be attained with the minimum delay after the conclusion of the war. His Excellency regretted that force of circumstances had compelled him to suspend the preparations for the inauguration of Federation and said: "I deeply regret myself that that should have been necessary, since whatever criticisms, on one ground or another, have been levelled against the scheme of Federation in the Act, could it but have been brought into operation, it would have provided us with the solution of almost all the problems that confront us today—the presence of Ministers at the Centre; the association of the Indian States (a point of such vital importance to British India) in a common Government; the representation of all minorities on the lines elaborated after a full consideration of the claims and proposals of the minorities themselves; and the unity of India."

Outlining the intentions of His Majesty's Government towards India, the Viceroy said: "Their objective for India is full Dominion Status—Dominion Status, too, of the Statute of Westminster variety; that, so far as the intermediate period is concerned (and it is their desire to make that intermediate period the shortest practicable), they are ready to consider the reopening of the scheme of the Act of 1935 so soon as practicable after the war with the aid of Indian opinion; that they are prepared in the meantime, subject to such local adjustments between the leaders of the great communities as may be necessary, to ensure harmonious working, and as an immediate earnest of their intention, to expand the Executive Council of the Governor-General by the inclusion of a small number of political leaders; and that they are ready and anxious to give all the help they can to overcome the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

difficulties that confront us and that confront India today."

His Excellency continued: "We are, after all, dealing not with one political party only, but with many. Nor must we forget the essential necessity, in the interests of Indian unity, of the inclusion of the Indian States in any constitutional scheme. There are the insistent claims of the minorities. I need refer only to two of them—the great Muslim minority and the scheduled castes. There are the guarantees that have been given to the minorities in the past—the fact that their position must be safeguarded, and that those guarantees must be honoured.

"The position of the Viceroy and of His Majesty's Government, is difficult, faced as they are with strong and conflicting claims advanced by bodies and interests to whose views the utmost attention must be paid, and whose position must receive the fullest consideration. Justice must be done as between the various parties, and His Majesty's Government are determined to see justice done.

"But I would ask my friends in the various parties to consider whether they cannot get together and reach some agreement between themselves which would facilitate my task, and the task of His Majesty's Government, in dealing with this vital question of Indian constitutional progress: and I would venture again to emphasise the case for compromise—the case for avoiding too rigid an approach to problems such as those with which we are dealing today. As to the objective, there is no dispute. I am ready to consider any practical suggestion that has general support, and I am ready, when the time comes, to give every help that I personally can. His Majesty's Government are not blind—nor can we be blind here—to the practical difficulties involved in moving at one step from the existing constitutional position into that constitutional position which is represented by Dominion Status. But here again I can assure you that their concern and mine is to spare no effort to reduce to the minimum the interval between the existing state of things and the achievement of Dominion Status.

"The offer is there. The responsibility that falls on the great political parties and their leaders is a heavy one, and one of which they are, I know, fully conscious. They have helped me in the past. I ask today that they will help me again and help India, and I ask for their co-operation and their assistance in terminating at as early a date as possible a state of things which all who have faith in the virtue of constitutional progress must deplore; a state of things which every lover of India—everyone who is concerned to advance her interests—must feel today to be a bitter disappointment."

Immediately after this the Viceroy made it clear in a speech at Baroda that the fact that the federal preparations had been suspended did not for a moment mean that His Majesty's Government had in any way modified their own view as to the necessity for securing Indian unity, "a unity which can only be complete if in the constitutional arrangements of the future the historic Indian States, with their great and special traditions, take the place which we have always looked forward to seeing them occupy."

On the basis of the Bombay speech quoted above, Mr. Gandhi again met the Viceroy, but the interview led to nothing, as at earlier meetings. In the words of an agreed *communique*, "His Excellency set out in some detail the intention and the proposals of His Majesty's Government. He emphasised, in the first place, their earnest desire that India should attain Dominion Status at the earliest possible moment and to facilitate the achievement of that status by all means in their power. He drew attention to the complexity and difficulty of certain of the issues that called for disposal in that connection, in particular the issue of defence in a Dominion position.

"He made it clear that His Majesty's Government were only too ready to examine the whole of the field in consultation with representatives of all particulars and interests in India when the time came. He made clear also the anxiety of His Majesty's Government to shorten the transition period and to bridge it as effectively as possible.

"His Excellency drew attention to the fact that, as he recently repeated at Baroda, the Federal scheme of the Act, while at present in suspense, afforded the swiftest stepping stone to Dominion Status and that its adoption, with the consent of all concerned, would facilitate the solution of many of the problems that had to be faced in that connection.

"He added that the offer put forward by him in November last of an expansion of the Governor-General's Executive Council on the lines and on the basis then indicated remained open and that His Majesty's Government were prepared to give immediate effect to that offer. Subject to the consent of the parties affected, His Majesty's Government would be prepared also to reopen the Federal scheme so as to expedite the achievement of Dominion Status and to facilitate the settlement after the war of the issues to which it gave rise.

"Mr. Gandhi expressed appreciation of the spirit in which these proposals were put forward, but made it clear that they did not, in his view, at this stage meet the full demand of the Congress Party. He suggested, and the Viceroy agreed, that in the circumstances it would be preferable to defer for the present further discussions with the object of a solution of the difficulties which had arisen."

In a statement on the failure of this latest effort, Mr. Gandhi said he saw no prospect of a peaceful and honourable settlement unless Britain accepted the position that the time had come when India must be allowed to determine her own constitution and status.

"There exists a deep gulf," he said, between the position indicated in the Viceroy's offer, which contemplates final determination of India's destiny by the British Government, and the position taken up by the Congress."

RAMGARH CONGRESS, 1940.

The annual session of the Congress was held at Ramgarh in April 1940. Maulana Abul Kalam Azad, who presided, said: "When once a step is taken, there is no stopping. To cry halt is to go back, and we refuse to go back. We can only, therefore, go forward. I am sure that the voice of every one of you joins me when I proclaim that we must, and will, go forward." He continued: "The straight and simple question is of India's right: whether she is entitled to determine her own fate or not. On the answer to this question depend the answers to all other questions of the day." He then referred to the communal question, and said that the Congress always meant to solve the problem on the basis of two principles, namely, (1) that whatever constitution was adopted for India there must be the fullest guarantees in it for the rights and interests of minorities; (2) that the minorities should judge for themselves what safeguards were necessary for the protection of their rights and interests.

He added: "I have been in the Congress for the last nineteen years. During the whole of this period there is not a single important decision of the Congress in the shaping of which I have not had the honour to participate. I assert that during these last nineteen years not for a single day the Congress has thought of solving this problem in any way other than the way I have stated above."

"Indian Muslims," he said, "have to answer one basic question: "Do we Indian Muslims view the free India of the future with suspicion and distrust or with courage and confidence? If we view it with fear and suspicion then undoubtedly we have to follow a different path.... We are then forced to tolerate the existence of a third power.....But if we are convinced that for us fear and doubt have no place, and that we must view the future with courage and confidence in ourselves, then our course of action becomes absolutely clear." I am a Muslim and proud of that fact. Islam's splendid traditions of thirteen hundred years are my inheritance.....It is my duty to protect them." At the same time, he said: "I am proud of being an Indian, I am a part of the indivisible unity that is Indian nationality.....I am an essential element which has gone to build India, I can never surrender this claim."

Concluding, he said: "The time of our trial is upon us. We have already focussed the world's attention. Let us endeavour to prove ourselves worthy."

There was only one resolution before the session, and it was adopted *nem con.* It ran:—

"This Congress, having considered the grave and critical situation resulting from the war in Europe and British policy in regard to it approves of and endorses the resolutions passed and the action taken on the war situation by the A.I.C.C. and Working Committee. The Congress considers the declaration by the British Government of India as a belligerent country, without any reference to the people of India, and the exploitation of India's resources in this war, as an affront to them, which no self-respecting and freedom-loving people can accept or tolerate. The recent pronouncements made on behalf of the British Government in regard to India demonstrate that Great Britain is carrying on the war fundamentally for Imperialist ends and for the reservation and strengthening of the Empire, which is based on the exploitation of the people of India, as well as of other Asiatic and African countries. Under these circumstances, it is clear that the Congress cannot in any way, directly or indirectly, be party to the war, which means continuance and perpetuation of this exploitation. The Congress, therefore, strongly disapproves of Indian troops being made to fight for Great Britain and of the drain from India of men and material for the purposes of the war. Neither the recruiting nor the money raised in India can be considered to be voluntary contributions from India. Congressmen, and those under the Congress influence, cannot help in the prosecution of the war with men, money or material.

"The Congress hereby declares again that nothing short of Complete Independence can be accepted by the people of India. Indian freedom cannot exist within the orbit of Imperialism and Dominion Status or any other status within the Imperial structure is wholly inapplicable to India, is not in keeping with the dignity of a great nation, and would bind India in many ways to British politics and economic structure. The people of India alone can properly shape their own constitution and determine their relations to the other countries of the world, through a Constituent Assembly elected on the basis of adult suffrage.

"The Congress is further of opinion that while it will always be ready, as it ever has been, to make every effort to secure communal harmony no permanent solution is possible except through a Constituent Assembly, where the rights of all recognised minorities will be fully protected by agreement, as far as possible, between the elected representatives of various majority and minority groups, or by arbitration if agreement is not reached on any point. Any alternative will lack finality. India's constitution must be based on independence, democracy and national unity, and the Congress repudiates attempts to divide India or to split up her nationhood. The Congress has always aimed at a constitution where the fullest freedom and opportunities of development are guaranteed to the group and the individual, and social injustice yields place to a juster social order.

"The Congress cannot admit the right of the rulers of Indian States, or of foreign vested interests to come in the way of Indian freedom. Sovereignty in India must rest with the people, whether in the States or the provinces, and all other interests must be subordinated to their vital interests. The Congress holds that the difficulty raised in regard to the States is of British creation and it will not be satisfactorily solved unless the declaration of the freedom of India from foreign rule is unequivocally made.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Foreign interests if they are not in conflict with the interests of the Indian people, will be protected.

"The Congress withdrew the Ministries from the provinces where the Congress had a majority in order to dissociate India from the war and to enforce the Congress determination to free India from foreign domination. This preliminary step must naturally be followed by Civil Disobedience, to which the Congress will unhesitatingly resort as soon as the Congress organisation is considered fit enough for the purpose, or in case circumstances so shape themselves as to precipitate a crisis. The Congress desires to draw the attention of Congressmen to Gandhiji's declaration that he can only undertake the responsibility of declaring Civil Disobedience when he is satisfied that they are strictly observing discipline and are carrying out the constructive programme prescribed in the Independence Day pledge.

"The Congress seeks to represent and serve all classes and communities without distinction of race or religion, and the struggle for Indian Independence is for the freedom of the whole nation. Hence the Congress cherishes the hope that all classes and communities will take part in it. The Civil Disobedience is to invoke the spirit of sacrifice in whole action.

"The Congress hereby authorises the All-India Congress Committee and in the event this being necessary, the Working Committee, to take all steps to implement the Working Committee resolution, as the Committee concerned may deem necessary."

Mr. Gandhi scored a personal triumph at Ramgarh as, in response to his speeches to the delegates, the voice of opposition, such as it was, was effectively stifled; and there was evidence of a general readiness to follow his lead implicitly.

In obedience to his directions, the various Congress organisations in the country converted themselves into *Satyagraha* committees, and a large number of Congressmen, including ex-Ministers, enrolled themselves as active *Satyagrahis*, ready to make any sacrifice to secure the Congress objective of independence for India.

THE CONGRESS IN 1940-41.

The weeks that followed the Ramgarh session of the Congress—and since then there has been no annual session of the Congress till the time of writing—was a period of intensive preparation for a direct action movement under the guidance of Mr. Gandhi, side by side with expressions of hope by Mr. Gandhi and other Congress leaders that such a struggle might be avoided. Mr. Gandhi's notion of "preparation" was as usual on the constructive plane, that is, hand-spinning, removal of untouchability and promotion of Hindu-Muslim unity. The central executive of the Congress encouraged provincial and district Congress committees to convert themselves into Satyagraha committees charged with the task not only of propagating the items of the constructive programme but also of infusing into Congressmen a sense of discipline and implicit obedience to Mr. Gandhi's dictates.

As for communal unity, Mr. Gandhi stoutly resisted the Muslim League demand for Pakistan but declared that, although, as a man of non-violence, he could not forcibly resist the proposed partition, if the Muslims of India really insisted upon it, he could never be a willing party to the proposed vivisection of the country. He wrote: "My whole soul rebels against the idea that Hinduism and Islam represent two antagonistic cultures and doctrines. To assent to such a doctrine is for me denial of God. For I believe with my whole soul that the God of the Quran is also the God of the Gita, and that we are all, no matter by what name designated, children of the same God. I must rebel against the idea that millions of Indians who were Hindus the other day changed their nationality on adopting Islam as their religion."

Announcing the British Government's policy, Lord Zetland told the House of Lords in April 1940 that negotiation and not dictation was embodied in the undertaking given by His Majesty's Government to examine the constitutional field in consultation with representatives of all parties and interests in India. He thought that the fate of India depended on the answer the Congress gave to the question whether or not it would close the door upon that unity of India which the Congress itself so passionately desired.

Mr. Gandhi responded with a declaration that he would do nothing to embarrass Great Britain, although the Congress could not lend its moral influence to Britain. He expressed the hope that Britain would make it unnecessary for him to launch a struggle and said: "I would welcome a settlement which ensures peace with honour. I am not averse to coming to terms with Britain on matters like defence and commercial interests, and I am fully prepared that these adjustments should be referred to a constituent assembly as part of an agreed settlement."

NO EMBARRASSMENT.—While elaborate conversations of this character were going on between representatives of the British Government and Mr. Gandhi, the war took a sudden

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

turn for the worse. The Government in Great Britain was reconstituted under Mr. Churchill with Mr. L. S. Amery at the head of the India Office in place of Lord Zetland.

The invasion of the Low Countries, the capitulation of Belgium and the collapse of France produced in India a new feeling in favour of Britain. "We have undoubtedly our grievance against England; we know that she has not behaved fairly and squarely by India," said Babu Rajendra Prasad; "at the same time I realise that England is any day better than the Totalitarian States." The same feeling must have induced Mr. Gandhi to affirm that he had no desire to embarrass Britain but that he wanted the Congress, through civil disobedience, merely to deny Britain the moral influence which Congress co-operation would give.

Pandit Nehru, too, proclaimed that England's difficulty is not India's opportunity," while Mr. Gandhi remarked: "If the British Government will not *suo moto* declare India as a free country, having the right to determine her own status and constitution, I am of opinion that we should wait till the heat of the battle in the heart of the Allied countries subsides and the future is clearer than it is. We do not seek our independence out of Britain's ruin.

There was clear evidence of a desire on the part of many Congress leaders actively to help in the war in spite of Mr. Gandhi's known convictions on the subject. Mr. C. Rajagopalachariar, for instance, said that the present crisis was very serious, but if India was to take an enthusiastic part and give full help to the Allies the best means would be to confer on her freedom, which would infuse in her a feeling that in fighting for the Allies she fought for her own interest.

In his first official pronouncement on India, Mr. Amery said that the attainment by India of free and equal partnership in the British Commonwealth was the goal of his Government's policy as it had been of its predecessor. He added that it was for Indians themselves to play a vital part in devising a form of Constitution best adapted to India's conditions and India's outlook.

Mr. C. Rajagopalachariar, ex-Premier of Madras and prominent Congress leader, responded to this appeal with the observation that "at this juncture there ought to be responsible government in each province; only Ministers enjoying the confidence and support of the people would be in a position to allay any possible panic and maintain order." Whatever might have been the relations between Britain and India in the past, said Mr. Rajagopalachariar, the cause of the Allies in the present war was a just one. He reiterated that India's support would be forthcoming in ample measure if Britain gave a promise to grant freedom to India. Mr. Gandhi had gone to the extent of saying he would be satisfied with an assurance intended to be fulfilled at the conclusion of the war. But Britain was evading giving a direct and clear reply.

A Big Jump.—By now the feeling had grown among Indians that the war had come closer to this country and that the danger of external aggression and internal disorder were not remote possibilities. This realisation caused a revolution in the minds of most Congressmen who had the courage to adhere steadfastly to Mr. Ga and his non-violence in any eventuality. Congress Working Committee virtually a doned Mr. Gandhi and offered to co-operate the war effort provided a fully representa National Government was formed at the cen Apart from the ideological separation fr Mr. Gandhi, this offer constituted a big jump the Congress—from non-participation in war to active help in the prosecution of t war.

The grounds for this change in Congress po was prepared in June 1940 when, after prolong deliberations, the central executive of t Congress issued a lengthy statement runn as follows:—

"The Working Committee have been deep moved by the tragic events that have tak place in Europe in startling succession and i particular by the misfortunes that have befal the people of France. These events have alread had far-reaching consequences and they a likely to be followed by other happenings wh will lead to novel situations and complex pr blems.

"Ever since the commencement of th European war the Congress has followed policy which was based on its principles and o the attitude of the British Government towar the demand that India should function as free and independent country. This policy w confirmed in the Ramgarh resolution, and th manner of the application of this policy w necessarily depend on the situation which chang from day to day.

"The problems which were distant are n near at hand and may soon demand solutio The problem of the achievement of nation freedom has now to be considered along with t allied one, its maintenance and the defence the country against possible external aggressi and internal disorder.

"The war in Europe, resulting from a des for Imperialist domination over other peop and countries and a suicidal race in armament has led to human sorrow and misery on a sc hitherto unknown. It has demonstrated th inefficacy of organised violence on however w a scale for the defence of national freedom a the liberties of peoples.

"It has shown beyond a doubt that warfa cannot lead to peace and freedom and the choi before the world is uttermost degradation a destruction through warfare or the way peace and non-violence on a basis of freedo for all peoples.

"Mahatma Gandhi has presented to th peoples of the world crying for relief from m crushing burden of war a weapon in the shape organised non-violence designed to take th place of war for the defence of a people's rig and freedom against armed aggression. He feels that at this critical phase in the history of man the Congress should enforce this ideal by itself declaring that it does not want that India should maintain armed forces to defend her freedom against external aggression or internal disorder.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"While the Working Committee hold that the Congress must continue to adhere strictly to the principle of non-violence in their struggle for independence, the committee cannot ignore the present imperfections and failings in this respect of the human elements they have to deal with and the possible dangers in a period of transition and dynamic chance until the Congress has acquired non-violent control over the people in adequate measure and the people have imbibed sufficiently the lesson of organised non-violence.

"The committee have deliberated over the problem that has thus arisen and have come to the conclusion that they are unable to go to the full length with Gandhiji, but they recognise that he should be free to pursue his great ideal in his own way and, therefore, absolve him from responsibility for the programme and activity which the Congress has to pursue under the conditions at present prevailing in India and the world in regard to external aggression and internal disorder.

"Many of the problems which the Working Committee have considered in this connection are not of the present, though they may be of the near future. The committee wish to make it clear that the methods and basic policy of non-violence in the national struggle for freedom continue with full force and are not affected in the least by the inability to extend it to the region of national defence."

The statement adds: "The war committees that are being formed are definitely aimed at increasing the war effort. In view of the Congress policy, they cannot be supported and Congressmen cannot participate in them or contribute to war funds, nor can Congressmen associate themselves under the present political conditions with Government-controlled civic guards.

"Congress committees should organise, wherever necessary, people in villages and other areas, for self-defence and in order to maintain a sense of public security in their respective areas. This should be done on a non-communal basis and in full co-operation with all other groups interested in this task.

"In view of the difficult times that loom ahead, it is essential that the Congress should function as an active and disciplined organisation. Provincial committees are enjoined to take necessary steps for this purpose. They should realise that it is of urgent and vital importance that the Congress should function in this way in these days of crisis and should not be merely a roll of vast numbers of inactive members. All members of the executive committees in particular are expected to take a continuous and active part in the Congress work and those who are unwilling or unable to do so are failing in their duty to the country and are of no service to the organisation."

Delhi Offer.—It was only natural that the June statement of the Congress should be followed by something more specific; and this was done in the following month at Delhi. The central executive of the Congress passed a very brief resolution in which it demanded an unequivocal declaration by Great Britain according India complete independence and urging, as a first step, the immediate formation of a National Government at the Centre enjoying the confidence of the elected members of the legislature.

The following is the text of the resolution: "The Working Committee have noted the serious happenings which have called forth fresh appeals to bring about a solution of the deadlock in the Indian political situation; and in view of the desirability of clarifying the Congress position they have earnestly examined the whole situation once again in the light of the latest developments in world affairs.

"The Working Committee are more than ever convinced that the acknowledgment by Great Britain of the complete independence of India is the only solution of the problems facing both India and Britain and are, therefore, of opinion that such an unequivocal declaration should be immediately made and that, as an immediate step in giving effect to it, a provisional National Government should be constituted at the Centre, which, though formed as a transitory measure, should be such as to command the confidence of all the elected elements in the Central Legislature, and secure the closest co-operation of the responsible Governments in the provinces.

"The Working Committee are of opinion that unless the aforesaid declaration is made, and a National Government accordingly formed at the Centre without delay, all efforts at organising the material and moral resources of the country for defence cannot in any sense be voluntary or as from a free country, and will, therefore, be ineffective. The Working Committee declare that if these measures are adopted, it will enable the Congress to throw in its full weight in the efforts for the effective organisation of the defence of the country."

This resolution has become famous in recent Congress history as the Delhi Offer inasmuch as it provided a bargaining counter, even at the expense of ideological separation from Mr. Gandhi.

Commenting on this resolution, Mr. Gandhi pointed out that it was the inevitable sequel to the decision taken a month earlier absolving him from responsibility for the leadership of the Congress. He revealed that he had himself drafted the resolution for adoption by the Working Committee based on an uncompromising faith in non-violence, but that, although the members of the Working Committee were in their individual capacity full of such faith, they could not truthfully say that their constituencies shared their individual faith.

While he expressed deep sorrow at the circumstances which compelled the members of the Working Committee as honest men to reject his advice, Mr. Gandhi declared that the resolution represented the considered policy of the Congress. He thought that non-Congressmen who were eager for the Congress to be free from his religious bias to adopt a purely a political attitude should welcome the resolution. "The British Government have to make their choice," he said. "Independence they cannot withhold unless their wisdom is as much blurred as Rajaji

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

claims that mine is. If independence is recognised, the acceptance of the other part of the resolution follows as a matter of course. The question is: 'Do they want to impress help from India by virtue of their rulership over India? Or will they have the help that a free and independent India can give?' My individual advice has already gone. My help always has been promised. Acceptance of that advice can but enhance their heroism. But if they cannot accept it, I advise, as a disinterested but staunch friend, that the British Government should not reject the hand of friendship offered by the Congress."

Such doubt as existed in the minds of ardent believers in Mr. Gandhi's philosophy were dispelled by what happened at a meeting of the All-India Congress Committee held at Poona at the end of July 1940. The A.I.C.C. by a majority of two to one endorsed the Delhi resolution of the Working Committee demanding of the British Government a declaration of complete independence for India and meanwhile the provisional constitution of National Government at the Centre. The A.I.C.C. likewise endorsed the statement issued by the Working Committee in June of that year that it was unable in the then circumstances to declare that the principle of non-violence should be extended to free India's national defence.

August Offer.—Then came the famous statement by the Viceroy, known as the British Government's August offer. The following is the full text of the Viceroy's statement:—

"India's anxiety at this moment of critical importance in the world struggle against tyranny and aggression to contribute to the full to the common cause and to the triumph of our common ideals is manifest. She has already made a mighty contribution. She is anxious to make a greater contribution still. His Majesty's Government are deeply concerned that that unity of national purpose in India, which would enable her to do so, should be achieved at as early a moment as possible. They feel that some further statement of their intentions may help to promote that unity. In that hope they have authorised me to make the present statement.

"Last October His Majesty's Government again made it clear that Dominion Status was their objective for India. They added that they were ready to authorise the expansion of the Governor-General's Council to include a certain number of representatives of political parties, and they proposed the establishment of a Consultative Committee. In order to facilitate harmonious co-operation it was obvious that some measure of agreement in the Provinces between major parties was a desirable prerequisite to their joint collaboration at the Centre. Such an agreement was unfortunately not reached, and in the circumstances no progress was then possible.

"During the earlier part of this year I continued my efforts to bring the political parties together. In this last few weeks I again entered into conversations with prominent political personages in British India and the Chancellor of the Chamber of Princes, the results of which have been reported to His Majesty's Government. His Majesty's Government have seen also the resolutions passed by the Congress Working Committee, the Muslim League and the Hindu Mahasabha.

"It is clear that the earlier differences which had prevented the achievement of national unity remain unbridged. Deeply as His Majesty's Government regret this, they do not feel that they should any longer, because of these differences, postpone the expansion of the Governor-General's Council, and the establishment of a body which will more closely associate Indian public opinion with the conduct of the war by the Central Government.

"They (His Majesty's Government) have authorised me accordingly to invite a certain number of representative Indians to join the Executive Council.

"They have authorised me further to establish a War Advisory Council, which would meet at regular intervals and which would contain representatives of the Indian States and of other interests in the national life of India as a whole.

"The conversations which have taken place and the resolutions of the bodies which I have just mentioned, make it clear, however, that there is still in certain quarters doubt as to the intentions of His Majesty's Government for the constitutional future of India, and that there is doubt, too, as to whether the position of minorities, whether political or religious, is sufficiently safeguarded in relation to any constitutional change by the assurance already given. There are two main points which have emerged. On those two points His Majesty's Government now desire me to make their position clear.

"The first is as to the position of minorities in relation to any future constitutional scheme. It has already been made clear that my declaration of last October does not exclude examination of any part either of the Act of 1935 or of the policy and plans on which it is based.

"His Majesty's Government's concern that full weight should be given to the views of the minorities in any revision has also been brought out. That remains the position of His Majesty's Government.

"It goes without saying that they could not contemplate the transfer of their present responsibilities for the peace and welfare of India to any system of Government whose authority is directly denied by large and powerful elements in India's national life. Nor could they be parties to the coercion of such elements into submission to such a Government.

"The second point of general interest is the machinery for building, within the British Commonwealth of Nations, a new constitutional scheme when the time comes. There has been very strong insistence that the framing of that scheme should be primarily the responsibility of Indians themselves, and should originate from Indian conceptions of the social, economic and political structure of Indian life. His Majesty's Government are in sympathy with that desire and wish to see it given the fullest practical expression, subject to the due fulfilment of the obligations which Great Britain's long connection with India has imposed upon her, and for which His Majesty's Government cannot divest themselves of responsibility.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"It is clear that a moment when the Commonwealth is engaged in a struggle for existence is not one in which fundamental constitution issues can be decisively resolved.

"But His Majesty's Government authorise me to declare that they will most readily assent to the setting up, after the conclusion of the war, with the least possible delay, of a body representative of the principal elements in India's national life in order to devise the framework of the new Constitution, and they will lend every aid in their power to hasten decision on all relevant matters to the utmost degree.

"Meanwhile, they will welcome and promote in any way possible every sincere and practical step that may be taken by representative Indians themselves to reach a basis of friendly agreement, first, on the form which the post-war representative body should take, and the methods by which it should arrive at its conclusions, and, secondly, upon the principles and outlines of the constitution itself.

"They trust, however, that for the period of the war (with the Central Government reconstituted and strengthened in the manner I have described, and with the help of the War Advisory Council) all parties, communities and interests will combine and co-operate in making a notable Indian contribution to the victory of the world cause which is at stake. Moreover, they hope that in this process new bonds of union and understanding will emerge and thus pave the way towards the attainment by India of that free and equal partnership in the British Commonwealth which remains the proclaimed and accepted goal of the Imperial Crown and of the British Parliament."

The Viceroy's statement met with a measure of welcome. The Government's policy was also approved by Parliament. Mr. Amery said in the House of Commons: "Dominion Status is not, as is often suggested, an inferior or dependent status. There is no higher status in the world than that, and that is the status we have declared to be the goal of our policy in India." He added that the Viceroy's initiative represented a sincere effort on Britain's part to make such contribution as she can towards the smooth and speedy attainment of the desired goal. "Others must also make their contributions. The responsibility for securing a speedy as well as satisfactory result rests upon Indians themselves."

The Secretary of State said that Indian leaders would have, by accepting the Viceroy's offer, committed themselves to nothing except to work together in the present emergency for the good of India and for the common cause.

"If that should unfortunately not prove to be the case, Lord Linlithgow will of course still go ahead, prepared to work with those who will work with him and each other."

The proudest day in Britain's history, Mr. Amery said, would be the day when they saw India joining as a free and willing partner in the brotherhood of British peoples. He believed that both Britain and India would contribute to the joint efforts.

Congress Rejection.—The Congress, however, rejected the Viceroy's offer and decided that the proposals contained in the Viceroy's statement and the Secretary of State's speech in the Commons are wholly opposed not only to the principle of democracy, acclaimed by the British Government in their war aims, but also to the best interests of India, and therefore the Congress cannot be a party to accepting these proposals or advising the country to accept them." The resolution says *inter alia* :—

"The Working Committee has read the statement issued by the Viceroy on the authority of the British Government on August 8 and the report of the speech of the Secretary of State for India in the House of Commons explaining the Viceroy's statement. It notes with deep regret that the British Government have rejected the friendly offer and practical suggestion contained in the Poona resolution of the A.I.C.C. of July 28 framed for a solution of the deadlock and to enable the Indian National Congress to withdraw its non-co-operation and secure in the recent crisis the patriotic co-operation of all the people of India in the governance of India and the organisation of national defence.

"The Working Committee has read with pain and indignation the declarations and assumptions contained in the statements and speeches made on behalf of the British Government which seek to deny India her natural right of complete national freedom and reiterate the untenable claim that Britain should maintain herself in a dominant position in India in the discharge of the higher functions of the state.

"These claims render false and empty even their own promise to recognise India at an early date as a free and equal unit within the British Commonwealth. Such claims and recent events and developments in the world have confirmed the Committee's conviction that India cannot function within the orbit of an imperial Power and must attain the status of a free and independent nation. This does not prevent close association with other countries within a comity of free nations for the peace and progress of the world.

"The Working Committee is of the opinion that the assertion contained in the statements made on behalf of the British Government that they will not part with power and responsibility in favour of the elected representatives of the people of India and that, therefore, the present autocratic and irresponsible system of Government must continue so long as any group of people or the Princes, as distinguished from the people of the States, or perhaps even foreign vested interests, raise objections to any constitution framed by the elected representatives of the people of India, is a direct encouragement and incitement to civil discord and strife and amounts to a fatal blow to all willingness to compromise and adjustment of claims.

"The Working Committee regrets that, although the Congress has never thought in terms of coercing any minority, much less of asking the British Government to do so, the demand for a settlement of the constitution through a Constituent Assembly of duly elected representatives has been misrepresented as coercion, and the issue of the minorities has been made into an insuperable barrier to India's progress. The Congress has proposed that

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

minority rights should be amply protected by agreement with elected representatives of the minorities concerned.

The Working Committee, therefore, cannot but conclude that the attitude and assertions contained in these statements made on behalf of the British Government confirm the prevailing feeling that the British authority has been continually operating so as to create, maintain and aggravate differences in India's national life.

"The Working Committee notes with astonishment that the demand for the constitution of a Provincial Government composed of persons commanding the confidence of the various elected groups in the present Central Legislature, formed under the 1919 Constitution of India, has been described by the Secretary of State for India as one that would raise the unsolved constitutional issue, and prejudge it in favour of the majority and against the minorities.

"The Working Committee is of the opinion that the rejection of this proposal unmistakably indicates that there is no willingness on the part of the British Government to part with any power and authority even for the immediate purpose of securing co-operation in the war effort. The British Government would gather together and carry on with such dissentient groups and individuals as oppose the wishes of the majority of the people of India and without any co-ordination with the elected legislatures at the Centre or in the provinces, rather than concede anything that would work towards the recognition of the rights of the people of India to rule themselves democratically.

"For these reasons the Working Committee has come to the conclusion that the statements referred to are wholly opposed not only to the principle of democracy as acclaimed by the British Government in their war aims but also to the best interests of India and it cannot be a party to accepting the proposals contained in the statement or advising the country to accept them.

"The Working Committee considers that these declarations and offers not only fall far short of the Congress demand, but will be impediments to the evolution of a free and united India. The Working Committee calls upon the people to condemn the attitude adopted by the British Government by means of public meetings and otherwise, as also through their elected representatives in the provincial legislatures."

"The decision of the British Government to enforce their will on India, in opposition to the will of the great majority of the people and regardless of consequences, has produced a situation of the utmost gravity. The rejection of the Congress proposals is proof of the British Government's determination to continue to hold India by the sword. In order to compass this end, they have been endeavouring to undermine the strength of the Congress by picking up and arresting hundreds of public workers, including the best workers of the Congress, under the Defence of India Act, which has no popular sanction whatever.

"The desire of the Congress not to embarr the British Government at a time of peril them has been misunderstood and despi They are imposing on the Congress a struggle vindicate its position and to act for the preser tion of the liberties and honour of the peop The Congress can have no thought but that the supreme good of the dumb and toil millions of India and, through them, of t whole of submerged humanity.

"In view of the gravity of the situation, t Working Committee has decided to convene meeting of the All-India Congress Commit in September.

At this stage no attempt was made to recon the ideological differences between the Congre and Mr. Gandhi on the question of a non-viole approach to the war. It was stated that th Committee as a body and Mr. Gandhi agree to differ on the question of non-violence i relation to meeting external aggression an internal disorder.

"Sporting Offer".—Meanwhile, public utterances of Muslim League leaders made it clear that the League did not approve of the Congress demand for a national government at the Centre as embodied in the Delhi Offer of the Congress, for the reason that a National Government responsible to the Central Legisla ture would, in the opinion of the League, be tantamount to Hindu rule inasmuch as the Hindus were in a majority in the Central Legislature and the Congress was the largest single party therein.

In order to meet the League objections t the Congress idea of a National Government Mr. C. Rajagopalachariar made what has come to be known as a "sporting offer". He said: "In answer to Mr. Amery's difficulty as to the minorities, I may make a sporting offer that if His Majesty's Government agree to a Provisional National Government being formed at once, I will undertake to persuade my colleagues in the Congress to agree to the Muslim League being invited to nominate the Prime Minister and to let him form a National Government as he would consider best. If there is sincerity in the difficulty felt by His Majesty's Government it should be met by what I offer." Nothing, however, came out of this "sporting offer."

In the same month, the Viceroy invited Maulana Abul Kalam Azad to discuss with him the Congress reaction to the August Offer. The Congress President replied that the August Offer was totally at variance with the proposals last put forward by the Congress at Poona and with the objective of the Congress. The Working Committee could not associate itself in any way with those proposals. As the proposed discussion was to take place within the framework of the August announcement, which was held to be wholly inadequate for the Congress purpose, the Maulana declined to meet the Viceroy.

Bombay Decision.—When this "last gesture" was ignored, the Congress meekly returned to Mr. Gandhi and his non-violence. This was in a sense the outcome of the deliberations of the All-India Congress Committee held in Bombay in the middle of September 1940. The A.I.C.C. passed a resolution confirming the August

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

resolution of the Working Committee rejecting the Viceroy's offer and requesting Mr. Gandhi to take over the leadership of the Congress. The following is the text of the resolution :—

"The All-India Congress Committee has given its careful attention to the events that have taken place since its last meeting held in Poona on July 27, 1940, and to the resolutions passed by the Working Committee at Wardha in August last. The Committee approves of and endorses these resolutions.

"In order to end the deadlock in India and to promote the national cause, in co-operation with the British people, the Working Committee even at the sacrifice of Mahatma Gandhi's co-operation, made a proposal to the British Government in their Delhi resolution of July 17, 1940, which was subsequently approved by the A.I.C.C. at Poona. This proposal was rejected by the British Government in a manner which left no doubt that they had no intention to recognise India's independence and would, if they could, continue to hold this country indefinitely in bondage for British exploitation. This decision of the British Government shows that they will impose their will upon India, and their recent policy has further shown that they will not even tolerate free expression of public opinion in condemnation of their associating India in the war against Germany, against the will of the vast body of the people of India, and of exploiting her national resources and man power for this purpose.

"The All-India Congress Committee cannot submit to a policy which is a denial of India's natural right to freedom, which suppresses the free expression of public opinion, and which would lead to the degradation of her people and their continued enslavement. By following this policy the British Government have created an intolerable situation and are imposing upon the Congress a struggle for the preservation of the honour and the elementary rights of the people. The Congress is pledged under Gandhiji's leadership to non-violence for the vindication of India's freedom. At this grave crisis in the movement for national freedom, the All-India Congress Committee, therefore, requests him to guide the Congress in the action that should be taken. The Delhi resolution, confirmed by the A.I.C.C. at Poona, which prevented him from so doing, no longer applies. It has lapsed.

"The A.I.C.C. sympathises with the British people as well as the peoples of all other countries involved in the war. Congressmen cannot withhold their admiration for the bravery and endurance shown by the British nation in the face of danger and peril. They can have no ill will against them, and the spirit of *satyagraha* forbids the Congress from doing anything with a view to embarrass them. But this self-imposed restraint cannot be taken to the extent of self-extinction. The Congress must insist on the fullest freedom to pursue its policy, based on non-violence. The Congress has, however, no desire at the present moment to extend non-violent resistance, should this become necessary, beyond what is required for the preservation of the liberties of the people.

"In view of certain misapprehensions that have arisen in regard to the Congress policy of non-violence, the A.I.C.C. desires to state this afresh and to make it clear that this policy continues, notwithstanding anything contained in previous resolutions which may have led to these misapprehensions. This Committee firmly believes in the policy and practice of non-violence not only in the struggle for Swaraj, but also, in so far as this may be possible of application, in free India.

"The Committee is conviced, and recent world events have demonstrated, that complete world disarmament is necessary, and the establishment of a new and juster political and economic order, if the world is not to destroy itself and revert to barbarism. A free India will, therefore, throw all her weight in favour of world disarmament and should herself be prepared to give a lead in this to the world. Such lead will inevitably depend on external factors and internal conditions, but the State would do its utmost to give effect to this policy of disarmament. Effective disarmament, and the establishment of world peace by the ending of national wars, depend ultimately on the removal of the causes of wars and national conflicts. These causes must be rooted out by the ending of the domination of one country over another and the exploitation of one people or group by another. To that end India will peacefully labour, and it is with this objective in view that the people of India desire to attain the status of a free and independent nation. Such freedom will be the prelude to the close association with other countries within a comity of free nations for the peace and progress of the world."

Pandit J. Nehru made a very short speech in commending it for acceptance. Addressing Mr. Gandhi, he said : "We have often in the past followed your guidance and shared the burden readily. So it is but right that you should speak on this resolution and tell us what you have in your mind and what you expect us to do. We are ready to face the consequences of doing so. We do so with faith in you, faith in ourselves, and faith in the future of India."

Issue for Satyagraha.—By now it had become clear that the only course open to the Congress and Mr. Gandhi was to launch a campaign of direct action. No-one seemed, however, to know what form this campaign should take. Mr. Gandhi had disapproved of civil disobedience of the 1930 and 1932 types. His reasons were that any mass campaign was bound to embarrass Britain in the midst of her life and death struggle and that agitation for further political rights all over the country would inevitably raise complications with the Muslim League and might conceivably lead to an accentuation of the existing Hindu-Muslim discord.

It was thus a difficult position in which the Congress and Mr. Gandhi found themselves. The demands which had been made from time to time on behalf of the Congress and the manner and the timing of their presentation were such as to leave the Congress no escape from the fulfilment of its threat of direct action. At the same time, it was not easy to find a form of action which would not embarrass Great Britain and an issue which would not bring about a clash with the Muslims.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

As had happened many a time before, Mr. Gandhi found a formula overcoming all these difficulties. He sidetracked the communal complication by announcing that the issue on which the campaign would be launched would have nothing to do with the future constitution. He said he would fight solely for the right of Indians to preach against the war and India's participation in it. As for avoiding embarrassment to Great Britain, he declared that there would be no mass campaign, that he himself would not court arrest and that there would be a quiet form of civil disobedience by individual Congress leaders to be chosen by him personally. He added that he would shortly seek an interview with the Viceroy to explain the Congress viewpoint in regard to non-violence.

In two lengthy speeches made at the Bombay meeting of the A.I.C.C., he said that where civil liberty could not be protected *swaraj* could not exist. The war had been declared by Britain, and, although there was autonomy in the provinces, the Government of India did not choose to consult the ministers. The constitution was such that the Viceroy was more or less an autocrat ruling over the destinies of 30 crores of people of India. In the face of such power of the sword, the Congress could only rely on its weapon of non-violence. Mr. Gandhi took occasion to answer the charge that his advocacy of the Congress resolution was inconsistent with the statement he made soon after the declaration of war, namely, that he would unconditionally give his moral support to Britain. He said that that was his personal view which, however, need not stand in the way of his supporting the justice of the claim of the Congress as a political body.

He also reconciled his desire not to embarrass Britain and his decision to start a satyagraha campaign. "There comes a time," he said, "when a man in his weakness mistakes vice for virtue and virtue itself, when taken away from its context and from the purpose for which it was dedicated, that very virtue becomes vice. I felt that if I did not go to the assistance of the Congress and take the helm, even if it be in fear and trembling, I would be untrue to myself. I feel that in taking the step that we are doing we are rendering a great service not only to the Congress but to the whole of India. I should be untrue to all Indians if, at this time, I said 'No embarrassment to Britain.' If I exercise that suppression at this critical moment in the history of the nation it would be useless. The virtue of self-restraint now becomes a vice because it will kill the Congress organisation and it will kill the spirit which is exercising this self-restraint."

Mr. Gandhi declared, "If we can get a declaration from the British Government that the Congress can go on preaching anti-war propaganda, go on preaching non-co-operation with Government in their war effort, we will not have civil disobedience.

"I claim the liberty of going through the streets of Bombay and say that I shall have nothing to do with this war because I do not believe in this war and in this fratricide that is going on in Europe. I admire the bravery, but what is the use of this bravery? I deplore their foolishness and their crass ignorance. They do not know what they are fighting for. Th is how I look at this war that is going on acr the seas. I cannot possibly take part in Nor do I want the Congress to do so.

"Our demand is for freedom of speech, a simply because the British people are engag in a war for their very existence they can curtail our freedom of expression of opinio We must make this issue clear, namely that w are fighting to obtain the right to say what w like—liberty of speech.

"If this liberty of the nation or the movem for freedom is likely to be choked, then I s that the virtue of self-restraint is going to becom a vice. That virtue of restraint cannot b carried to the extent of self-extinction—extin tion of the national spirit wherever it may resid whether among Congressmen or non-Congress men." Mr. Gandhi added that he would g and tell the Viceroy: "We do not want t embarrass you and deflect you from your purpos in regard to the war effort. We go our way and you go yours, undeterred, the common ground being non-violence. Left free to ourselves, there will be no war effort on the part of our people. If, on the other hand, without your using any but moral pressure you find that they respond, then we cannot help it. If you get assistance from the Princes, from the zemindars, from anybody high or low, you can have it; but let our voice also be heard. If you do so, it will beb eminently honourable it will certainly be a feather in your cap. It will be honourable of you—although you are engaged in a life-and-death struggle—that you have given us this liberty. It will be honourable of you that you take this great step, although you have limitless powers to choke our voice and give us the fullest possible freedom consistently with the observance of non-violence, to tell the people of India not to join the war effort."

Continuing, Mr. Gandhi said, "Let the people use any reasoning they like. My reasoning is the only reasoning which will sit well on the Congress lips. But I do not expect all to restrict themselves to that reasoning. Those who have conscientious objection, as I have, will adopt my reasoning. Those who are tired of British Imperialism will use that argument. There may be others who will have other arguments. All these should be covered under this freedom of speech, provided, however they all accept non-violence, provided also that what they say is said openly and not secretly. So long as you can preach non-co-operation with the war effort in men and money, there should be no civil disobedience, but if you have not that liberty there is no liberty but perpetual bondage.

"I have restrained myself, and will restrain myself.

"I won't seek imprisonment, I do not want to offer civil disobedience. I will not place myself in peril.

"In this battle I won't expose myself to imprisonment; but if Government chooses it will not be difficult to take me away. I won't be able to seal my lips or restrain my pen. It will be difficult for them to keep me in prison, not because India will rise in rebellion—India will be wrong if it does so. My own instinct is that they won't be able to keep me in jail."

Viceroy-Gandhi Interview.—In accordance with his statement before the A.I.C.C. in Bombay, Mr. Gandhi sought an interview with the Viceroy which, however, proved fruitless. As the points discussed at this interview provide the background for the civil disobedience movement which was launched in October 1940, it may be useful to quote *in extenso* the letters exchanged between Mr. Gandhi and the Viceroy at the end of the interview. On September 30, 1940, the Viceroy wrote as follows:—

Dear Mr. Gandhi.—I think it will be convenient if I record very briefly in writing the origin of the talks we have had on the 27th and 30th September and their outcome.

"As you will remember, you wrote to me on the 18th September to ask that I should grant you an interview, and you explained in your letter that you were anxious to discuss the situation covered by the recent resolution of the All-India Congress Committee, not only in your capacity as guide of the Congress but as a personal friend. I was, I need not say, most ready to talk things over with you, and we have now had the advantage of two conversations.

"In the course of these conversations the situation has been exhaustively discussed, with particular reference to the question of free speech in time of war. On that matter, while professing yourself most anxious to avoid in any way embarrassing His Majesty's Government in the prosecution of the war, you made it clear to me that you regarded it as essential that the Indian National Congress and other members of the public should be in a position to give full expression to their views in relation to the war effort provided only that such expression was fully non-violent.

"I indicated to you the nature of the special treatment laid down by law in the United Kingdom for dealing with conscientious objectors —which I may broadly describe as an arrangement under which while the conscientious objector is absolved from the duty of fighting and is allowed even to profess his faith in public, he is not permitted to carry his opposition to the length of endeavouring to persuade others, whether soldiers or munition workers, to abandon their allegiance or to discontinue their effort.

"You made it clear to me that you would not regard treatment of that nature as adequate in the conditions of India, and that you regarded it as essential that in India, where in your judgment conditions were wholly different from those existing in Great Britain, the Indian objector, either to all war as such, or to the participation of India in the present war, should be untrammelled in the expression of his views. It emerged further from our conversation that while you would not yourself preach to workers engaged on war work at the actual works, in order to endeavour there to dissuade them from the working on war equipment you would regard it as essential that it should be open to Congressmen and non-Congressmen alike to deliver addresses and otherwise to call upon people throughout the country to refrain from assisting India's war effort in any way which would involve India's participation in bloodshed.

"I listened with the utmost care and attention to your argument, and our examination of the situation has been full and close. I felt bound, however, in the outcome to make it clear to you that action such as you suggest would certainly amount not only to the inhibition of India's war effort, but to that embarrassment of Great Britain in the prosecution of the war which the Congress state that they are anxious to avoid; and that it would clearly not be possible in the interests of India herself, more particularly at this most critical juncture in the war, to acquiesce in the interference with the war effort which would be involved in freedom of speech so wide as that for which you had asked."

Mr. Gandhi replied:—

"Dear Lord Linlithgow,—I have your letter of even date.

"It fairly sets forth the Congress position as I placed it before you. It is a matter of deep regret to me that Government have not been able to appreciate the Congress position, meant just to satisfy the bare requirements of the people, whether Congressmen or others, who felt a conscientious objection to helping a war to which they were never invited and which they regard, so far as they are concerned, as one for saving Imperialism, of which India is the greatest victim. Their objection is just as conscientious as mine as a war resister. I cannot claim greater freedom for my conscience than for that of those I have named. As I made it plain in the course of our talks, the Congress is as much opposed to victory for Nazism as any Britisher can be. But their objection cannot be carried to the extent of their participation in the war. And since you and the Secretary of State for India have declared that the whole of India is voluntarily helping the war effort, it becomes necessary to make clear that the vast majority of the people of India are not interested in it. They make no distinction between Nazism and the double autocracy that rules India. Had His Majesty's Government recognised the freedom required in the special condition of India, they would have justified the claim that they were receiving from India only such effort as they could voluntarily. The war party and the no-war party would have been placed on an equal footing so far as each worked fully non-violently.

"As to the last paragraph of your letter, I wish to remind you that it was never contemplated to carry non-embarrassment to the point of self-extinction or, in other words, stopping all national activities—which were designed to make India peace-minded and show that India's participation could not benefit anyone, not excluding Great Britain.

"Indeed, I hold that if India were left free to make her choice which freedom of speech implied, India would probably have turned the scales in favour of Britain and true liberty by the moral prestige which Britain would have then gained.

"I must, therefore, repeat that the Congress does still want to refrain from embarrassing British Government in their war effort.

"But it is impossible for the Congress to make of the policy a fetish by denying its creed at this critical period in the history of mankind. If the Congress had to die, it should do so in the act of proclaiming its faith.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"It is unfortunate that we have not been able to arrive at an agreement on the single issue of freedom of speech. But I shall hug the hope that it will be possible for Government to work out their policy in the spirit of the Congress position.

"I should like to touch upon the other points I raised in our talks. But for fear of burdening this reply, I refrain. I shall hope to make a public statement on them as early as I can.

"In conclusion, let me thank you publicly for the great courtesy and patience with which you listened to my very long statement and argument.

"And though our ways seem to diverge for the moment, our personal friendship will, as you have kindly said at the time of saying farewell, bear the strain of divergence."

In further explanation of his stand, Mr. Gandhi wrote immediately after the Viceregal interview: "I want to enter upon the fight with the hope that its very fairness will compel the recognition that India deserves better treatment, not merely from the British but from all the nations of the earth. Lest it might be said that the Congress fights because it has failed to get power, I told His Excellency in the plainest words possible that the Congress had no desire to mount to power at the expense of a single national interest. It seeks no power save for the whole nation. Therefore he will have no opposition from the Congress if he forms a Cabinet composed of representatives of different parties. The Congress would be content to be in opposition so far as the war effort is concerned and so long as the Government machinery has to subserve Imperialist ends. The immediate issue is not independence. The immediate issue is the right to exist, *i.e.*, the right of self-expression which, broadly put, means free speech. This the Congress wants not merely for itself, but for all, the only restraint being complete observance of non-violence. I hold that that condition answers all the difficulties by whomsoever raised."

Civil Disobedience.—About a fortnight after this, Mr. Gandhi unfolded his plan of individual civil disobedience restricted to a limited number of satyagrahis, which was approved by the Congress Working Committee. "This will perhaps be the last civil disobedience which I will conduct," said Mr. Gandhi on October 15, 1940. "Naturally, I would want it to be as flawless as it can be. I have striven to produce the highest quality irrespective of quantity." Mr. Gandhi added that it was a peremptory obligation binding on every Congressman that there should be no civil disobedience but what was laid down by him. He repeated that, unlike previous occasions, he did not wish to offer civil resistance himself, for the very good reason that his imprisonment was likely to cause greater embarrassment to the authorities than anything else the Congress could do. He wanted to remain outside also in order to cope with any contingency that might arise.

Mr. Gandhi chose as his first satyagrahi Mr. Vinoba Bhave who had been doing village uplift work. The satyagraha for the time being was to be confined to Mr. Bhave. According to plan, Mr. Vinoba Bhave set out on a marching tour from village to village preaching non-participation in war on grounds of non-violence. He enjoyed freedom for a couple of days but was arrested on the third day and sentenced to a short period of imprisonment for doing an act prejudicial under the Defence of India Ordinance.

It soon became known that Pandit Jawaharlal Nehru was to be the second satyagrahi but before he could formally defy the law he was arrested in respect of certain speeches made by him weeks earlier, and sentenced to four years' imprisonment.

Then followed a series of arrests of persons chosen by Mr. Gandhi. They included most of the members of the Congress Working Committee, most of the Premiers and Ministers of the former Congress Governments and a large number of members of the Central Legislature and other prominent Congressmen all over the country.

The procedure in the early stages was for the selected Congressmen to intimate to the authorities that they would break the law at a given place and time. This method led to a disturbance at Patna as the result of which Mr. Gandhi gave an injunction to the satyagrahis that they should not inform the public but privately tell the authorities of their intention to do satyagraha.

Mr. C. Rajagopalachariar improved upon this by breaking the law through the post. He wrote to Government officials and non-officials taking part in the war effort urging them to desist from helping in the war.

A further stage was reached when Mr. Gandhi's satyagrahis did not deliver speeches against the war but merely shouted anti-war slogans. All the persons who took part in this satyagraha campaign were arrested under the Defence of India Rules and sentenced to varying terms of imprisonment or detained without trial on the ground that their freedom to speak and move about was prejudicial to the successful prosecution of the war.

In Bengal and more particularly in the Frontier Province, however, satyagrahis were not arrested.

The Congress organisations in most areas were converted into satyagraha committees. In provinces where the Congress was not in power the members of the Legislature returned on the Congress ticket were asked to withdraw, as in Assam and the Punjab.

The first batch of satyagrahis consisted of prominent all-India personalities. Then came persons who may be described as belonging to the second rank, such as provincial and district leaders. Later, Congress members of local bodies, such as municipalities and district boards, were asked to resign. It was announced that after this the turn of the vast masses of primary members would come.

At a certain stage the Government prohibited the publication of reports of the progress of the satyagraha movement and of speeches made in support of the campaign. The Indian press rose in arms against this order and after a series of negotiations Government agreed to set up advisory committees, consisting of journalists,

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

to advise them on the suitability of publishing speeches and statements which were of a doubtful character. This was done on an assurance that the Indian press had no desire to impede India's war effort.

It may be mentioned that as the result of the original prohibitory order Mr. Gandhi suspended the *Harijan* and allied publications.

About this time there was talk of Mr. Gandhi going on a fast as a protest against the indirect restrictions placed on his right to propagate his doctrine of non-violence in relation to the war. It was later revealed that Mr. Gandhi did indeed think of a fast, and that some of his closest associates implored him not to endanger his life at an advanced age. Eventually Mr. Gandhi announced that the call from within had not come; and the fast did not come about.

During all this time Mr. Amery made a number of statements in Parliament and outside bearing not only on the wider aspects of the Indian problem but also on the element of advance contained in the Viceroy's August offer. Some of these utterances hinged on the communal aspect of the problem; the general impression created in India by these speeches was that the British Government were not prepared to ignore the claims and interests of the minorities, including of course the Muslims, or other important elements in the country's national life. (Extracts from Mr. Amery's speeches are given in the chapter on Muslim League).

An interesting diversion was provided by Maulana Abul Kalam Azad who in the midst of the satyagraha campaign declared that, although the Delhi Offer of the Congress (which since its endorsement by the A.I.C.C. at Poona has also come to be called the Poona Offer) had lapsed, the Congress would be prepared to reconsider the position if the Government changed their attitude.

With the rejection of the Viceroy's August Offer by the Congress, the Muslim League and all other important sections of the country, there remained nothing for the authorities to do except, in the words of the Viceroy, to hope that as time passed there would be greater readiness on the past of the principal political parties in India to take advantage of that offer.

In his address to the Associated Chambers of Commerce at Calcutta in December 1940, the Viceroy reaffirmed that "our objective remains to lead India to the proclaimed goal of Dominion Status and that as early as may be; there is nothing more that we can do than what we have done."

On Christmas Eve spokesmen of different parties in the House of Commons sent an open letter to the people of India urging the removal of misunderstandings on superficial matters and appealing for agreement on fundamentals. They declared that the British people were irrevocably resolved to give India full political freedom and to allow India to decide her own constitution. Asking Indians to get together, they emphasised the need for a provisional Government for the duration of the war as "a half-way house" to the final constitution. The spirit of the Viceroy's offer of August 8 deserved confidence, they affirmed, as the idea of looking on India as anything less than an ally was foreign to the House of Commons to-day. Therefore they appealed to the Indian nation to "join with us in defeating Hitlerism and thereafter in framing the terms of peace and helping to shape the course of the world."

As if in reply to this, prominent Liberal and moderate politicians issued a lengthy statement which is discussed fully in the chapter on Indian Liberal Federation.

Early in 1941 Mr. Gandhi in a public statement said that as far as he was concerned the Poona Offer of the Congress would remain lapsed so long as the war lasted. "I believe there can be no settlement with the Congress short of complete independence during the pendency of the war for the simple reason that the Congress cannot commit itself to active help in the war with men and money," he said.

This statement, coupled with the prevalent state of affairs in Indian politics, stimulated an effort on the part of Liberals and other non-party leaders to replace the present bureaucratic control of the Indian administration by a popular Government both at the Centre and in the Provinces.

Accordingly, a conference was held in Bombay in March 1941 which demanded the complete Indianisation of the Government of India. (For details see chapter on Indian Liberal Federation.)

On the eve of this conference Mr. Gandhi issued a statement modifying his earlier statement about the Congress not at all being free to co-operate in the war effort. He said that his interpretation of the Congress attitude was that of an individual. "I have no authority from the Congress to interpret or vary the Congress resolutions. That is essentially the function of the President, the Working Committee and finally the A.I.C.C. The only authority I have is to conduct the campaign of civil disobedience; but when the time for a settlement comes, it will be for the working Committee to decide what the terms shall be. My contribution will be confined to advising the Committee. The latter may reject the interpretation I have given it; on the A.I.C.C. may even alter the resolutions it has passed."

This statement has been interpreted as a willingness on the part of Mr. Gandhi to let the Congress do what it liked, irrespective of his own personal convictions with regard to non-violence and India's attitude to the war.

Till the time of writing nothing has come of the Bombay Conference move. The Congress campaign continues: Indian politics are in a state of drift.

The Hindu Mahasabha.

The Hindu Mahasabha, which in recent years has claimed a growing share of public attention in India, is an organisation of comparatively recent origin. Its beginnings can be traced to the first years of the current century, almost simultaneously with the awakening of Muslim consciousness in 1906.

During the first twenty-five years of its life, the Hindu organisation had to struggle for its existence, what with the proverbial indifference of the Hindu masses, the inherent inability of majorities the world over to organise, and the better response which the Congress with its wider nationalistic appeal evoked among the Hindus. All this time, however, the causes which hampered the growth of the Hindu organisation were gradually, if imperceptibly, neutralised.

For instance, the Hindu community's indifference began to give place to communal consciousness as a result of a number of Hindu-Muslim riots in which the majority community came out second best. The waves of conversion from the Hindu fold, partly due to the discontent of the outcastes and partly because of the proselytising nature of the Islamic and Christian religions, opened the eyes of Hindu leaders to the growing decrease in the number of people owing allegiance to the Hindu faith.

In addition to the reasons stated above, the political gains secured by the Muslim community under the Minto-Morley and Montague-Chelmsford Reforms Schemes taught the Hindu community to come together and set up an organisation which will voice its claims in future adjustments.

Even the wider platform of national emancipation and Hindu-Muslim unity from which the Congress appealed to the Hindu mind has latterly given signs of weakness, because Hindu-Muslim concord, far from coming within reach, threatens to go beyond grasp.

It is however, wrong to assume that the Hindu organisation is anywhere near as powerful as the Congress, or even the Muslim League of the past two or three years. The Hindu Mahasabha has undoubtedly consolidated its position in recent years; most Hindus, not excluding many Congressmen, professing nationalistic ideals, have a sneaking sympathy for the Mahasabha, but when it comes to a question of elections to representative institutions, the Mahasabha has failed to make an appeal to the Hindu electorate to the exclusion of the Congress.

Just as the Muslim League, in spite of its not very thumping success at the polls in 1937, has become a mighty organisation among the Muslims of India, similarly the Hindu Mahasabha has given proofs of considerable following among the Hindu and even of a certain amount of power—as evidenced by the importance bestowed on it by His Excellency the Viceroy. In 1940, for the first time in its history, the Mahasabha was recognised as an organisation influential enough in the country to be reckoned with for purposes of representation in the Central Government.

Speaking for the present, however, it difficult to say whether the status at pres enjoyed by the Mahasabha will continue in t event of the Congress coming to a settlement wi the British Government, because the Congress h been in the field for a much longer period and h perfected its organisation in the country to a extent which the Mahasabha has yet to achiev

Moreover, it was only recently that the Maha sabha struck out a path of its own, to the poli of hostility to the Congress, having in the firs twenty or twenty-five years of its existenc contented itself with occupying a status subordi nate to that of the Congress and seeking only t emphasise the communal claims of the Hindu as distinct from their national claims.

Those who first urged the community to organise were actuated by a fear lest the numerical strength of the community should be adversely affected by the proselytising activities of the champions of other faiths. A Hindu leader, for instance, remarked: "Political power in democracies hinges more and more on the population strength of a community which in the case of the Hindus must depend in the main on the proportion in which the Hindus succeed in stopping the dreadful conversion activities of alien faiths and in accelerating the reclamation of the alienated numbers back to the Hindu fold. In a country like India where a religious unit tends inevitably to grow into a cultural and national unit, the *Suddhi* (reconversion to Hinduism) movement ceases to be merely theological or dogmatic, but assumes the wider significance of a political and national movements. If the Muslims increase in population, the centre of political power is bound to be shifted in their favour."

Another Hindu leader said: "A community which does not know itself, does not feel its individual pulse, does not pride in its past and believe in its future, is, to all intents and purposes, a dead and self-effaced community. In order to exist at all and exist in the midst of a struggle where the universal law is encroachment and survival of the fittest, the very first and most preliminary need is to realise individual existence."

For these reasons, the early years of the Hindu Mahasabha were more or less associated with the activities of the Arya-samaj, an allied organisation which worked for the reclamation of Hindu converts to other faiths.

Apart from the denominational aspect of its activities, the Hindu Mahasabha has claimed that India belongs to the Hindus—the term 'Hindus' being interpreted as meaning people belonging to the Hindu race, irrespective of their denominational affiliations. It has been argued that "the minority problem of Europe is pre-eminently a racial one and not religious because there is only one religion, Christianity, which is common to all. The minority problem of India, on the other hand, is, if anything, pre-eminently religious and not racial at all."

Digitized by Arya Samaj Foundation Chennai and eGangotri

The first beginnings:—Following the partition of Bengal in 1905, the foundations of the Muslim League were laid in Dacca in the next year. The first activities of the infant Muslim League gave rise to a fear in the minds of the Hindus of Bengal who in the following year held a provincial conference of the community. The conference passed a resolution viewing with apprehension "the decrease in the normal growth of the Bengal Hindu population" and appointed a committee to inquire into its causes.

Almost simultaneously, there was founded in the Punjab a provincial Hindu Sabha with the object of "watching and safeguarding the interests of the entire Hindu community in all respects." Four years later, at the time of the introduction of the Minto-Morley Reforms, the Punjab Hindu Sabha sent a memorial drawing attention to the "differential treatment in the distribution of Government patronage" and "the disadvantageous position in which the Hindus would be placed in the matter of representation under the proposed Reforms scheme." The conference also contended that "the principle which had been accepted in providing for the separate and special representation of one particular community puts educational qualifications at a discount and introduces a new factor of political importance which, by giving rise to invidious and unjustifiable distinctions based purely on denominational considerations, will tend to accentuate social feelings and militate against the good results that the people of Hindustan expect from the schemes of Reforms.

"Nor has any case been made out for any special concession to the Mahomedan community on the score of their alleged historical or political importance. The Government of the country in almost every case was acquired by the British from the Hindus. The vast majority of the Mahomedans in the country are descendants of Hindu converts. Hindustani Mahomedans have never been rulers of the country. Even at the present moment a great majority of the Native States of Hindustan are ruled by Hindu Chiefs and Princes."

A number of meetings of the Punjab Provincial Sabha were held in Upper Indian towns in the succeeding years. The foundations of the All-India organisation were, however, laid at Allahabad in 1910 when it was decided to form an All-India Hindu Mahasabha. A few years later, an organisation came into being under the title of "Akhil Bharatiya Hindu Mahasabha." The first few sessions of this body were held on the occasions of certain annual Hindu fairs but it did not take many years for the Hindu organisation to become a regular political institution.

It suffered an eclipse in 1919-20 as a result of the Congress ascendancy to power under Mr. Gandhi who conducted the non-co-operation and Khilafat movements. The first effects of the Khilafat movement on Hindu-Muslim relationship was the Moplah disturbances in which the fanatical Moplahs perpetrated numerous atrocities on the Hindu inhabitants of Malabar. This was followed in the next few months by riots in Multan, Saharanpur and Kohat in all of which the Hindus were the sufferers. These gave rise to a feeling among the Hindus that they should organise themselves for self-protection.

Dawn of Renaissance.—This period has been described by Hindu leaders as the dawn of Hindu renaissance. It was at this time that the twin movements of *Suddhi* (reconversion into Hinduism) and *Sangathan* (Hindu unity drive) were born. An outstanding event occurred in 1922-23 when 450,000 Mahomedan Rajputs were reconverted to Hinduism.

In 1923 was held the Benares session of the Hindu Mahasabha which was a pronounced success. The rules of the Mahasabha were amended at this session. After this date, provincial and branch Hindu Sabhas were organised and Hindu conferences took place in different parts of the country. Swami Shraddhanand, Lala Jajpatrai and Pandit Madan Mohan Malavaya took active interest in the work of the Mahasabha.

The Hindu reconversion movement gave rise to a counter-movement on the part of the Muslims, one of whose leaders published a book outlining the quickest and most comprehensive ways of converting *Kaffirs* to Islam.

The war of conversion went on for a few years. Much bad blood was generated which manifested itself in a number of Hindu-Muslim riots. Swami Shraddhanand was murdered about this time. The murder of one or two advocates of the Hindu cause also took place in 1926-27.

Meanwhile, the political aspect of the Mahasabha's work had also begun. At the session of the Mahasabha held at Delhi in 1925-26, it was resolved that at the forthcoming elections to the legislatures Congress candidates who might be considered harmful to the interests of the Hindus should be opposed and Hindu Mahasabha nominees set up against them—otherwise the Hindu Mahasabha should not oppose the Congress. The years that followed marked the termination of this friendly relationship between the Congress and the Mahasabha. With the advent of Bhai Parmanand and Dr. B. S. Moonje the Mahasabha acquired somewhat of an aggressive and militant character. Prior to this time, while the Hindu leaders were keen on defending the rights of the Hindu community, they still dreamed of a united nation. Socially, they wanted to make the Hindu community very strong and united; but, politically, they sought to keep the Hindu Mahasabha as an adjunct to the Congress.

Then followed the Simon Commission, the Round Table Conference and the Communal Award. The announcement of the Communal Award and the attitude adopted by the Congress towards it, namely, of neither accepting it nor rejecting it, drove a further wedge between the Congress and the Mahasabha. The latter's leaders conducted a strong campaign in the country against the Communal Award which they contended was strongly pro-Muslim and anti-Hindu.

Earlier Demands.—Before we come to this stage, we may briefly survey the demands of the Hindu Mahasabha in the preceding ten or fifteen years.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The 1918 session at Delhi demanded responsible self-government for India as a unit in the Empire and expressed opposition to the introduction of creed and colour considerations in the matter of representation on legislative councils, etc. While deprecating the attempts to extend separation and excessive communal representation in local bodies, the session demanded that if any special consideration was shown to a non-Hindu community where it was in a minority, the same consideration should also be shown to the Hindus where the latter were in a minority.

In 1925 the Mahasabha, which met at Calcutta resolved: "As it is essential to have one nation for peace and happiness and for the establishment and maintenance of *Swaraj* in the country; and also as communal representation in regard to national institutions and the services has been harmful and detrimental to the creation of a united nation, the Hindu Mahasabha strongly protests against the introduction of such a system; the Mahasabha also appeals to its non-Hindu brethren to give up such anti-national demands and help the Hindus in establishing national solidarity and oneness."

In the next year the Mahasabha expressed the opinion that "as the principle of communal representation and separate electorates, far from bringing the different communities together, has proved a serious hindrance to the growth of national feeling and to the smooth working of municipal, district, provincial and national representative institutions it is the duty of Hindu politicians of all shades of opinion to make a determined stand against this vicious principle."

In 1928 the Mahasabha reaffirmed its conviction that communal representation was fundamentally opposed to nationalism and laid down the following "essential propositions" for incorporation in any future constitution of the country. "That there shall be uniformity of franchise for all communities in each province; that elections to all elective bodies shall be by mixed electorates; that there shall be no reservation of seats on communal considerations in any of the elective bodies and educational institutions; but, to start with, if a minority community in any province were to demand reservation of seats, such reservation may be granted only in the legislatures for a short and on the basis that the representation of different communities shall be uniform, such as adult population, voting strength or taxation; the re-distribution of provinces in India, if and when necessary, shall be made on their own merits in the light of principles capable of general application with due regard to administrative, financial and similar other considerations, but no new provinces shall be created with the object of giving a majority therein to any particular community. In the case of provinces like the N.-W. F. P. and Baluchistan and Scheduled Districts, steps should at once be taken to secure with as little delay as possible the benefits of a regular system of administration, both judicial and executive, so as to leave no ground for refusing them the full benefit of the future reformed constitution of the Government of India; there shall be no communal representation in the Public Services which must be open to all communities on the basis of merit and competency ascertained through open competitive tests."

Round Table Conference.—While the Round Table Conference was in session, the Mahasabha met at Akola in 1931 and resolved *inter alia*: "The Hindu Mahasabha warns the Government that the people of Hindustan are in no mood to be satisfied with anything less than immediate full Dominion Status and full responsible government; this conference, while being emphatically of the opinion that Hindustan is quite capable of taking over immediately full responsibility for its own Government, puts on record its desire that the Round Table Conference may prove a success and that peace and friendship may be established between England and Hindustan. In case a certain transitory period as regards the defence of the country and imperial foreign policy be still considered needed, such period should not exceed ten years when those special reservations should automatically cease to operate; that even during such a period of transition there should be a minister or ministers in charge of the reserved subjects and the ministers shall be appointed by the Viceroy from among the elected members of the Central Legislature; that recruitment of officers holding King's Commissions in the Indian Army, Navy and Air Force should be made in India from the Indian Army, Navy and Air Force, irrespective of considerations of caste or creed or of the so-called martial and non-martial classes, subject always to the requisite standard of efficiency; provided that, it shall be open to the Government of India to provide for recruitment in England to fill up such of the vacancies as may not be filled in India; that all arrangements should be made for the intensive military training of Indian boys by establishing military schools and rifle associations and organising gymnasia for the training of boys in the indigenous arts of self-defence such as 'lathi' play, sword-play, etc., and encouraging boys to join University Training Corps, and young men to join the Territorial Force."

Communal Award.—The session held in 1932 at Delhi was of particular importance to the Hindu community in that it condemned the Communal Award on the following grounds. "That it maintains and extends the scope of separate communal electorates against all canons of democratic, responsible and representative Government which the British Government are pledged to establish in Hindustan; that it belies the Prime Minister's own declaration in the House of Commons on January 19, 1931, emphatically condemning communal electorates and weightages in representation as they leave no room for national political organisations or parties; that it flouts the unanimous opinion of the vast Hindu community, of the Sikhs, of important sections of Muslims, Christians, and Depressed Classes and also of the women of India in favour of joint electorates; that it practically forces separate communal electorates on unwilling Hindu minorities in the Punjab and Bengal; that it even extends separate electorates to women against their agreed demands to the contrary; that in the name of protection of minorities it has only granted protection to Muslims whether they form majority or minority, while not only no protection has been granted to

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Hindu minorities but they have been even deprived of a part of their representation, which they are entitled to on the basis of their proportion in population; that it provides for differential treatment of minorities favouring Muslim and European minorities in that (*i*) it adds an artificial and arbitrary weightage to the representation of Muslim minorities; (*ii*) it reduces the representation of the Hindu minorities of Bengal and Punjab below what they are entitled to on the basis of their proportion to the population; (*iii*) it denies to the Sikhs the weightage in representation which it grants to Muslim minorities under similar conditions; (*iv*) it grants to European and Anglo-Indian minorities a weightage of representation which is grossly out of proportion to their strength in population; and (*v*) it reduces the representation of the Hindu minorities of Bengal and the Punjab to what is flagrantly out of proportion to their contributions to taxation and to the culture, charitable benefactions and general progress of their respective provinces". The resolution continued: "It destroys the communal equipoise of the Lucknow Pact which was an agreed solution of the Communal problem and which was endorsed even by the Simon Commission in the absence of any other agreed solution; that the communal decision is not an award of an arbitrator to which the parties concerned are committed but it is the decision of the British Government; that the contention that an agreed Indian solution of the communal problem is not forthcoming is unwarrantable inasmuch as the problem was, at its origin, the creation of the Government itself; its solution has been obstructed by conditions created by Government such as the publication of the Government of India's despatch on Simon Commission practically conceding in advance almost all the demands of the Muslims and by the exclusion of nationalist Muslims from the Round Table Conference. Therefore, as circumstances favourable to an agreed solution do not exist, the Hindu Mahasabha, in accordance with its previous resolutions, recommends that the communal problem of Hindustan be settled, on an all-India basis, on the lines of the International Communal Award as embodied in Minorities' Guarantee Treaties to which His Majesty's Government and the Government of India are already committed as parties and signatories, and which, now form part of the public law of Europe and of the world, guaranteeing to minorities full protection, linguistic, cultural, educational and religious, but not through separate communal electorates.

The Hindu Mahasabha invites all other communities to stand for this International Communal Award formulated by the highest Arbitral Body of the world as their agreed solution of the communal problem; that in case the Communal Award is not suitably modified within reasonable time the Hindu Mahasabha calls upon the Hindus to take all steps necessary both in legislatures and outside for frustrating the objects of the Anglo-Muslim alliance on which it is based, and directs the Working Committee to prepare a programme of work to give effect to it."

The next year's session discussed an appeal to the League of Nations in respect of the Indian minorities problem.

The sessions of 1935 and 1936 condemned the Reforms scheme, especially as "it sacrificed the interests of the Hindu community to those of the other communities", but decided to contest the elections to be held under the 1935 Constitution "with a view to protecting and upholding the Hindu interests".

In 1937 the Mahasabha resolved that, in spite of the defects of the constitution, "the Hindus should utilise whatever powers are provided for under the Act in the interest of the evolution of Hindustan as a united nation" and urged upon Government to expedite the introduction of Federation.

The Mahasabha took strong exception to the Congress attitude of neither-accept-nor-reject towards the Communal Award, and as a protest against it Pandit Madan Mohan Malaviya and Mr. M. S. Aney, who till then wielded considerable influence on Congress policies, started a new party called the "Congress Nationalist Party" within the Congress, determined to oppose the Congress attitude towards the Award.

During 1934-35 a number of conferences were held to oppose the Communal Award.

Congress-Mahasabha Cleavage.—Then occurred another change in the Hindu Mahasabha. Mr. V. D. Savarkar entered the lists with a virile programme for the regeneration of the Hindu community. The cleavage between the Congress and the Hindu Mahasabha was further accentuated. Mr. Savarkar's attitude of hostility towards Congress may be illustrated by the following words: "The Hindu Sangatanists had to face the apathy on the part of crores of the unawakened masses of their co-religionists on the one hand and on the other the treacherous attitude of the pseudo-nationalist Hindus who are friends of every other community in the world but their own and who are ever ready to betray even the just interests of the Hindus and to placate the Muslims even in the most anti-national demands on their part—just to prove that the Indian patriotism of these pseudo-nationalists, like Ceazer's wife, was above suspicion. Thus, unaided and betrayed at home, the brave band of the Hindu Sangatanist leaders and missionaries had to face outside the organised opposition of the Christian missionaries on the one hand and the fanatical riots, hooliganism, assaults and assassinations by the Muslim fanatics on the other, while the British Government, out of its political hostility to the Hindus, was sworn never to take the side of the Hind s whenever Hindu interests clashed with the interests of the traditional 'favoured wife' of the British..."

Bhai Parmanand said: "the best way to bring about Hindu- Mahomedan unity is to strengthen the communities... Let the Hindus cease to be Hindus, but the Mahomedans shall be Mahomedans for all times to come. The negation of Hinduism on the part of the Hindus does not mean the negation of Islam on the part of the followers of the latter. The best security, for bringing about a desirable national evolution is to preserve the communal strength. It will then be to the interest of the Mahomedans to consent to the obliteration of all religious distinctions for political purposes... Sub-consciously, the

Hindus have, perhaps, felt that the Congress, the bestower of the priceless gift of liberty, must have been right in pawning Hindu independence, culture and prosperity in exchange for an elusive Moslem support. In fact the emotion that has accompanied Congress activity in the last twenty years has destroyed in the Hindus the love of their heritage. They have been too willing to offer themselves as sacrifices at the altar of a Goddess which was surreptitiously given back Hindu offerings to Muslims. ....If the Congress had not engineered the theory that liberty can only follow Hindu-Muslim unity, liberty today would not be hampered and confined as it is."

Referring to the latest phase of the Hindu-Muslim relationship, Bhai Parmanand said, "The situation has got only two solutions. One is the partition of the country into two, and the other to allow a Muslim state to grow within the State. That is sure to take us to a period of trial of strength, and in that case the Hindu Mahasabha alone and not the Congress can offer the right solution. I am convinced that if the Congress had not thought of Hindu-Muslim unity, if Mr. Gandhi had not made his ill-fated pact with the Ali Brothers, it could have made a significant contribution to the achievement of freedom. It would then not have nurtured an enemy to its ideals within its own territories."

Dr. Moonje remarks that "during the last 18 years the Congress has developed a tendency that may aptly be called a pro-Muslim mentality at the cost of Hindu interests with the ultimate object of placating and winning them over to merge in the Congress.....The Muslim scheme of emancipation is essentially and fundamentally based on the essentially communal ambition of winning a domineering position for Islam in this hoary land of the Hindus.... The Muslims have no idea of patriotism, or nationalism, if shorn of Muslim communalism; nor do they care for *Swaraj* in India, if Swaraj does not offer to them a domineering status in the administration of the country. Their one point, on which they have concentrated, for the present, all their energy and intellect and staked everything that counts in life, is how to 'win' a position for Islam in India, even if it be at the cost of others. Does this, in any sense, mean the need for minority protection? What is the cure for such a mentality? It has now reached its culminating point; it is no mere bluff. It has now begun to demand division of India into Muslim India and Hindu India." Dr. Moonje claims that "in any country it is always the right of the majority community to establish Swaraj and to create its own nationalism, to maintain internal law and order and to diefend the *swaraj* from external aggression."

Since 1937, Mr. Savarkar has been Hindu-India's No. 1. In 1937 the Mahasabha declared as its goal the attainment of complete independence by all legitimate and peaceful means.

An example of the militant character of the Mahasabha in later years may be found in a resolution passed in 1938 at Nagpur which urged upon the provincial Hindu Sabhas the need of opening *akhadas* (gymnasia) for improving the physique of Hindus and of starting rifle clubs.

The 1939 session in Calcutta resolved to form volunteer corps, under the name of 'Hindu Militia'. It also expressed the view that "the Muslims have been made much of both by the Congress and the Government and have been given concessions at the expense of the Hindus, constitutional and administrative, much more than what are their due in their proportion to the population."

Attitude to War.—On the question of war it was resolved: "In view of the statement made by His Majesty's Government that it has declared the war with a desire to safeguard the vital principles of freedom and democracy as against the rule of force and in view of the fact that nowhere is there greater necessity for the application of these principles than in India, the All-India Hindu Mahasabha declares: As the task of defending India from any military attack is the common concern of England and India and as India is unfortunately not in a position today to carry out that responsibility unaided, there is ample room for whole-hearted co-operation between India and England and that, in order to make such co-operation effective, His Majesty's Government should immediately take steps: (1) to introduce responsible government at the centre; (2) to redress the grievous wrong done to the Hindus by the Communal Award both at the Centre and in the Provinces, particularly in Bengal and the Punjab where the Hindus have been reduced to the position of a fixed statutory minority contrary to all principles of democracy, with their representation in the legislatures reduced far below what they are entitled to even on the basis of their population strength; (3) in order to inspire the people of India to feel that the Indian Army is the national army of the people of India and not an army of occupation of the British, to remove all artificial distinctions between the so-called "listed" and "non-listed" classes or "martial" and "non-martial" races, and to accomplish the complete Indianisation of the Indian Army as early as possible; (4) to modify the Indian Arms Act, so as to bring it on a par with what prevails in England; (5) to expand on an extensive scale the Indian Territorial Force and the University Training Corps, to establish such military organisations in provinces where they are not in existence at present, and to increase substantially the admission of cadets at the Indian Military Academy; and (6) to make adequate arrangements for the training of the people in all branches of the defence forces so as to make it ready for all emergencies."

As far as the future constitution of India is concerned, the session resolved that "the All-India Hindu Mahasabha reaffirms complete independence as the goal of India's political aspirations and urges that a constitution based upon the Dominion Status as defined in the Statute of Westminster be immediately conferred on India" and that "the Mahasabha emphatically protests against the recent pronouncements of the Viceroy and the Secretary of State to the effect that the further constitutional progress of India must depend upon a solution of its communal and minority problems, since they flagrantly violate the fundamental principles of a democratic constitution resting ultimately upon the vote of the political party commanding a majority and not subjected to the veto of the minorities."

In the Limelight.—The declaration of war in September 1939, followed as it was by numerous efforts by His Excellency the Viceroy to get leaders of Indian opinion together to an understanding on the political and constitutional issues with a view to unifying and intensifying India's war effort, brought the Hindu Mahasabha very much into the limelight. It was in 1939-40 that the Mahasabha secured for the first time official recognition at the hands of the Government of India, a fact which was appreciated by the annual session of the Mahasabha in 1940. When His Excellency the Viceroy summoned leaders of different communities and interests for consultation on the political question, the Hindu Mahasabha insisted that it alone had the right to speak in the name of the Hindu community. The resolution passed by the Mahasabha welcomed "the recognition by the Viceroy and the Secretary of State that the political situation in the country cannot be satisfactorily solved without the co-operation of the Hindu Mahasabha, which is the most outstanding body representing the Hindu community's interests."

In the middle of 1940 when the Viceroy was considering the best method of associating representative Indian opinion with the governance of India by means of an expanded Central Executive Council, the Hindu Mahasabha strongly advocated the claims of the Hindu community for adequate representation thereon, and stoutly resisted the claims of Mr. Jinnah that the Muslim League should have a majority in the Central Executive Council if the Congress abstained from participation.

The Working Committee of the Hindu Mahasabha resolved in September 1940:—"In view of the opportunities that the present war offers for the general militarisation of the Hindus and for the organisation of the defence of India on sound up-to-date modern lines, so that India may be converted into a self-contained defence unit, the Hindu Mahasabha is prepared whole-heartedly to work out the schemes of the extension of the Viceroy's Executive Council and the War Advisory Council, but on honourable terms of equity and justice as stated below:—'In view of the declaration made by the Muslim League of its 'determination, firm resolve and faith' that the partition of India is the only solution of a future constitution for India, the Hindu Mahasabha urges upon the Viceroy to make a clear and definite declaration that Government have not approved or accepted any such proposal or scheme;

'That in view of the reported understanding between the Viceroy and the Muslim League that the League would be given two seats on the proposed extended Executive Council and five seats on the proposed War Advisory Council, the Mahasabha claims a representation of six seats in the extended Executive Council and 15 seats on the War Advisory Council on the population basis;

'That out of the six seats on the extended Executive Council, one be given to Sikhs and one to Scheduled Castes and the rest to be given to the nominees of the Mahasabha;

The Working Committee considers the demand of the Muslim League for 50 per cent. representation on the proposed Executive Council and elsewhere as undemocratic, unconstitutional unreasonable and preposterous, and urges upon the Viceroy to give an assurance to the Mahasabha that no such demand would be entertained;

'In view of the attitude taken up by the Muslim League and the altered political situation brought about thereby, the Working Committee of the Hindu Mahasabha requests the President, without meaning any disagreement about the personnel of the panel, to withdraw the panel which was submitted by him to the Viceroy on behalf of the Mahasabha, in deference to the wishes of the Viceroy;

'The Working Committee also urges that a sub-committee of the extended Executive Council be formed, with the Viceroy as President, to be in charge of the defence portfolio and that Hindus should be given adequate representation on it;

'The meeting urges that the Viceroy should not commit himself to any distribution of portfolios before the extended Executive Council is constituted. The Committee further urges that the distribution of portfolios when made should be on an equitable basis with due regard to the importance and interests of the Hindus."

Opposition to Pakistan.—During 1939-40 the Hindu Mahasabha was considerably exercised over the demands of the Muslim League for the division of the country into Muslim and Hindu Indias. Anxiety was also expressed over the statements made by the Secretary of State for India on this subject, which were interpreted by the Mahasabha as conceding too much to the Muslims. (For details of these pronouncements by British spokesmen see the chapter on the Muslim League.) The Working Committee of the Mahasabha claimed that India should be granted Dominion Status within a definite time limit and expressed the opinion that the statements made by the Viceroy and Mr. L. S. Amery as highly "unsatisfactory and disappointing" in that they contained no reference to India's right to independence, which was the declared goal of the Mahasabha, and that the reference made to the grant of Dominion Status as an immediate step in constitutional advance was vague and uncertain. The Statement to the effect that the British Government would not agree to hand over the administration of the country to a system of Government which would not be acceptable to large and powerful elements of Indian life, the Committee thought, required clarification as it was capable of the interpretation that if the Muslim League, the Princes or other vested interests opposed the recognition of the legitimate rights of the majority in India the further constitutional advance would be held up, or the rights of the majority would be surrendered to them. This would mean negation of the principle of democracy and an incitement to the minorities to obstruct and revolt.

With regard to the Mahasabha attitude to the war and the offer of the Viceroy to expand the Central Executive Council, the Working Committee declared that the activities of the Mahasabha would be guided by a policy whereby the Hindu interests would be furthered, and that no

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

elements would be permitted to dominate the public life of this country to the detriment of Hindus. The Mahasabha was determined to fight every inch of ground, both inside and outside Government, to achieve this object, and it would accept any reasonable and honourable offer made by Government only if such acceptance would stimulate and advance the Hindu cause and prevent any encroachment being made on the rights of Hindus. But this acceptance of the offer would not be considered as a bar to the Mahasabha carrying on agitation for the further advancement of the Hindu cause and interests.

While the Hindu Mahasabha kept on urging the Hindus to offer themselves for recruitment in the fighting services, with a view to the steady militarisation of the Hindu community, its leaders carried on a ceaseless agitation against the Muslim League's Pakistan demand and against what they termed as the persistent refusal of the authorities to repudiate it.

1940 Session.

It was in this atmosphere that the annual session of the Mahasabha met at Madura in South India in December, 1940. Mr. V. D. Savarkar, who presided, preached the ideal that the Hindus should get themselves "re-animated and re-born" into a martial race.

Advocating the doctrine of a "pan-Hindu" movement Mr. Savarkar declared that it was encouraging to note that Hindu Princes were evincing keen interest in it. "The farsighted amongst them have begun to realise that their present and future interests as well are in fact identified with the 'pan-Hindu' movement now growing stronger day by day.

He then went on to explain the position of the Hindu Mahasabha *vis a vis* the Congress, the Muslim League and Government.

"Although the Congress itself openly resented the charge that it represented the Hindus and proved its contention to the hilt by actually betraying Hindu interests a hundred times over, still Government persisted in believing that the Congress and the League were equivalent as a sum total of Hindu-Muslim representation. The Hindus, as Hindus, not only continued to be unrepresented, but were positively mis-represented in all Governmental constitutional deliberations. But the growing prestige, influence and effective activities of the Hindu Mahasabha did at least impress Government with the fact that it was no longer possible to look upon the Congress as a representative Hindu body or to refuse to recognise the representative character of the Hindu Mahasabha."

He thanked His Excellency the Viceroy for having decisively recognised the position of the Hindu Mahasabha.

"In framing our programme so far as it lies in our power, our only consideration should be how best we can take advantage of the war situation to promote our own interests, how best we can help ourselves in safeguarding and, if possible, even in promoting the Hindu cause."

He urged the Hindus to utilise the opportunities afforded by the war to the militarisation and industrialisation of the community.

"I feel no hesitation" he said "in proposing that the best way of utilising the opportunities which the war has afforded to us cannot be any other than to participate in all war efforts which the Government are compelled by circumstances to put forth, in so far as they help in bringing about the industrialisation and militarisation of our people.

"Fortunately for us facilities are thrown open to us in this direction within a single year in consequence of the war which we could not find during the last 50 years and could not have hoped to secure by empty protests and demands for the next 50 years to come.

After referring to the rapid industrialisation of the country Mr. Savarkar turned to the *satyagraha* campaign of the Congress. "What is the alternative programme to the one adopted by the Hindu Mahasabha? Shouting some slogans and going into the jails?

"I appreciate the motive of those patriotic men in the Congress; I sympathise with their sufferings. But I must plainly state that they have made a mess of all political movements and the "satyagraha" they have now launched can bring no substantial good to the country."

Concluding, Mr. Savarkar dwelt on the political demands of the Mahasabha. "I must make it clear" he said "that the demands forwarded by the Hindu Mahasabha were not slighted by Government. We ask them to make a declaration that within one year's time after the cessation of the war Dominion Status shall be granted. Now the Viceroy and the Secretary of State have both made it clear that India shall be raised to the position of a self-governing unit of the Commonwealth which they call British, but, I claim, must be called Indo-British, on an equal footing immediately after the war.

"We wanted a declaration from Government that they would not encourage the scheme of breaking up the integrity of India. Under pressure from the Hindu Mahasabha alone Mr. Amery has made a clear declaration to that effect in his speech on "India First."

The main resolution passed by the session *inter alia* stated that the Hindu Mahasabha appreciated the recognition by the Viceroy and the Secretary of State that the political situation in the country could not be satisfactorily solved without the co-operation of the Hindu Mahasabha.

The resolution added that while reiterating faith in the goal of complete independence, the Hindu Mahasabha is prepared to accept Dominion Status of the Westminster type as the immediate step.

The Mahasabha considered that the declarations made from time to time by the Viceroy and the Secretary of State on the constitutional question "are vague, inadequate and unsatisfactory" and therefore urged the Government to make an immediate and clear declaration that Dominion Status as contemplated in the Statute of Westminster should be conferred on India within one year of the termination of the war and the constitution should be so framed as to ensure the integrity and indivisibility of India as a state

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and a nation, and while providing ligitimate safeguards for the protection of the rights and interests of the minorities it should not in any manner adversely affect the rights and interests of the majority in the country."

The Mahasabha further "condemns the attitude of the British Government in not making a clear announcement of its opposition to the scheme of Pakistan" and therefore, urged the British Government immediately to declare that Pakistan would not be tolerated and entertained by Government.

The resolution also called upon the Government to recruit Hindus for the army and the navy, make military training compulsory for Indians, and to promote the establishment of war industries in India. The resolution concluded: "In case the Government fails to make a satisfactory response to the demands embodied herein before March 31, 1941, the Mahasabha will start a movement of direct action." A committee was appointed to devise ways and means for starting and conducting the campaign of direct action after the lapse of the period mentioned above.

Nothing happened, however, on the expiry of the ultimatum, because, it is gathered the Hindu Mahasabha President received from the Viceroy assurances which were conciliatory in nature. It was reported in April, 1941, that the Viceroy had told Mr. Savarkar that there was no formal Pakistan proposal before the Government and that none such was under consideration by the authorities.

At the end of the meeting of the Working Committee held in the middle of April, 1941, Mr. Savarkar announced that the Viceroy's reply to his questions was such that in some Hindu circles it evoked feelings of satisfaction, while in others it was felt that it did not come up to expectations.

For this reason the Working Committee decided that the correspondence between the Viceroy and Mr. Savarkar should be placed before a meeting of the All-India Committee of the Mahasabha for such action as it might like to take. Political circles believe that this means that there is no prospect of direct action by the Mahasabha, at any rate, in the near future.

The National Liberal Federation.

The definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (*vide* 1919 edition of this book) witnessed the birth of the National Liberal Federation which has, since then, been the platform of Indian moderate leaders. It held its first session in Bombay in 1918, Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress. The Liberal Party in India has always been the rallying point of moderately progressive opinion. It has consistently stood for a pure type of nationalism and orderly progress through peaceful and constitutional means, as opposed to the revolutionary creed and policy of the Congress. During the first five or six years of its existence, the party played a useful and valuable part in politics and exerted a wholesome influence on public life. The death of the Rt. Hon. E. S. Montagu was a serious blow to the Indian Liberal Party whose influence on Indian affairs steadily waned since then. The Indian Round Table Conference brought it again to the forefront, but its influence again suffered partly as the result of the "reactionary provisions" of the Government of India Act of 1935 and partly as the result of the growing strength of the Congress organisation. The return of the Congress to the constitutional path ousted it from Indian politics. At the time of writing the Liberal Party exists only in name, there being no place for a middle group in Indian affairs of the present day. Indeed, it was felt necessary to enter at the last session of the Liberal Federation a special plea for the continuance of the Liberal Party in reply to suggestions that the party be wound up.

Shortly after the annual session of the Liberal Federation in 1935 there were rumours of an understanding with the Congress in order jointly to contest the elections, but these were soon proved to be unfounded. Efforts were doubtless made to bring about this consummation, but it was found there was very little chance of the Congress and Liberals agreeing on any joint programme of work—their outlook was so widely divergent.

The general elections for the provincial legislatures under the Government of India Act of 1935 not only proved that the Congress had enormous influence over the electorate but also confirmed the exit of Liberals from active political life in India. Few Liberal candidates contested the elections, but hardly any was successful. During the past two or three years the Liberal Party existed only in name. Its leaders, however, made their existence felt by occasional contributions to the discussion of public questions. They also played a valuable part in offering sober and constructive criticism of the policies and actions of the majority party, the Congress. Such criticism was all the more useful owing to the absence of an opposition in most of the provincial legislatures in which the Congress is now in power.

Although the Liberals hold no less progressive views than Congressmen, there is a fundamental difference between the two: the former have fixed Dominion Status within the Empire as their ambition, while the latter have set "complete independence" as their goal; similarly in the matter of method, the Liberals are opposed to direct action and are wedded to constitutional forms of agitation to accelerate the pace of the country's political advance.

There is another direction in which the Liberal Party's sentiments may be said to be different from that of the Congress. Having an abiding faith in the British connection and being convinced of the potentialities for good of the British Empire, the Liberal Party constantly wishes well by the Empire and what it stands for. For this reason no member of the Party wishes anything but success for the Empire in the struggle which it is waging against Nazism. Many of them have given public expression to their convictions in this behalf and to their undoubted desire that India should render full support to Britain in her war.

Latterly, however, the bulk of the Liberals have shown signs of impatience over the deadlock in the country. While they were ready to realise that the intransigence of the Congress was not a little responsible for the political *impasse*, they were by no means happy over the bureaucratic form of administration both at the centre and in the majority of the provinces. They wished that the authorities should make an effort to end the political inactivity, primarily with a view to investing the country's war effort with popular sanction through non-official representatives of Indians. Towards this end they made an appeal to Government in March 1941, whose outcome is not known at the time these lines are being written.

A Middle Course.—The activities of the Liberals and other moderate leaders during the past twelve months have thus followed a middle course. On the one hand, they were never slow to denounce any attempt to hamper the country's war effort, and, on the other, their demands were little different from those of the Congress. What may thus be described as the dual policy of the Liberals found ample expression in the past few months. Shortly after the publication of the Viceroy's August offer (see chapter on Indian National Congress) the Council of the National Liberal Federation passed a resolution voicing the fear lest the British obligations in India should permanently stand in the way of this country achieving the same freedom as the other Dominions and demanding an assurance that the contemplated free and equal partnership of India was not subject to a distinction between the functions and the status of a Dominion.

Proceeding, the resolution said:—"The Council considers that a definite time limit should be laid down within which India will attain Dominion Status, as it feels that after the war danger is over the various conditions in the declaration are capable of being put forward as excuses for delaying such attainment indefinitely.

"While the Council is anxious to satisfy all reasonable claims and aspirations and remedy all the genuine grievances of the various minori-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

ties and interests in the country, it cannot help feeling that the guarantees given in the declaration to the minorities are worded in such wide terms that they can be used to stop all political progress if their demands, even the most unreasonable, are not fully conceded. The Council, therefore, desires that it should be clearly stated that in the event of such a 'non-possumus' attitude on the part of any minority or interest, Government will carry out their promise to grant Dominion Status consistently with the principle of nationalism and democracy and the integrity of the country."

At the same time the resolution observed :— "To enable India to put forth her best effort for the prosecution of the war and to reconcile the country to any sacrifices that may be necessary, the Council considers it essential that the Defence portfolio should be entrusted to an Indian who commands the confidence of the people, and that the defence forces of India should be organised on a fully national basis, in particular that the recruitment of non-Indian officers should henceforward be discontinued. The new members of the Viceroy's Executive Council should be selected from the representatives of the various political parties in the country, and such new members should be in a majority on that council. As a matter of convention such an enlarged Executive Council should work as a Cabinet. The Viceroy should be its constitutional head, and the British Government should not ordinarily interfere with any policy that has the support of such an Executive Council and the Central Legislature. The acceptance of the principle of self-determination in the declaration is so hemmed in by regard for British obligations and guarantees to minorities and interests as to render it nugatory, and the Council considers that if it is really intended to grant self-determination, it should be done in a manner which will make it practically effective."

Criticism of Congress and League.—Some time after the launching of the civil disobedience movement by Mr. Gandhi, the Council of the Liberal Federation expressed the opinion that the liberty of speech demanded by the Congress was a "licence to hamper all war effort which in reality is an abuse of the liberty of free speech." It declared that the Congress claim to carry on unfettered propaganda against the war was not only impracticable but opposed to the best interests of India herself and would undoubtedly have serious repercussions. It was obvious to the Council that in spite of its loud protestations not to embarrass the British Government the Congress was merely trying to create a political crisis with a view to bolstering up its own prestige and covering up a series of capital political mistakes which it committed when it had the reins of government in seven provinces.

The Council also disapproved of "the anti-national policy" adopted by the All India Muslim League in putting forward the Pakistan scheme "designed to partition the country on communal lines." A statement issued by the Council said :—"The Liberals have always stood for effective safeguards for the protection of Muslims and other important minorities and for securing to them real part in the governance of the country but they can never countenance a scheme which strikes at the root of all true nationalism and unity thus inviting fresh dangers of which the consequences cannot be foreseen. At this juncture, it is the duty of all well-wishers of India, to whatever political party they might owe allegiance and to whatever community they might belong to, unite in a common front to oppose the suicidal policies both of the Congress and the Muslim League which undoubtedly hamper all political progress on democratic lines.

"The Council are surprised at the attitude of the Government who, by carrying on ceaseless negotiations with representatives of only certain political and communal organisations, make it appear that the only method of agitation of which they can take notice is that of threats, bluff and bulleying.

There is a widespread feeling all over the country even amongst those who do not approve of the Congress and the League attitude, that the Government have really no intention to part with power. In the interests of democracy itself and greater effort in the prosecution of the war, it is essential to remove this impression."

Annual Session.—The annual session of the Liberal Federation met at Calcutta in Christmas week under the presidency of Mr. V. N. Chandavarkar. Both the presidential address and the resolutions passed by this session reflected the dual policy referred to earlier in this chapter, namely, urging, on the one hand, wholehearted war effort and deploring the Congress attitude and, on the other, demanding political changes which might well have proved acceptable at least to the right wing of the Congress.

Mr. Chandavarkar delivered an outspoken address suggesting that those in power ought to do at the present moment to win the complete confidence of the Indian people that they may go ahead with the war which, I must frankly say, is as much our war as it is theirs, so that lasting victory shall, in the end, crown the British arms,—a victory that will preserve our liberties for us in India as they will be preserved for those in Great Britain as well. We must not let ourselves forget in this connection that the political quarrel between Britain and India is a domestic quarrel, which should not be allowed to interfere with and queer the pitch for action against the common enemy of mankind."

Referring to Indian unity and Indian nationalism, he said, "whatever mars that unity has, therefore, to be regarded as a step not only retrograde but definitely meant to divide us in order to keep us in permanent bondage. Hindus and Mahomedans have lived long enough—for centuries by now—in this country, not to regard themselves as separate political entities. Nationality and Nationalism are terms that can never mean either Hindu Nationality and Nationalism or Mahomedan Nationality and Nationalism. They can only mean, rightly understood, Indian Nationality and Indian Nationalism. In public life, there can be only Indian Nationality based on Indian unity. If this has not been so in India even today, the reason is not far to seek. It is to be found in the introduction of communal electorates in Indian body-politic."

Proceeding, he said :—"What characterises the present political situation in India may be

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

aptly described as the negation of Liberalism. For another vital characteristic of that faith is compromise which is, today, conspicuous by its absence between the Government and the parties themselves that should work together for common good. "I am the State" says the Government, "I am the State to be and the people combined," says the Congress. "I am going to be the State—not even within the larger State—but separate and distinct from the whole,—and yet I demand that the greater will move as I direct or shall not move at all," says the rival, threatening war if it is not heard. All this has come about because there is the absence of larger vision and the denial of rational compromise as the only key to the solution of any political problem. The Government will not compromise, the Congress will not compromise and the Muslim League will not compromise. The Government will do nothing without the Congress and the Muslim League, It will listen to none else for, as the slogan goes, none else can deliver the goods. They seem to have forgotten, all of them, that this has never been and can never be the successful method of political reform and advancement."

After demanding that a definite time limit should be announced forthwith for the grant of full Dominion Status to India, the President said:—"The least that we expect from the Government of the day is, that they will go ahead with their scheme of the expansion of the Viceroy's Executive Council and of adding on to it a War Council, also composed of non-officilas drawn from all parties in the country. But it has to be emphatically said in this connection that the two Councils so formed should not be in the nature of an eye-wash. The members chosen or nominated to work upon them should be of the wisest and the best, and though technically responsible to the Viceroy alone, the convention should be established that their advice shall normally operate without let or hindrance from any quarter. Above all things the portfolios of Defence and Finance must be in charge of non-officials who are not drawn from permanent services. The polices shall be framed by the non-official members concerned, who will be allowed to see to it that they are carried out in letter and spirit by the administration under them. And the responsibility o these members shall be a joint-responsibility, and not only for the particular department which may be put in their charge.

I need not go here into the details of Defence and Finance. But I shall permit myself to say something by way of general observations on Defence. We are here on stronger ground than any other political party in India. Finance and Defence have been subjects studied in detail and spoken on with authority by some prominent members of our Party. Not to refer to venerable names like those of Sir Dinsha Wacha and Mr. G. K. Gokhale in the past, we have in our midst today persons of the eminence of Sir Sivaswami Aiyer and Pandit Hridayanath Kunzru who have made the subject of Indian Defence all their own."

Concluding, Mr. Chandavarkar said:—"We want Indian unity, and no party domination. We want India to be one nation and not cut as under into Hindu India and Muslim India. We honestly think and firmly believe that Dominion Status of the Westminister Statute variety will give us the *kind*.. of independence we need in India today and tomorrow, to weld her into a self-determining and self-sufficing nation. I do not look far into the future. One step is enough for me.

My submission to the British Government, in their own interest as well as in the interest of India is this:—It should make a clear declaration to the Indian people that, say within two years after the war, they will definitely establish Dominion Status in India, and then the people of India shall have to work out their own salvation in their own way, without either interference of domination from Great Britain, or by any party that may be in power in Great Britain thereafter. In the meanwhile they are sending a Good-Will Mission to India, fair, impartially minded, of undoubted integrity and honour, whose sole aim in going to India and seeing things for themselves, shall be to clear up misunderstanding, restore friendship, and do all in their power to smoothen the path of progress all round. It is my firm, considered and emphatic opinion that until the Indo-British problem is solved first all other differences in India will not end."

The Resolutions.—Among the resolutions passed by the session were three which, between them, give expression to the dual policy. Two of these, dealing with the political aspect ran:—

"The National Liberal Federation of India, while desirous to satisfy the reasonable claims of minorities, is of opinion that the Viceroy's declaration of August last virtually gives them a veto on constitutional progress, and protests strongly against the distinction drawn by Mr. Amery between the status and functions of a Dominion, which has created a grave apprehension in the minds of the people that what he called British obligations in India may permanently stand in the way of India achieving the same freedom as the other Dominions enjoy.

"The National Liberal Federation of India strongly dissents from the recent statement of H. E. the Viceroy that the British Government can do nothing more than they have already done to enable India to enjoy Dominion Status, and urges that it should be immediately announced that India will be accorded the status and functions of a Dominion within the meaning of the Statute of Westminister within a period not exceeding two years after the conclusion of the war. The National Liberal Federation of India is further of the view that, in the meanwhile, the Central Government should be so reconstructed, as to have by convention a fully national character. The Viceroy should be its constitutional head and the British Government should not ordinarily interfere with any policy that has the support of such an executive and the Central Legislature. The portfollos of Defence and Finance should be entrusted to non-official Indians enjoying the confidence of the country."

"The Federation, while fully ready to safeguard the interests of all sections of the people, considers that the aim of India's political evolution should be a democracy, not qualified by considerations of race or creed, and therefore the Federation is definitely opposed to the permanent existence of communal electorate

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and the present Communal Award; at the same time, as it would not be practicable to effect this reform immediately owing to existing conditions, it considers that gradual steps should be taken to eliminate separate communal electorates by having joint electorates with reserved seats for a definite period. "The Federation is emphatically opposed to the suggested division of India into Pakistan and Hindustan as being against the best interests of the country which in its opinion, should be one single unit of Government for purposes of administration and defence, though it will have necessarily to be of a federal character."

The war resolution read :—"The Federation reaffirms its deep sympathy with the victims of totalitarian aggression and is fully confident that they will soon be able to regain their lost independence.

"It deeply appreciates the heroic efforts made by Britain and the countries associated with her and by Greece and China in resisting aggression and trusts that their enormous sacrifices will be crowned with success. "The Federation feels that India should offer its whole-hearted support in the prosecution of the war as it is convinced that the future of democracy and the cause of India's freedom are bound up with the defeat of totalitarianism. At the same time it feels that the requisite effort will not be forthcoming from the people of India unless sufficient enthusiasm is created among the people by a change in the policy of Government towards India."

Another resolution which dealt with the Congress campaign of civil disobedience stated :—"The Federation deplores the resort to civil disobedience by the Congress as it will still further complicate the difficult situation in the country. "The Federation also deplores the severity of sentences passed in certain cases and advocates enlightened treatment of political prisoners throughout the country."

A resolution on defence policy was also passed in the following terms :—"The National Liberal Federation, while always demanding a radical change in the defence policy of the Government is strongly of opinion that the war has shown that, for making adequate preparations for the security of India, it is essential that (1) the Defence Portfolio should be entrusted to an Indian member who commands the confidence of the people and that (2) the defence forces of India should be organised on a fully national basis. It recognises the progress that has been made with regard to the manufacture of war materials but is thoroughly dissatisfied with the policy in other respects. It urges in particular (a) that the policy of Indianisation of the Army, Navy and Air Force should be immediately adopted and (b) that the distinction between martial and non-martial races should be done away with and the Army recruited from all provinces and classes."

Appeal to Britain.—A few days later, many prominent Liberal leaders issued a public statement in which they declared that the British Government had so far failed to unify British and Indian interests and to inspire zeal for the British cause among the people of India, and that the situation in the country, though serious, could be improved beyond recognition if Britain acted with vision and courage. This was in reply to a goodwill appeal made by representative members of the Parliament to the Indian people in the preceding Christmas week in which the British spokesmen had affirmed that the idea of looking on India as less than an equal was foreign to the House of Commons today.

Reciprocating these sentiments, the Indian Liberals' statement said :—"As Indian and British political ideals are the same and the moral sympathy of India is with the forces of democracy at this juncture, we agree that it is a tragedy that India and England are drifting apart. It will be a greater tragedy if immediate efforts are not made to reconcile the two. "We must point out, however, that it is a mistake to think that the misunderstandings relate to superficial matters. Deeper causes are responsible for the present situation. At the outbreak of the war India was more warmly sympathetic to England than even during the last Great War owing to community of political ideas. But the British Government unfortunately failed, to mobilise Indian goodwill owing to their unimaginative and still distrusting attitude. In the political domain they have moved very reluctantly and always too late.

"The declaration made by the Viceroy after the outbreak of the war merely re-affirmed that Dominion Status was the ultimate issue of India's political evolution, and there was no offer at that stage of associating Indians with the formulation and execution of war politics. Further the measures taken in respect of the vital questions of defence and industrialisation have caused intense dissatisfaction and deepened distrust of British policy which seemed to be based on racial considerations. We agree that the controversy with regard to Dominion Status and Independence has no practical importance at the present time. But we must emphasise that this controversy can be put an end to only by granting Dominion Status to India and thus securing to her the reality of national freedom.

"We can sincerely say that we have never approached any public question with the slightest communal bias. We have always honestly tried to understand and remove the legitimate apprehensions of minorities. It has always been our aim that the constitution shall fully protect the minority interests and enable the minorities to make their contribution to the solution of national problems. But we must say that although it is apparently conceded that India must be allowed to have a substantial share in the framing of her constitution, yet the task has been made virtually impossible for her by declaration on the part of Government which encourage communal intransigence and thus practically give the minorities and other interests a veto on constitutional advance.

Insistence on every official pronouncement on the rights of minorities without a clear statement that the minorities would not be allowed to block constitutional advance by unreasonable demands have, we are afraid, created the impression that Britain is taking advantage of the communal difficulties in order to maintain her power.

We believe in co-operation between Britain and India if it could be achieved on honourable terms. Notwithstanding the differences that have arisen, the magnitude of which cannot be minimised, there is every desire on our part to offer our full co-operation, but it is in our

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

view incumbent on Government to make our task easy by creating the right psychological atmosphere.

How can India which is not assured of her future freedom, forget its humiliating position and work enthusiastically for the freedom of England and other nations? We are unreservedly opposed to the totalitarian systems and would genuinely wish that India was in a position to put forth her maximum effort for the cause of freedom and democracy.

"But we deeply regret that the British Government have so far failed to unify British and Indian interests and to inspire zeal for the British cause among the people of India. The situation in the country, though serious can be improved beyond recognition if Britain acts with vision and courage. We have here expressed our own views but we believe that they are shared by a considerable section of our countrymen."

Bombay Conference:—As the foregoing demands and appeals appeared to find little response from any quarter—Government, the Congress or the Muslim League—a few prominent leaders, mostly belonging to the Liberal party but some drawn from Independents and Hindu Mahasabhaites, met in Bombay in the middle of March 1941 and passed the following resolution:—While India should not take advantage of Britain's difficulties in her heroic struggle, the conference is equally desirous that India's domestic problems should not be pressed to her disadvantage. As a first step towards the removal of the present deadlock and until a permanent constitution is brought into force, the conference desires to emphasise the immediate need for the reconstruction of the Governor-General's Executive Council.

The conference considers that the present Council, which consists of three European members from the Indian Civil Service, and three Indians, of whom two are non-officials and one is a member of the Indian Civil Service, in addition to His Excellency the Viceroy and His Excellency the Commander-in-Chief, is neither adequate nor sufficiently representative to organise and direct India's war efforts at this moment of grave peril. This conference is anxious that India's defences should be put on a firm basis and that the resources of this great country in men and material should be used to the fullest advantage not only for defending her own frontiers, but for helping the British people to the fullest extent possible consistently with the best interest of India.

For the reasons mentioned above, this conference is of the opinion that the whole Executive Council should consist of non-official Indians drawn from important elements in the public life of the country. This would naturally involve the transfer of all portfolios, including the vital ones of Finance and Defence, to Indians.

The conference would be content during the period of the war that the reconstructed Centre remains responsible to the Crown; and so far as Defence is concerned, the position of the Commander-in-Chief as the executive head of the defence forces of the country should not be in any way prejudiced. At the same time, the conference is strongly of the view that the reconstructed Government should not merely be a collection of departmental heads, but should deal with all important matters of policy on a basis of joint and collective responsibility. In regard to all inter-imperial and international matters, the reconstructed Government should be treated on the same footing as the Dominion Governments.

The conference is further of the opinion that with a view to creating a favourable atmosphere for the working of the reconstructed Central Government, it is necessary to remove the doubts and misgivings of the people of this country as regards the genuineness of the intentions of His Majesty's Government by making a declaration, simultaneously with the reconstruction of the Government, that within a specified time limit after the conclusion of the war, India will enjoy the same measure of freedom as will be enjoyed by Britain and the Dominions.

The conference authorises its President, the Right Hon. Sir Tej Bahadur Sapru, to communicate the terms of the resolution to His Excellency the Viceroy and the Secretary of State for India, and to take such other steps as may be necessary to achieve its objects."

This resolution received widespread publicity in the country, especially as it purported to come from leaders without any affiliation with the major parties to the Indian deadlock and in view of Mr. Gandhi's explanation that, in spite of his personal Convictions about the war and India's participation therein the Congress organisation was free, if it chose, to consider any compromise or settlement of the political question.

Some very strong speeches were made in support of the resolution passed in Bombay and several moderate leaders who did not attend the conference, including the Rt. Hon'ble V. S. Srinivasa Sastri, urged Government to adopt the Bombay suggestion without any delay. Mr. Sastri described the Bombay proposal as not only feasible but the necessary minimum of constructive conciliation and, warning Britain that "delay will only aggravate present difficulties and create new ones", said: "To listen while there is time to the clear call sounded in Bombay is the wisest course for Great Britain at the moment."

Sir Tej Bahadur Sapru, who presided over the Bombay conference, explained that the Central Government contemplated in the resolution should be national in spirit and practice and hoped that, though the Indians to be appointed to the Central Executive would be responsible only to the Crown, they would reflect public opinion and would be in constant touch with it.

It may be noted that at least in one respect the Bombay conference resolution went farther than the Congress demand in that it asked for the complete Indianisation of the Central Government and a declaration that the Dominion Status to be conferred on India after the war would correspond to that which might eventually be enjoyed by the other Dominions and Great Britain herself in the Commonwealth.

In spite of the opinion expressed by a couple of Liberal leaders that the scheme proposed in the resolution would not work without the Congress and the League co-operation, reactions in the country were very favourable and at the time of writing the result of the conference is being eagerly awaited.

MUSLIM LEAGUE.

The awakening of political consciousness among Muslims in India as a separate entity dates back to 1906 when the All-India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the 'twenties, and differences set in among its members. When enhanced powers were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire for a greater share in the control of the administration of the country and in Government posts. This feeling gave rise to the formation of a new body whose promoters concentrated on aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme, these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League. The result was the All-Parties Muslim Conference in 1928. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped this process of consolidation. An attempt was made early in 1934 to consolidate the community by healing the split within the Muslim League and, if possible, bringing the League and the Conference together to work as a united body. The latter failed, but the former object was largely successful and the League marched from strength to strength until it emerged as a powerful organisation of the Muslim community on the eve of the first elections to the provincial legislatures under the Government of India Act of 1935. For the first time in the political history of Muslims their representative institution functioned as a vigorous and active all-India organisation with results which flattered Mr. Jinnah, and his co-workers, although the success of League nominees was not very striking. Doubtless Mr. Jinnah, who was the guiding spirit behind this new activity, was handicapped by fissiparous tendencies and reactionary forces in distant provinces beyond the sphere of his direct influence. This was soon rectified by the growing influence of Mr. Jinnah and the League among the Muslims.

Mr. Jinnah's influence among the Muslims increased rapidly in the years following the advent of the 1935 constitution. The Muslim League grew into a powerful organisation with branches all over the country. At Lucknow in 1937 its creed was lightened up; at Lahore three years later it adopted a resolution demanding the partition of the country into Hindu and Muslim India; and in 1941, the creed was again changed into what amounts to a demand for secession.

Shortly after the 1936 elections, Mr. Jinnah explained the position of the League members of provincial legislatures *vis-a-vis* other groups and said: "The constitution and policy of the League do not prevent us from co-operation with others. On the contrary, it is part and parcel of our basic principle that we are free and ready to co-operate with any group or party from the very inception, or inside the legislature, if the basic principles are determined by common consent."

These words engendered a hope that the League might be induced to co-operate with the Congress in its extremist programme and negotiations were started, but it soon became apparent that the two could not come together. The situation was rendered more difficult by the attitude of stiffness adopted by the Congress and its President, Pandit Jawaharlal Nehru. Mr. Jinnah refused to convert the League into an understudy of the Congress and firmly upheld the position of the Muslim community. The Congress, for its part, found as the result of the elections that it did not have the support of the Muslim community. Very few Congress Muslims were put up as candidates for the elections, and even they failed. The Congress therefore set about roping in the Muslims by an appeal to their economic conscience, explaining that the Congress was out to alleviate the sufferings of the masses, Muslims as well as Hindus, and to uplift the nation as a whole. In this process the League and its leaders came in for a great deal of violent criticism at the hands of the Congress managers. On behalf of the League Mr. Jinnah retorted: "The Congress have not the monopoly, nor are they the sole custodians of Indian nationalism. As I have always maintained, the Muslim League is prepared to join hands with any progressive party in the fight for the country's freedom, but to achieve this the question of minorities must be settled satisfactorily. Here I am not talking of only Muslims but all minorities. Further, we are not prepared to merge ourselves into any organisation, however great it may be, and however advanced its programme and policy may be unless it is determined by common consent."

Paying little heed to these words of warning, the Congress leaders went their own way. Puffed with the success at the polls, they affected to ignore the claims of League leaders. In what may be described as non-Muslim provinces—that is, those in which the Muslims are in a minority—the Congress formed Ministries without consulting and securing the co-operation of the Muslim League. No doubt attempts were made to arrive at an understanding with the Muslim League, but they failed mainly on account of the Congress demand that wherever such an understanding was reached the Muslim League should cease to be a separate parliamentary body and merge itself into the resultant Congress-League Party. The League, for its part, was willing to co-operate but not on the terms imposed by the Congress. In the result the negotiations failed, and the League remained in the Opposition. Although the bulk of the Muslim representatives returned to the provincial legislatures by the electorate were in opposition to the Congress the latter proceeded to constitute Governments with Muslim Ministers who did not represent Muslim opinion in the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

legislature. Nowhere in any of the so-called Congress provinces did the Muslim Ministers have the support of the majority or even a decent number of Muslim legislators. Thus these Muslim Ministers in the Congress provinces were the objects of repeated displays of Muslim hostility.

Having failed to reach an agreement with the League and its leaders, the Congress tried to crush the League and its leaders by making a direct approach to the Muslim masses through an economic and national programme. For a time this appeared to succeed, but eventually failed to achieve its object. The League leaders counteracted the Congress propaganda by pointing out to the Muslim masses that their true interests lay in their organisation under the banner of the League which alone could serve them truly. The League's counter-drive succeeded in a large measure aided by allegations that in provinces where the Congress was running the Government the Muslim minorities were not treated well. The widening gulf between the Congress and the League gave an additional stimulus to the consolidation of the Muslim forces under the League which found fruition at the Lucknow session of the League in the autumn of 1937.

The Lucknow Session.—The session was unique in several respects. For the first time in the history of the Muslim organisational movement, complete unity was achieved, and every section of Muslim opinion, including those which till then had been opposed to the League or outside it, rallied round the League. There was no discordant note and Muslim political unity was complete. The Muslim League emerged the only strong and influential political organisation of the Muslim community.

The session changed the creed of the League to "the establishment in India of full independence in the form of a federation of free democratic states in which the rights and interests of the Muslims and other minorities are adequately and effectively safeguarded in the constitution." (For details of the proceedings of this session, see *Indian Year Book* 1938-39.)

The enthusiasm engendered by the success of the Lucknow session was kept up in succeeding months by an intensive organisation of branch Leagues in every province and district.

The foundations of Muslim solidarity laid at the Lucknow session of the League in the autumn of 1937 proved very strong indeed. The League grew from strength to strength in the two succeeding years and today it is admittedly the most powerful organisation of the community. The League's spokesmen claim that it is the only mouthpiece of the Muslims, and one may be inclined to recognise that claim but for the existence of other organisations in the community with more or less following and influence, not excluding a large number of Muslims who are members of the Congress. There may be two opinions about the claim that the League is the only organisation of the community, but no one can question that it is the most powerful and the most influential.

With the outbreak of the war and the changes it wrought in Indian politics, the League found itself in an extremely advantageous position. A perusal of the chapter on the Indian National Congress will show how the Congress withdrew its ministries from the provinces where it had held sway for nearly two and a half years. As a result of this the League came to be on a par with the Congress in that both were now out of office and without the power and influence which went with it. Whereas the Congress lost through the resignation of its ministries such bargaining power as it had while in office, the League acquired some indirect power through the international complications that resulted from the war. Again, whereas the Congress had alienated the sympathies of the Indian Princes by sponsoring and encouraging agitation for responsible government for the States people, the League earned the friendship of the Princely order by condemning such activities and upholding the rights and privileges of the Indian Princes in any revision of the Indian Constitution. In yet another direction the League manœuvred itself into a comfortable position; whereas, the Congress categorically withheld its co-operation from the war, the League abstained from taking any such attitude and merely insisted on the satisfaction of its claims prior to making up its mind. Even this was only the official attitude of the League as an organisation. Most of its individual members were in favour of wholeheartedly aiding in the prosecution of the war. And the League winked at this.

A fortnight after the declaration of the war, the Working Committee of the League passed a resolution which illustrates the tact and firmness with which the League steered the Muslim ship. The League Committee stated that "if full, effective and honourable co-operation of the Mussalmans is desired by the British Government in the grave crisis which is facing the world today and if it is desired to bring it to a successful termination it must create a sense of security and satisfaction among the Mussalmans and take into their confidence the Muslim League, which is the only organisation that can speak on behalf of Muslim India."

Attack on Congress Ministries.—Side by side with the demand for the redress of Muslim grievances and the assertion that their full and free consent should be obtained before any change in the Constitution was attempted, the League continued its campaign against the Congress ministries, to which a reference has been made in past issues of the "Indian Year Book." Apart from the "atrocities" which, the League affirmed, had been perpetrated on the Muslim minorities in the provinces administered by the Congress, the League made a fresh point which was soon to become the nucleus of a serious development in Indian politics.

In a resolution passed in September 1939, the Working Committee of the League said: The developments that have taken place, especially since the inauguration of the provincial constitution based on the so-called democratic parliamentary system of government and the recent experiences of over two years, have established beyond any doubt that it has resulted wholly in a permanent communal majority and the domination by the Hindus over the Muslim minorities, whose life and liberty, property and honour are in danger, and even their religious rights and culture are being assailed and annihilated every day under the Congress Governments in various provinces.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"While Muslim India stands against exploitation of the people of India and has repeatedly declared in favour of 'a free India,' it is equally opposed to domination by the Hindu majority over the Mussalmans and other minorities and vassalisation of Muslim India, and is irrevocably opposed to any federal objective which must necessarily result in a majority community rule under the guise of democracy and parliamentary system of government. Such a constitution is totally unsuited to the genius of the peoples of the country, which is composed of various nationalities and does not constitute a national state."

This attack on provincial autonomy and on majority rule was an altogether new line which was struck almost for the first time by the League. Till then the Muslim demand had always been for effective safeguards for the protection of the Muslim community's religious, cultural and other rights; now the Muslims began to question the very basis of democracy and declared that the western democracy in the sense of rule by majority was unsuitable. This was developed in the summer of 1940 into a demand for the separation of Muslims on the ground that they constituted an integral nation and not a minority in the Indian population.

In the succeeding weeks numerous attempts were made to ascertain the grievances of the Muslims and to find out whether they were justified—in other words, whether the Congress ministries had been guilty of oppressing them or even neglecting them. But all these ended in smoke.

Political Discussions.—Meanwhile, discussions on the political field continued and early in October 1939 the Viceroy called into consultation leaders of all sections of opinion in India with a view to ascertaining their wishes in the matter of constitutional reform. On the conclusion of these consultations, the Viceroy issued an exhaustive statement on Britain's War aims *vis-a-vis* India.

It gave the Muslim community the requisite assurance concerning its status in future adjustments. This is evident from the resolution passed by the Working Committee of the League which met in Delhi towards the end of October 1939. The Committee hailed the Viceroy's statement as a new charter of hope for the minorities and as a recognition of the League's right to full say in the future constitutional arrangements. From this resolution one can infer that the League found in the Viceregal declaration an acknowledgment of the League's status as an essential factor in any political development on an all-India basis.

In January 1940 the Viceroy made a speech in Bombay in which he further clarified Britain's intentions towards India and declared that Dominion Status was the goal of British policy in this country and that Great Britain was prepared to take steps immediately after the War to implement that offer, subject, of course, to justice being done as between the various parties and communities in India and His Majesty's Government.

On the basis of this speech there was a consultation between the Viceroy and the leaders of the principal parties in February 1940. During this conversation Mr. Jinnah urged on His Excellency the great importance attached by the Muslims and the other minorities to the safeguarding of their position in any settlement or discussions that might take place. His Excellency assured Mr. Jinnah that His Majesty's Government were fully alive to the necessity for safeguarding the legitimate interests of the minorities and that he need be under no apprehension that the importance of those interests would be lost sight of.

This was almost immediately followed by the publication of the correspondence between the Viceroy and Mr. Jinnah. The Muslim leader asked: "(1) So soon as circumstances may permit, or immediately after the war, the entire problem of India's future constitution, apart from the Government of India Act, 1935, shall be examined and reconstructed *de novo*; (2) no declaration shall, either in principle or otherwise, be made or any constitution be enacted by His Majesty's Government or Parliament without the approval and consent of the two major communities in India, namely, Muslims and Hindus; (3) His Majesty's Government should try and meet all the reasonable national demands of the Arabs in Palestine; and (4) Indian troops will not be used outside India against any Muslim Power or country."

The Viceroy in his reply said: "My answer to your first question is that the declaration I made with the approval of His Majesty's Government on October 18 last does not exclude examination of any part either of the Act of 1935 or of the policy and plans on which it is based. With reference to your second point, I can assure you that His Majesty's Government are not under any misapprehension as to the importance of the contentment of the Muslim community to the stability and success of any constitutional developments in India. You need, therefore, have no fear that the weight which your community's position in India necessarily gives their views will be underrated. In framing their policy for Palestine, His Majesty's Government have endeavoured to meet all reasonable Arab demands, and they continue to be fully alive to the importance of that issue. Finally, you asked for an assurance that Indian troops will not be used outside India against any Muslim Power or country. This question is fortunately hypothetical, since His Majesty is not at war with any Muslim Power. You will appreciate, however, that it is impossible to give a guarantee in terms so wide as those of your letter, which would have the effect of limiting India's right to use its own arm in its own defence in circumstances which cannot now be foreseen; in the present situation, however, as you are aware, every precaution has been taken by His Majesty's Government at the instance of the Government of India to ensure that Muslim feeling in India on this matter is fully respected.

During all these months the relationship between the two major communities worsened steadily and many a communal riot occurred in the country. By far the most serious of these was the holocaust in Sind where a dispute over a civil claim that a certain building in Sukkur was at one time a mosque and should therefore be restored to the Muslim community developed into a wide-spread riot. Almost for the first time the virus spread to the rural areas.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Another development in the Muslim community worthy of notice is the growth of a militant spirit among a wide section of Muslims. An example of this was the organisation known as "Khaksars." True, it had been in existence for years past, but it was not until 1939-40 that its activities became felt. It is a semi-military organisation whose membership is variously estimated between 200,000 to 400,000. Armed with a spade, the Khaksars are brought up under an iron discipline and give implicit obedience to orders from the higher command, involving, in some case of breach, public flogging. In the middle of 1939 they were a source of trouble to the Government of the Punjab and more especially of the U.P. In the early summer of 1940 they came into violent conflict with the guardians of peace and order in the Punjab and an armed conflict ensued leading to firing by the police and number of casualties. Partly as the result of official action and partly, it is presumed, through the good offices of Muslim leaders, the movement quietened down in 1940.

Lahore Sessions.—To return to the Muslim League. As already stated the idea of Muslims being a nation gathered during 1939-40 in which period a number of schemes for the formation of a Muslim *bloc* of autonomous states were mooted. For a time they were not regarded seriously; but from the proceedings of the annual session of the League held in April 1940 it became that the Muslim League was serious about this partition business. At Lahore, the Muslim community, as represented by the Muslim League, declared for Muslim independence.

The principal resolution of the session, which was carried unanimously, reiterated that "the scheme of federation embodied in the Government of India Act, 1935, is totally unsuited to and unworkable in the peculiar conditions of this country and is altogether unacceptable to Muslim India."

It further recorded its emphatic view that "while the declaration dated the 18th of October 1939, made by the Viceroy on behalf of His Majesty's Government is reassuring, insofar as it declares that the policy and plan on which the Government of India Act, 1935, is based will be reconsidered in consultation with the various parties interests and communities in India, Muslim India will not be satisfied unless the whole constitutional plan is reconsidered *de novo* and that no revised plan would be acceptable to the Muslims unless it is framed with their approval and consent."

"It is the considered view of this session of the All-India Muslim League that no constitutional plan would be workable in this country or acceptable to the Muslims unless it is designed on the following basic principle, *viz.*, that geographically contiguous units are demarcated into regions which should be so constituted with such territorial readjustments as may be necessary that the areas in which the Muslims are numerically in a majority, as in the north-western and eastern zones of India, should be grouped to constitute independent states in which the constituent unit shall be autonomous and sovereign."

"Adequate, effective and mandatory safeguards should be specifically provided in the constitution for minorities in the units and in the regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them."

This created a stir in the country, among nationalists and Hindus alike and also among some Muslims. True the novelty of the thing caught the Muslim imagination but even among Muslims there were many who questioned the wisdom of the step suggested in the Lahore resolution. Apart from destroying Indian unity which had been built up after years of strenuous effort, it was argued by many, the Lahore scheme would place the Muslim minorities in Hindu provinces in a very unenviable position.

As for the British Government, Lord Zetland, speaking in Parliament in April 1940, refused to countenance the partition proposal although he was inclined to sympathise with the motives underlying the League demand.

British Assurances.—Lord Zetland was succeeded by Mr. Amery as the Secretary of State for India in May 1940. The latter, in his numerous public utterances upheld the basic principle of British policy in India, namely, to ensure that in any constitutional readjustment the interests of the minorities were effectively safeguarded. All his utterances were characterized by a marked desire to assure the Muslims that they would not be sacrificed to the majority community or that their interests would not be neglected. Although he nowhere committed himself categorically on the question of the Muslim League demand for the partition of the country, his remarks were interpreted in India as being more or less in approval of the Muslim League's claim that no re-organisation of the Indian Government, at the centre or in the Provinces, or any future reconstruction of the framework of the Indian constitution, should be undertaken without the consent of the Muslim League. More about this presently.

In India itself the evolution of Muslim League thought in 1940-41 followed the lines laid down in April 1940 when the Pakistan resolution was adopted at Lahore. Percentages and weightages, proportion of representation and share in services, guarantees and safeguards—notions which had held the political field for decades—were clean swept aside. Mr. Jinnah was not thinking in terms of these trifles, outworn gadgets of a democracy which were unsuitable to an oriental people and totally inapplicable to the peculiar conditions of India. All these devices presupposed the continuance of Muslims as members of a State, more or less secured and safeguarded, enjoying greater or less share of power, but scarcely likely as a community ever to occupy a dominant position. Mr. Jinnah refused to think of an arrangement which would not give the Muslims equal power and authority with the majority community. He would not be party to making the Muslims subordinate to the Hindus. Being a numerical minority they as a community would perforce be the junior partner in any composite State.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

As in a composite State the Muslims could not in the nature of democracy expect to be reckoned as equals with the majority community, much less as the dominant force, Mr. Jinnah went away from the idea of a composite State and proposed that India should be divided into two spheres. Muslim and Hindu. Each was to be autonomous internally and for purposes of a Central Government with minimum powers the two should collaborate as equals.

The Pakistan ideal began to exercise the Muslim mind. It provided the League and Mr. Jinnah with a new plank, gave the Muslim community a new goal, a new vista free from what was described as "the danger of Hindu Raj." Every development affecting the future of India in any way was viewed against the background of Pakistan; how will more power for the future Indian State affect the Muslims? Therefore the League claimed the right to approve or reject every proposal calculated to affect the country and its population. The threat was put forth that "any move by the Congress to widen political power in India without the League's approval will meet with the League's resistance."

Muslims and the War.—When the war took a turn for the worse in the summer of 1940, Mr. Jinnah in a statement explained that, without prejudice to the adjustment of the larger issues at a later date, the Muslims were willing to help the authorities in the successful conduct of the war. "It is up to the British Government to show trust in Muslim leadership and as confident friends seek our whole-hearted support. We shall not fail them."

Shortly after the entry of Italy into the war, the Working Committee of the League met in Bombay and expressed its alarm at the growing menace of Nazi aggression and the unprovoked declaration of war by the Italian Government on the Allies. While urging Indians to prepare themselves for the defence of their country, the committee considered that a satisfactory basis of co-operation between the Central Government and the Muslim League and other parties had essentially to be reached. It was pointed out that, in view of the grave danger facing the country, real purpose would not be served by Muslims merely joining provincial and district war committees. With a view to seeking clarification on the possibility of devising prompt and effective measures for the intensification of war efforts, the President of the League, Mr. M. A. Jinnah, has been authorised to enter into communication with the Viceroy.

This attitude towards War Committees was strongly dissented from by a number of members of the Working Committee of the League, including the Prime Ministers of Bengal and the Punjab, who refused to be parties to any act of commission or omission which would detract from Muslim India's active participation in the country's war effort.

Mr. Jinnah saw the Viceroy as directed by the League Working Committee, and had a long talk with him. The outcome of these conversations will be better discussed as part of his correspondence with the Viceroy which will be referred to later.

Meanwhile, the Congress Executive had met at Delhi and passed a resolution demanding the formation of a "National Government" at the Centre, responsible to the Central Legislature. This was however, opposed by Mr. Jinnah who argued that the National Government would mean but a Congress Raj. He declared that the Muslim League was firmly convinced that the only solution was a division of India as laid down by the League at Lahore. "The word 'national' has been flagrantly abused. If the 'National Government' demand is met, it will mean a Hindu majority—a permanent Hindu majority Government—a position which will never be accepted by the Muslims."

Maulana Abdul Kalam Azad, on behalf of the Congress, explained to Mr. Jinnah in a telegram that the Congress demand for a National Government meant a composite Cabinet, not limited to any single party. The Maulana enquired whether it was the position of the League that it would not agree to any provisional arrangement not based on the two-nations scheme. To this Mr. Jinnah replied :—"I refuse to discuss with you by correspondence or otherwise, as you have completely forfeited the confidence of Muslim India."

After protracted negotiations for an internal settlement and repeated attempts by the representative of the British Government to bring the parties together, His Excellency the Viceroy made a statement in August 1940 outlining a scheme for the expansion of the Central Executive Council and the establishment of an Advisory Council for the conduct of the war. (For details see chapter on the Indian National Congress). The Viceroy's scheme, which has since come to be known as the August Offer, was welcomed by the Working Committee of the Muslim League as constituting a considerable advance towards the point of view of the Muslims. This was, however, seriously detracted from by the mention of a number of features of the Viceroy's pronouncement as being unacceptable. While expressing satisfaction at the fact that His Majesty's Government had on the whole practically met the demands of the Muslim League for a clear assurance to the effect that no future constitution, interim or final, should be adopted by the British Government without its approval and consent, the League Working Committee challenged the reference made by the Viceroy to the theory of unity of national life "which does not exist." The Committee affirmed that the partition of India and the creation of independent states in the north-western and eastern zones of India where Muslims are in a majority was the only solution of the complex problem of India's future constitution. In this sense, the August Offer was welcomed as constituting a considerable advance towards the Muslim point of view, but the Committee mentioned a series of reservations in respect of which Mr. Jinnah was asked to seek clarification from the Viceroy. For instance, the Committee complained that it had not been consulted on the number of new members to be added to the Central Executive Council, and the manner in which the Executive Council would be reconstituted, on the allotment of portfolios and on the ratio of representation of the different interests in the country.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

A resolution was also passed lifting the ban and explaining that it had not been introduced as a policy of non-co-operation with Government but was intended to urge upon Government a line of action and policy which they should adopt to secure more effective co-operation in the prosecution of the war. At the same time, the Working Committee appointed a committee to examine cases in which members of the League had acted in contravention of the ban and to take disciplinary action against them.

Viceroy-Jinnah Correspondence.—And now for the correspondence between His Excellency the Viceroy and Mr. Jinnah which ran over a long period between February and September 1940. From this correspondence it transpires that in June 1940 Mr. Jinnah discussed the following points with His Excellency the Viceroy :—

"That no pronouncement or statement should be made by His Majesty's Government which would, in any way, militate against the basic and fundamental principles laid down by the Lahore resolution of division of India and creating Muslim States in the North-west and Eastern zones; and it may be stated that that ideal now has become the universal faith of Muslim India.

"That His Majesty's Government must give definite and categorical assurance to the Mussalmans of India that no interim or final scheme of constitution would be adopted by the British Government without the previous approval of Muslim India.

"In view of the rapid developments in Europe and grave danger that is facing India, it is fully realised that everything should be done that is possible to intensify war efforts and mobilise all the resources of India for her defence for the purpose of maintaining internal security, peace and tranquillity, and to ward off external aggression. But this can only be achieved provided the British Government are ready and willing to associate the Muslim leadership as equal partners in the Government both at the Centre and in all the provinces. In other words, Muslim India leadership must be fully trusted as equals and have equal share in the authority and control of the Governments, Central and Provincial.

"Provisionally and during the period of the war the following steps should be taken to comply with the formula, namely, co-operation with the Government with equal share in the authority of the Government.

"(A) That the Executive Council of the Viceroy should be enlarged within the framework of the present constitutional existing law, the additional number to be settled by further discussions, but it being understood that the Muslim representation must be equal to that of the Hindus if the Congress comes in, otherwise they should have the majority of the additional members, as it is obvious that the main burden and the responsibility will be borne by the Mussalmans in that case.

"(B) In the provinces where Section 93 has to operate, non-official advisers should be appointed, the number to be fixed after further discussion, and the majority of the non-official advisers should be the representatives of Mussalmans; and where the provinces can be run by combination of parties or 'coalition,' naturally it would be for the parties concerned to adjust matters by agreement among themselves.

"(C) There should be a War Council consisting of not less than fifteen members, including the President, to be presided over by His Excellency the Viceroy. I don't like the expression "War Consultative Committee." This Council should regularly meet to deal with, and review, the general situation as it may develop from time to time, and advise the Government with regard to matters in connection with the prosecution of the war generally, and in particular, the fullest development of the defence possible, and finance, and to make a thorough economic and industrial drive. In this body it will not be difficult to secure the representation and full co-operation of the Indian Princes, and as far as I can judge, they would have no difficulty in joining it. It is through this body that the association of the Princes can be secured. Here again, the representation of Muslim India must be equal to that of the Hindus if the Congress comes in otherwise they should have the majority.

"Finally, the representatives of the Mussalmans on the proposed War Council and the Executive Council of the Governor-General, and the additional non-official advisers of the Governors, should be chosen by the Muslim League.

To the foregoing the Viceroy sent a reply in July removing certain misunderstandings.

His Excellency said :

"As regards the expansion of my Executive Council, this would, as you rightly observe in your memorandum, be within the existing constitutional scheme. In other words, any Council so expanded would co-operate as a whole and as a single Government of India. It is not a case of striking a balance between the different interests or of preserving the proportions between the important parties. As you yourself indicated in the course of our conversation, there are parties other than either Congress or the Muslim League who may fairly claim to be considered for inclusion, and there is a very definite limit of numbers to any possible expansion.

"At the same time I readily accept the importance, in the event of any expansion, of securing adequate representation of Muslim interests, and that is a point which I would bear in mind. There is, however, as you will see from my explanation, no question of responsibility falling in greater or less degree on any particular section. Responsibility will be that of the Governor-General-in-Council as a whole. Again, it will be clear that under the existing law and practice it must remain with the Secretary of State, in consultation with the Governor-General, to decide upon such names as we may submit to His Majesty the King for inclusion in the Governor-General's Executive Council, and such persons cannot be the nominees of political parties, however important; though it

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

may, of course, be assumed that both the Secretary of State and the Governor-General would, in all cases, do their utmost to select persons from the various sections of the community.

"I need not remind you that under law the whole responsibility for Government in section 93 provinces vests exclusively in the Governor, although a Governor can, of course, take advantage of the assistance of any advisers he may appoint. Whether, and if so at what point and in what strength, non-official advisers from political parties should be appointed in provinces under section 93 administration, in the event of an expansion of the Governor-General's Council, would clearly call for consideration in the light of circumstances of each province. You will, I think, agree with me also that the importance of the community from which advisers are drawn in a particular province has a direct bearing.

"Your idea for a War Council is, in my view, well worth while considering, though details would have to be worked out. Here again there are, of course, many parties to be considered other than the Muslim League or Congress.

"It would be constitutionally impossible for the choice of Muslim gentlemen to be appointed to any expanded Executive Council or as non-official advisers to rest with the Muslim League. But in the contingency envisaged you need not fear that any suggestions you may put forward would not receive full consideration.

In a letter, written a few days after the publication of the August Offer the Viceroy told Mr. Jinnah that" the total strength of the Council will be likely to be in the neighbourhood of 11. If, as I trust, the Muslim League are prepared to accept my invitation. I would like you to let me have a panel of names, say four with a view to my selecting two from it for appointment to my Council. It is clearly impossible until the discussions on which I am at present engaged are complete to indicate precisely what would be the parties represented in the expanded Council. The strength and composition of the War Advisory Council can clearly only be fixed after the expansion of the Executive Council is complete. Here, too, I should be grateful if you would be good enough to let me have a panel of names for my consideration on the assumption that there would probably be, say, five Muslim League representatives out of a total of something in the neighbourhood of 20."

In response to the demand for clarification made in the resolution of the League Working Committee in the first week of September (mentioned earlier in this chapter) the Viceroy explained "the constitutional reasons which make it essential that the choice of members of the Governor-General's Executive Council must rest exclusively with the Governor-General and the Secretary of State, with whom it must rest to tender advice in this matter to His Majesty."

His Excellency added, "I appreciate however, the difficulties which, you made it clear to me confronted you in connection with the formation of the panel which I had earlier suggested to you, and in the light of our discussion I am content that the selection of representatives, while resting with the Governor-General, should be based, in the case of the Muslim League (and, should they so desire, of the other parties to be represented in my Council) not on a panel formally submitted but on confidential discussion between the leader of the party concerned and myself.

"I have also indicated the impracticability of a final decision as to the total strength of the expanded Council or as to the allocation of portfolios (a matter which must, of course, rest entirely with the Governor-General) until the replies of all those who may be invited to serve have been received. But I have made clear to you (as I have also to the leaders of the other parties whom I have recently seen) my attitude on both those issues."

In other words, it became clear from this correspondence that the Viceroy refused to concede the League claim that "in the event of any other party deciding later on to be associated with your Executive Council to assist in the prosecution of the war it should be allowed to do so on terms that may be approvebed of, and consented to, by the Muslim League Party, as we were entering into, so to say, a 'war contract'."

August Offer Rejected.—Immediately following this, the Council of the Muslim League met in Delhi under the presidency of Mr. Jinnah who contended that "the British Government appear to have no intention to part with power. In making the present offer they were trifling with ninety millions of Muslims, who are a nation. The long drawn out negotiations which the Viceroy has been carrying on with the various parties lead to only one conclusion, namely, that the British still wish to continue the relationship of master and servant. We will not submit to this position."

Proceeding, Mr. Jinnah said: "The Viceroy's offer, when boiled down, comes to this: that two seats on the Governor-General's Executive Council will be allotted to the nominees of the Muslim League out of a number we don't know yet. In his first letter to me, the Viceroy had indicated that the number of members on the expanded Executive Council would be in the neighbourhood of eleven. The word 'neighbourhood' by itself was an elastic one. In the latest letter to me, the Viceroy says that the number is not yet determined and even the elastic term 'neighbourhood' has disappeared.

"Then again we do not know who are the other parties who have been invited to send in their nominees for inclusion in the Viceroy's Council. If we wanted jobs for two of our men we could have straightaway nominated our representatives. It would have been very happy. But would it have been a real share in power even at the Centre? No! The offer is a travesty of giving us a real share in authority. Therefore, even if we knew what other parties were coming in, there was another very vital question requiring solution. Supposing some party which kept itself out for the present subsequently decided to come in—and we would

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

be happy if they did so—it was then probable that the personnel of the Executive Council may further be increased, and if the Executive be reshuffled, what would then be the position of the Muslim League ?

"I referred this matter to the Viceroy in my last interview with him on September 24. I then urged that in the event of any party now refusing co-operation subsequently coming in it should only be allowed to do so in agreement with the parties already represented on the Council. I had no satisfactory reply from the Viceroy."

Mr. Jinnah added that the position of the Muslim League considerably differed from those of the other parties. In its case the question of non-co-operation did not arise for the present. It was essential for them to give all support for intensifying the war effort in the defence of India. It was in their interests. But while they had the desire to help, there were certain fundamental requisites, which required fulfilment in order to secure wholehearted co-operation.

Mr. Jinnah referred to the demand of the League that the constitution of 1935, should be examined *de novo*, and said that that demand had practically been met by the British Government, as was evident from the statements of the Viceroy and of Mr. Amery. That, however, was a matter for the future.

In the immediate present the Muslims of India were prepared to shed the last drop of their blood and part with their last penny to assist Great Britain in the present war. In short they were prepared to sink or swim with Great Britain. It was, however, a war contract, without prejudice to the future problems of Indian constitution and to the major and fundamental issues.

The League Council then adopted a resolution which stated that notwithstanding their desire from the very beginning to help in the prosecution of the war and the defence of India, regret that they are unable to accept the present offer for the following reasons :—

1. That the inclusion of only two representatives of the Muslim League in the proposed expansion of the Governor-General's Executive Council, of which neither the total strength nor the number of additional members has so far been definitely determined, does not give any real and substantial share in the authority of the Government at the Centre.

2. That no indication has been given as to what would be the position of the Muslim League representation in the event of any other party deciding, at a later stage, to assist in the prosecution of the war, and the Government agreeing to associate it with the Executive Council which may involve a substantial modification and re-shuffling of the executive.

3. That so far the Government do not propose to appoint non-official advisers in those provinces which are being administered by the Governors under section 93 of the Government of India Act, 1935. As the Committee feel that without the association of the Muslim League representatives in the administration of those provinces, it will not be possible to secure the real and effective co-operation of the Muslims.

4. That the proposed War Advisory Council is yet in embryo and no information is available as to its constitution, composition and functions, except that it will probably consist of about 20 members, and that the question of setting it up will be considered after the expansion of the Executive Council is complete.

5. That out of the various points raised in the resolution of the Committee passed on September 2, only one relating to panel has been satisfactorily met.

This was practically the last occasion when the League as an organisation expressed its opinion on the proposals for a reconstruction of the Central Government—barring, of course, Mr. Jinnah's address to the annual session of the League which met in Madras in the middle of April 1941, to which reference will be made later.

Between October 1940 and April 1941, the League leaders confined themselves to the propagation of the Pakistan ideal. Meanwhile, the Congress, which had offered to co-operate with the British Government in the war on condition that a National Government was set up at the Centre, withdrew the offer and took to civil disobedience under the guidance of Mr. Gandhi. This action of the Congress was criticised by the League leaders as an attempt to establish a Hindu Raj in India and to dominate over the Muslims and all other minorities. As for the war, Mr. Jinnah outlined the League attitude in the following terms: "We want Britain to win this war. There is no question of our changing our masters. We want to take our freedom from Great Britain. For that reason we from the beginning did not place any obstacles in the way of Great Britain. In spite of the fact that Pakistan is our sheet anchor, we did not demand it as a condition precedent to our whole-hearted support to the British Government. We promise to give a great deal in men, money and materials, in fact, the whole-hearted support of the 90 million Muslims. I am prepared to bring to the common pool all this, but I must have an equal, but really effective, share in power."

Such was Mr. Jinnah's distrust and hostility towards the Congress that he took Mr. Fazlul Huq severely to task for suggesting that the former should make an offer to negotiate peace with the Congress. Mr. Jinnah affirmed that the Congress was responsible for the deadlock and added: "when the other party has declared war and is holding a pistol at your head what do you propose that I should do? What do you think is the aim and object of the Congress in launching civil disobedience? Is it not obvious that they want to bend the British Government to surrender or yield to their demands? At whose cost? Over our head and at our cost." Mr. Huq protested: "My only desire has been for peace, because I feel that unless there is unity among all communities on the principles of give and take there will be no constitutional advance and no prospect of a better India than we know at the present

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

moment. The present Government of India Act is absolutely rubbish. It gives us responsibility but no power; it gives all the power to the Governor and the Governor-General-in-Council, but all the responsibilities to the Ministers."

British Statesmen's Assurances.—Let us now take a review of the various statements made by spokesmen of the British Government in regard to the future of India with particular reference to the Muslim community. Shortly after he took charge of the India Office, following the reconstruction of the British Cabinet under Mr. Churchill, Mr. Amery declared that the attainment by India of free and equal partnership in the British Commonwealth was the goal of his Government's policy. "We recognise," he added, "that it is for Indians themselves to play a vital part in devising a form of constitution best adapted to India's conditions and India's outlook. The promise already given that the present scheme of the Act of 1935 and the policy and plans on which it is based are to be open to re-examination at the end of the war necessarily implies discussion and negotiation and not dictation."

A month later, Mr. Amery announced Britain's "sincere desire that India should as a willing partner attain the same status in the British Commonwealth as is enjoyed by the Dominions or, for that matter, by ourselves."

Then, again, in September, Mr. Amery said: "India's internal structure is complex and difficult, and no plausible formula but only patience and genuine willingness to compromise can find a solution. The differences are real, but I refuse to regard them as unbridgeable. "It would be wrong," he added, "if the British Government ignored the differences in India and, forgetting the responsibilities which the course of history has imposed upon it in India, light-heartedly accepted some constitutional solution which would inevitably be rejected by large and important elements in India's national life and only lead to confusion and chaos."

The problem of finding an Indian constitution which can reconcile Indian differences and preserve India united in essentials was again referred to by Mr. Amery in November 1940. Mr. Amery said: "May be the fears of the Muslims might be largely met by a further increase in the powers of the provinces possibly rearranged and regrouped, subject only to a minimum central control necessary to secure some measure of unity in foreign, defensive and economic policy. A change in that direction would no doubt also largely meet the hesitations of the Princes. It would still, of course, involve some central executive, some central legislature empowered to vote and levy the necessary expense.

"May be some other form of representation, for example, functional representation such as has already been tentatively established in some Indian States, might greatly help to get over the communal difficulty.

"Lastly, may be that our whole conception of parliamentary executive, is, for the Central Government of India at any rate, less suited than an executive more on the American lines, that is, independent of the legislature for the term of its office, whether directly elected or nominated by the provinces and States and with a definite proportion allocated to different main elements.

"India First."—"It is, I believe, for Indians themselves to face these questions and seek a constructive solution. May be the lead in such a study will come not so much from the older party leaders but from younger men, who are inspired with a patriotism which puts India first—first not only before subservience to Britain but also before subservience to party or community."

This slogan of "India First" was again uttered by Mr. Amery in December 1940 when he said: "There must be many of every party and every community in India, younger men with ideals and yet wide-eyed for reality, who should be able to find a way out of the deadlock between contending Indian claims which cannot serve either India or the common cause in the present conflict."

Commending the slogan "India first," he said: "By India I mean India as a whole; India as nature and history have shaped her; India with her infinite diversity and underlying unity; India as she is today and as we wish her to be in the years to come.....Hinduism and Islam in very varying proportions are coterminous over the whole sub-continent .....History has created in India, in spite of infinite variations in detail, variations everywhere shading insensibly into one another, her own distinctive human type and in a large measure her own distinctive way of life.....Once broken up into separate and independent entities, India would relapse, as it did in the decline of the Moghul Empire, into a welter of contending powers in which free institutions would inevitably be suppressed and in which no one element would have the resources with which to defend itself against external attack, whether by land or by sea."

Putting himself in the place of a Hindu he would ask himself: "Must I not win over to my conception of India's future my Muslim neighbour who is as essentially and necessarily a part of India as I am? Should my preference for a democratic system on the simple majority basis stand in the way of some compromise which would enable him to feel that his community will as surely enjoy in the future India as real a freedom and as full a development of its individual, communal and cultural entity as my own?"

Putting himself in the place of a Muslim, he would ask himself: "Bound as I am to assert the right of my own community to be recognised as a permanent element in India's national life and not as a mere numerical minority, am I entitled to put that claim to the point of imposing a veto on all political progress, except at the cost of a complete break-up of the Indian unity which would be equally disastrous to us both?"

This speech gave rise to a strong dissent from the Muslim League Council which in February 1941 passed a resolution disapproving of Mr. Amery's pronouncements which are "likely to create grave apprehensions in the minds of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the Mussalmans, as they give an impression that His Majesty's Government are still contemplating the possibility of a constitution based on the economic and political unity of India." The Working Committee added, "It is unfortunate that Mr. Amery should have allowed himself to indulge in slogans such as 'India first'."

The protest had almost immediate effect; for, speaking the next day from the British Broadcasting Corporation, Mr. Amery referred to "the pretensions of the Congress party not only to immediate and unconditional independence, but in the name of democracy to override the claim of other important elements in India's complex national life." He also referred to "the great Muslim community of 90 millions in India and to the Indian States with their long and different history." It was to meet that situation, he said, that His Majesty's Government had made it clear that they were prepared to give effect at the earliest possible moment after the war to a new constitution in consonance with Indian conceptions, but added that it must be a constitution based on agreement between the main elements in India's national life.

The meeting of the Council of the Muslim League, referred to above, also condemned the Congress civil disobedience movement as being "designed to bring pressure on the British Government to resile from the position they have taken in regard to the future constitution of India relating to the Muslims and other minorities and to concede the Congress demands that are fundamentally opposed by Muslim India.....If any concession to the Congress is made which adversely affects or militates against Muslim demands, it will be resisted by the Muslim League with all the power it can command. The Muslim League desires to place it on record that, if the situation demands, it would not hesitate to intervene and play such part in the struggle as may be necessary for the protection of the rights and interests of the Mussalmans in this country."

Throughout the year under review, Mr. Jinnah and other Muslim League leaders made numerous speeches advocating the two-nations theory.

Sir Sikander Hyat Khan, Premier of the Punjab and one of the foremost Muslim leaders, was never forthright in his demand for Pakistan. As late as March 1941 he urged that fresh efforts should be made to bring about communal unity and referred to "several grotesque schemes proposing the division of India by race or religion." He added, however, that the claim propounded by the League at Lahore should have been dispassionately considered rather than branded as a "Pakistan stunt."

The bitter controversy which was raging in the country over the issue of Pakistan was somewhat relieved by a statement made by Mr. Jinnah on the floor of the Assembly during the Budget session of 1941. Mr. Jinnah said: "We divide the problem of India into two parts—the present and the future. As far as the future is concerned, we say that when the time comes to change the whole constitution we shall then discuss the various schemes. We believe in Pakistan. As far as the present is concerned our position is that we are willing, only for the prosecution of the war successfully, to co-operate in forming a Government within the framework of this constitution. Our present quarrel with Government is that the Muslim League is not given a real and substantial share in the Government, both at the Centre and in the Provinces." The hopes built upon this statement proved, however, to be short-lived.

1941 SESSION.

The annual session of the League was held in Madras amidst scenes of great enthusiasm in the middle of April 1941. Mr. Jinnah, who presided, urged the British Government to give up their policy of appeasement towards those who were bent upon frustrating the war efforts and to get on with those who wanted to get on with them.

Mr. Jinnah spoke for two hours dealing with what the League had already achieved, the present situation and the task ahead of the League. He said that Muslim India during the past five years had rapidly become well organised and politically conscious and its activities were being watched throughout the world. He declared that the League's goal was Pakistan as had been stated several times since the last Lahore Conference.

Referring to the political deadlock, Mr. Jinnah said that the Congress and other parties were responsible for it and criticised the British Government's policy for trying to appease them. The Muslim League did not want to embarrass the British Government when it was engaged in a life and death struggle, he said. That was why it agreed to the postponement of the constitutional question for consideration *de novo* after the war. They had not asked for Pakistan here and now. The Government must realise this and be grateful to the League.

Mr. Jinnah remarked that the foundation of the revival of the Muslim League was laid in April 1936 and during the preceding five years it had made tremendous progress. "Since the fall of the Moghul Empire," he said, "I think Muslim India was never so well organised and so alive and so politically conscious as now." He exhorted the delegates to devise another five-year programme, laying particular emphasis on the educational, economical and social upliftment of Muslim India. He remarked with gratification that the Muslim League had made the community politically conscious, raised them in their own mind, in their own ideals, and enhanced their self-respect, self-reliance, dignity and honour as a nation. He wanted them, however, to be trained and disciplined and desired that the average man should be trained as a political soldier.

Outlining the policy of the Muslim League, he said: "The goal of the All-India Muslim League is that we want to establish a completely independent State in the north-west and eastern zones of India with full control finally on defence, foreign affairs, communications, customs, currency, exchange, etc. We do not want under any circumstances a constitution of an All-India character with one Government at the Centre. We will never agree to

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

that. If you once agree to it, let me tell you that the Muslims would be absolutely wiped out of existence. We shall never be a feudatory of any power or of any Government at the Centre so far as our free national homelands are concerned. Muslim India will never submit to an All-India constitution and one Central Government. The ideology of the League is based on the fundamental principle that the Muslims of India are an independent nationality and that any attempt to get them to merge their national and political identity and ideology will be resisted. The policy of the League is to endeavour to promote goodwill and harmony among other peoples on the basis of equality, fair-play and reciprocity. This can best be secured by agreement with other peoples and parties and states with the object of achieving collective security and orderly development of the people living in different states as well as among the different free states as members of a comity respecting each, the other's rights."

Emphasising the unsuitability of democracy to India, Mr. Jinnah said: "Majority rule in a single nation, in a single society is understandable. Representative government in a single nation, harmonious and homogeneous, is understandable. But you have only to apply your minds for a few minutes to see if such a system can even work or succeed when you have two different nations, more than two different nations, in this sub-continent, when you have totally two different socieities. "He also referred to Dravidistan in South India and said that they were fully agreeable to the establishment of Dravidistan.

Surveying the present political situation, he recorded with gratification that the British Government had not only suspended the federal scheme embodied in the Government of India Act of 1935 but had subsequently declared that the whole problem of India's future constitution would be considered *de novo*. He denied that he was out to secure for himself or for the League the right to veto India's constitutional progress and explained that all that he demanded was that no constitutional change, interim or final, should be made without the approval or consent of the Muslims of India. "It is not that I have a veto in the ordinary constitutional sense of the word but it means that in the framing of a constitution for India, Muslim India must be a constituent factor. It is but bare justice that the Muslims should be recognised as a constituent factor."

Referring to his recent statement in the Assembly that he was not interested in the immediate establishment of Pakistan and that he was willing to consider any interim adjustment during war time, he regretted that it had been misinterpreted to mean that he was prepared to shelve Pakistan. Such a reading, he said, was wishful thinking. If the Muslim League did not demand Pakistan here and now, it was because it did not want to embarrass the British Government when the latter was undergoing a life and death struggle. Instead of being grateful to the Muslims for their attitude, the British Government, he was sorry to find, were pursuing a policy of inaction, weakness and vacillation, which, he said, would prove "more disastrous than it has proved in Europe." He cited the instance of Croatia, which had been recognised as an independent province only a couple of days earlier, and asked the British Government to do the same in respect of India. "Are you going to allow somebody else to come here and do the job for you? Or are you going to do the job yourself?"

Mr. Jinnah next discussed the attitude of the Congress and asked whether Mr. Gandhi's satyagraha movement was merely to secure liberty of speech? "Don't you think," he continued, "this is nothing but a weapon to coerce the British, who are now in a tight corner, to surrender and to concede the Congress demands?"

Referring to the Congress demand of National Government, Mr. Jinnah said that "Indians believe that Mr. Gandhi was not a party to the strategy that was designed at Poona. The Congress were willing to throw overboard their general, Mr. Gandhi, provided the British Government made a declaration of immediate independence and freedom of India unconditionally, and the future constitution to be framed after the war, the provisional constitution being national government at the Centre responsible to the legislature. This is the Poona resolution, and Mr. Gandhi was, of course, thrown overboard (Laughter). And *ahimsa* which is the creed of the Congress, was also buried in the city of Poona, because the Congress was there to help the British Government in the prosecution of war. What was *haram* at Wardha became *halal* (permissible) at Poona. They found that this would not wash either."

If there was any political wisdom or statesmanship still left in the Congress leadership, he said, then the Congress should apply its mind to the Pakistan scheme honestly and without prejudice.

So far as the Hindu Mahasabha was concerned, it was an absolutely incorrigible and hopeless organisation. An example of their statesmanship, Mr. Savarkar, President of the Hindu Mahasabha, had sent a message to the Sikh Conference at Karachi in which he urged the Sikhs to establish *Sikhistan* in the Punjab. He not only talked of Hindudom and the Hindu nation and Hindu *raj*, but he also urges the Sikhs to establish *Sikhistan*.

Mr. Jinnah next referred to what Pandit Jawaharlal Nehru's paper had written on March 30. The paper said:—"On two things there shall be no compromise. There shall be never any division of India to suit the ambitions of fanatics. It shall always be *Akhand Bharat* and *Vishal Bharat*. It shall be democracy," meaning said Mr. Jinnah, majority rule.

Mr. Jinnah said that these were only samples to show how the Congress and the Hindu Mahasabha leaders thought. When the Muslims talked about Pakistan they were called fanatics, but when the Congress and Hindus talked about Hindudom and Hindu *raj* for the whole of India they were liberals and nationalists. The only pity was that the Hindu public was being deceived by this kind of leadership. So long as they followed that leadership they could not escape from their responsibilities and the consequences which would follow.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Mr. Jinnah ridiculed the move of the Bombay Conference and said that it was like the Dutch Army, all Generals and no privates. He added: "The Bombay proposals are nothing less than another name, another flank movement and a second edition of the Poona proposals for a national Government. If you read the memorandum there can be no doubt left. Sir Tej Bahadur Sapru is entirely on the wrong line and I am sorry that he has been caught in this trap by the wire-pullers of other organisations behind this movement."

Change of Creed.—The most important resolution of the Madras session was that which changed the creed of the League.

Clause (A) of the Article which was sought to be amended runs as follows:—"The aims and objects of the All-India Muslim League shall be (*a*) the establishment of full independence in the form of a federation of free democratic States in which the rights and interests of the Muslims and other minorities are adequately and effectively safeguarded in the constitution."

This was amended so as to read:

The amendment is to substitute in its place the following as passed by the Subjects Committee:

"(1) The establishment of completely independent States formed by demarcating geographically contiguous units into regions which shall be so constituted with such territorial readjustments as may be necessary that the areas in which the Muslims are numerically in a majority as in the north-western and eastern zones of India shall be grouped together to constitute independent States as Muslim free national homelands in which the constituent units shall be autonomous and sovereign:

(2) That adequate, effective and mandatory safeguards shall be specifically provided in the constitution for minorities in the above mentioned units and regions for the protection of their religious, cultural economic, political, administrative and other rights and interests in consultation with them:

(3) That in other parts of India where the Muslims are in a minority, adequate, effective and mandatory safeguards shall be specifically provided in the constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them."

The following resolution was passed on Mr. Gandhi's Civil disobedience campaign:—

"This session of the All-India Muslim League is definitely of the opinion that the present civil disobedience movement started by Mr. Gandhi on behalf of the Congress ostensibly for freedom of speech is really meant to coerce the British Government to concede the Congress demands regarding the future constitution of India, which are really and virtually for a transfer of sovereign powers to the Hindus and thus relegate the Muslim nation of 100,000,000 and the Indian minorities to the status of subjects of the Hindu *raj* throughout the country.

"It therefore draws the attention of the British Government that if constitutional changes either interim or final are made without the approval of the All-India Muslim League, it would be construed as a flagrant breach of faith on the part of the British Government with the Muslims of India and would be contrary to the solemn declarations and promises that have already been made to the Muslims of India by the recent announcements of His Excellency the Viceroy, the Secretary of State for India and His Majesty's Government, ending with the declaration of August 8, 1940 and amplification of it by Mr. Amery on August 14, 1940, and warns the British Government that if any attempt is made to depart from or modify in any way the above mentioned declaration and pledges, the Muslims of India would be forced to resist every measure and method with all the power that they can command."

Another resolution urged Government not to postpone the coming elections to the provincial legislatures, "at least in the provinces where provincial autonomy is already working under the Government of India Act, 1935, and also in the North-West Frontier Province, where it can confidently be stated that a stable Government will be formed."

A Committee was set up to chalk out a five-year plan for the educational, economic, social and political advancement of the Mussalmans and to submit its report to the Working Committee of the All-India Muslim League within six months.

Another Committee was asked to draft a constitution, rules and regulations for the organisation, management, control and composition of the Muslim National Guards and submit a report within a period of three months to the President of the League for approval.

The League authorised its President, Mr. Jinnah, till the next annual session of the League, to take any necessary action or steps in furtherance of and relating to the objects of the Muslim League as he may deem proper, provided they are consistent with the goal and policy of the League or any resolution expressly passed by the sessions of the All-India Muslim League.

Government of India Act, 1935.

The seeds of the Government of India Act, which was placed on the Statute Book in 1935, were sown as far back as the autumn of 1930 when the Indian Round Table Conference met in London for the first time. Three sessions of the conference were held, and it concluded on December 24, 1932. Some months later the British Government published their proposals for the reform of the Indian constitution based on the largest measure of agreement reached at the three sessions of the Round Table Conference. These proposals were embodied in a White Paper (March 1933) which was referred to a Committee of the two Houses of Parliament. The Committee submitted its report in October 1934. Based on the recommendations of this Committee, the Government of India Bill was presented to Parliament in January, 1935. The Bill has since become law with a few changes in its passage through Parliament.

Federation.—The Act proposed to set up a Federation with limited responsibility at the Centre, and provide for autonomy to the eleven provinces of composing British India.

Formally inaugurated in April 1937, the provincial part of the new constitution functioned for about two and a half years with a fair amount of smoothness, but at the end of that period it broke down in seven out of the eleven provinces by the refusal of the party in power to carry on the work of Government. Thereupon the Governors of those provinces assumed sole charge of the Administration aided by Advisers responsible to him. The constitution remained virtually suspended.

The federal part of the constitution could not be inaugurated according to plan owing to diverse factors—the difficulties experienced by the Princes in acceding to Federation except on the fulfilment of certain conditions, the internal, political and communal differences in British India and, above all, by the declaration of war which militated against any major changes in the governmental machinery at the centre.

Suspenion of the Federal idea—The Viceroy openly announced that steps for the enforcement of the federal part of the constitution would remain suspended, although he also expressed the hope that conditions, internal as well as external, would so settle down as to permit of a reconsideration of the position at an early date. Apart from the war situation, which precludes any major undertaking relating to the Indian constitution, the steadily deteriorating internal political controversies have pushed into the background measures for the revival of the Federation envisaged by the Government of India Act. Indeed, present trends indicate that the 1935 Federation is virtually dead. There seems little prospect of a resurrection of the federal ideal of the Round Table Conference. The very principles underlying the structure of the Central Government—and even the Provincial Governments—have been challenged. Widespread and influential demands have been made for an examination *de novo* of the entire constitutional fabric, and the authorities have more or less agreed to those demands. Like everything else in a totalitarian war, the Government of India Act of 1935 is in the melting pot; the federal part of it has been put off, while the provincial part has been suspended in seven out of the eleven provinces. Thus the account hereinbelow relates mainly to the provisions in the statute rather than to what is in vogue. The provincial part is, of course, in operation in the Punjab, Bengal, Assam and Sind.

Amendments to the Act.—While the suspension of the Provincial Constitution (in seven provinces) was the indirect result of the war—the popular Ministries in those provinces having resigned on an issue somewhat connected with the war and rendered the formation of other Ministries in their places impossible owing to the numerical disposition of the party strength—other changes were made in the Act during the past few months as a direct consequence of the war.

One of these changes was effected by an alteration in the King-Emperor's Instrument of Instructions to the Governor-General. By virtue of the change thus effected the Governor-General is freed from the necessity of submitting for the signification of the Crown's pleasure any measure involving certain special responsibilities of the Governor-General. It has been laid down that the Governor-General need not so submit any measure or measures if he is satisfied that conditions created by the present war have rendered it impossible or inexpedient to do so.

Similarly, in order to provide against possible constitutional complications that may arise from an interruption of communications between Great Britain and India, it has been laid down by amendments to the Government of India Act of 1935, passed by Parliament, that the Governor-General should have the power of making appointments to, and removal from, any office in India which under the original Act is exercisable by His Majesty. The amendment also authorises the Governor-General to enact by notifications in the *Gazette of India* provisions which could be made by Orders in Council. There were similar changes made solely with the object of obviating the delay which might occur in consequence of the war in securing prior approval of the authorities in England.

The Federation which the Act, as it stands, provides differs from those in other parts of the world because its units are not homogeneous. The Indian States differ widely from the British India Provinces. These complications react upon the constitution. As Sir Samuel Hoare said in the House of Commons "they react, for instance, upon the provisions as to how the federation is to be formed, for it is obvious that the Princes, being voluntary agents, can only enter of their own volition. They react again upon the kind of executive and the kind of legislature that is proposed, each side of the federation obviously demanding adequate representation both in the government and in the federal legislature. They react again upon the relations between the two Federal Chambers, the Princes from the first attaching the greatest possible importance to the Chambers having equal powers. They react, further, upon the list of federal

Generally the Ministers are entrusted with the administration of their own departments. Under the old constitution they were merely advisers of the Governor. Under the new Constitution they are effective executives. Only in those spheres where the Governor retains as pecial responsibility does he have the right to act independently of the Ministers should he differ from their views. But normally such occasions are not frequent.

Both the Upper and Lower Houses have power to initiate legislation except that Money Bills can be initiated in the Lower House only. Should there be a difference of opinion between the two Houses with regard to a Bill the Governor has power to convene a joint session of the two Houses. Any Bill affirmed by the majority in the joint session shall be taken to have been duly passed.

Governors' Powers.—Under the new Constitution the Governor has almost the same special responsibilities as the Governor-General except the one relating to financial stability and credit. The Governor has, not with standing the advice of his Ministers, power to take whatever action he thinks necessary for the due discharge of his responsibility for preserving the peace tranquillity of the Provinces.

The following tables give the strength and composition of the Federal and Provincial Legislatures under the new constitution:—

THE COUNCIL OF STATE.

Representatives of British India.

Provinces or Community.	Total seats.	General seats.	Seats for scheduled castes.	Sikh seats.	Muslim seats.	Women's seats.

The Indian Legislature.

War continued to overshadow the work of the Indian Legislature and several legislative and taxation measures and fourteen Ordinances by the Viceroy were enacted to promote the war effort. The Central Legislative Assembly, elected normally for 3 years, completed the seventh year of its life on September 30, 1941, and in all probability its life will be extended by another year.

The Central Assembly held 16 sittings during the autumn session of 1940 and 34 sittings during the budget session of 1941; the Council of State held 10 and 16 sittings respectively during the corresponding sessions. The Congress Party which constitutes the main Opposition in the Central Assembly and had resolved to keep away from the sittings of the House since the Simla session of 1939 returned to the Assembly to take part in the discussion of the Emergency Finance Bill and withdrew from the House after voting down the Bill.

On November 20, 1940, His Excellency Lord Linlithgow, the Viceroy, addressed a joint sitting of the two Houses. He announced that because of the lack of representative support he could not, at that stage, proceed with the expansion of his Executive Council or the establishment of the War Advisory Council. He spoke with deep disappointment about the failure to secure within the framework of the constitution that ultimate and essential unity upon which depends the future position and influence of India in time to come and added "But stress of war may well in the end come to strenghten and extend that very process of unification and to hasten the achievement of those constitutional changes implicit in self-government with unity which, at this moment it appears to obstruct." The Viceroy emphasised that "the duty of my Government is clear. It is to press forward with all speed and in every field of activity those preparations upon which rests the capacity of this country to wage war with ever-growing strength successfully to overcome the hazards that confront her". His Excellency mentioned that India's war effort had struck the imagination of the world through magnificent achievement by British India and the Indian States in the provision of men, of money and of material. He spoke of the strengthening of India's defence organisation, of the work of the Supply Department, the Eastern Group Conference and the Roger Mission, of the pressing problems that war conditions have brought to Indian trade and industry and of the efforts to find new markets for India's manufactures.

Governor-General's Ordinances.—The invasion of Norway occurred just after the conclusion of the Budget session of the Central Legislature. In order to meet emergent situation then apprehended the Government of India Act 1935 was amended empowering the Viceroy to make Ordinances which would remain in force for the duration of the war and one year thereafter. The original power restricted the life of such Ordinances to 6 months. Lord Linlithgow enacted 14 Ordinances during the period April to December, 1940.

The object of these Ordinances may be stated briefly. The Payment of Wages Ordinance was enacted to enable an employer with the written consent of the employee to make deduction from wages in respect of subscription to war-savings scheme. The currency situation caused by extensive hoarding of silver coin in the early summer of 1940 was met by the enactment of three Ordinances. These provided for one-rupee currency printed on paper, instead of on silver introduced the device of security-edge rupee and reduced by almost half the silver contents of the rupee, half-rupee and quarter-rupee. All these measures were generally welcomed by the market. An important Ordinance issued on August 24, 1940, made provision for insurance of goods in British India against damages by enemy action. Under the Ordinance persons carrying on business as sellers of goods of certain description are required, compulsorily, to insure goods against war risk on payment of a certain prescribed premium which is kept as low as possible. Those whose stock-in-trade does not amount to Rs.20,000 are exempted from this law. The importance of the Ordinance lies in that for the first time the State has undertaken insurance against damage to goods—a sphere formerly left to private enterprise. No private insurance company is permitted to undertake this kind of insurance but the agency of insurance companies is being utilised by the Government for putting the Ordinance into effect. Indian and British insurance houses have agreed to do this work without remuneration in order to co-operate with Government.

An example of how urgent problems of trade and industry were met by the Viceroy is provided by the Ordinance which authorised government to regulate export of coffee and the sale of coffee in British India. This law was considered necessary to save the industry from collapse due to the loss of foreign markets caused by the war. A Board has been formed to purchase surplus coffee in British India and hold it for disposal at a favourable date. All coffee estates are to be registered and all coffee produced in excess of that specified for internal sale quota is to be delivered to the Board for inclusion in the surplus pool. The Board shall take all practical measures to market the coffee included in the surplus pool and the price realised is to be distributed among coffee-growers. Another Ordinance amended the Tea Control Act and removed certain difficulties in the working of the Act. There was no power to reduce the total allotment of quotas already fixed. Under the Ordinance allotments can now be reduced *pro rata*.

An Ordinance amending the Indian Arms Act enables the Commander-in-Chief in India to transfer from one Corps to another Corps officers and men who were under obligation to serve in a particular Corps only. An Ordinance relating to technical personnel authorised various tribunals to compel an employer to release technicians for war work and to re-employ such technicians whenever they are released by government from their war work.

Note.—In Bombay seven of the general seats are to be reserved for Marathas.
In the Punjab one of the Landholders' seats is to be a seat to be filled by a Tumandar.
In Assam and Orissa the seats reserved for women are to be non-communal seats.

Though this Ordinance is in force in British India, arrangements have been made to bring Indian States into the pool. Technical personnel over the age of 18 and under 50 shall be liable for national service which is defined as "employment in a notified factory" and 'notified factory' includes "any factory under the Crown and any factory declared to be engaged in a work of national importance." An Ordinance amended the European British Subjects National Service Act and removed certain defects experienced in its working. It also provides for conscientious objections and appeals.

The Indian Legislature, too, passed a number of measures designed to help war effort. The Indian Works of Defence Amending Act makes it possible to exempt from demolition specified buildings existing at the time of issue of notice and permit those buildings to be maintained in the same condition. The Indian Navy Discipline (Amending) Act makes legal the imposition of minor punishments such as the deprivation of good conduct badges, cell punishment, etc., according to the customs of the navy. Another amendment provides for the application of the Act when Indian Naval Forces are serving with the Naval Forces of Burma. A War Donations and Investment (Companies) Act 1940 was passed to enable a company, whether a club or not, to make any contribution it wishes to war funds notwithstanding any legal impediment caused by their Memoranda of Association. An Act was passed fixing compensation for war injuries and damage sustained by masters and seamen employed on small vessels plying in Indian coastal waters. Vessels affected number 77,000 and range from 3 to 200 tons.

Emergency Budget, 1940.—At the opening of the Assembly session on November 5, 1940, the Finance Member, Sir Jeremy Raisman, made a statement on the financial position, disclosing a prospective deficit of Rs. 13 crores due to war expenditure to meet which in part he introduced a supplementary Finance Bill imposing a 25 per cent surcharge for Central purposes on all taxes on income and increasing letter postage, telegram and telephone charges to yield altogether an additional Rs.6 crores in a full year, leaving comprehensive measures to be worked out at the time of the normal Budget. He stated that the 25 per cent surcharge on all taxes on income, including supertax and corporation tax, which he estimated would yield Rs.5 crores in a full year, would work out at an increase of 8¼ per cent on account of the last 4 months of the year. The assessment already made for 1940-41 would be increased by one-twelfth while deductions at source from salaries and dividends would be increased by 25 per cent.

The initial rate for inland letters was raised to 1 anna 3 pies, for letters to Burma to 2 annas and to Empire countries to 3 annas 6 pies, while that for book packets was raised to 9 pies for the first 5 tolas. All other postal rates remained unchanged. The remaining item was a surcharge of 1 anna on each ordinary and 2 annas on each express inland telegram and a 10 per cent surcharge on trunk telephone bills, to yield altogether Rs.1 crore.

The debate in the Assembly was heated and prolonged. The Congress Party led by Bhulabhai Desai thought that the Supplementary Finance Bill was an insidious attempt to commit India to war aims of the British Government, while Jinnah attacked the Congress Party for trying to coerce the British Government to throw Muslims and other minorities overboard. The Muslim League remained neutral with the result that the Finance Bill was rejected by a majority of two votes, firstly when the motion for its consideration was voted down and secondly when the House refused to entertain the same Bill sent back by the Viceroy in a recommended form. The Bill was passed by the Council of State in the certified form and became law soon thereafter.

Railway Budget, 1941-42.—The Railway estimates presented by Sir Andrew Clow in the Legislative Assembly on February 19, 1940, forecast for 1940-41 a surplus of 14·59 crores against a surplus of 8·29 crores originally estimated, and for 1941-42 a surplus of Rs.11·83 crores. The revised estimate of surplus on railways for 1940-41 is more than the actual surplus of last year by about 10¼ crores. The total traffic receipts of State-owned lines are expected to reach 109¼ crores, about 11¼ crores more than last year and Rs.6¼ crores more than the original estimate. The total working expenses, including Rs.12⅝ crores for depreciation, are a little below Rs.66¾ crores, or about 1¼ crores more than last year. The surplus expected is 14·59 crores. The balance in the depreciation fund will stand at a little over Rs.35 crores. The gross total works programme for 1941-42 is slightly over 19¼ crores. Estimates for track renewals amount to Rs.6 crores, and those for rolling stock to Rs.4½ crores. Rs.3¼ crores are provided for bridges and other structural works, and a little over Rs.66,00,000 for an increase in stores balances.

Referring to the war effort of the railways Sir Andrew Clow mentioned that, besides the men who had joined the fighting forces, many were employed in the production of various war requirements, for which some railway workshops had been wholly made over. He also alluded to the fact that about 305 miles of branch lines, which had been found unremunerative would be dismantled by the end of the year for shipment overseas of material required for the construction of railways. As regards manufacture of locomotives, Sir Andrew stated that the heavy demand for skilled labour, machine tools and materials resulting from the immense expansion in the production of munitions and other military requirements made it out of the question to embark at this stage on a new large-scale industry, and the workshop, which had been selected for the purpose, had been completely turned over to war work.

Sir Andrew Clow referred to the provision of Rs. 2 crores for the purchase of the Assam Bengal Railway and Rs.2¾ crores for the purchase of the Bombay, Baroda and Central India Railway. He said notice had also been given to purchase the Tapti Valley Railway (156 miles) at the end of March, 1942, at an estimated cost of Rs.1⅝ crores, but the payment being due only in 1942-43, has not been provided

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

for in this Budget. Sir Andrew Clow mentioned that General revenues would receive in 1940-41 Rs.9·96 crores in all and in 1941-42 Rs.10·18 crores. He said he realised that this result would come as a disappointment to many who were interested in railways as, though a record surplus was expected, the railway reserve gained very little. He felt confident, however, that when it was realised that the needs of general revenue were war needs and that the alternative to an arrangement such as he proposed would be an even heavier burden on the general taxpayer than he must in any case be called upon to bear, the justification for this arrangement would be recognised. He concluded with an appeal. "I hope," he said, "that in the future this House or its successors will not forget the service which the railways have been able to render at this juncture and will be ready, when peace is restored, to give the railways generous treatment. Generosity by the community here is generosity to themselves, and a liberal policy towards the Railways will not fail of its rewards."

It may be added that the final returns to hand by the middle of April show that total traffic receipts for the year 1940-41 are better by about 2 crores than shown in the revised estimate and that the general revenue would derive this further benefit from railway earnings.

General Budget, 1941-42.—Presenting the Central Budget for 1941-42 on February 28, 1941, the Finance Member, Sir Jeremy Raisman, disclosed a deficit of Rs.8,42 lakhs for 1940-41 and a prospective deficit of Rs.20,46 lakhs for 1941-42. He proposed to raise a further 6,61 lakhs by additional taxation to meet the share of the cost of India's war measures which was being provided from revenue. He proposed to increase the rate of Excess profits Tax from 50 per cent to 66⅔ per cent, to yield Rs.250 lakhs, and to raise the present Central surcharge of 25 per cent on Income-tax and Super-tax to 33⅓ per cent for the year 1941-42, to yield an additional Rs.190 lakhs. In the field of indirect taxation the first proposal was to double the excise duty on matches. The Finance Member stated that as the retail price of matches had already risen over large parts of the country, the increase in duty would appropriate for the Exchequer a due share of the enhanced retail price paid by the consumer. There will be a corresponding rise in the duty on imported matches and a similar increase will be made in the duty on mechanical lighters. The additional match duty is estimated to yield Rs.150 lakhs. The other proposals are to increase the alternative specific import duty on artificial silk yarn and thread from 3 annas to 5 annas per pound and to introduce a new excise duty of 10 per cent *ad valorem* on pneumatic tyres and tubes, to yield together Rs.71 lakhs. The total estimated yield of this new taxation is 6,61 lakhs which reduces the prospective deficit to Rs.13,85 lakhs. The Finance Member said that though this was still a formidable gap which the unforeseen contingencies ahead were obviously more likely to widen than to narrow, it had to be remembered that Rs.3 crores were still being provided for the reduction of debt and that any modification of the existing free trade regime, as the result of the Indo-Burma trade negotiations then proceeding, would result in some increase in revenue. But, in any case, judged by the share of the whole additional cost of India's war measures which is being met by taxation, the position was fully defensible and the inherent soundness of India's financial position entitled her to face the future with courage and confidence.

The total revenue for 1941-42 is estimated at Rs.1,06,39 lakhs and expenditure at Rs.1,26,85 lakhs. The yield from Customs duties has been estimated Rs. 3 crores lower than the current year's estimate—Rs.34,75 lakhs as against Rs.37,75 lakhs. This is based on the assumption that the present tendencies will continue and that there will be no violent change in the effect of the war on Customs revenue.

The Defence Budget for 1941-42 amounts to Rs.84,13 lakhs made up of—

		Rs. lakhs
(1)	Basic normal budget ..	36,77
(2)	Effect of rise in prices	3,55
(3)	India's war measures	35,40
(4)	Non-effective charges	8,41
		84,13

The Finance Member stressed the fact that these estimates provided only for specific schemes and measures definitely under way or in sight and, while Defence plans have to be adapted to meet the changing war situation, it is impossible to forecast the cost of unforeseeable items. The charges borne by His Majesty's Government on account of the supplies and services rendered by India during 1941-42 are expected to be more than double the amount of India's war expenditure, while His Majesty's Government are also providing free of charge much of the equipment needed for the modernisation of the Army in India.

The Finance Member pointed out that the total strength of India's armed forces is now well over half a million men and further expansion is proceeding. New regiments of mechanised cavalry, artillery and infantry are being raised as also Signal and Sapper and Miner Units and all specialised troops required for modern warfare. New ships for the Royal Indian Navy are being built and more officers and men to man them are being trained. For the Air Force aircraft and equipment are being obtained from America and the first "made-in-India" aeroplanes are expected to be manufactured this year. At the same time airmen are being trained as fast as the capacity of the flying schools permit. Civil expenditure has also increased by Rs.2,61 lakhs, mainly on account of schemes connected with the war. Thus the training of pilots and mechanics for the Air Force Reserve will cost Rs.33 lakhs and the scheme for the training of 15,000 war technicians by March, 1942, a further Rs.93 lakhs. The Supply Department's expenditure on placing orders for Indian products for allied Governments, the value of which has already exceeded Rs.82 crores, is expected to be Rs.58 lakhs.

Thus while the Government of India's total expenditure next year is expected to increase by Rs.15 crores to Rs.1,26 crores, its total

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

revenue is expected to rise by Rs.3 crores to Rs.1,06 crores, leaving a prospective deficit of Rs.20 crores. A third of this is met by the fresh taxation and the remainder from the Defence Loans. The Finance Member also stated that with the surplus of Rs.7 crores over from last year and the increased contribution of Rs.10 crores from the Railways, the cost of the Defence expansion would cause a deficit of only Rs.8 crores in 1940-41 instead of Rs.13 crores as previously estimated.

The Finance Member finally explained the advantage to India of the recent redemption of India's sterling debt and its replacement by rupee obligations. When the operation was completed the Government of India's external debt would have been reduced by Rs.120 crores and its interest charges payable in London would have been halved over the last 6 years. This would not affect the size of the country's gold reserves, but will greatly strengthen India's credit, while at the same time helping His Majesty's Government to finance the war.

The prolonged debates in the two Houses of the Legislature revealed general approval of the plan to raise only one-third by taxation and the various financial measures were passed by both the Houses. The only modification made was the announcement by the Finance Member that Government would exempt from excise duty tyres used by animal-driven carts.

Other Legislative Measures.—Besides the various financial and other measures for promoting the war effort, the Central Legislature passed other Bills some of which are of considerable importance. They are :

The Reserve Bank of India (Third Amendment) Act.—Under Section 42 of the Act a scheduled bank is required to maintain daily with the Reserve Bank a minimum balance equal to 5 per cent of its demand liabilities and 2 per cent of its time liabilities, and in case of default the Reserve Bank is entitled to charge interest at penal rate on the amount of default. There is no provision, however, in the Act to prevent the Bank from withdrawing its deposit, even up to the full amount, provided it is prepared to accept the liability to pay this penal interest on the resulting deficiency. Cases of such withdrawals were brought to the notice of the Central Board of the Reserve Bank who recommended to the Government of India that in the interest of depositors and of sound banking in general, legislation to penalise directors and other officers of such banks who are knowingly and wilfully parties to such defaults be undertaken. The Act prescribes a suitable penalty and gives powers to the Reserve Bank to prohibit defaulting banks from accepting fresh deposits during the continuation of the default.

Railway Ticketless Travellers Act.—This legislation provides for imprisonment for a term which may extend to three months and for removal of a person from a railway carriage provided that nothing in the Act "shall be deemed to preclude a person removed from a carriage of a higher class from continuing his journey in a carriage of a class for which he holds a pass or ticket; provided further that women and children, if unaccompanied by male passengers shall not be so removed except either at the station at which they first enter the train or at a junction or terminal station or station at the headquarters of a civil district and only between the hours of 6 a.m. and 6 p.m." The above formula represents a compromise between the Government and the non-official members of the House and provides a much-needed deterrent punishment for checking the enormous evil of ticketless travel.

Delhi "Ribbon Development" Act.—This Act is the first legislation of its kind to be enacted in India. It regulates in the Province of Delhi the use of land for purposes other than agricultural. There is no legal power to control building development along the main roads in Delhi province outside the Delhi and New Delhi municipalities. The Act will safeguard future expansion of the Capital and will prevent growth of vested interests in uncontrolled areas. It is also proposed to control brick-fields as a part of the anti-mosquito campaign in the Capital. Safeguards have been provided in the Act in respect of places of worship.

Indian Merchandise Marks Amendment Act alters the law which has existed since 1889. The original Act was directed to the suppression of false marking on goods and did not require a positive statement of their actual origin, except in the case of goods which bears a false or misleading indication. The Amending Act provides for the marking of the country of origin in all necessary cases by vesting power with the Central Government to require, by notification, any class of goods to be marked with the country of origin. Goods from the U. K. are placed on the same footing as those of other countries.

Insurance Law Amending Act was framed after a conference with representatives of the Insurance Companies and makes a number of changes in the substantial law passed 4 years ago.

Assam Rifles Act has been passed providing for the regulation of and the maintenance of discipline in the Assam Rifles. This law provides for the taking over by the Central Government of the administration of Assam Rifles which had hitherto vested in the provincial government. The change has been made with the consent of the Assam Government.

In all 15 Bills were passed by the Indian Legislature during the autumn session of 1940 and 13 Bills were passed during the Budget session of 1941.

The Indian Tariff Board.

The Indian Tariff Board is an *ad hoc* body constituted from time to time as necessity arises to investigate the claims made by any Indian industry to protection. It generally consists of a President and two members, one of whom is normally a Government official. It has, subject to the approval of the Government of India, power to co-opt other members for particular enquiries. It tours over the industrial centres in India where the industry referred to it is located and if satisfied after detailed enquiries that the claim for protection is justified, it makes its recommendations to the Government of India. The last Tariff Board became *functus officio* early in 1939 after completing an enquiry into the question of extending protection to the Indian sericulture industry.

Indians Overseas.

Numbers.—The total Indian population overseas, according to the latest available returns, is as follows:—

Name of country.	Indian population.	Date of estimates.
British Empire.		
1. Ceylon	682,570†	1938

Origin of Indian Emigration.—Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purpose of labour dates from the beginning of the 19th century. From 1800 A. D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tapioca, and cocoanut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830, when a French merchant, named Joseph Argand, carried some 150 artizans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta. The Government of India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

History of Emigration.—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and last direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1894 gave rise to a system of emigration from French Indian ports to Réunion and Bourbon which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1858 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act, based on a convention with the French Government was passed legalising and regulating emigration to Reunion Martinique, Guadeloupe, and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1872 to Surinam. Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

of gross abuses in the treatment of emigrants in British Guiana. A commission of enquiry was appointed, and their report led to important legislation in the colony for the protection of Indian immigrants which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment.

Recent Legislation.—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pitcher and Mr. Grierson) to ascertain, in the N. W. P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year. This Act specifies the countries to which emigration is lawful, but empowers the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country, or on the ground that proper measures have not been taken for the protection of emigrants, or that the agreements made with them in India are not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out. Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chimanlal, and they arrived at the conclusion that the time has come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

It was found that the lack of power to regulate the total flow of emigration for unskilled work, whether assisted or voluntary and whether under contract or not, may operate to the detriment of Indian communities overseas, particularly in times of economic depression. The Indian Emigration Act was suitably amended in 1938 and the Government of India took power, to prohibit, when necessary, even unassisted emigration for the purpose of unskilled work. This amendment was promulgated on December 14, 1939. The rules have been made applicable in the first instance to the Province of Bombay where the problem of illicit emigration was found to exist in appreciable proportions. Under the new rules the passage broker is precluded from recovering or being a party to any arrangement to recover the "cost of recruitment" from the emigrant.

During 1939-40 two minor defects in the Indian Emigration Act, 1932 were remedied by the Indian Emigration Act, 1940. This Act empowers Protectors of Emigrants to exercise the powers of detention, search, etc., for the prevention of offences under the Act and by making the offence under Section 30 of the Act cognizable, removes an anomaly between Sections 35 and 30A of the Act.

Present Position.—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three:—

(*a*) Control of emigration.
(*b*) Rights of Indians to admission to other parts of the Empire.
(*c*) Rights and disabilities of Indians domiciled overseas.

These questions may be considered separately.

Control of Emigration.—So far as unskilled labour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigration Act of 1922 are as follows:—

"10. (1) Emigration, for the purpose of unskilled work, shall not be lawful except to such countries and on such terms and conditions as the Governor-General in Council, by notification in the *Gazette of India*, may specify in this behalf.

"(2) No Notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legislature and has been approved by a resolution of each Chamber, either without modification or addition, or with modifications and additions to which both Chambers agree, but, upon such approval being given, the notification may be issued in the form in which it has been so approved."

Under this law emigration has been legalised to Ceylon on the following conditions:

(1) The emigrant shall—
  (*a*) have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of Ceylon, or
  (*b*) have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.

(2) The emigrant shall not, before leaving British India, have entered into a contract of service for a period exceeding one month.

(3) Within six months from the issue of this Notification, or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that any contract of service for a period exceeding one month entered into by an emigrant shall be void.

(4) No part of the cost of his recruitment, subsistence during transport, or transport shall be recoverable from any emigrant and all expenses in this connection shall be defrayed from a common fund to be raised in such manner and managed by such agency as may appear suitable to the Colonial Government.

(5) The Government of Ceylon shall at any time when so desired by the Governor-General in Council admit and give all facilities to an Agent appointed under section 7 of the Act.

(6) Within one year of his arrival in Ceylon any emigrant who has been assisted to emigrate at the cost of the common fund referred to in clause (4) shall, on satisfying the Agent appointed under section 7 of the Act that his return to his home is desirable either on the ground of the state of his health or on the ground that the work which he is required to do is unsuitable to his capacity, or that he has been unjustly treated by his employer, or for any other sufficient reason, be repatriated free of cost to the place of recruitment, and the costs of such repatriation shall be defrayed by the Government of Ceylon or the Ceylon Planters' Association.

(7) If at any time there is no Agent appointed under section 7 of the Act, the Government of Ceylon shall appoint a person to perform the duties of the Agent as set forth in clause (6).

(8) Within six months from the issue of this Notification, or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that no payment made in India by a recruiter to an emigrant to enable him to pay off debts before emigrating shall be recoverable.

(9) The Government of Ceylon shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of persons emigrating to Ceylon in accordance with this Notification.

Similar conditions have been imposed in the case of Malaya. Emigration was also permitted to Mauritius for a period of 1 year only with effect from May 1st, 1923, and limited to a number not exceeding 1,500 labourers. The terms were more onerous than in the case of nearer Colonies and the arrangement has now lapsed.

Emigration to British Guiana for the purpose of unskilled work has also been declared lawful on the terms and conditions given below, but the date from which emigration is to commence has not yet been fixed:—

Emigration to British Guiana.—Emigration to British Guiana for the purpose of unskilled work shall be lawful with effect from such date as the Governor-General in Council may with the concurrence of the Governor of British Guiana notify in the *Gazette of India* on the following terms and conditions, which shall thereupon become operative:—

(1) The family shall be the unit for the purposes of emigration. Not more than 500 families shall be permitted to emigrate and the number of persons included in the said 500 families shall not exceed 1,500.

(2) The emigrants shall either have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of British Guiana, or have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.

(3) No part of the cost of his recruitment of subsistence during transport shall be recoverable from any emigrant and all expenses in this connection shall be borne by the Government of British Guiana or met from funds at their disposal.

(4) The Government of British Guiana shall at any time when so desired by the Governor-General in Council, admit and give all facilities to an Agent appointed under section 7 of the Act.

(5) If at any time there is no Agent appointed under section 7 of the Act, or if the Agent is absent or unable to perform his duties, the Government of British Guiana shall at the request of the Governor-General in Council appoint a person to perform temporarily the duties of the Agent.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(6) Prior to the arrival of the emigrants a Settlement Commission shall be appointed in British Guiana to select and prepare suitable agricultural land for the emigrants and generally to supervise their employment. The Agent referred to in clause (4) shall, on appointment, be a member of such Commission.

(7) The Government of British Guiana shall offer to each family for its separate enjoyment a holding comprising not less than five acres of suitable agricultural land prepared for cultivation on the terms hereinafter set out in a locality which shall be healthy and shall have an adequate supply of good drinking water. All expenses in connection with the preparation of the holdings shall be borne by the Government of British Guiana and shall in no case be recoverable from an emigrant.

The annual rent of the holding shall be fixed by the Settlement Commission at a rate not exceeding the lowest rate paid in the locality.

After an emigrant has been in occupation of a holding for three years, he shall, provided that he has cultivated a portion of the holding either by himself or through some member of his family, be entitled to a grant of the holding on payment at any time during the ensuing four years of such fees not exceeding 24 dollars as may be fixed by the Settlement Commission.

On the expiry of seven years from the date of the commencement of his occupation of a holding an emigrant shall acquire absolute ownership in the holding provided that he has paid the rent and fees referred to in the foregoing paragraphs of this clause and has brought under cultivation either by himself or by some member of his family half the area of his holding.

(8) An emigrant on arrival in British Guiana shall be housed and maintained without charge by the Government of British Guiana for at least one month.

(9) If any emigrant so requires loans shall be made to him for maintenance, house accommodation, payment of rent and for agricultural purposes generally. Free medical assistance and free skilled supervision shall be provided.

(10) Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of 7 years from the date of his arrival in British Guiana.

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 3 and not more than 5 years from the date of his arrival in British Guiana on payment to the Government of British Guiana of half of the cost of his passage from his residence in India to British Guiana.

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 5 and not more than 7 years from the date of his arrival in British Guiana on payment to the Government of British Guiana of quarter of the cost of his passage from his residence in India to British Guiana.

(11) Notwithstanding anything contained in the last preceding clause the Government of British Guiana on the request of an Agent appointed under section 7 of the Act shall repatriate at its own expense and without any payment by or on behalf of the emigrant to the place of his former residence in India any emigrant at any time after his arrival in British Guiana.

(12) An emigrant shall be at liberty at any time after his arrival in British Guiana to take up work or employment other than or in addition to the cultivation of a holding on lease from the Settlement Commission.

(13) The ordinance enjoining compulsory education in British Guiana shall be enforced to the same extent in the case of Indian children as in the case of children belonging to other communities.

(14) Boards of arbitration in regard to wages shall be established before the arrival of the emigrants and Indians shall be adequately represented on such boards.

(15) Any Indian who has emigrated to British Guiana before the date of this notification and under any agreement in force at the date of this notification is entitled to an assisted return passage to India shall not be required to pay more than 25 per cent. of the excess in the cost of his return passage and clothing over the cost of such passage and clothing at the time of his first arrival in the colony.

(16) Any Indian who has emigrated to British Guiana before the date of this notification and has at the date of this notification become or thereafter becomes destitute shall be entitled to be repatriated to India at the expense of the Government of British Guiana without being further required to prove that he has become incapable of labour.

(17) The Government of British Guiana shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of the persons emigrating to the Colony in accordance with this notification.

Admission of Indians to Other Parts of the Empire.—On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917 and 1918, and the policy accepted by the self-governing dominions and the British Government was embodied in the following resolutions:—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour purposes or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition: (*a*) That not more than one wife and her children shall be admitted for each such Indian; and (*b*) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

The first paragraph of this resolution has regularized the various restrictions on immigra-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

tion which the self-governing dominions have, from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to be unsuited to the requirements of the Union. Canada prohibited the landing of any person who had come to the Dominion otherwise than by continuous journey from the country of which he was a native and unless he possessed in his own right 250 dollars. Since 1930, Canada has restricted the immigration of Indians to the wife or unmarried child under 18 years of age, of any Canadian citizen legally admitted to and resident in Canada, who is in a position to receive and care for his dependents. Newfoundland and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side has assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passports. A bill has also been passed by the Indian Legislature empowering the Government of India to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile." With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms:—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless feel bound to record their profound concern at the position of Indians in South Africa and hope that by negotiations between India and South Africa a way can be found as soon as may be to reach a more satisfactory position.

Summary of present Position.—Outside Australia, New Zealand and Canada the position stands as follows:—

(1) **South Africa.**—The main grievances of Indians, which led to a passive resistance movement headed by Mr. Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts-Gandhi agreement. The substance of this agreement is embodied in the following extracts from letters:—

(i) Mr. Gorges, Secretary for the Interior, to Mr. Gandhi, June 30th, 1914: "With regard to the administration of existing laws, the Minister desires me to say that it always has been, and will continue to be, the desire of the Government to see that they are administered in a just manner and with due regard to vested rights."

(ii) Mr. Gandhi to Mr. Gorges, July 7th, 1914: "By vested rights I understand the right of an Indian and his successors to live and trade in the township in which he was living and trading, no matter how often he shifts his residence or business from place to place in the same township."

This has been officially interpreted to mean "that the vested rights of those Indians who were then living and trading in townships, whether in contravention of the law or not should be respected."

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were as follows:—

(1) Law 3 of 1885 (Transvaal), the Gold Law of the Transvaal (Act No. 35 of 1908) and Act No. 37 of 1919 should not be repealed.

(2) There should be no compulsory repatriation of Asiatics; but

(3) Voluntary repatriation should be encouraged.

(4) There should be no compulsory segregation of Asiatics; but

(5) A system of voluntary separation should be introduced under which municipalities should have right, subject to certain conditions:—

(*a*) to lay out residential areas for Asiatics.

(*b*) to set aside certain streets or portions of the town for Asiatic traders to which existing license holders should gradually be attracted.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(6) These areas should be selected and allocated by a board of independent persons in consultation with the Municipal Council and Asiatic community.

(7) In Natal the right of Asiatics to acquire and own land for farming or agricultural purposes, outside townships, should be confined to the coast belt, say, 20 to 30 miles inland.

(8) A uniform "License Law" applicable to all the Provinces of the Union should be possible, be enacted. If that is impracticable, the law relating to the issue of Trade Licenses in the Cape Province, the Transvaal and Natal should be assimilated in a comprehensive consolidating Act of Parliament providing, *inter alia*:—

(*a*) That the granting of all licenses to trade (not being liquor licenses) shall be entrusted to municipal bodies within the area of their jurisdiction; outside those areas, to divisional Councils in the Cape Province, and in the other Provinces to special Licensing Officers appointed by the Administrator.

(*b*) The grounds upon which an application for the grant of a new license may be refused.

(*c*) That the reasons for the refusal to grant any license shall be recorded, together with any evidence tendered for or against the application.

(*d*) That, in the case of the refusal of a license on the ground that the applicant is not a fit and proper person to hold the same or to carry on the proposed business, there shall be a final appeal to a Special Appeal Board, appointed by the Administrator.

(*e*) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop, store or other place of business.

(9) There should be no relaxation in the enforcement of the Immigration Laws, and more active steps should be taken to deal with prohibited immigrants who have evaded the provisions of those laws.

(10) The administration of the Asiatic policy of the Government should be placed in the hands of one official, under whose charge would come all administrative functions, together with the official records relating to Asiatics. This officer should also be entrusted with the duty of securing full statistics regarding Asiatics in the Union and of the arrivals in and departures from South Africa. Details of all applications for trade licenses, and transactions in connection with the purchase of land and property made by Asiatics throughout the Union, should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1913.

On the other hand, he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner, give a ready ear to any complaints or grievances and generally safeguard their interests.

From the above it will be observed that the Commission recommended the retention of a law prohibiting the ownership of land by Asiatics in the Transvaal, and another of its recommendations, threatened the right which Indians had previously enjoyed of acquiring and owning land in the Uplands of Natal. Against this latter proposal the Government of India earnestly protested, but the protest was not accepted by the Union Government.

As has been stated above, the representatives of the Union of South Africa dissented from the resolution of the Imperial Conference of 1921 which recommended the recognition of the right of Indians to citizenship in the self-governing Dominions. The negotiations conducted between the two governments produced little result and the anti-Asiatic feeling prevailing was reflected in the legislation passed during the following years. Between 1922 and 1925 the Durban Land Alienation Ordinance, the Borough and Township Land Ordinance, the Natal Boroughs Ordinance (No. 19 of 1924) and the Natal Townships Ordinance of 1925 were all passed and were detrimental to Indian interests. In 1925, the Areas Reservation, Immigration and Registration (Further Provision) Bill was introduced in the Union Parliament, the object of the Bill being to stiffen the immigration law in its application to Asiatics and to introduce segregation in Natal. The Bill roused consternation in South Africa and widespread resentment in India. After prolonged negotiations between the two Governments, the Union Government agreed to a conference between the representatives of the two Governments and to the postponement of the consideration of the Areas Reservation Bill until after the conference. The Conference met in Cape Town and arrived at an understanding, commonly known as the Cape Town Agreement of 1927. The terms of this agreement, which were ratified by both Governments in February, 1927, are reproduced below.

Cape Town Agreement, 1927

1. It was announced in April 1926 that the Government of India and the Government of the Union of South Africa had agreed to hold a Round Table Conference to explore all possible methods of settling the Indian question in the Union in a manner which would safeguard the maintenance of western standards of life in South Africa by just and legitimate means. The Conference assembled at Cape Town on December 17th and its session finished on January 12th. There was, in these meetings, a full and frank exchange of views which has resulted in a truer appreciation of mutual difficulties and a united understanding to co-operate in the solution of a common problem in a spirit of friendliness and good-will.

Both Governments re-affirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life.

2. The Union Government recognises that Indians domiciled in the Union who are prepared to conform to western standards of life, should be enabled to do so.

3. For those Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required. Union domicile will be lost after 3 years' continuous absence from the Union in agreement with the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted emigration scheme who desire to return to the Union within the 3 years will only be allowed to do so on refund to the Union Government of the cost of the assistance received by them.

4. The Government of India recognise their obligation to look after such emigrants on their arrival in India.

5. The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918.

6. In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments, and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill.

7. The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest.

8. The Government of the Union of South Africa have requested the Government of India to appoint an agent in order to secure continuous and effective co-operation between the two Governments.

In February, 1930, a Select Committee of the Union House of Assembly was appointed to inquire into and report on certain matters relating to the rights of Indians to own and occupy immovable property in the Transvaal and incidentally to trade. The Committee was required, *inter alia*, to investigate how far the intentions of the legislature, as embodied in the Act of 1919, were being given effect to and whether, and, if so, to what extent, an amendment of the Act was desirable. The Committee came to the conclusion that the position which had arisen as a result of illegal occupation in the mining areas was serious and that there was no doubt that Law 3 of 1885, as amended by the Act of 1919, intended that Asiatics should not own fixed property in the Transvaal outside reserved areas either individually or collectively and either directly or indirectly. It submitted its report on the 13th May, 1930, and embodied its recommendations in a Bill, which it urged should be enacted immediately. The Bill was read for the first time on the 14th May, 1930, but in deference to the representations made by the Government of India that adequate time should be allowed for careful examination of the far-reaching provisions of the measure, the Union Government decided to defer further consideration of it until the Parliamentary session of 1931. As a result of opposition to the Bill, it was later postponed further, and a Conference was held in 1932 to examine the provisions of the Bill and to review the working of the Cape Town Agreement of 1927 in accordance with para. 7 of that Agreement.

The results of the Conference are contained in the following extracts from a statement made in the Indian Legislature on the 5th April, 1932:—

1. In accordance with paragraph 7 of the Cape Town Agreement of 1927 delegates of the Government of the Union of South Africa and of the Government of India met at Cape Town from January 12th to February 4th, 1932 to consider the working of the Agreement and to exchange views as to any modifications that experience might suggest. The delegates had a full and frank discussion in the Conference, which was throughout marked by a spirit of cordiality and mutual good-will.

2. Both Governments consider that the Cape Town Agreement has been a powerful influence in fostering friendly relations between them and that they should continue to co-operate in the common object of harmonising their respective interests in regard to Indians resident in the Union.

3. It was recognised that the possibilities of the Union's scheme of assisted emigration to India are now practically exhausted owing to the economic and climatic conditions of India as well as to the fact that 80 per cent. of the Indian population of the Union are now South-African-born. As a consequence the possibilities of land-settlement outside India, as already contemplated in paragraph 3 of the Agreement, have been further considered. The Government of India will co-operate with the Government of the Union in exploring the possibilities of a colonisation scheme for settling Indians, both from India and from South Africa, in other countries. In this investigation, which should take place during the course of the present year a representative of the Indian community in South Africa will, if they so desire, be associated. As soon as the investigation has been completed the two Governments will consider the results of the inquiry.

4. No other modification of the Agreement is for the present considered necessary.

5. I shall now endeavour to deal with the Transvaal Asiatic Tenure (Amendment) Bill. The Conference decided that it should be considered by a sub-committee consisting of two representatives of each Delegation. After discussion in the sub-committee Dr. Malan, who was one of Union representatives, agreed to place informally before members of the Select Committee, which had prepared Bill, suggestions of the delegates from India. Results of this consultation may be summarised as follows:—

(1) Clause 5 of the Bill which embodied the principle of segregation by providing for the ear-marking of areas for the occupation or ownership of land by Asiatics has been deleted. Instead, the Gold Law is to be amended to empower the Minister of the Interior after consultation with the Minister of Mines to withdraw any land from the operation of sections 130 and 131 in so far as they prohibit residence upon or occupation of any land by coloured persons. This power will be exercised after inquiry into individual cases by an impartial commission presided over by a judge to validate present illegal occupations and to permit exceptions to be made in future from

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

occupational restrictions of Gold Law. It is hoped that liberal use will be made of this new provision of the law so as to prevent the substantial dislocation of Indian business which strict application of the existing restrictions would involve, and to provide Indians in future with reasonable facilities to trade in the mining areas without segregation.

(2) The Bill has also been amended so as to protect fixed property acquired by Asiatic companies up to 1st March 1930, which are not protected by section 2 of Act 37 of 1919. This will have the effect of saving many Indian properties which, though not acquired in contravention of the letter of the Act of 1919, were acquired contrary to its spirit.

(3) Local bodies whom, clause 10 of the Bill required to refuse certificates of fitness to an Asiatic to trade on the ground that the applicant may not lawfully carry on business on the premises for which the licence is sought, shall have to treat a certificate issued by a competent Government officer to the effect that any land has been withdrawn from the restrictive provisions of sections 130 and 131 of the Gold Law as sufficient proof that a coloured person may lawfully trade on such land. As it is proposed to maintain hereafter a register of all lands in proclaimed areas where Asiatic occupation is permitted, such a provision should prove a valuable safeguard to the Indian community.

6. As against these important concessions, it has to be recognised that the recommendations of the Indian Delegation that areas like Springs and de-proclaimed land, to which the restrictions of clauses 130 and 131 do not at present apply should not be made subject to them, and that leases for ten years or more should not be treated as fixed property have not been accepted. On the balance, however, the amendments which, subject to ratification by the Union Parliament, have been made in the Bill represent a substantial advance on the original Bill.

The Transvaal Asiatic Land Tenure Bill, as amended in the manner mentioned in paragraphs 6 and 7 of the statement above, was passed into law in 1932 and a Commission, presided over by the Honourable Mr. Justice Feetham, was appointed in October, 1932, to enquire into the occupation by coloured persons of proclaimed land in the Transvaal. The Transvaal Asiatic Land Tenure (Amendment) Act of 1936, which was passed after consideration of the recommendations of the Feetham Commission, completed the legislation necessary to give effect to the policy of the original Act of 1932.

The Government of the Union of South Africa also appointed a Committee to undertake the investigation of the possibilities of colonisation contemplated in the 1932 Agreement referred to above. The report of this Committee was published simultaneously in India and in South Africa on the 2nd July, 1934. The main recommendation of the Committee was that further investigation in regard to the successful operation of a colonisation scheme could advantageously be made by a joint commission in British North Borneo, British New Guinea and British Guiana. The idea of colonising Indians from the Union, however, does not appear to have been proceeded with.

Since 1932, there have also been several enactments which are capable of being used against Indians in the Union, *e.g.*, the Transvaal Licences (Control) Ordinance of 1932 and the Natal Rural Dealers' Licensing Law Amendment Ordinance of 1935. A further development occurred in 1937 when three private Bills affecting the position of Indians in the Union were introduced in the Union Parliament. The first sought to prohibit marriages between Europeans and Asiatics or natives. It was introduced on the 12th January but attempts to have it referred to a Select Committee failed. The second Bill sought to empower Provincial Councils to prohibit the employment of Europeans by non-Europeans in the Union, and the third to prohibit the acquisition of fixed property in the Transvaal by any European, Coloured or Cape Malay women married to Asiatics and by children of such marriages. Both the Government of India and their Agent General in the Union made representations against these two Bills. Second reading, which would have involved acceptance of the principle of the two measures, was not proceeded with and they were referred to a Select Committee of the Union House of Assembly for investigation of their contents and form. Both the Indian community and the Agent General gave evidence before the Select Committee. The Committee came to no conclusion on the proposal to restrict ownership of land through marriage, but after consideration of the other Bill, submitted an amended Bill entitled the White Women's Employment Restriction Bill. The amended Bill sought to prohibit the employment of European women by Asiatics except under a certificate of the Minister of Labour and to forbid the issue of such a certificate if the women concerned were to be under the direction or supervision of a non-European or to be housed or employed on premises containing dwelling or sleeping quarters of Asiatics or at places where they might come into contact with Asiatics other than as customers over the counter. Cape Malays and Japanese (while the trade convention with Japan lasted) were to be exempted from the restriction. The new measure was purely anti-Indian and the Government of India protested strongly against it. In the course of oral evidence before the Select Committee, a representative of the South African Indian Congress stated that he believed Indians would be willing to terminate employment of European women voluntarily where circumstances showed that particular exception might be, or had been, justifiably taken to such employment. The Union Government accepted this statement as an assurance of co-operation by the Indian community in objectionable cases and an announcement was made on the 14th April in the Union House of Assembly that no further opportunity would be given for the discussion on, or for legislation in connection with, the Select Committee's report on the Bills. The Union Government, however, reserved the right to undertake legislation later should circumstances demand it. The dropping of these two Bills did not, however, satisfy certain sections and an

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

announcement was made in the Union Parliament on the 17th May, 1937, that two Commissions, one to enquire into mixed marriages and the other into the question of Asiatic land tenure in areas not covered by the enquiry of the Feetham Commission, would be appointed. These Commissions were appointed in February, 1938. The local Indian community and the Agent-General in the Union gave both written and oral evidence before the Commissions. The Mixed Marriages Commission has not as far reported and its findings are not likely to be of much practical importance to the local Indians, as such information as is available goes to show that mixed marriages are very rare among Indians in South Africa. The Land Commission reported towards the end of March, 1939 and its recommendations were generally considered to be satisfactory from the Indian point of view.

In spite of repeated representations from the local Indian community and the Government of India, the Union Government passed the Asiatic (Transvaal Land and Trading) Act 1939 which came into force on June 16, 1939. The Act restricts three important rights of the Indian community in the Transvaal; (*a*) the right to occupy land not subject to Gold Law restrictions; (*b*) the right to trade anywhere in the Transvaal; and (*c*) the right of Indians holding trading licences in May 1919 to transfer their business premises in the same township. The main provisions of the Act are as follows: (1) Further protection for two years was granted to such illegal occupation of land by Asiatics in the area under the Gold Law as had been protected since May 1930. (2) The issue of trading licenses except with the permission of the Minister was prohibited unless it was proved that the applicant and the person in control of the business were not Asiatics. (3) The hiring or occupation by Asiatics of any land or premises was prohibited if such land or premises were not occupied by Asiatics or coloured persons on April 30, 1939. (4) The Minister was empowered to issue permits of exemption.

The international situation in September 1939 and the consequent change of Ministry in the Union altered the position slightly so far as the Indian community was concerned. It was officially announced that the Government of the Union intended to appoint a commission to ascertain whether penetration had in fact taken place. The Union Government also declared that no fresh statutory measures involving segregation would be introduced during the war.

It may be mentioned in this connection that the report of the Mixed Marriages Commission was published in August 1939. Four members of the Commission signed a majority report recommending that legislation should be passed prohibiting mixed marriages and that this legislation should be accompanied by other measures directed against illicit miscegenation. A minority report by one member stated that legislation was no solution of the problem and suggested immigration of young European women to South Africa in order to overcome the disparity between the European male and female population. In January 1940 Dr. Malan moved a resolution in the House of Assembly that steps should be taken to implement the recommended legislation. In reply the Minister of the Interior stated that as the country was in a state of war Government did not propose to embark upon contentious legislation touching difficult social conditions, sentiments and racial pride.

The magnificent performances of Indian soldiers in the Middle-East were not without influence in South Africa, where the attitude towards Indians notably improved. In April 1941 legislation was passed in both Houses of the Union Parliament, which for the first time gave Indians the legal right to own and occupy land in what was known as "gold areas," *i.e.*, Johannesburg and surrounding areas. The replacement of General Hertzog by Field Marshal Smuts saw the Union Government adopt a more liberal Asiatic policy. In May 1941 the South African Government agreed to admit commercial travellers from India into the Union. In 1938 it was brought to the notice of the Government of India that the immigration laws of the Union of South Africa, under which prohibited immigrants were not entitled to obtain a licence to carry on any trade or calling in the Union, prevented the admission of Indian commercial travellers into the Union. Following representations made to the Union Government by the High Commissioner for India, the Union Government agreed to issue temporary permits and the necessary licences to *bona fide* commercial travellers from India.

When General Smuts' Government came to power at the end of 1939 they decided to appoint a Commission with a view to ascertain whether there was Indian penetration into predominantly European areas on a scale that justified legislation. In pursuance of this decision Mr. Lawrence, Minister of the Interior, appointed a Committee, popularly designated the Lawrence Committee, consisting of representatives of the Natal Indian community and the Durban Municipal Corporation with the object of exploring the possibilities of finding a solution to the problem of segregation on a non-statutory basis. Hopes of finding a solution on these lines have increased since the Committee started work.

The Indian community in South Africa offered enthusiastic co-operation to the war effort. A mechanical transport corps for Indians was organised and over a thousand Indians, mostly from Natal, volunteered to serve.

On the whole, since the advent of the Smuts Government, the Indian position has improved remarkably. As a gesture of goodwill and also to indicate appreciation of the gallantry of India's soldiers the Union Government took steps to see that the anti-Asiatic provisions of the law were not applied to Indian visitors, particularly students passing through Union territory on their way from Britain or the continent to India during the war.

(2) **Kenya Colony.**—The grievances of Indians domiciled in this Colony are fully set forth in the published despatch of the Government of India, dated October 21st, 1920. The controversy centred round the following points:—

(*a*) FRANCHISE.—Indians have not the elective franchise. The Government of India proposed that there should be a common electoral roll and a common franchise on a reasonable property basis *plus* an educational test

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

without racial discrimination for all British subjects.

(*b*) SEGREGATION.—Professor Simpson who was sent to East Africa to report on Sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly, that it was impracticable; secondly, that it was commercially inconvenient; and thirdly, that Indians are in practice unfairly treated in the allocation of sites.

(*c*) THE HIGHLANDS.—Lord Elgin decides in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area has now been given out, and the Government of India claim that there is no land left to which Lord Elgin's decision applies. This decision has now, however, been extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(*d*) IMMIGRATION.—Suggestions have been put forward for restricting Asiatic immigration into Kenya. The Government of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle indefensible.

The Settlement.—The decisions of the British Government were contained in a White Paper presented to Parliament in July 1923. It was held that the guiding principle should be that "the interests of the African native must be paramount," and in light of this it was decided:—

(*a*) FRANCHISE.—A communal franchise was adopted with 11 seats for elected Europeans, 5 elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority. One Indian is also appointed on the Governor's Executive Council.

(*b*) SEGREGATION.—The policy of segregation as between Europeans and Asiatics is abandoned.

(*c*) THE HIGHLANDS.—The existing practice is maintained both as regards initial grants and transfers. A similar reservation in the lowlands is offered to Indians.

(*d*) IMMIGRATION.—Racial discrimination in immigration regulations is rejected. But in the economic interests of the Africans, further control over immigration is necessary. Some arrangement is required for securing a strictly impartial examination of applications for entry into Kenya. The Governors of Kenya and Uganda have been instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 18th, 1923, and recorded "their deep regret that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them" and reserved liberty to reopen the case on a suitable opportunity. They stated their intention of making representations regarding the action to be taken to implement these decisions, particularly in the matter of the Immigration regulations.

Following upon the Kenya award statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views; and that earnest attention would be given to any representation which their Committee desired to make. As has already been stated such a Committee was appointed in March 1924. The following statement made by the Secretary of State for the Colonies in the House of Commons on 7th August 1924 shows the result of the representation made by the Colonies Committee:—

"(1) IMMIGRATION.—My position is that if danger ever arises of such an influx of immigrants, of whatever class, race, nationality or character, as may likely be prejudicial to the economic interest of the natives, I hold myself entirely free to take any action which may be necessary. Conflicting statistics which have been laid before me have not enabled me to reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) FRANCHISE.—I have given careful consideration to representations in favour of a common poll, but I am not prepared to resist the conclusion already arrived at that in the special circumstances of Kenya, with four diverse communities, each of which will ultimately require electoral representation, the communal system is the best way to secure the fair representation of each and all of these communities.

(3) HIGHLANDS.—I consider that the Secretary of State for the Colonies has no alternative but to continue pledges, expressed or implied, which had been given in the past, and I can hold out no hope of the policy in regard to agricultural land in the Highlands being reconsidered.

(4) LOWLANDS.—It was proposed to reserve an area in the lowlands for agricultural immigrants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas. At present any consideration of the matter is in suspense pending receipt from

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the colony of reports from the native and agricultural points of view on the areas in question."

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya, and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-co-operation and to select five members for nomination by the Governor to the Legislative Council.

In June 1924, His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough, to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended, pending the publication of the report of the Commission presided over by Major Ormsby Gore, which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee. The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th, Major Ormsby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which, under his chairmanship, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1926, information reached the Government of India, that the Government of Kenya contemplated undertaking legislation at an early date in order to make the European and Indian communities responsible for the net cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll-tax. The Indian community resented this differentiation and, ultimately, the Colonial Government decided that both communities should pay the same form of tax, *viz.*, an adult poll tax. For Europeans this has been fixed at 30 shillings and for Indians at 20 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January 1927.

Closer Union.—In view of the issue of another White Paper in July 1927, in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

In March 1929, the Secretary of State for the Colonies sent out Sir Samuel Wilson, Under-Secretary of State for the Colonies, to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected, with a view to seeing how far it may be possible to find a basis of general agreement. Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivasa Sastri, P.C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal, if he wished to make use of him in dealing with the Indian deputations.

Mr. Sastri left India in April and returned in June 1929. In the Report presented by him on his return he recommended that the Government of India should—

(*a*) press for inquiries as to the basis of a civilisation franchise which shall be common to all races alike;

(*b*) invoke the good offices of the Colonial Office and of the Government of Kenya in securing the consent of the European Community to the establishment of a common roll;

(*c*) oppose the grant of responsible government to Kenya or of any institutions leading up to it;

(*d*) oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson;

(*e*) demand, in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians;

(*f*) advocate the continuance of the official majority in the Legislative Council of Kenya;

(*g*) demand that the representation of natives in the Kenya Legislative Council should be by natives or by Europeans and Indians in equal proportions.

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government.

The report of Sir Samuel Wilson was published on the 5th October 1929. Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June, 1930, in the form of a White Paper and it was announced that they

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November, 1930. The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V. S. Srinivasa Sastri, P.C., C.H., as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastri in July, 1931.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932.

As regards the question of *Closer Union*, His Majesty's Government have accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time has not arrived for taking any far-reaching step in the direction of the formal Union of the several East African Dependencies.

There was no important development in regard to this question until 1935 when certain sections in Kenya attempted to revive the proposal for Closer Union. Early that year an unofficial conference of Europeans, held at Arusha, was reported to have expressed the view that since 1931 circumstances had changed so rapidly as to justify a reversal of the Joint Committee's decision and that immediate steps should be taken towards the Closer Union of East Africa. A "Memorandum on Union" was also forwarded to the Secretary of State for the Colonies by the European Elected Members' Organisation of the Kenya Legislative Council. His Majesty's Government did not, however, consider that there were adequate grounds for reopening an enquiry into the matters which had been so carefully investigated by the Joint Select Committee as recently as 1931. This decision is contained in Mr. Malcolm MacDonald's despatch, dated the 12th October, 1935, to His Excellency the Governor of Kenya which has been published in all the countries concerned.

Franchise.—As regards franchise, His Majesty's Government stated in the White Paper of 1930 that "His Majesty's Government are of the opinion that the establishment of a common roll is the object to be aimed at and attained, with an equal franchise of a civilization or education character open to all races." In 1931 the question of franchise was also referred to the Joint Select Committee of Parliament which was appointed to consider the question of Closer Union. After discussing the arguments that had been brought forward for and against a common electoral roll, the Select Committee stated in para. 100 of their report that it would be impracticable under present conditions to advocate the adoption of the system of common roll representation in preference to the existing system of election." The Secretary of State for the Colonies accepted the recommendations of the Joint Select Committee in the matter.

Highlands.—The Joint Select Committee of Parliament, which was appointed to consider the question of Closer Union in East Africa, had recommended that "in view of the nervousness among the native population as regards the land question, a full and authoritative inquiry should be undertaken immediately into the needs of the native population, present and prospective, with respect to land within or without the reserve held either on tribal or on individual tenure." In April, 1932, a Commission was accordingly appointed by His Majesty's Government and the terms of reference of the Commission included the following:

> 'To define the area known as the Highlands within which persons of European descent are to have a privileged position in accordance with the White Paper of 1923.'

The Commission in their report, which was published in May 1934, recommended that the boundaries of the European Highlands should be safeguarded by Order-in-Council so that the European community might have the same measure of security in regard to land as the Commission had recommended for the natives. His Majesty's Government announced that they accepted this recommendation of the Land Commission. The Indian community was perturbed by this announcement as the proposed Order-in-Council would give statutory effect to restrictions which were originally considered necessary on grounds of administrative convenience and representations were made to His Majesty's Government both by the Government of India and the local Indian community. No Order-in-Council had been promulgated till the end of 1937, but the position as it affects Indians appears clear from the following extracts from the speech of the Secretary of State for the Colonies made on the 9th July, 1936:—

> '(a) What is contemplated, arising out of the recommendations of the (Morris-Carter) Commission, is the issue of two Orders-in-Council. There are, of course, many other things arising out of those recommendations, but the points which have been raised are chiefly concerned with these Orders-in-Council. One of them is to define the boundaries of those parts of the Highlands which are to be set aside for non-native occupation, and (b) I want to make it clear that there is to be nothing in either Order imposing any legal disability against Indians or against any persons on the ground of race, colour, creed or anything else. Equally I want to make it clear that the existing administrative practice, which was first laid down by Lord Elgin is to be continued. I wish that to be understood clearly both in India and elsewhere. The existing administrative practice of the Kenya Government which has been followed since 1908 will continue. In the area demarcated as the European area not by law, not by anything in the Order-in-Council, but as a matter of administration that practice will continue in the future as in the past. There will be no legal colour bar.'

In spite of protests from the Government of India and the local Indian community, the Order-in-Council contemplated in the above announcement issued in February, 1939. Though the Order does not contain a definition of the 'privileged position' which persons of European descent are to have within the territorial limits to be included in the Highlands, His Majesty's Government have made it clear that there is no intention of changing the administrative practice which has been followed for many years with regard to alienation and transfer of land in the Highlands. This decision has caused profound disappointment to all sections of Indian opinion both in Kenya and in India, in particular because of the preference which it accords even to non-British subjects of European race.

Lowlands.—Subsequent to the announcement made in the House of Commons in 1924, in connection with the 'Lowlands,' the question of deputing an officer to examine these areas was considered by the Government of India who thought it inadvisable to proceed any further with the idea.

Apart from the major problems outlined above, other questions have also been causing concern to the Indian community in the colony. The most important of these are (i) the Ordinance to control and regulate the marketing of native Produce and (ii) the Transport Control Ordinance. The former Bill sought to regulate the selling and buying of native produce by such methods as limiting the number of licences and confining sales to specified localities so as to ensure control over quality. As a number of Indian traders were affected, representations were made to His Majesty's Government by the Government of India and the Bill was revised in certain respects and became law in 1935. It was brought into force from the 1st January, 1936.

The Kenya Transport Control Bill which was passed last year was intended to give effect to the recommendations of the Kenya Transport Co-ordination Committee which was appointed in 1935 to investigate and consider the desirability of co-ordinating and regulating all forms of transport in the colony. The Indian members of the Kenya Legislative Council objected to the principle of the Bill as in the attempt to prevent wasteful competition between the railways and other forms of transports in Kenya, they felt that the considerable interests of Indians in the transport industry would be affected adversely. The other main objections were directed against the composition of the Transport Licensing Board and the provision relating to the grant of exclusive licences. The Bill has now become law and an Indian has been appointed to the Transport Licensing Board.

In the latter half of 1938 and the beginning of 1939, the Kenya Indians were interested in (1) the Immigration of Jewish refugees, (2) the Kenya Immigration Restriction Ordinance and (3) the representation of the Indian community on the Kenya Immigration Board. All these three questions were connected with one another in some form. His Majesty's Government had under consideration a scheme for the settlement of a small number of Jews in the Kenya Highlands. The main objection of the Indian community was that it would accord to foreign subjects within a British Colony privileges which are denied to British Indian subjects. As His Majesty's Government were committed to a policy of settling Jewish refugees from Central Europe, it was not possible to meet the objections of the Indian community in the matter. To prevent an influx of destitute and undesirable foreigners into the Colony as a result of the international situation in Europe, an Immigration Advisory Board was established in October, 1938. The Board was to advise the Commissioner of Police on such matters as may be referred to it in connection with immigration into Kenya but it was not intended that it should consider or advise upon any aspect of Indian immigration. Nevertheless it was felt that the Indian community which is vitally interested in the composition of the population and the economic development of the Colony should be represented on the Board. Representations were made to His Majesty's Government in the matter and the result of the representations is awaited. The objections to the Kenya Immigration Restriction Bill centred round two provisions of the Bill:—(*i*) the provision authorising the Immigration Officer to require any intending immigrant, who is without any visible means of support or is likely to become a pauper, to give security by bond to an amount not exceeding £500; and (*ii*) the provision altering the period of 12 months, within which an intending immigrant has to prove that he is not a prohibited immigrant, to any period the Immigration Officer may fix in his discretion. Though these clauses were intended to apply only to immigrants from Europe, the Indian community thought that they might at any time be applied to Indians also.

Both questions have been settled satisfactorily. Indian representation on the Board has now been conceded and under the revised provisions all immigrants are divided into two classes: (*a*) those who will if necessary be received back by their country of birth or origin and (*b*) those who will not be so received back, the existing law being left practically unaltered in respect of the former category of persons. Indians therefore will be unaffected by this measure which received the Royal assent in May 1939.

Tanganyika.—In the adjoining mandated territory of Tanganyika, the Indian community were deeply concerned at the rumoured transfer of the territory to Germany. Their views in regard to this subject were communicated by the Government of India to His Majesty's Government. It was learned from His Majesty's Government that the rumours were without foundation.

Nyassaland and the Rhodesias.—The report of the Royal Commission which had been appointed in 1938 to inquire into the question of closer co-operation between Southern Rhodesia, Northern Rhodesia and Nyassaland was received and was under the examination of the Government of India but in view of the war the discussions have been suspended for the present.

Natal.—Out of a total population of about 38,000 Indian immigrants in Natal in 1937, approximately 27,000 or 71 per cent. are (according to the 1937 report of the Protector of Immi-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

grants in Natal, just published) in employment in the Provinces, and many, in addition, are farming on their own account and carrying on other trades. There is, however, considerable unemployment in and around Durban.

Of those in employment, the largest number, about 6,000, are in the sugar industry. The next largest number are in the corporate bodies, which provide employment for over 2,100. Miscellaneous industries and employment as domestic servants account for 5,650, and tea, coal and railways employ roughly 1,750.

The average rate of wages paid on the estate is 42*s.* 6*d.* per month, with food, accommodation, medical attention and medicine free of charge.

The total number of Indians employed in coal-mines in Natal during the year was 1,885, of whom 557 were men, 345 women and the rest children.

The wages on the lines remained about the same as before, namely, 1*s.* 6*d.* or 2*s.* 6*d.* per shift, with food, medicine, medical attention and quarters free.

The number of Indians in Natal on 31st December 1937 was approximately 171,000, of whom 38,000 were males, 28,000 females and the rest children. Of the 171,000 about 26,600 represent the original immigrants and 144,000 are Natal born.

There were 274 more births and 108 less deaths during 1937 than in the previous year, bringing the birth rate to 48·79 per mille and death rate to 14·15 per mille. The corresponding figures of 1936 were 48·84 and 15·31, respectively.

The death rate in 1937 is the lowest for the last six years. There were no arrivals during the year, emigration to Natal having been stopped by the Indian Act of 1911. The total number of Indian immigrants who returned to India during the year was 232, of which 110 were sent to India from different parts of the Union under the Assisted Emigration Scheme. The number of Indian children attending the schools, both Government and aided, is about 22,500 out of a total children population of 104,500, thus bringing the percentage to 21.

During the year there was a renewal of the agitation in Durban on the question of penetration of European areas by Indians. Protests were made by the Natal Indian Association in a letter to the Town Clerk, Durban, but at the suggestion of the Minister of the Interior who visited Durban it was agreed to establish more cordial relations between the European and Indian communities. A joint committee of representatives of the Durban City Council and the Natal Indian Association was accordingly formed. Apart from purchases of property the committee will deal with questions of Indian housing and provision of municipal amenities in Indian areas. Inaugurating the session of the committee the Agent-General to the Government of India, Sir Rama Rau, said that not only the Union Government but also the Government of India would watch with interest the results of this experiment.

(3) **Fiji and British Guiana.**—Emigration to Fiji was stopped in 1917, under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible, a renewal of emigration to the Colony, an unofficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fiji Government, arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January, 1920, and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March, 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that "the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji." In July, 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members, Messrs. Srinivasa Sastri and Hirdaynath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs. Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma, and Lieutenant S. Hissam-ud-din Khan did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji. Many arrived in India comparatively destitute; while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come. During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them. Admirable work was done among these distressed persons by the Emigrants. Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

In February, 1929, Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made, *inter alia*, for the election of three Indian members on a communal basis. On the 5th November, 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and, no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A fresh election was held during 1932 and as a result two Indian constituencies returned their representatives to the Council, but no candidate offered himself for election from the third constituency.

In 1935, the elected Indian members of the Legislative Council advocated a system of nomination in place of the system of election and the proposal was opposed by the local Indian Association. European opinion was divided. The Government of India supported the principle of election and made representations to His Majesty's Government. The decision of His Majesty's Government is contained in the despatch, dated the 20th July 1936, addressed by the Secretary of State for the Colonies to the Government of Fiji. The main points of the decision were :—

(*a*) the Fijian representatives should be selected as heretofore, *viz.*, by the Governor from a panel submitted by the Great Council of Native Chiefs ;

(*b*) some of the European and Indian members should be elected and the others nominated ;

(*c*) the circumstances were such as to make it impossible to arrange for representation of the three sections of the population by means of a general franchise. The Legislative Council should consist of the Governor, 16 official members, 5 European members (3 to be elected on a communal franchise and 2 to be nominated), 5 Fijian members (all to be selected as at present) and 5 Indian members (3 to be elected on a communal franchise and 2 to be nominated).

The Legislative Council as newly constituted met in September 1937.

Another important matter which is attracting attention is that of land tenure. Indians experience a number of practical difficulties connected with the leases of land and the administration of the land law and they have been brought to the notice of His Majesty's Government by the Government of India. In September 1936, the Council of Chiefs of Fiji agreed that all lands (including leases) not required for the maintenance of the Fijian owners should be opened for settlement ; that to further this end a Committee should be appointed to inquire into and to determine the amount of land needed for proper development by the Native owners ; and that all land (including leased) not so required should be handed over to the Government to lease on behalf of the Fijians.

In November 1939 the Government of Fiji published a Native Land Trust Bill to provide for the establishment of a Native Land Trust Board to administer all native lands in the colony and to give power to the Governor to appoint a Local Committee in any district to advise the Board on any matters affecting such land within the district. Under the Bill certain land is to be allocated for the exclusive use of Fijians and the remainder made available on lease for non-Fijians (including Indians). Government have been assured that Indians will be represented on the District Advisory Committees and that leases of non-reserved native land may be granted for periods extending up to 99 years. The Government of India made suitable representations on the Bill with a view to safeguarding legitimate Indian interests. The Bill with certain amendments passed its third reading in the Legislative Council on February 22, 1940.

On the subject of alleged discrimination in the Fiji Civil Service the Government of India have now been assured by His Majesty's Government that there is no rule preventing the appointment of an Indian as such to any posts in Fiji except those concerned solely with Fijian administration. The Colonial Government had under consideration a proposal to fix a quota for Indian emigrants but the matter has been held over for discussion with the Government of India after the war.

British Guiana.—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr. J. J. Nunan, Attorney-General, and Mr. J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

of Messrs. Pillai, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay: Diwan Bahadur P. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice-President; and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonization scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matter. Kunwar Maharaj Singh, M.A., C.I.E., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September 1925. His report was received on February 1st, 1926, and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled. The colonisation scheme has not yet come into operation as the Colonial Government are not in a position at present to afford the cost which it involves.

In March 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The changes eventually introduced by the British Guiana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

Nothing important about the Indian community in that colony was heard till September-October 1935, when there were labour disturbances on certain sugar estates. A Commission was appointed by the Governor to enquire into and report on (*a*) the causes which led up to the disturbances and (*b*), *inter alia*, the condition of labour on sugar estates; and to advise on the measures necessary to obviate the recurrence of similar disputes. From the report of the Commission, which was published in December 1936, it would appear that the disturbances were primarily of an economic character and were inspired by grievances and disabilities which the Commission found to be genuine and which were common to both African and Indian labourers, whether resident or non-resident. There is reason to suspect that the position of the Indian labourer has somewhat deteriorated in the last few years. The abolition of the indentured system was no doubt most desirable and constitutes a theoretical advance, but as things are at present the Indian labourer no longer enjoys the measure of security provided by the Immigration Ordinance in regard to pay, hours of work and other benefits and the supervision of the Immigration officers in his relation with the plantation authorities. In order to remedy this state of affairs, the Commission has recommended:

(*i*) the creation by Government of some authority with such powers as are considered necessary for the efficient safeguarding of the interests of both employed and employer; and

(*ii*) the revision of the provision of the Employers and Servants Ordinance in the light of more modern conceptions of the relations between employer and employed. As a result, the British Guiana Government has appointed a Commissioner of Labour and the other recommendations are, it is understood, still under consideration.

West Indies Royal Commission.—The decision of His Majesty's Government to appoint a Royal Commission to conduct a comprehensive survey of the social and economic problems affecting the group of the West Indian Colonies was announced by the Secretary of State for the Colonies in the House of Commons on the 14th June, 1938, in the course of the debate on the Colonial Office vote during which discussion largely centred around conditions in the West Indies. The actual terms of the Commission (which were announced in the House of Commons on the 28th July) were the following:—

> "To investigate social and economic conditions in the Barbados, British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad and Tobago, and Windward Islands and matters connected therewith and to make recommendations."

In view of the large number of Indians in Jamaica, Trinidad and British Guiana and the importance of the Indian case in these territories being properly presented before the Royal Commission, the question of safeguarding the interests of Indians engaged the attention of the Government of India. As a result of representations made by them, they were able to secure the approval of His Majesty's Government to the deputation of an officer to represent their views before the Commission and to assist Indians in the West Indies in the presentation of their case. Mr. J. D. Tyson, C.B.E., I.C.S., who was secretary to the Rt. Hon'ble V. S. Srinivasa Sastri, P.C., C.H., when the latter went as the first Agent in the Union of South Africa, and subsequently represented the Government of India before the Joint Select Committee in South Africa on the Transvaal Asiatics Land Tenure Amendment Bill in 1930, was the officer chosen in this connection.

The Commission concluded taking evidence towards the end of March 1939 and the report was made available to the press in October 1939. Only a summary of the recommendations of the Commission were available; the report will not be published by His Majesty's Government for the present. The Commission recommended that some officer or officers, preferably members of the labour department should specialise in East Indian questions and if suitable candidates are forthcoming should be East Indians. The Commission also recommended that the possibility of the appointment of suitable East Indians

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

to posts in the Government service should be carefully borne in mind by Colonial Governments. They expressed sympathy with the complaints regarding the arrangements for legitimisation and validation of East Indian marriages and recommended that these marriages should so far as the law is concerned be put on exactly the same footing as other marriages.

In effect the commission conceded practically all the demands to which Indians themselves attached importance. The general recommendations which relate to matters of education, housing and labour administration appear satisfactory and likely to be of benefit to Indians. As an immediate step towards implementing the recommendations of the Commission His Majesty's Government have announced their decision to increase the annual allotment to the Colonial Development Fund from £1,000,000 to a maximum of £5,000,000 for ten years and to sanction annually a grant up to £500,000 for the purpose of colonial research. Though the Commission made no recommendation for the appointment of an Agent of the Government of India in the West Indies the matter continues to engage the attention of the Indian Government.

During 1939-40 Major G. Orde Browne was deputed by the Secretary of State for the Colonies to investigate and report on labour condition in the West Indies. The Government of India have taken steps to ensure that any measures undertaken to ameliorate the condition of labour as a result of Major Orde Browne's recommendations should reach also the Indian labour population in British Guiana, Trinidad and Jamaica. The Government of India have suggested with reference to Indian labour in Trinidad that the Industrial Adviser should also concern himself with the evolution of machinery for collective bargaining among rural labour as in the sugar industry; and in regard to educational institutions in British Guiana, that the Colonial Government should make every endeavour to assume direct responsibility for their management and control.

(4) OTHER PARTS OF THE EMPIRE.

Ceylon and Malaya.—The Government of India maintain their own agents in Ceylon and Malaya.

The question of the fixation of a standard minimum wage for India estate labourers in Ceylon and Malaya has been the subject of negotiations between the Government of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act, 1923.

Ceylon.—A satisfactory settlement regarding the standard wage and other outstanding questions affecting the interests of labourers was arrived at in 1927 and the legislation to give effect to it was passed by the Ceylon Legislative Council in December, 1927, as the 'Indian Labour Ordinance No. 27 of 1927.' The standard rates of wages agreed upon were introduced with effect from the 1st January, 1929. In view of the considerable fall in the cost of living and the precarious condition of the rubber and tea industries during the slump, the rates of wages in mid- and low country estates were reduced early in 1932, those in up-country being left intact. A further reduction in wages took place in 1933 in view of the deterioration in the position of the rubber and tea industries. While agreeing to these proposals, the Government of India stipulated that the reductions should be treated as strictly temporary and emergent and revision of rates on the upward grade should be considered as soon as the industries revived.

As soon as there was a revival of these industries towards the middle of 1933, the Government of India pressed for the restoration of wage cuts and the rates in force prior to the reductions of 1932 were restored with effect from the 1st June, 1934.

Since September, 1935, there has been little or no recruitment of Indian labour owing to the depression in the tea and rubber industries. In September, 1937, with an increase of prosperity in these two industries, the demand from the planters for extra labour became insistent. Their requirements were estimated at 20,000 labourers, but the Ceylon Government decided to permit the recruitment of only 5,000 as they were anxious to absorb suitable labour available for employment. The Government of India did not feel justified in permitting recruitment unless some revision of wages was promised and Indian estate labourers were accorded the village Committee franchise. The position in regard to the village Committee franchise is explained in a later paragraph and the question of the revision of wages was receiving the attention of the Wage Boards towards the end of 1938. Meanwhile there was no recruitment of Indian labour for the Ceylon estates.

In 1936, as a result of a resolution passed in the State Council, the Ceylon Government appointed an Immigration Commission to consider and report upon the problem of non-Ceylonese workers in Ceylon, particularly with a view to the restriction and effective control of immigration into Ceylon of workers from other countries, including assisted estate labourers. Indians form the majority of the immigrants in Ceylon and they presented a memorandum to the Immigration Commissioner. The report of the Commissioner was published in April, 1938. The Commissioner came to the conclusion that, although in the absence of statistics it was not possible to estimate the extent of Indian immigration, the immigrant came to share the work when it was available and when it was not, he returned to his home; that the immigrant workers made possible an economic and general advance which could not have taken place without them; that Indians did not undercut wages; that the existing means of control of immigration were sufficient and that the restriction of Indian immigration for the protection of Ceylonese employment was not practicable. The report is under the examination of the Ceylon Government.

Another piece of legislation affecting Indians in Ceylon was the Village Communities (Amendment) Ordinance. The amendment sought to enfranchise all persons of either sex other than Indian estate labourers thereby giving the vote to Europeans and Burghers who were previously excluded. This discrimination against Indians roused protest both in India and in Ceylon.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

With the object of removing the charge of obvious racial discrimination, the Standing Committee of the State Council made an amendment to the proposed Bill which had the effect of extending the franchise to those members of excepted classes, *i.e.*, (Europeans, Indians and Burghers), who pay land tax, and possess a specified area of land (5 acres). The practical effect of this would be to enfranchise the great majority of Europeans and Burghers and leave practically the entire Indian estate labour population without the vote. A further protest was made to the Ceylon Government by the Government of India, who decided to stop the recruitment of labour for Ceylon until this question was satisfactorily settled. The Bill was passed by the State Council but was reserved by His Excellency the Governor of Ceylon for the signification of His Majesty's pleasure.

With a view to meeting the charge of racial discrimination, the relevant clause of the Bill was amended so as to exclude all labourers resident on estates, whether Ceylonese or Indian, from the village committee franchise. The Original Bill and this amendment became law on 1st January, 1939 and it is felt that though *de jure* discrimination against Indians has been removed, *de facto* discrimination remains as a very large body of Indian estate labourers till in practice be excluded from the village franchise while the effect upon the Ceylonese will be negligible.

Indo-Ceylonese relations during 1939-40 showed no improvement and feeling was further embittered by the recalcitrant attitude displayed by the Ceylon Government. Despite repeated appeals for delay from the Government and people of India the policy of so-called voluntary repatriation was brought into force by the Ceylon Government on August 1, 1939. About 600 Indian ex-employees of the Ceylon Government left the island with the promise of a bonus on reaching their homes. Attempts were continued to squeeze out Indians engaged in other walks of life, such as teachers and municipal servants. The report of the Jackson Immigration Commission, which found that far from causing any economic injury Indian immigration had been beneficial to Ceylon met with hostile reception at the hands of the Sinhalese. In view of Ceylon's attitude the Government of India decided to prohibit further migration of unskilled labour from this country to Ceylon.

The Shops Regulation Ordinance came into force from August 1, 1939 but as there was great difficulty in fixing closing hours of shops that portion of the ordinance which related to closing hours was not enforced. The draft of a Fisheries Ordinance was published by the Ceylon Government in 1939, its object being to prohibit any non-Ceylonese from taking fish for profit in Ceylon waters or from employing any other person for such purposes except under the authority of a fishing license.

The dismissal of Indian daily-paid staff in Government Departments took place on a large scale and of 1,354 Indians with less than five years service 1,225 have already been discharged. Of persons with more than five years service 1,323 have expressed their willingness to retire under the voluntary scheme. In view of these developments negotiations for a trade agreement with Ceylon were abandoned.

One result of the uncertainty engendered by the Ceylon Government's measures is the spread of labour unrest on estates. Several strikes took place and police firing on the Mooloya Estate which resulted in the death of one labourer led to important repercussions in the Ceylon State Council. A commission of inquiry was appointed to investigate the incident.

Indo-Ceylonese relations during 1940-41 showed no improvement. Following the failure of the exploratory Indo-Ceylon conference held in Delhi in November 1940, the Ceylon Government, despite protests from India and in the face of the disapproval of Ceylon's Governor, Sir Andrew Caldecott, sponsored two Bills to regulate the immigration and registration of non-Ceylonese in the island. The Bill, after passing two readings in the Ceylon State Council, was referred to the Standing Committee.

Malaya.—In Malaya, standard wage rates which were considered suitable by both the Indian and Malayan Governments were introduced in certain 'Key' areas in 1928. The rates fixed, however, were reduced by 20 per cent. with effect from the 5th October, 1930, owing to the acute depression in the rubber industry. The Government of India accepted the proposals for the reduction in the wages but they represented to the Malayan Governments that all Indian labourers who wished to be repatriated, either because they were thrown out of employment, or because they were unwilling to work on wages lower than the standard rates, should be repatriated free of cost. As a result of this suggestion, nearly 73,000 Indians obtained free repatriation between August and December, 1930. All recruitment of labour from India to Malaya, moreover, was stopped and only such persons were assisted to emigrate to Malaya as had left their families there. The depression in the rubber industry continued throughout 1931 and 1932, but towards the end of 1933 there was an upward trend in rubber prices. The figures of repatriation showed a steady decrease and it was felt that there might be a shortage of labour if prices continued to rise. The Malayan Governments accordingly requested the Government of India to permit the reopening of voluntary assisted emigration from South India to Malaya which was stopped in 1930. Assisted emigration was resumed in May, 1934 and was regulated by a "quota" system subject to certain safeguards. This system was continued in 1934 and 1935 and was stopped from 1936 when voluntary assisted emigration was allowed without a quota. In 1936 the Government of India sent a deputation consisting of the Rt. Hon. V. S. Srinivasa Sastri, P.C., C.H., with Mr. G. S. Bozman, I.C.S., as his adviser, to Malaya to examine the condition of Indian labourers in Malaya with special reference to the rates of wages. During the visit of the Deputation, the Malayan Governments decided to restore half the cut which had been imposed in 1930 in so far as labour employed by them was concerned. The estates immediately followed suit and the standard rates in force on the estates were fixed at 45 cents for men and 36 for women. There was wide-spread labour unrest towards the end of 1936. The Chinese labour on estates and mines struck work and as a result secured revision of wage rates. Over 12,000 Indian labourers employed by the Singapore Municipality also struck work in November, 1936, and the Munici-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

pality decided to give a minimum basic wage of 52 cents a day to unskilled labourers, with free quarters and corresponding increases in the higher rates of wages of all labourers with effect from the 1st March, 1937. The Deputation returned to India in January, 1937, and recommended the immediate restoration of the wages of Indian labourers to the 1928 level. As a result of the correspondence between the Government of India and the Malayan Governments the latter restored the rates of 50 cents for men and 40 cents for women with effect from the 1st April 1937.

This restoration of wages was however short-lived. The condition of the rubber industry deteriorated and the Malayan Government reduced the wages of the Indian labourers by 10 per cent. with effect from the 1st May, 1938 and contemplated a further reduction of 10 per cent. from the 1st August, 1938. The Government of India asked for a statement of the reasons for the first reduction and requested that, in the meantime, the reduction of wages should be postponed. The second reduction was not brought into force and the Government of India prohibited, with effect from 15th June, 1938, all assisted emigration to Malaya for the purpose of unskilled work.

With a view to settling the differences that had arisen as a result of the stoppage of emigration to Malaya and in order to discuss other outstanding questions, the Government of India accepted the suggestion of the Malayan Governments that a delegation from Malaya should visit India. This delegation came to India in January, 1939, and discussed the various points of interest with the Government of India. The Members of the Standing Emigration Committee also met the members of the Malayan delegation and heard their views. The main question discussed was that of the rates of wages of Indian labourers in Malaya. Certain proposals for a recalculation of standard wages, partly on a fresh basis and partly on account of the changed circumstances, were made by the Government of India. The Malayan Delegation, after stating certain objections to these proposals, agreed to place them before the Malayan Governments for examination on their return to Malaya. The Malayan delegates also agreed to have the suggestion of the Indian representatives on certain other points, *e.g.*, the status of Indians in the Malayan States, the provision of adequate educational facilities for Indians of all classes, etc., examined by their Government. Future negotiations were to be continued by correspondence and the Government of India have addressed the Malayan Government on all the points raised.

The Government of India are still in correspondence with the Malayan Government on the question of the wages of Indian labourers. The outbreak of war resulted in a considerable increase in the price of rubber and the employers of Indian labour voluntarily raised the wages of Indian labourers to 50 cents for men and 40 cents for women with effect from October 1, 1939. The Government of India are still in correspondence with the Malayan Government on the question. The Malayan Government have published two Bills to provide for : (*a*) the establishment of an industrial court and of courts of inquiry in connection with trade disputes, and (*b*) the registration and control of trade unions. A number of suggestions were made by the Government of India in regard to these bills with a view to safeguarding the legitimate interests of Indian labourers. Not all the suggestions were accepted by the Malayan Government and suitable representations have since been made to the Secretary of State for India in this matter.

Burma.—With the separation of Burma the position of Indians in that country had to be watched with special care and attention. Between July and September, 1938, Indians in Burma passed through very anxious times. Anti-Indian riots of an alarming character broke out in Rangoon on the 26th July and continued till the 1st August. As the news spread to the districts and villages, rioting took place in various districts towards the end of July and the beginning of August. In a few places rioting continued till September. Though the first outbreak of riots was brought under control, there was acute tension between the Burmese and the local Indian communities which manifested itself in a second outbreak in Rangoon early in September. Indian life and property became insecure during this period and about 11,000 Indian refugees were repatriated to India by the Shipping companies, by private relief committees and at the expense of the Government of Burma. The total number of Indians killed and injured during the riots is estimated at 164 and 711 respectively. The loss of Indian property on account of the riots is estimated between 18 and 54 lakhs.

The serious situation in Burma hastened the decision of the Government of India to send out their Agent whose appointment was already under contemplation. Mr. C. A. Henderson, C.S.I., I.C.S., a senior I.C.S. officer from Madras, was temporarily appointed as Agent and he took over charge of his duties towards the end of September 1938.

The Government of Burma appointed on the 22nd September a Committee to enquire into the riots and the personnel and the terms of reference are given below :

Personnel.—(1) The Hon'ble Mr. Justice H. B. L. Braund, M.A., Bar-at-Law (*Chairman*); (2) U. Po Han, B.A., Bar-at-Law, member of the Public Services Commission, Burma; (3) Senator A. Rahim of Maymyo; (4) U Khin Maung Dwe, Pleader, Mandalay; and (5) Dr. M. A. Rauf, B.A., B.C.L., LL.D. (Bar-at-Law)—*Members.* F. S. V. Domison, I.C.S.—*Secretary.*

Terms of reference.—

(1) to inquire into and report on

  (*a*) the causes of the recent riots in Burma;

  (*b*) the measures and actions taken by the police and civil officers during the riots; and

  (*c*) the loss of life and property and the desecration and destruction of religious edifices and buildings during the riots.

(2) to make recommendations for the prevention of similar communal or religious disturbances.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

In view of the importance and urgency of removing the underlying causes of the riots the Committee submitted an Interim Report which was published in January, 1939. According to the Interim Report, though the immediate cause or the occasion of the outbreak of the riots was the publication, or rather the discovery, of Maung Shwe Hpi's book which is alleged to have insulted the Buddhist religion, the real causes were political, economic and social and lay deeper. The unsatisfactory conditions of land tenure and the resultant agrarian discontent; the feeling of uneasiness which exists in the mind of the average Burman as to the future course of Indian immigration into Burma and of its effect upon the economics and social life of the Burmese; marriages of Burmese women with Indian moslems and the activities of the organisations which have for their motto 'Burma for the Burmese' were, according to the Committee, some of the more important causes of the riots of 1938. The Final Report of the Inquiry Committee was published during April, 1939, and the Recommendations made in these two reports are receiving the attention of the Government of India. The questions under active consideration are (*i*) compensation for loss of Indian life and property and (*ii*) Indian immigration into Burma.

The general improvement in Burma was unfortunately marred in the closing days of January 1940 by a communal riot in Rangoon. The casualties were estimated at 15 dead and about 150 injured. The tension did not spread into the interior and peace was restored in less than a week. In this matter Mr. R. H. Hutchings, C.I.E., I.C.S., who had succeeded Mr. C. A. Henderson, C.I.E., I.C.S., as Agent of the Government of India in Burma in September 1939, had the prompt and effective co-operation of the Rangoon City Police and the Government of Burma.

In view of the wide-spread uneasiness about Indian penetration into Burma revealed by the Riot Inquiry Committee in 1939 the Government of Burma decided to appoint a commission headed by the Honourable Mr. J. Baxter and containing one Indian representative, Mr. Ratilal Desai, to inquire into and report on the volume of Indian immigration and its ramifications. The Commission has not yet completed its work.

During the latter half of 1939 the attention of the Indian community in Burma was focussed on the land Purchase Bill which sought to establish the principle of individual and independent propriety in the soil; on the Rangoon Municipal Amendment Bill, 1937 which aimed at remedying the inadequate representation of Burman interests in the Municipality of Rangoon; and on the administration of the Tenancy Act, 1938 which affected the Nattukottai Chettyars Association. Representations were made by the Government of India to the Burma Government on all these matters.

In April 1941 an Indo-Burma Trade Agreement was signed at New Delhi under which, subject to the provisions of the agreement, the contracting parties undertook to accord each other the most favoured Empire nation treatment.

The more important items of trade affected and the new rates of duty applicable to goods imported into India are as follows:—Rice and other grains and pulses, timber, raw rubber and lubricating, fuel and batching oils to be admitted free of duty; duty to be levied at 5 per cent. *ad valorem* on potatoes, cotton fabrics, cutch and gambier, and 10 per cent. on candles, wax and grease, turpentine, non-essential oil seeds and cigars; betelnuts to pay duty at 20 per cent. *ad valorem*, while a duty of one anna per pound was charged on unmanufactured tobacco. Motor spirits and kerosene were already liable to full duty.

In accordance with the terms of the revised Trade Agreement, no duty was levied in India on imports of starch from Burma. The general principle underlying the agreement was that goods of Indian and Burmese origin enjoyed in the market to which they were exported a margin of preference of not less than 10 per cent. over similar articles liable to duty at the standard rate.

In June 1941 the Government of India sent a delegation to Burma to negotiate an agreement over immigration of Indians into Burma. The delegation consisted of the Hon. Sir Girja Shankar Bajpai, Mr. R. H. Hutchings, Agent to the Government of India in Burma and Mr. G. S. Bozman, with Mr. V. Viswanathan, I.C.S., as Secretary. Indian immigration to Burma is regulated by the Burma Immigration Order since the separation of Burma from India. In 1941, a twelve months' notice terminating the Order was given by the Burma Government. A new agreement, therefore, has to be reached by March 31, 1942.

Under the Indo-Burmese Immigration Agreement Signed in July, 1941, it was agreed that workers would not be allowed into Burma without either an "A" or "B" permit, and as "A" permits cost Rs. 500 this will virtually exclude unskilled labourers. "B" permits were to be valid for not more than three years, but could be extended with the Burma Government's approval to not more than 9 years in all. A literacy test was laid down for "A" permit. Permits would be limited to quotas fixed by the Government of Burma on the recommendation of an Immigration Board on which Burmans, Indians and Europeans were to be represented. In addition to the repatriation and entrance fees totalling Rs. 32, an unskilled labourer was required to pay a residential fee of Rs. 5 a year and extra fees for admitted dependants. Skilled workers were subject to higher levies. Immigrants who have resided in Burma for 7 years between 1932 and 1941 were to be treated as privileged and given the right to further employment without the time limit. The agreement met with hostile criticism in the Indian press generally.

Zanzibar:—The small Protectorate of Zanzibar, consisting of the two islands of Zanzibar and Pemba, has an Indian community of nearly 15,000 out of a total population of 235,000. These Indians are mostly traders, and the trade in cloves—of which Zanzibar furnishes more than 80 per cent. of the world's supply—is largely in their hands. No problems of any magnitude faced this community until July 1934, when a group of Decrees regulating the trade in cloves and prohibiting the free alienation of land by Africans and Arabs to others was passed by the Legislative Council of Zanzibar and received the assent of H.H. the Sultan.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

2. So great was the apprehension of the Indian community in regard to these measures that, after an unsuccessful attempt to have their operation postponed, the Government of India deputed Mr. K. P. S. Menon, I.C.S., to visit Zanzibar and examine the effect of the Decrees on Indian interests. Mr. Menon expressed the opinion that (*i*) the clove legislation, *i.e.*, the Clove Growers' Association Decree and Clove Exporters' Decree, and (*ii*) the Land Alienation Decree, were objectionable from the point of view of the Indian community. In regard to (*i*) he stated in his Report, which was published in January 1935, that its effect would be to drive from the market most exporters of cloves and also middlemen in the internal market, who as already explained were almost entirely Indians.

3. After consideration of Mr. Menon's recommendations and the comments of the late Resident of Zanzibar thereon, detailed comments on the Decrees were communicated to His Majesty's Government by the Government of India. Eventually, as a result of their representations, His Majesty's Government deputed Mr. B. H. Binder, a Chartered Accountant, to Zanzibar in April 1936 to review the position of the Zanzibar clove industry. With the concurrence of His Majesty's Government the Government of India deputed Mr. G. S. Bozman, I.C.S., to act as an observer in connection with the enquiry.

4. Mr. Binder's Report was published in November 1936 and he made the following recommendation for the control of the clove trade with the object of securing a fair price to the producer and preventing wide fluctuations of prices.

(*i*) **Internal marketing.**—The purchase of cloves should be restricted to licensed buyers, a sole licence to buy and receive deposits of cloves being in the first instance granted to the Clove Growers' Association. The Association should fix purchase prices according to quality from time to time, if possible for each season, and in so doing should take into account the profit or loss on each year's working. The Association should have the power to appoint district representatives and local agents for purchasing cloves from the growers, to be selected from existing local dealers and shopkeepers irrespective of nationality.

(*ii*) **Export trade.**—No sales should be made by the Association except for export and to licensed exporters. The Association should not export direct unless oversea buyers desire to buy direct or other circumstances arise which necessitate this course. The right to limit the number of licensed exporters should remain but the licence fee should be reduced to a sum which would be within the means of the small exporter and the levy on the export of cloves should be abolished.

(*iii*) **Advisory Committee.**—Mr. Binder recommended the establishment of an Advisory Committee, to consist of two representatives of growers, one for Zanzibar and one for Pemba, two representatives of exporters and one of the C.G.A. to confer from time to time with the Board of the Association and to discuss the purchase and sale prices to be fixed.

5. Mr. Binder's recommendations were opposed both by the Indian community in Zanzibar and public opinion in India. Legislation which substantially gave effect to these recommendations was, however, passed in the shape of the Clove (Purchase and Exportation) Decree, and came into force on the 1st August 1937. As a result of representations by the Government of India, safeguards were provided in the form of (*i*) an assurance that all Indians previously engaged in the internal trade who applied for them would be given buying agent's licenses and (*ii*) Indian representation on the Board of Management of the C.G.A. to the extent of a total membership of seven, and on the Advisory Committee to the extent of two members out of six. These modifications, however, did not satisfy the Zanzibar Indian community, who refused to nominate their representatives, and organised an almost complete boycott of the clove trade, both in the internal market and on the export side. Their sympathisers in India also organised an equally effective boycott of imports of Zanzibar cloves into this country; in this connection it must be remembered that over 26 per cent. of the cloves exported from Zanzibar normally come into this country, and that India is almost the sole market for cloves of the best quality.

6. The whole question of the clove trade was now re-examined by the new Resident in the light of the boycott and, following representations by the Government of India, the Government of Zanzibar, with the approval of the Secretary of State for the Colonies, prepared a modified scheme for the control of the clove trade. Details of this scheme were explained in a memorandum which was published simultaneously in Zanzibar and India on the 3rd March, 1938. The main feature of the scheme was the withdrawal of the monopoly of the Clove Growers' Association in the internal market. Any licensed dealer was to be free to purchase cloves, either from producers or from other licensed dealers, at prices to be arranged between themselves and to store cloves as long as they wished. Producers indebted to Government under the Land Protection (Debt Settlement) Decree (explained in paras 10 and 11 below) were to sell only to the Clove Growers' Association, but other producers were to be free to sell their cloves to the Association or to any licensed dealer. All cloves were to pass through the Association, before ultimate export, but the Association itself was not to sell to principal overseas markets as long as the normal flow of exports was maintained.

7. The Government of India were of opinion that the proposals were not free from certain features held to be objectionable by local Indians and suggested that the possibility of evolving a satisfactory formula acceptable to them should be explored by means of a conference at which alternate proposals and matters of detail could be discussed. The Government of India also offered to depute an officer to render all assistance in effecting a settlement, if the proposal found favour with the Zanzibar Government. This was readily acceded to by them and the Government of India selected for this purpose Mr. G. S. Bozman, I.C.S. (who had been deputed to Zanzibar in 1936 in connection

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

with Mr. Binder's enquiry)—a choice which was welcomed by the Zanzibar Indian National Association.

Mr. Bozman reached Zanzibar in the middle of April, 1938. Though the outlook for an amicable settlement seemed rather gloomy at various times during the negotiations, it became possible to announce an agreement on the 5th May, thanks to the co-operation of the local Indian community and the accommodating spirit of the Zanzibar Government.

8. The main objections of the Indian community to the original proposals were (*i*) that participation in the export trade was very much restricted, (*ii*) that freedom of purchase in the internal market was permitted only with producers not indebted to Government, and (*iii*) that the proposed transport scheme for the conveyance of cloves from producers was liable to be used as an inducement to attract all sale of cloves to the Clove Growers' Association. According to the compromise arrived at, exporters are free to purchase up to 50 per cent. of the quantity to be exported from other than the Association's stocks, so that half the export trade is not subject to control. In the view of the Zanzibar Government this measure of control could not be dispensed with if export prices are to be maintained at a stable level. As regards the internal market, producers indebted to Government are under obligation to sell to the Clove Growers' Association only so much of their stocks as will set off the instalment due to Government under the debt redemption scheme. Under the modified transport scheme, cloves will be brought to market centres where dealers and the Glove Growers' Association will have an equal chance with the producer. The agreement has been given effect to by the Clove Decree, 1938, and so far has been working smoothly.

9. Closely allied with the control of the clove trade were the problems of indebtedness and the restrictions on the alienation of land. The land alienation Decree passed in 1934, besides restricting the passing of land out of the hands of the Arab and African plantation owners into those of Indians, established, for one year in the first instance, a moratorium on debts secured on land mortgage. This moratorium was later extended from time to time, pending a settlement of the whole problem of indebtedness. Mr. Menon's inquiries in regard to these questions also discussed a position unsatisfactory from the Indian point of view. After consideration of his recommendations the Government of India suggested to the Government of Zanzibar that the position was such as to require review. The latter agreed to make a fuller investigation of the indebtedness question, and appointed a Commission for the purpose. This Commission, which included one Indian member (Mr. Tayabali Rajabali), produced a report which on the whole supported the position taken up by the Indian community in this respect. The Government of Zanzibar, however, found themselves unable to accept the report as it stood and formulated alternative proposals.

10. Representations were made by the Government of India and after considerable discussion, a Bill drafted by the Attorney General of Zanzibar in consultation with Sir Ernest Dowson was passed into law as the Land Protection (Debt Settlement) Decree, which came into force on the 1st December 1937. The principal features of the scheme embodied in the Bill are :—

(*a*) Adjudication of the debt with a view to ascertaining the actual amount lent (or value of goods delivered on credit) and allowing a fair rate of interest thereon.

(*b*) Valuation, by an officer appointed by Government for the purpose, of both mortgaged lands and lands sought to be attached by unsecured creditors.

(*c*) The Government to pay off the creditor to the extent of the value of the land threatened, and to assume the position of mortgagee, in respect of the amount paid.

(*d*) Where the value of the land as estimated by the officer appointed to value it is insufficient to satisfy the debt, the creditor will be free to challenge the valuation either by instituting a suit for foreclosure or sale or by applying for an order for sale or attachment

(*e*) On any such proceeding being taken, the Court will in the first instance proceed to value the property in such manner as it considers proper, unrestricted by the rules contained in the Bill which govern the actual valuation.

(*f*) The Court's valuation must not be less than the official valuation. If it is greater the Government must give effect to it, unless the debtor himself prefers that the proceedings against his land which have commenced shall take their ordinary course.

(*g*) Repayment by the debtor of the amount advanced by the Government on his behalf and interest thereon to be effected by suitable instalments having due regard to the necessity of leaving means at his disposal to provide for the proper husbandry of the land and for the livelihood of himself and his family.

The moratorium imposed by the Land Alienation Decree of 1934 was lifted at the same time. The new scheme has, on the whole, met with a favourable reception from all communities in the Protectorate.

The decree was assented to by the Sultan on June 16, 1939. From information received from the Indian Trade Commissioner in East Africa the Government of India understand that the clove agreement continues to work smoothly. So far as can be judged from the figures of total clove exports from the Protectorate and the business handled by Indian firms, Indians have recovered the full share in the trade which they had in 1934 and there is no doubt that this position is a direct outcome of the agreement.

Mauritius.—In April 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an Officer for the purpose and to give him all facilities; and in December, 1924, an Indian Officer of Government, Kunwar (now Sir) Maharaj Singh, left India to conduct the necessary inquiry.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Sir Maharaj Singh's report was published by the Government of India in August 1925. The various recommendations made in the report were commended to the consideration of the Colonial Government.

In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius, *viz.*, that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population resident in the Island, the Colonial Government expressed their willingness to give effect to several of them.

The condition of Indians in this Colony continued to remain satisfactory till 1937 when there were labour disturbances on certain sugar estates employing Indian labour. The Colonial Government appointed a Commission to enquire into and report on the disturbances. The commission reported during 1938 and the most important recommendations of the Commission related to the necessity for the formation of a Department of Labour and the enactment of suitable labour legislation in place of the Labour Ordinance of 1922 which mainly dealt with indentured labour. Both recommendations have been given effect to and the Labour Ordinance of 1938 which closely follows the Malayan Labour Code should prove of considerable benefit to the Indian labourers, a large number of whom are employed on sugar estates. The Industrial Associations Ordinance of 1938 provided for the regulation of conditions of employment, the establishment of machinery for the peaceful settlement of disputes and generally the formation of industrial Association. This Ordinance, it will be observed, provides for collective bargaining by Industrial labourers.

It was learned that the Colonial Government in agreement with the local merchants had instituted a scheme for the licensing of rice importers—the rice import trade is chiefly in the hands of Indian merchants—under which each licensee is required to set aside in the Government granary not less than 20 per cent. of each consignment imported at any one time so as to serve as a reserve stock. No complaints have reached the Government of India regarding this scheme.

Canada and Australia.—The present position of Indians in the Dominions is that under the Canadian Dominion Election Act, Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces. In the province of British Columbia, Indians do not enjoy the provincial or the Dominion franchise and efforts so far made to remove this disability have not been successful. In New Zealand, Indians enjoy the franchise on the same footing as all other British subjects. In Australia, sub-section (5) of section 39 of the Commonwealth Electoral Act, 1918-24, was amended in 1925, by adding after the word "Asia" the words, "except British India." This measure gives the Commonwealth franchise to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr. Sastri on the occasion of his visit to Australia in 1922. As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Government of India to the Prime Minister of Australia, the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State. It was, therefore, in Western Australia alone that Indians did not enjoy the suffrage in respect of election for the Lower House. This disability was also removed at the end of 1934. By Acts which have recently been passed by the Commonwealth Parliament, British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics. Old Age Pension is payable to men above 65 years of age, or above 60 years, provided such persons are of good character and have resided continuously for at least 20 years. An Invalid Pension is obtainable by persons, who, being above 16 years of age and not in receipt of an Old Age Pension, have whilst in Australia, become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind, provided they have resided continuously in Australia for at least five years.

Maternity allowance to the amount of £5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant on the Commonwealth or intends to settle there. This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government.

Indians in Great Britain.

In the middle of the nineteenth century the Parsee community, in the persons of the late Dadabhai Naoroji and other members of the firm of Cama & Co., led the way in the sojourn of Indians in England for business purposes. This lead it has since maintained, though there are both Hindu and Mahomedan business men firmly established there. Nor are the professions unpresented, for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth. The number of the latter, especially Parsees, is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. Since 1910 six Indians—the late Mr. Ameer Ali, the first Lord Sinha, the late Sir Binode Mitter, the late Sir Dinsha Mulla, Sir Shadi Lal and Mr. M. R. Jayakar—have served on the Judicial Committee of the Privy Council. Three Indians are Advisers to the Secretary of State for India. In 1919, the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government.

India House.

High Commissioner for India.—This post was first established in 1920 and its various permanent incumbents have been :—

Sir Wm. Meyer, K.C.S. (Retd.), 1920-22. Sir Dadiba Merwanjee Dalal, 1923-24. Sir Atul Chandra Chatterjee, 1925-31. Sir Bhupendra Nath Mitra, 1931-36. Sir Firozkhan Noon, from 1936.

In March, 1930, the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to the new India House in Aldwych, erected and furnished at a cost of £324,000. The design of this noble building, which has a frontage of about 130 ft. opposite the Waldorf Hotel, was the work of Sir Herbert Baker, A.R.A., with Dr. Oscar Faber as consulting engineer. Although expression of the Indian character of the building is mainly found in the interior, the architect has given to the details of the external elevation, by means of carving, heraldry, and symbolism an individuality that proclaims it the London house of India. Including basement and mezzanine floors, there are twelve floors in all, the available space for clerical work alone being between 50,000 and 60,000 ft. The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft.

On the ground floor there is a great hall for exhibits of the products and art wares of India. This hall is carried up two floors, the upper floor being represented by a wide gallery, and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits. From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor. This gallery in its turn leads to a high vaulted library and reception rooms, and the central portion of the library provides accommodation for large receptions on special occasions.

The staircase, exhibition hall, octagonal hall and library markedly express the Indian character of the building. The walls of the staircase and the halls are of red stone similar in appearance to the Agra and Delhi sandstone, carved and pierced in the geometrical patterns of the *jali* in Indian architecture. Such of the carving as could be completely separated from the structure was actually worked at New Delhi by Indian workmen from Makara marble. The use throughout of Indian hardwoods, chiefly gurgan, for flooring obviates the need for any floor covering. From basement to roof scarcely any wood of non-Indian origin was employed. For panelling and decorative purposes in all parts of the great building silver gray, koko, laurel and the beautiful dark red padouk have been used. The domes and vaults of the building have been embellished by mural paintings, the work of specially selected Indian artists. The water supply is entirely independent of municipal service, being obtained from two artesian wells sunk some 460 ft. below the basement, where the central heating apparatus is installed.

The Indian Trade Commissioner and his staff are at India House, with all other departments of the Office of the High Commissioner excepting the Stores Department which was housed at the depot off the Thames at Belvedere Road, Lambeth.

The Students.

Under normal conditions it is the student community which constitutes the greatly preponderating Indian element and creates a constant problem. Its numbers multiplied ten or twelve fold in the quarter of a century before the 1914-18 war. After a very considerable temporary check caused thereby the numbers rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ordinary graduate or under-graduate student, there are some youths of good family, including heirs of Indian States, admitted into the public schools, such as Eton and Harrow. There are ordinarily some 500 Indians at the Inns of Court. In the last quarter of a century there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students, there were up to the outbreak of War in 1939 fully 2,000 young Indians (some five per cent. of them women) in London, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other centres. London absorbed about half the total. The added dangers of "total warfare" under present day conditions and difficulties of transport led to a rapid reduction of members since there were few new comers, and the stream almost dried up. Happily the decision of H. M. Government in the autumn of 1939, moved thereto by the East India Association, to make open the combatant services to Indian temporarily or permanently resident in Great Britain, led to recruitment of a number of the students, some of whom obtained commissions in the R.A.F. Many Indians took a share in A.R.P. and other civil defence organisation. The Indian Soldiers and Sailors Comfort Fund, under the leadership of the Dowager Lady Chelmsford and Mrs. L. S. Amery did excellent work, with headquarters at India House.

SOCIETIES AND INSTITUTIONS IN LONDON CONNECTED WITH INDIA.

ANGLO-INDIAN ASSOCIATION, LONDON.—Established in 1905 to promote the interests and welfare of the Anglo-Indian and Domiciled European communities wherever resident by such means as may be deemed by the Council to be desirable. Anglo-Indians and Europeans, whether domiciled in India or not, are eligible. *Hon. Sec.* F. L. Sheldon, B.A., 23, Winchester Road, Oxford.

CENTRAL HINDU SOCIETY OF GREAT BRITAIN.—Founded for the exposition of Hindu philosophy; to provide facilities for social intercourse between followers of different religions to create and strengthen better mutual understanding; to assist members in every reasonable way. *President:* R. S. Nehra. 43, Chalkhill Road, Wembly, Middlesex.

CENTRAL INDIAN COLONIAL ASSOCIATION, LONDON.—Established to represent the Colonial Indians' cause to the Colonial Office, India Office, and other proper authorities; to protect, strengthen and enhance the interests, political, social, commercial and religious, of Colonial Indians in all parts of the World; to provide a central platform and meeting place for Colonial Indians in London; to promote, encourage and strengthen friendship and amity between Colonial Indians and other races; to assist in the achievement of fair and equal treatment to Indians in the Colonies by all constitutional means. *President:* R. S. Nehra. *Hon. Sec.:* N. D. Tangri. 170, Adelaide Road, N. W. 3.

EAST INDIA ASSOCIATION.—Founded in 1866 by Dadabhai Naoroji and other public men. Its object is to promote, by all legitimate means, the welfare of the inhabitants of India generally. The methods are—(1) by providing opportunities for the free public discussion, in a loyal and temperate spirit, of important questions affecting India; (2) by promoting friendly social contact between Indians and English people interested in India, though the medium of social gatherings and of private meetings of members to exchange views on current Indian questions; (3) by making representations to the authorities on non-political questions affecting Indian interests, and, generally by the promulgation of sound and trustworthy information regarding the many weighty problems which confront the Administration in India, so that the public may be able to obtain in a cheap and popular form a correct knowledge of Indian affairs. Subscription, entitling a member to the free supply of the quarterly *Asiatic Review* £1-5-0 per annum. *President:* The Marquis of Willingdon, P.C., G.C.S.I., G.C.I.E., G.C.M.G., G.B.E.; *Chairman:* Sir John Woodhead, K.C.S.I., C.I.E.; *Hon. Secretary:* Sir Frank Brown, Kt., C.I.E., 3, Victoria Street, S.W.1.

INDIAN CHAMBER OF COMMERCE IN GREAT BRITAIN.—Africa House, 44/46, Leadenhall St., London, E. C. 3. During hostilities: Old Wolverton House, Wolverton, Nr. Bletchley, Bucks.

INDIAN EMPIRE SOCIETY.—Reorganised since the passing of the India Act to collect and disseminate information as to events in India. *President:* Lord Middleton. *Hon. Secretary:* Sir Louis Stuart, C.I.E., 57, Bassett Road, London, W. 10.

INDIAN GYMKHANA CLUB LTD.—Thornbury Avenue, Osterley, Middlesex. Object: To provide facilities for sports, games and social intercourse for Indians, particularly students, in Great Britain. The Club owns 16 acres of well-situated freehold sports ground with a fine Pavilion, Annual Subscription: £1-1-0. Ladies: 10/6*d.* *Hon. Secretary:* Mr. David S. Erulkar, "Africa House," 44/46, Leadenhall Street, London, E. C. 3. (During hostilities:—Old Wolverton House, Wolverton, Bletchley, Bucks).

THE INDIA SOCIETY (ART AND LETTERS).—Founded in 1910 to promote the study and appreciation of India art and literature, in India and also in those countries which have been influenced by it have influenced India especially Java Thai-land, Indo-China, Afghanistan, Iran and the middle East. Lectures at which papers are read by leading British, Indian and Continental specialists have become a regular feature of the Society's activities. In order that the members resident abroad may be able to share in the benefit of these lectures, papers and proceedings are published bi-annually in "*Indian Art and Letters*" which is issued free to members. In addition members receive free in return for their annual subscription (£1-11-6) volumes, as issued, on some subject connected with Indian art or literature published by the Society. Visits to private collections of Oriental Art are arranged from time to time. Exhibitions of Indian art are another feature of the Society's activities, *President:* The Marquis of Zetland, G.C.S.I., G.C.I.E. *Chairman of Council:* Sir Francis Younghusband, K.C.S.I., K.C.I.E. *Vice-Chairman:* John de La Valette. *Hon. Treasurer:* Sir Frank Brown, C.I.E. *Hon. Secretary:* F. J. P. Richter, M.A., 3, Victoria Street, London, S.W.1.

INDIAN STUDENTS UNION AND HOSTEL.—112, Gower Street, W.C. 1. (Clubroom 115, Gower Street). *President:* Sir Ewart Greaves, D.L.; *Hon. Treasurer:* Harold G. Judd, O.B.E.; *General Secretary:* P. Cox, Bar-at-Law; *Hospitality Secretary:* Prakash Datta.

THE INDIA LEAGUE—(Formerly The Commonwealth of India League) to support the claim of India for Swaraj (Self-Rule). Publishes "Notes on India" (monthly); "News India" (fortnightly). Sends speakers. *Address:*—165, Strand, W. C. 2. *Chairman:* Bertrand Russell. *Secretaries:* James Marley and V. K. Krishna Menon.

INDIAN CONCILIATION GROUP.—(Meeting at Friends House, Euston Road, N. W. 1). *Chairman:* Carl Heath. *Hon. Secretary:* Agatha Harrison. 2, Cranbourne Court, Albert Bridge Road, S. W. 11.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

INDIAN VILLAGE WELFARE ASSOCIATION.—Its objects are:—(1) the collection and dissemination of information on rural activities in India; (2) the furtherance of schemes and experiments to promote rural welfare which are approved at a meeting of the Executive Committee; (3) the holding of Schools and other educational activities to arouse interest in the needs of rural India. *President:* The Viscountess Halifax, C.I.; *Chairman:* Sir Francis Younghusband, K.C.S.I., K.C.I.E.; *Hon. Secretary:* Sir Gilbert Jackson, 7, Gainsborough Gardens, Hampstead. N. W. 3.

MUSLIM SOCIETY IN GREAT BRITAIN.—Formed to safeguard and to maintain the interests of Islam and Islamic institutions. *Chairman:* Ismail V. de-Yorke, bar-at-law. *Secretary:* M. A. Rashid. *Treasurer;* Khwaja S. Mahmud. 18, Eccleston Sq., S. W. 1.

NATIONAL INDIAN ASSOCIATION in aid of social Progress and Education in India—Founded by Miss Mary Carpenter in 1870. Objects: To extend a knowledge of India, in England, and an interest in the people of that country; to co-operate with all efforts made for advancing education and social reform in India; to promote friendly intercourse between British people and the people of India. *Chairman of the Committee:* Sir Selwyn H. Fremantle: *Hon. Secy.:* C. P. W. Lloyd, c/o East India Association, 3, Victoria St., S.W. 1.

NEW BURMA CLUB.—*Secretary:* 3 Bayley Street, London, W. C. 1.

NORTHBROOK SOCIETY.—Makes grants to deserving Indian students. *Hon. Secretary:* I. N. Wankawala, 59, Doughty Street, W. C. 1.

THE OXFORD MAJLIS.—Formerly known as the Mavaratman Club, and later as the Oxford United Club. The Oriental Club was incorporated with it in 1913. Its attitude towards Indian problems has been progressively Left. Full membership is restricted to Indians. Meets on Sundays during term. Officers elected each term. *Address:* President, The Oxford Majis, c/o Union Society, Oxford.

PARSEE ASSOCIATION OF EUROPE INCORPORATED—Zoroastrian House, 11, Russell Road, Kensington, London, W. 14. Tel. Western, 1657.

ROYAL ASIATIC SOCIETY.—Established 1823, obtained Royal Charter 1824, "for the investigation of subjects connected with and for the encouragement of Science, Literature, and the Arts in relation to Asia." *President:* Viscount Samuel, G.C.B., G.B.E.; *Secretary:* Mrs. Davis, 74, Grosvenor Street, W. 1.

ROYAL CENTRAL ASIAN SOCIETY.—*President:* *Chairman:* Field-Marshal Sir Phillip Chetwode, Bt., G.C.B., O.M. *Hon. Secretaries:* Brig.-General Sir Percy Skyes, K.C.I.E., C.B., C.M.G., E. M. Gull. *Hon. Treasurer:* Major E. Ainger, 8, Clarges Street, W. 1.

ROYAL EMPIRE SOCIETY.—Formerly Royal Colonial Institute. Northumberland Avenue, W.C. 2. *Hon. Secretary:* Sir Walter Buchanan Smith, C.M.G., M.C.; *Honorary Corresponding Secretaries in India:* L. S. Adlard, Lahore; C. T. Allen, C.I.E., Cawnpore; Lt.-Col. W. Bell, Dehra Dun; C. M. Eastley, Bombay; Colin C. Garbett, C.S.I., C.M.G., C.I.E., Simla; Major J. W. Gordon, C.I.E., O.B.E., Jodhpur; Lt.-Col. K. A. Gosnell, I. A., Quetta; R. A. P. Hare, Bihar; Dr. R. A. Heatley, Ajmer; E. F. G. Hunter, Madras; R. B. Lagden, O.B.E., M.C., Calcutta; F. C. Morgan, Karachi; R. H. T. Mackenzie, Bikaner; Capt. S. E. Tidy, Bangalore.

ROYAL SOCIETY OF ARTS has an India and Burma Section. 18, John Adam Street, Adelphi, W. C. 2. *Secretary:* K. W. Luckhurst, M.A.; *Acting Secretary, India and Burma Section:*—Miss Scott Rogers.

ROYAL INSTITUTE OF INTERNATIONAL AFFAIRS, Chatham House, 10, St. James's Square, S. W. 1. *Secretary:* Ivison S. Macadam, O.B.E., M.V.O.

SOCIETY FOR THE STUDY OF RELIGIONS.—*President:* The Most Hon. the Marquess of Zetland, P.C., G.C.S.I., G.C.I.E.; *Chairman of Executive Committee: Editor of Official Journal, Religions:* F. Victor Fisher. *Hon. Secy.:* Miss Margaret Skinner, 26, Buckland Crescent, N. W. 3.

STUDENT CHRISTIAN MOVEMENT OF GREAT BRITAIN AND IRELAND.—*Secretary:* Rev. W. D. L. Greer, Annandale, North End Road, Golders Green, N.W. 11.

VICTORIA LEAGUE.—81, Cromwell Road, S.W. 7. *Secretary:* Miss Gertrude Drayton, C.B.E.

WORLD CONGRESS OF FAITHS (Continuation Movement).—Organised to promote a spirit of fellowship among mankind through religion. *Chairman:* Sir Francis Younghusband, K.C.S.I., K.C.I.E.; *Secretary:* Arthur Jackman, 335, Abbey House, 2, Victoria Street, S. W. 1.

INDIAN RELIGIOUS PLACES OF WORSHIP.

BUDDHIST.—THE BRITISH MAHA BODHI SOCIETY—41, Gloucester Road, Regent's Park, N. W. 1 (Chalk Farm).

CHRISTIAN.—Churches in every district of London.

HINDU.—HINDU ASSOCIATION OF EUROPE.—30, Belsize Park, Hampstead, N.W. 3 (Belsize Park).

MUSLIM SOCIETY IN GREAT BRITAIN.—18, Eccleston Square, Victoria, S.W. 1 (Victoria).

MUSLIM.—THE LONDON MOSQUE.—53, Melrose Road, S.W. 18 (Southfields, S.R.).

PARSEE ASSOCIATION OF EUROPE.—11, Russell Road, Kensington, W. 14 (Addison Road).

RAM KRISHNA VIVEKANANDA VEDANTA SOCIETY.—51, Lancaster Gate, W. 2 (Lancaster Gate).

SHAH JEHAN MOSQUE.—Woking, Surrey (Woking, S. R.).

Sport.

Despite the many unfavourable conditions produced in India by the War appreciable progress has been made in almost every branch of sport and substantial amounts contributed to the War Fund through this channel.

Cricket.—The Board of Control for Cricket in India is responsible for the affairs of the game. The various provinces compete annually on the zonal basis in the Cricket Championship of India, for the Ranji Trophy, a magnificent gold cup of unique design which keeps green the memory of that illustrious Indian cricketer, Ranjitsinhji. The biggest attraction of the year is the Bombay Pentangular Tournament, which comprises teams representing the Hindus, Muslims, Parsis, Europeans and The Rest, and attracts all the leading players in the country. Owing to the political situation in the country and consequent upon the opinion expressed by Mr. Gandhi that he was opposed to communal tournaments, the Hindus did not participate in the season under review.

Football.—The game is controlled by subordinate provincial associations in affiliation with the All-India Football Federation. It has made tremendous strides in recent years, and the institution of a rule by the parent body preventing the wholesale transfer of players during the season has proved most beneficial. There is at the moment no accepted Championship for the country. The premier tournaments are the I.F.A. Shield, in Calcutta, the Rovers Cup, in Bombay, and the Durand Cup, usually played in Simla, but now transferred to Delhi.

Hockey.—The game, which is controlled by the All-India Hockey Federation, is easily the most popular in the country, and the standard of play the best in the world, a fact which is borne out by India's triumphs at the last three Olympiads. There is an official Championship, competed for by Provincial teams, and the trophy is a quaintly carved Maori Shield, presented by the Maoris to the Indian team which toured New Zealand. The principal tournaments are the Aga Khan Cup, in Bombay, the Beighton Cup, in Calcutta, and the Yadavendra Shield, in New Delhi.

The Turf.—Racing in India is organised on a large scale, and all the many courses are controlled, between them, by the Royal Western India Turf Club and the Royal Calcutta Turf Club. The standard is very high, and the racecourses, particularly those in Bombay and Calcutta, compare favourably with the best in the world. The class of thoroughbred imported from Australia and England is of the best, and the indigenous breed has made remarkable improvement in the last few years. The principal races are the Eclipse Stakes of India, run in Bombay and regarded as the Blue Riband of the Turf in the country, and the King-Emperor's and Viceroy's Cups, in Calcutta.

Golf.—The game has a big following, and almost every town of any size has its own course. The Royal Calcutta Golf Club's "A" course is considered the best in the country, and the one recently laid out by the Bombay Presidency Golf Club, at Chembur, holds great promise. In view of the outbreak of War it was feared that the annual Golf Week at Nasik, always popular with followers of the game in Western India, would have to be dropped, but the excellent support forthcoming made it possible for the event to materialise and prove as successful and enjoyable as any of its predecessors.

Tennis.—Tennis is looked after by the All-India Lawn Tennis Association through its provincial associations, and a definite effort is being towards the improvement of the standard of play by the attention which is being given to the appointment of expert coaches and the selection of promising young players for those coaches to work on. The aim of the Association is the training of a Davis Cup team, and there are a few players who already show great promise of developing into first class players, judged by world's standards.

Athletics.—There is an All-India Olympic Association with subordinate associations in most of the provinces, but athletics generally do not approach the standard of the other games. There was an appreciable improvement at the 1941 Olympic Games held in the major provinces, but in no event did the performance approach International standard. Lack of tracks and suitable training grounds is a big handicap to progress being made but the governing body is tackling this question and already cinder and cycle tracks have been constructed at Patiala.

Other Games.—Most of the other games have their controlling organisations. Table Tennis and Billiards have caught on wonderfully with all classes, and Badminton has made appreciable progress. Amateur Boxing is strong in Bombay, Bengal and in the Services, but is still in its infancy in other parts of the country.

1. The entries in the above table, which are in alphabetical order in each article, apply exclusively to the persons entered therein, and while regulating their relative precedence with each other do not give them any precedence over members of the non-official community resident in India, who shall take their place according to usage.

2. Officers in the above table will take precedence in order of the numbers of the entries. Those included in one number will take precedence *inter se* according to the date of entry into that number with the exception of officers of the Defence Services, who rank *inter se* in accordance with their seniority, and of the Chief Justice of Bengal, who will rank before all other persons included in Article 14 irrespective of the date of their entry into that Article.

3. When an officer holds more than one position in the table, he will be entitled to the highest position accorded to him.

4. Officers who are temporarily officiating in any number in the table, will rank in that number below permanent incumbents.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

5. All officers not mentioned in the above table, whose rank is regulated by comparison with rank in the army, to have the same rank with reference to civil servants as is enjoyed by military officers of equal grades.

6. All other persons who may not be mentioned in this table to take rank according to general usage, which is to be explained and determined by the Governor-General in his discretion in case any question shall arise.* When the position of any such person is so determined and notified, it shall be entered in the table in italics, provided he holds an appointment in India.

7. The following will take courtesy rank as shown :—

Consuls-General.—Immediately after Article 35, which includes Brigadiers.

Consuls.—Immediately after Article 38, which includes Colonels.

Vice-Consuls.—Immediately after Article 59, which includes Majors.

Consular officers *de carriere* will in their respective grades take precedence of consular officers who are not *de carriere*.

Among themselves Consular Officers will take precedence in their respective grades according to the dates of the Government of India notifications announcing the recognition of their appointments. An officiating incumbent of a grade will rank as an officer of that grade immediately below its permanent incumbents except that when an officer below the substantive grade of Consul officiates as a Consul-General he will be ranked with Consuls and assigned a place immediately after permanent Consuls.

8. The following may be given, by courtesy precedence as shown below, provided that they do not hold appointments in India :—

Peers according to their precedence in England. Knights of the Garter, the Thistle and St. Patrick. Privy Councillors. Advisers to the Secretary of State for India. Immediately after Members of the Governor-General's Executive Council, Article 9.

Baronets of England, Scotland, Ireland and the United Kingdom according to date of Patents. Knights Grand Cross of the Bath. Knights Grand Commander of the Star of India. Knights Grand Cross of St. Michael and St. George. Knights Grand Commander of the Indian Empire. Knights Grand Cross of the Royal Victorian Order. Knights Grand Cross of the Order of the British Empire. Immediately after Puisne Judges of High Courts, Article 23.

Knights Commander of the Bath. Knights Commander of the Star of India. Knights Commander of St. Michael and St. George. Knights Commander of the Indian Empire. Knights Commander of the Royal Victorian Order. Knights Commander of the Order of the British Empire. Knights Bachelor. Immediately after the Residents of the Second Class, Article 31.

9. All ladies, unless by virtue of holding an appointment themselves they are entitled to a higher position in the table, to take place according to the rank herein assigned to their respective husbands, with the exception of wives of Peers and of ladies having precedence in England independently of their husbands, and who are not in rank below the daughters of Barons; such ladies to take place according to their several ranks, with reference to such precedence in England immediately after the wives of Members of the Governor-General's Executive Council.

Given at Our Court at St. James's this Ninth day of May in the year of Our Lord One thousand nine hundred and thirty-seven and in the First year of Our Reign.

BY HIS MAJESTY'S COMMAND,

ZETLAND.

* In virtue of the provisions of section 9 (ii) of the Indian Church Act, 1927, a Bishop or Archdeacon who held a bishopric or archdeaconry on the 1st March 1930 takes rank as follows :—

Bishop of Calcutta, Metropolitan of India, immediately after Article 8.

Bishops of Madras and Bombay, immediately after Article 14.

Bishops of Lucknow and Nagpur, immediately after Article 25.

Bishops (not territorial) under licence from the Crown, immediately after Article 39.

Archdeacon of Lucknow, in Article 42.

Indian Orders.

The Star of India.

The Order of the Star of India was instituted by Queen Victoria in 1861, and enlarged in 1866, 1875, 1876, 1897, 1902, 1911, 1915, 1920, 1935 and 1937 and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India, or upon British subjects for important and loyal service rendered to the Indian Empire; the second and third classes for services in the Indian Empire thirty years in the department of the Secretary of State for India. It consists of the Sovereign, a Grand Master (the Governor-General of India), the first class of forty-six Knights Grand Commanders (24 British and 22 Indian), the second class of one hundred and six Knights Commanders, and the third class of two hundred and thirty-seven Companions, exclusive of Extra and Honorary Members, as well as certain additional Knights and Companions.

The Insignia are (i) the Collar of gold, composed of the lotus of India, of palm branches tied together in satire, of the united red and white rose, and in the centre an Imperial Crown; all enamelled in their proper colours and linked together by gold chains. (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre, having thereon a star of five points in diamonds resting upon a light blue enamelled circular riband, tied at the ends and inscribed with the motto of the Order, *Heaven's Light our Guide*, also in diamonds. that of a Knight Commander is somewhat different, and is described below. (iii) The Badge, an onyx cameo having Her Late Majesty Queen Victoria's Royal Effigy thereon, set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points, all in diamonds. (iv) The Mantle of light blue satin lined with white, and fastened with a cordon of white silk with blue and silver tassels. On the left side a representation of the Star of the Order.

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky-blue, having a narrow white stripe towards either edge, and is worn from the right shoulder to the left side. A Knight Commander wears (a) around his neck a ribbon two inches in width of the same colours and pattern as a Knight Grand Commander, and pendent therefrom a badge of a smaller size, (b) on his left breast a Star composed of rays of silver issuing from a gold centre, having thereon a silver star of five points resting upon a light blue enamelled circular ribbon, tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears around his neck a badge of the same form as appointed for a Knight Commander, but of a smaller size pendent to a like ribbon of the breadth of one and a half inches. All Insignia are returnable at death to the Central Chancery, or if the recipient was resident in India, to the Secretary of the Order at New Delhi or Simla.

Sovereign of the Order:—His Most Gracious Majesty The King-Emperor of India.

Grand Master of the Order:—His Excellency the Governor-General of India, the Marquess of Linlithgow, P.C., K.T., G.M.S.I., G.M.I.E., O.B.E., D.L., T.D.

Officers of the Order:—*Registrar*: Major Henry Hudson Fraser Stockley, C.V.O., O.B.E., R.M., Secretary of the Central Chancery of the Orders of Knighthood, St. James' Palace, London, S. W. 1.

Secretary: Sir Gilbert Laithwaite, K.C.I.E., C.S.I., Secretary to the Governor-General (Personal) and Private Secretary to His Excellency the Viceroy.

The Orders of the Star of India are:

Extra Knight Grand Commander, (G.C.S.I.).
Honorary Knight Grand Commander, (G.C.S.I.).
Honorary Knight Commander, (K.C.S.I.)
Honorary Companion, (C.S.I.).
Knight Grand Commander, (G.C.S.I.).
Knight Commander, (K.C.S.I.).
Companion, (C.S.I.).

The Most Eminent Order of the Indian Empire.

This Order, instituted by Queen Victoria in December 1877, and extended and enlarged in 1886, 1887, 1892, 1897, 1902, 1911, 1915, 1920, 1935 and 1937, is conferred for services rendered to the Indian Empire, and consists of the Sovereign, a Grand Master, forty-two Knights Grand Commanders (of whom the Grand Master is first and principal), one hundred and fifty Knights Commanders, and an indefinite number of Companions (not exceeding, without special statute, 54 nominations in any one year), also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order, as well as certain Additional Knights and Companions appointed by special statutes.

The Insignia are: (*i*) The COLLAR of gold formed of elephants, lotus flowers, peacocks in their pride, and Indian roses, in the centre the Imperial Crown, the whole linked together with chains; (*ii*) The STAR of the Knight Grand Commander, comprised of five rays of silver, having a small ray of gold between each of them, the whole alternately plain and scaled, issuing from a gold centre, having thereon Her Late Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatricis Auspiciis*; and surmounted by an Imperial Crown gold; (*iii*) The BADGE consisting of a rose, enamelled gules, barbed vert, and having in the centre Her Late Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatricis Auspiciis*, surmounted by an Imperial Crown, also gold; (*iv*) The MANTLE is of Imperial purple satin, lined with and fastened by a cordon of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

white silk, with purple silk and gold tassels attached. On the left side a representation of the Star of the Order.

A Knight Commander wears: (*a*) around his neck a ribbon two inches in width, of the same colour (purple) and pattern as a Knight Grand Commander, pendent therefrom a badge of smaller size: (*b*) on his left breast a star, similar to that of the first class, but the rays of which are all of silver.

The above mentioned Insignia are returned at death to the Central Chancery, or if the Knight was resident in India to the Secretary of the Order.

A Companion wears around his neck a badge (not returnable at death) of the same form as appointed for a Knight Commander, but of smaller size, pendent to a like ribbon of the breadth of one and a half inches.

Sovereign of the Order:—His Most Gracious Majesty The King, Emperor of India.

Grand Master of the Order:—H. E. the Governor-General of India, the Marquess of Linlithgow, P.C., K.T., G.M.S.I., G.M.I.E., O.B.E., D.L., T.D., from April 18th, 1936.

Officers of the Order:—The same as for the Order of the Star of India.

The Orders of the Indian Empire are:

Extra Knight Grand Commander, (G.C.I.E.).
Honorary Knight Grand Commander, (G.C.I.E.).
Honorary Knight Commander, (K.C.I.E.).
Knight Grand Commander, (G.C.I.E.).
Knight Commander, (K.C.I.E.).
Honorary Companion, (C.I.E.).
Companion, (C.I.E.).

The Imperial Order of the Crown of India.

This Order was instituted on Jan. 1, 1878 and for a like purpose with the simultaneously created Order of the Indian Empire. It consists of the Queen, the Queen Mother with some Royal Princesses, and the female relatives of Indian Princes or of persons who have held conspicuous offices in connection with India, Badge, the Royal Cypher in jewels within an oval surmounted by an Heraldic Crown and attached to a bow of light blue watered ribbon, edged white. Designation, the letters C. I.

Lady Beatrix Taylor Stanley.
Doreen Maud, Marchioness of Linlithgow.
Doreen Geraldine, Baroness Brabourne.

Indian Titles; Badges.—An announcement was made at the Coronation Durbar in 1911, that a distinctive badge should be granted to present holders and future recipients of the titles of 'Diwan Bahadur', 'Sardar Bahadur', 'Khan Bahadur', 'Rai Bahadur', 'Rao Bahadur', 'Khan Sahib', 'Rai Sahib' and 'Rao Sahib'. Subsequently the following regulations in respect of these decorations were issued:—(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy crowned and the name of the title, both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown, the plaque or shield being of silver gilt for the titles of Diwan, Sardar, Khan, Rai and Rao Bahadur, and of silver for the titles of Khan, Rai, and Rao Sahib. (2) The badge shall be worn suspended round the neck by a ribbon of one inch and a half in width, which for the titles of Diwan and Sardar Bahadur shall be light blue with a dark blue border, for the titles of Khan, Rai and Rao Bahadur light red with a dark red border, and for the titles of Khan, Rai and Rao Sahib dark blue with light blue border.

A Press Note issued in November, 1914, states:—The Government of India have recently had under consideration the question of the position in which **miniatures** of Indian titles should be worn, and have decided that they should be worn on the left breast fastened by a brooch, and not suspended round the neck by a ribbon as prescribed in the case of the badge itself. When the miniatures are worn in conjunction with other decorations, they should be placed immediately after the Kaisar-i-Hind Medal.

Indian Distinguished Service Medal.—This medal was instituted on June 28th, 1907, by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII, and on the reverse a laurel wreath encircling the words For Distinguished Service. The

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

medal, 1⅜ inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon 1¼ in. wide, with blue edges ⅜ in. wide. This medal may be conferred by the Viceroy of India.

Indian Order of Merit.—This order was instituted by the Governor-General of India in Council in 1837, and amended in 1939. It is divided into a Civil Division and a Military Division. The Civil Division consists of one Class and is awarded for any act of conspicuous personal bravery in aid of public authority or the safety of others. The Badge consists of an eight pointed star 1″ in diameter composed of rays, with in the centre a circular ground of dark blue enamel surrounded by a laurel wreath. On the enamel ground there is the Royal Cypher surmounted by a Crown encircled with the words "For Bravery." The Badge is of Silver and the laurel wreath and the design in the centre of gold. The Badge is worn on the left breast pendant from a dark-red ribbon with blue edges.

The Military Division consists of two Classes, and appointments are made for any act of conspicuous gallantry performed in connection with duties. Appointments to the First Class are made only from members of the Second Class for any similar act performed. The Badge of the Military Division consists of an eight pointed silver star 1½″ in diameter, with in the centre two crossed swords around which is inscribed the words "Reward for Gallantry," all on a circular ground of dark-blue enamel and surrounded with a laurel wreath. In the Badge of the First Class the laurel wreath and the design in the centre are of gold, and the Second Class of silver. The Badge is worn on the left breast pendant from a dark-blue ribbon with red edges.

The members of the Order use the letters "I.O.M." after their names.

Order of British India.—This Order was instituted at the same time as the Indian Order of Merit and amended in 1939. It consists of two Classes, and appointments are made from among those on the active list in the Armed Forces in India, for long, faithful and honourable Service. Appointments to the First Class are made only from members of the Second Class. The Badge of First Class consists of a Star 1-11/16 in. in diameter composed of rays of gold and surmounted by a Crown, with in the centre on a ground of light blue enamel, the words "Order of British India" encircling a lion and surrounded by a laurel wreath of gold. In the Badge of Second Class the star is of 1½″ in diameter on a ground of dark-blue enamel. The Badge is worn pendant from a ribbon of dark red round the neck. Members of the Order also use the letters "O.B.I." after their names. The First Class carries with it the title Sardar Bahadur, and an additional allowance of two rupees a day and the second the title of Bahadur and an extra allowance of one rupee per day.

Indian Meritorious Service Medal.—This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medal": but on being promoted to a commission he may retain the M. S. medal, but the annuity attached to it will cease. On the obverse is the diademed bust of Queen Victoria facing left, with a veil falling over the crown behind, encircled by the legend Victoria Kaisar-i-Hind. On the reverse is a wreath of lotus leaves enclosing a wreath or palm tied at the base, having a star beneath, between the two wreaths is the inscription for meritorious service. Within the palm wreath is the word India. The medal, 1⅜ in. in diameter, is suspended from a scroll by means of a red ribbon 1¼ in. wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to EDWARDVS or GEORGIVS.

The Kaisar-i-Hind Medal.

This decoration was instituted in 1900, the preamble to the Royal Warrant—which was amended in 1901, 1912, 1933, 1938 and in 1939—being as follows:—"Whereas We, taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire, and taking also into consideration the expediency of distinguishing such services by some mark of Our Royal favour: Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid, We have instituted and created, and by these presents for Us, Our Heirs, and Successors, do institute and create a new Decoration." The decoration is styled "The Kaisar-i-Hind Medal for Public Service in India" and consists of three classes. The Medal is an oval-shaped Badge or Decoration—in Gold, in Silver or in Bronze—with the Royal Cypher on one side and on the reverse the words "Kaisar-i-Hind for Public Service in India"; it is suspended on the left breast by a dark blue ribbon.

Historical Centres.

Abu, Mount.—The Dilwara Jain temples form the great attraction of Abu. They belong to a beautifully modified style of the Aryavarta or North Indian or Indo-Aryan school of architecture.

Of the Abu group of temples, two are most important. They form the noblest examples of Jain temples of the North Indian school of art. One of them is dedicated to Adishvara or Adinatha or Rishavadeva, the first prophet of Jainism. Vimala Shah, a merchant-prince of Gujarat, built the temple in 1031 A.D. It is said that he bought the ground, covering it with silver coins and that it took 19 years to build the temple at a cost of Rs. 180 lacs plus Rs. 59 lacs towards levelling the hill. The other temple is ascribed to the brothers Vastupala and Tejpala, who built the triple temple at Girnar (the name of Tejpala alone is met with in the inscriptions). The temple was dedicated to Neminatha, the 22nd Tirthankara (the prophet of the Jains). This temple was built 200 years (1231 A.D.) after the temple of Vimala Shah. It is comparatively simpler and bolder.

These temples belonging to the last period of the medieval age record specimens of the culmination of Indian decorative sculptures. The Indian sculptor's proverbial patience reaches its limit here. No example of decorative art, known anywhere in the world, can beat the richness and delicacy of the sculptural decorations of the ceilings, pillars and walls of these temples. Never before has marble produced such marvellous specimens of artistic workmanship. Both the temples have at the entrance a room, containing 9 or 10 elephants. Inscriptions record that the elephants carried riders. Most of the figures are missing. Whatever is left, records a wonderful amount of life in the figures. Such lively human figures are hard to be met, not only in any other Jain temples, but anywhere else in India.

Apart from the claims of artistic interests, Mount Abu makes the finest hill-station of Rajputana. It is on an isolated plateau, about 4,000 ft. high. The Nakhli Talao, an artificial lake, near which the temples stand, lends a fine scenic effect. A few miles off, at Achalgarh, on a summit stand a beautiful group of temples. They are smaller temples and lack the finish of the Abu temple, but they have a real appeal of simplicity and charm. South of Mount Abu will be seen the traces of an ancient town, Chandravati, the remains of which have been removed by the Sultans of Ahmedabad and the Thakurs of Sirohi.

Agra.—The architectural history of Agra dates from the time of the Imperial Lodis, who transferred the capital from Delhi to Agra. It had been an early capital of the Moguls. In 1527 Babar made it his capital. Humayun had a preference for Delhi, but in 1565 Akbar formally removed the capital to Agra. He proposed to make it a worthy capital of an empire extending from Afghanistan to Bengal and from Kashmir to Ahmednagar. In 1658, Aurangzeb made Delhi again the imperial seat and henceforth Agra was relegated to unimportance. On the banks of the Jumna, in the shape of a crescent lies the fort of Agra, one of the greatest relics of Indian art in the Muslim period. The ramparts, a mile and a half long and 70 ft. high, enfold palaces, halls of state, terraces, balconies, kiosques, etc., the cost of each of which would be a king's ransom. Salim Shah, the son of Sher Shah laid the foundation of the Fort. Akbar developed it fully. Akbar's tomb at Sikandra is worthy of him, enshrining the unique eclectic spirit of the Great Mogul. It represents the Indian tradition of the multi-storeyed academic hall, where professors of the different schools of art and science could hold discussions in groups. Akbar himself had revived the plan in the council chamber at Fatehpur Sikri. The tomb of Itmimad-ud-Daula is worthy of the exceptional abilities of Nurjahan, who was in herself a combination of Elizabeth and Cleopatra. It has distinct qualities apart from its noble grandeur.

Agra had been the favourite seat of Shahjahan and he made contributions to the glories of Agra Fort. In his Moti Masjid (Pearl Mosque) is inscribed: "Verily it is an exalted palace of paradise, made of a single pearl of magnificence. In the history of the world no mosque made of marble could rival its greatness and beauty." The appeal of its noble magnificence lies in its great simplicity. Its refinement of contour is matched only in the Taj. The Jama Masjid, one of the greatest mosques of India, is built in white and red stones in memory of Jahanara. The Dewan-I-Aim, by some accounts, was built by Aurangzeb. This would be Aurangzeb's greatest architectural contribution. As his puritanical policy doomed to death the Mogul empire, the same spirit put an end to the great tradition of Mogul architecture and sculpture. All these edifices would have made Agra second to no other Mogul city; but the Taj, is an unparalleled monument and gives it a unique position.

The Taj Mahal is the tomb built at Agra by Shah Jehan for his wife, Mumtaz Mahal, where he is also buried. It was begun in 1632 (in which year the Shah ordered the stopping of all other Hindu temple-building), and was completed by 1650. The Taj Mahal is the most perfect example of the Mogul style and is by some considered the most beautiful building in the world. The tomb proper consists of a domed square, white marble building, raised on a terrace from the corners of which rise four slim, white minarets. The whole is set in an exquisite garden surrounded by a red sandstone wall; a gate and a mosque are subsidiary elements in the composition. The tomb building itself is 186 ft. square, with a dome 58 ft. in internal diameter rising to a total height of 210 feet. The Building is said to have cost over £3,000,000 It was probably designed by an architect named Ustad Isa, traditionally supposed to have been either Turkish or Persian.

Ajanta —The Ajanta Hills contain 29 caves (5 chaityas or shrines or churches and 24 viharas or monasteries, all Buddhist) and present a record of an almost unique combination of painting, sculpture and architecture of a period of about 9 centuries (2nd or 1st cen. B. C. to middle of 7th cen. A.D.). Ajanta forms specially the great museum of Indian painting.

The caves, excavated as caves and not as cave temples, (*e.g.*, Kailash, Ellora) extend over a distance of about 600 ft. in a perpendicular rock. Thus the roofs were not hewn, only the facades were hewn and sculptured. The Archæological Department numbers the caves from East to West. Paintings have been noticed in 16 caves.

The sculptures and the paintings of one cave may belong to different periods. Frescoes have been painted sometimes long after the excavation of a cave. Sculptures in different periods have been undertaken to continue the decoration of the caves. Paintings, reminiscent of the sculpture of Bharut and Sanchi, partially covered with later paintings, have been found in certain of the caves.

The caves were first noticed in 1819. Greedy ignoramuses, inclemency of weather and much damp, natural to the country, had done the worst imaginable injuries. That it could survive to any extent is due to the peculiar formulae of plastering and painting. During the present century steps have been taken towards preservation of the great works. Lately, Hyderabad State has taken charge of the caves.

The subjects of representation are almost always taken from Buddhist literature. They generally portray the figure of Buddha and incidents from his lives (his last life as Buddha and his previous births as man or a lower animal). Secular pictures are comparatively few, but not unknown. We have a bull-fight, many other beasts prowling in their pleasure, a pair of lovers, etc. These drawings are remarkably good. Women have received very great attention in Ajanta. Women with their eyes dreamily half-open, faces with delicate and tense expressions, poses most graceful and charming, and hands and fingers delicately modelled have made indelible impressions upon all succeeding ages of Indian art.

Amritsar.—The Pool of Immortality with the Golden temple in it makes Amritsar the most famous shrine of the Sikhs. Ramdas, the fourth Guru (Prophet) of the Sikhs (1574-81), is said to have received from Akbar a piece of land, within the limits of which he dug a reservoir, since well known as Amritsar. Some Sikh accounts, however, record that the pool had been an ancient one and a Vairagi (recluse) devoted to Rama claimed it as a sanctuary. The Guru, however, succeeded in ousting him. The appellation Haramandir for Darbar-Sahib is perhaps reminiscent of a tradition that it had been the site of a temple of Shiva. At first the locality was called Raddaspur. The next Guru Arjun (1581-1606) made Amritsar the proper seat of his followers, the centre which should attract their worldly longings for a material bond of union. The tenth and the last Guru Govind (1695-1708) declared the equal right of all Sikhs of all castes to bathe in the sacred tank. The temple and the pool suffered great havoc, possibly on two occasions, at the hands of the Durani invader, Ahmed Shah Abdali. The Khalsa (specially the Dal or army founded by Jussa Singh Kullal) restored the shrine and rebuilt the temple (1763-64). At this time they held at Amritsar a formal *Gurmutta* or conclave of the Sikhs, probably the first of its kind. On defeating the invader's viceroy, the Sikh chiefs met at Amritsar and struck for the first time the Govindashahi coins. In 1802-03, Ranjit Singh covered the dome and very possibly the whole structure with golden repousse copper work. Hence it is known as the Golden temple. As it served as the court of the Gurus, it is called the Darbar-Saheb.

The temple stands on a raised plinth 65 ft. square in the centre of the tank and is surrounded by spacious verandhas. A white marble causeway 204 ft. long, with an archway over it, joins the temple with the mainland. There are four entrances with doors covered with silver plates nicely wrought. Entrance by the principal gateway leads to the Bhung, where the arms of the Gurus have been preserved. Except the lower parts of marble, the whole edifice is wrapped with gilded copper, and quotations from the Grantha-Saheb (the Sikh bible) are plentifully inscribed. The Grantha-Saheb is the material object of veneration.

In the Guru-Ka-Bagh or the garden of the Guru there is the pretty Bab Atal Tower. There are some interesting late nineteenth century frescoes depicting incidents of the life of Guru Nanak.

Benares (Kasi).—Benares, the religious capital of Hindu India for centuries, is visited by millions of pilgrims every year. It lies between the Barna and Asi and stretches for three miles on the crescent of the Ganges. Massive medieval-looking edifices line the bank, which is practically a stretch of spacious ghats, of which there are 64 in good or indifferent condition.

Benares has 1,500 comparatively large temples, besides countless minor shrines. The most important temple is the one dedicated to Vishwanatha (Lord of the Universe). It is also known as the Golden Temple (the domes and spires were covered with gilt golden repousse copper-work) and stands in a typical Benares alley. Although it is the most famous shrine of India, it is conspicuous by its comparative smallness and the absence of ornamentation. Latterly Benares has become the seat of the famous Hindu University.

Bhuvaneshvar.—In the Gupta period (4th and 5th centuries A.D.), the golden age of Indian art and literature, most devout Hindus (Vaishnavas) as the Guptas were, they built numerous temples all over their great empire. Almost every part of the Gupta empire proved to be lasting seats of Muslim Kings, whose spirit of iconoclasm almost thoroughly succeeded in erasing the monuments of the Guptas. Only in one out of the way place have a few comparatively insignificant specimens survived to bear evidence of the glories of the great art of this period.

Digitized by Arya Samaj Foundation Chennai and eGangotri

Bhuvaneshvar, a small village on the way to Puri and the seat of Shiva, is only second in importance to Benares, and contains some four hundred or six hundred temples mostly of Shiva, dating from the 9th or 10th century to the 13th century A. D. The temples are entirely covered with sculptures and the artistic vision of the builders appears to be practically unlimited. The representations and patterns have been executed with great care and their claims to artistic merit are high.

The great temple in Bhuvaneshvar is the finest example of a purely Hindu temple in India. The main shrine is now 160 ft.; very possibly originally it had been a little (15 to 25 ft.) higher. It stands within a stone wall as strong as the ramparts of a medieval fort. The area is 520 ft. by 465 ft. The deity, *Tribhuvaneshvara* or *Lingaraja-Mahadeva* is represented by a block of granite, 8 ft. in diameter. It rises 8 inches above the floor.

The Mukteshvara temple, held by some to be the "gem" of Orissan art, is a small temple. Its proportions are almost perfect. The whole body, top to bottom, inside and outside is sculptured. The numerous floral designs, very delicate and natural, men and women dressed with great care and in very elegant poses, dancing girls arrayed very charmingly, couples of lovers very gracefully drawn, elephants, lions, etc., marvellously well represented, domestic scenes true and delicate, beautiful figures of gods and goddesses, etc., form an endless lavishing of beautiful sculpture.

Bijapur.—Yusuf Khan (Yusuf Adil Shah), said to be a fugitive younger son of Sultan Murad of Turkey, employed as a very high officer in the Bahmani Kingdom, on the decline of his masters set up the Sultanate of Bijapur (the city of Victory) in 1489. Eighth in succession, Sikandar Ali Shah lost his kingdom to Aurangzeb in 1686. In commemoration of the noble origin of the founder of the kingdom, the great edifices of the city were often surmounted with the Turkish crescent.

The most important architectural works in Bijapur are Jami Masjid, the tomb and mosque of Ibrahim II, or Bolil Gumbaz, the Mether Mahal, Asar Mahal, Gagan Mahal, Chini Mahal, Mecca Masjid, etc.

The Jami Masjid, one of the finest mosques of India, and the greatest mosque in South India, was begun and very possibly completed by Ali Adil Shah (1557-80) probably after the fall of Vijayanagar (1565). An inscription records that it stood in the reign of Mahammad Shah (1636). As a matter of fact, however, the mosque was never completed. The minor domes are so low as hardly to be seen from outside.

Bijapur has the distinction of possessing the second largest dome of the world in the Gol Gumbaz, the mausoleum of Mahammad Shah, which covers more ground than any other dome or vaulted roof. It dates back to 1659 A.D. and is also known as Boli-Gombaz or the whispering gallery. "Loud laughter is answered by a score of fiends hidden behind the plaster."

Conjeevaram (Kanchipuram).—The Benares of South India. Of 7 holy cities (Sapta-Tirtha) only one is in South India, which is Conjeevaram. Jainism, Buddhism, Shaivism and Vaishnavism have all played great parts in this city. It possesses historical records dating before Christ. The City grew in glory under the Pallavas and the Cholas. It has two parts: the western, with a large number of Shiva temples is known as Shiva or Big Conjeevaram, and the eastern, with a much lesser number of Vishnu temples, is called Vishnu or Little Conjeevaram. There are well over 1,000 temples in the city of which none belongs to the pre-Pallava period and most of the large ones belong to later Dravidian style. There are very good examples of temples of the first half of the eighth century.

Sculptures are lavished all over the main shrine, the porches and the minor shrines. There is a joint figure of Shiva-Parvati (Andharnishvara). The Devaraja temple (Vishnu Conjeevaram) would make a good example of later Dravidian style in which the early Pallava and early Dravidian styles are mixed up with a predominance of the latter. The temple has unfortunately been highly reconditioned at later periods. It has a seven storeyed tower 100 ft. high, and the original builders had either made it higher or had proposed to make it higher. The hall of Pillars is one of the most beautiful productions of its kind. It had received some injuries from Hyder Ali.

The Ekambranatha temple is a great monument of the art of Vijayanagar. It is 10 storeyed and 188 ft. high. All the walls run zig-zag and no two towers are at right angles. The hall of thousand (540) pillars is typical of the wealth of sculpture of Vijayanagar.

The temple of Kamakshi Amman where the goddess is depicted in the form of a *Yantra* is very popular.

Delhi.—In the course of 3,000 years, within an area of about 50 sq. miles, rose eight Delhis, sometimes one upon another and sometimes one beside another, as the imperial capital of India. In the longest Indian drama the curtain falls after the 9th act; and tradition goes that the fall of the 9th Delhi would close finally the career of India's greatest historical city. In the days of the *Mahabharata* (Circa 1,000 B.C.), Delhi, under the name of Indraprastha (the site where Indra had worshipped Vishnu) was for the first time declared the capital of India. The epic records that the surrounding moats were as large as rivers, the doors of the gateways were of the size of the wings of Garuda, the great mythological bird, and innumerable palaces filled the city. Later, the city was named Dilli (Delhi) in commemoration of Dilu of the Mayura dynasty. The fort of Indrapat, also known as Purana Kila (the Old Fort) is traditionally supposed to mark the site of Indraprastha. The construction of Purana Kila was begun by Humayun and completed by Sher Shah. In the 11th century the Palas of the Tomara clan had their capital at Delhi, the remains of which may be traced at Lalkot. Their successor, Prithviraja, the last Hindu prince of Delhi (1193 A.D.) built a capital at

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Rai-Pithora, which proved to be an extension of Tomara-Delhi. First within the walls of Rai-Pithora and later beyond the same at Siri, Qutubuddin and his successors built the first Muslim Delhi. Materials of the Hindu temples were used often *en block* in the construction of the new capital. Images and sculptures representing figures of men and animals were scrupulously destroyed.

In the middle of the 15th century, the Lodis removed the capital to Agra. Sher Shah built a wall surrounding the city; his capital, however, was Agra. His son built Selimgarh after his name. Akbar and Jehangir lived mainly at Agra, Lahore and Ajmer. The last Muslim Delhi is Shahjahanabad, the city of Shahjahan, which is now known as Old Delhi. In 1857, in course of the suppression of the Sepoy Mutiny, the last Mogul Emperor was taken prisoner and Delhi was formally annexed to the British Crown. At the Delhi Durbar on the 12th December, 1911, by an Imperial Proclamation, the seat of the Indian capital was removed from Calcutta to Delhi (New Delhi).

The Qutb mosque, the Qutb Minar, the tomb of Iyaltimash (Altamash), the mosque of Azmir and the gateway of the chief mosque at Budaun (U.P.) form the early great Muslim edifices of India. The Qutb mosque was named after a Muslim saint Qutbuddin of Ush near Baghdad. ft was built in 1196 under the Viceroyalty of Qutbuddin Aibek. The present dilapidated mosque preserves only a small portion of the original one.

The Qutb Minar (circumference 47 ft. 3 ins. at the bottom and 9 ft. at the top, height 280 ft.) a five storeyed detached minar, was begun by Qutbuddin Aibek and completed by Iyaltimash (1232). It is the most beautiful example known to exist anywhere. It does not form part of the mosque, which has its own minars. Tradition goes that it makes a pillar of victory, first erected by Prithviraj and later reconstructed by the Muslim emperors. Some Muslim accounts say that it had been begun by the Hindus and completed by the Muslims.

New Delhi is the creation of the British, wherein European architecture of different periods generally modified or modernised has been observed. Often features of Muslim architecture (*e.g.*, the dome) have been added and improved in that light. The appeal of simplicity in magnificence, of correct outlines and proportions forms a great architectural principle.

Ellora.—The Ellora Hill, containing the cave temples stands about 19 miles north-west of Aurangabad (Hyderabad State). It was known as Grishmeshwara (an appellation of Shiva) and held holy by the Hindus, especially the Shaivites. It has the largest cave temple in India, a form of architecture which in its development makes a most remarkable feature of architecture in India. The caves are excavated in the face of a hill or rather the scarp of a large plateau, and run nearly north and south for about a mile and a quarter, the scarp at each end of this internal throwing out a horn towards the west. The hill has the shape of a crescent, the southern arm, the centre, and the northern arm being occupied by the Buddhist, Hindu and Jain temples respectively. The caves have been numbered from south to north. The large or main caves are 34 and there are a number of minor caves.

The Buddhist temples in the southern section, known locally as Dheralerna, are the oldest. The caves number twelve. The first cave is a monastery with eight rooms; the second cave is a hall which was probably used as the lecture hall; its verandah has a number of Buddhist figures; the third one resembles the first, and is older than the other two caves. Five other caves have been more or less destroyed. Further up is the Maharbara cave. The height inside is about 117 ft. and the width 58 ft. The roof rests on 24 pillars. On the left of the entrance is a figure of Buddha in meditation. A crowd of males and females attend him. In the south of the cave there is a temple of a seated Buddha attended by a host of devotees, holding gracefully clusters of lotuses. Next come a number of monasteries and tanks. A little further up is the cave of Visvakarma, the Indian Vulcan. Local craftsmen come to worship here. The dating of the Buddhist caves may be made from the 3rd to the 6th century A.D.

Beyond the three-storeyed temple is the Hindu region, containing 17 large caves below the brow of the scarp and a large number of smaller ones above. The Hindu caves are generally more decorated than the other ones and the Kailasha Temple is the most famous of all the cave temples of Ellora. Both the architecture and the sculpture of Ellora reached their culmination in the Hindu cave temples. They present some excellent specimens of Indian sculpture and architecture (6th-8th cen. A.D.). The gem of the collection is the Kailash temple, a masterpiece of Indian architecture and sculpture, with a claim to be called unique of its kind in the world. About three million cubic feet of rock had to be quarried or chiselled to turn out this monolithic temple. It stands in a court averaging from 154 ft. wide by 276 ft. long with a scarp 107 ft. high at the back. Colossal in size and ambitions in plan, the whole temple, inside and outside, the roofs, ceilings, walls, pillars, every part of it, has been extravagantly sculptured with lavish decorations. The sculptures as in the case of Ajanta, Elephanta and elsewhere had been painted with a thin coating of lime plaster.

The whole execution shows an extraordinary command of glyptic technique, not only in the grouping and composition of line, but in the powerful and subtle treatment of the varied gradations of relief.

The last temple of the northern section belongs to Parsvanath of the Jains. It was built in brick by a Jain merchant of Aurangabad in the 18th century. The temple is about 700 ft. above the ground. The figure of Parsvanath is unclothed and is about 10 ft. high. The Jains (Digambaris) of Gujerat worship the image on the 14th day of the bright moon of Bhadra. South of the Parsvanath temple is the Indra-sabha, composed of three caves. The first one is

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

60 ft. by 30 ft. with 16 pillars. The walls are sculptured with figures of Jain divinities. The second one is Jagannathsabha. A large inner nave or shrine contains figures of Jain Tirthankaras, Ambika, etc. The temple of Ranchhorji is the third one. Figures of Jains, Gandharvas, etc., are seen on the shrine and the walls. In the porch, an elephant carries a male and a female. The Brahmans identify them as Indra and his wife.

Fatehpur-Sikri.—Fatehpur-Sikri was the proud and faithful mistress of the mightiest Mogul emperor, Akbar. His son Salim, who was also her son, had been kind to her in his early days. But she had practically died with the death of her lord. Her noble career is compassed within the period of half a century. Fatehpur-Sikri is now a dead forsaken city.

Again and again Akbar suffered the bereavements of his babies. He was left no son. Stories of miraculous powers of Shaikh Salim Chisti of Fatehpur-Sikri reached his ears. When men of science failed him, he turned to the man of God. His prayer was granted. The son was given the name of the saint. This son Salim, born at Fatehpur-Sikri, succeeded Akbar as Jehangir.

In 1569 Akbar founded the city of Fatehpur-Sikri, 23 miles off Agra. The present town of Fatehpur is on the south-west and the village of Sikri is on the north-east of the ruins. Both used to be within the walls of the city.

The most striking work of art is the Buland-Darwaja or the Great (High) Gateway. It was erected (160 ft.) in commemoration of the conquest of Khandesh. It forms the Southern gateway of the most imposing edifice in Fatehpur-Sikri, the Jami Masjid (1571), said to be a copy of a mosque at Mecca or Medina. It measures 550 ft. east to west and 470 ft. north to south. It contains the tomb of Shaikh Salim Chisti. The Buland-Darwaja makes the noblest example of the Mogul gateways. It is the highest Indian portal, the summit of the finials being 176 ft. from the roadway and 134 ft. from the pedestal. In its construction marble is noticeably used with sandstone. The form is Persian, but the construction is Indian.

Konark, Kanarak.—The Sun-temple of Konarak, known as the Black Pagoda, stands unsurpassed in the field of Indian art. By the sea-shore it is about 20 miles and by motor car 52 miles from Puri. Traditionally, it had been built by Sthamba, a son of Krishna, in thanksgiving to the Sun for curing him of an incurable disease. The present temple was built by King Narasingha-deva I of Orissa (1240-80).

The main temple has been destroyed. It may be that the sandy soil could not bear so enormous a structure. It may also be due to an earthquake. There is a tradition that some Muslim seamen (as their ship foundered, because a great lodestone on the top of the temple attracted away the iron bolts of the ship) had destroyed the temple. Ain-I-Akbari, records that there were 28 temples adjoining the main temple and a wall 225 ft. high and 28½ ft. thick surrounded it. The remains of the great temple formed a heap 70 ft. long and 45 ft. high.

As in the cases of some other ancient lithic monuments, so also Konark leaves one to wonder how numerous blocks of stones weighing many tons were conveyed over a long distance (not less than 80 miles) and it is a miracle of engineering how such stones were hoisted to a height of 150 ft. The Konark temple is markedly correct in proportion and symmetry. An image of great beauty of the sun in a temple in the yard of the Puri temple is shown as the image of the sun of Konark. The temple is built of red laterite and was probably called black due to the great shadow it casts. The pillar in front of the Puri temple had been brought from Konark.

Madura.—Known as *Kadamba-Vanam* (the Forest of Kadambas) in an earlier period, it was made the capital of the Pandya Kingdom by Muthu Tirumala Nayak (1623-59). Before the fall of Vijayanagar (1565) Madura had been an important centre of architecture. On the fall of Vijayanagar, it became the principal seat of Hindu architecture. The Nayaka rulers in the 16th and especially in the 17th centuries built the magnificent edifices of Madura, and Tirumala Nayak proved the greatest builder. The town was planned after a coiled snake.

The Great Temple in Madura forms a rectangle 847 ft. by 729 ft. It is made up of two temples, one of Meenakshi (*lit.* one with eyes resembling the shape of a fish. Tradition holds that she had been born as a Pandya princess and Sundareshvara took her as his consort) and the other of Sundareshvara (*lit.* The Lord Beautiful—Shiva). The entrance is by Meenakshi's temple. Adjoining the temple are the Nandi Hall, the temple of the Saints (Arunvati Muvar) wherein there are some remarkable statues of saints and gods, the Jewel House (the jewelleries of the deities make one of the finest collections in South India) and the Stable Houses. A "Hall of Thousand Pillars" (*Ayirakkal* or *Sahasra-stambha-mandapam*) stands in the north-east corner. No pillar is a replica of another. In the central row of pillars are statues of 10 Nayak kings together with their queens. In the outer rows are some remarkable sculptural representations of legends connected with Shiva.

Tirumal Nayak's Mahal or Palace in Madura records a landmark in the development of Indian architecture. It makes a great example where Hindu architecture in a masterly way had assimilated the principles of Saracenic and Gothic architectures. The great hall in the Palace is 140 ft. long, 70 ft. wide and 70 ft. high.

Tirumala Nayak's grandson Chokkanadhan went back to the old capital Trichinopoly, and to build a great palace there, the old palace was shorn of all its splendour. As a matter of fact, the greater portion of the palace, the best parts by his choice, were removed.

Mohenjo-Daro.—The ruins of Mohenjo-Daro (the Domain of the Departed) are situated eight miles off Dorki station (B.N.W.R.). Indian archaeological history dates from the 3rd century B.C. The excavated remains in Mohenjo-Daro belong to the last city, which had been built on ancient cities, which are suspected generally

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

to be lower than the water-level. All the objects found have not yet been studied in detail and there are reasons to think that the yield of even the upper layer cannot be strictly confined within 2750 B.C.and the subsequent period. Excavations of the lower strata may be expected to yield the remains of an older period. Failure to read the characters of the seals and inextensiveness of excavation continue to fortify the sealed character of its ancient inhabitants and their civilisation.

It is a very remarkably well-planned city. All the streets were laid south to north. Nothing is more welcome to an Indian city than the south wind. The city had necessarily grown most towards the south. Lanes are free from a general deviating or serpentine character. Homes were two-storeyed and the staircases lead not to the lower storey but to outside. This feature is not unknown in the houses in the hills. Covered balconies or open porticoes are conspicuous by their absence. The courtyards are to an extent small. Proximity of the dwellings points to a very crowded city. Mohenjo-Daro is a city of bricks, fire-burnt and sun-burnt. It had probably stressed more on drainage than any other ancient city. Evidence of underground drains are to be found everywhere. They are large and high and provided with manholes. The vastness of the drainage surely reflects the greatness of the upper structures, now very much lost to view. It is not known, however, whether the drains led to any common dumping place away from the city, although soak pits have been noticed, but from their size one cannot be sure that they were used as the main dumping grounds. A flight of steps into one of them would rather suggest that they proved minor temporary repositories, refuse from which has been systematically scraped off. Bathrooms are another feature significant of the cleanliness of the city.

The objects found in the remains mainly consist of seals, jewelleries, potteries, figures, (human and animal) and toys. The seals have on them inscribed characters of a conventionalised form of pictograph writing, which have not yet been deciphered. Most of them are of steatite and of square size. The more common animal is difficult to be identified. It has features both equine and bovine, with one horn only.

Puri (Jagannatham).—A popular Hindu pilgrimage centre on the eastern seaboard of India, specially sacred to the Vaishnavites. The White Pagoda of Jagannath or the Lord of the Universe is at Puri. The presiding deities are Jagannath (Krishna seen with his disc, Sudarshana), his brother Balaram and his sister Subhadra.

The strict commensal rules of the Hindu caste system have no application in Puri, especially in the matter of taking together the *Mahaprasada*, cooked or uncooked eatables ceremoniously offered to the deity. This is unknown anywhere else in Hindu India. It has been asserted that this peculiar feature marks Buddhist influence.

The altar in the temple, which is held very sacred, is supposed to contain one hundred thousand Shalagrama-Shilas (a particular type of round black stones, of the size of eggs, which serve as emblem of Narayana or Vishnu).

The court of the White Pagoda is 665 ft. east to west and 644 ft. north to south. A 24 ft. high stone wall was built around it by King Purushottamadeva. There are four entrances. The Lion-Door in the east is decorated with sculptures. It has a pyramidal roof. Before the door stands a beautiful pillar of the Sun (Arunstamba), 44 ft. high. The temple had originally a pillar surmounted with the figure of Garuda, the legendary bird, the carrier of Vishnu.

The temple of Jagannatha is a combination of four temples, which adjoin one other.

All the gods and goddesses in the temple and yard are strict vegetarians, except Vimala, in whose honour goats are sacrificed on the second day of *Durgapuja* at midnight, when Jagannatha and other gods are supposed to be asleep.

There is a very large number of monastic establishments (Maths) at Puri, the most important of which are Shankara, Nimai-Chaitanya, Kavir, Nanaka-Shahi and Vidura Math, Chakratirtha, Svarga-dvar, and Lokanath.

The most important event in Puri is the Car Festival, when an image of Jagannatha is taken in procession in a huge *Rath* or wooden vehicle.

Rameshvaram—An island in the Palk Straits, adjoining Ceylon, and an important Hindu place of pilgrimage, connected with the mainland by railway. It forms the interlude to the closing act of the great performance of South Indian architecture and sculpture.

The Great Temple in Rameshvaram grew up in 350 years. The principle shrines were built by Udayin Sethupati with the assistance of Pararaja Sekhara (1414) of Ceylon or they had been built by the Ceylonese prince himself. They are of a dark, hard limestone never more met again in the temple. It is said that they were hewn at Trinconamalai. The incomplete north and south *gopurams* are ascribed to a Deccanese, Kirana Nayar (1420). There are in the temple a number of finished minor *gopurams* and porches and the outer surrounding walls are credited to Udayin Sethupati and Komattl of Nagur, near Negapatam, statues of whom and of whose wife surmount the eastern wall. Some minor edifices were constructed in 1450.

The principal lingams in the shrine are supposed to have been installed by Ramachandra. The principal deity is known as Ramanatha or Ramlinga-Svami. The temple stands near a lake with a circumference of about three miles.

Sanchi.—A small village in Bhopal State in which is the largest and best preserved Buddhist stupa (or tope) or pagoda in India. A Buddhist stupa is a mound built on a relic of Buddha or Buddhist saints, or the mound is erected to commemorate an incident in the life of Buddha or Buddhist saints. The Great stupa in Sanchi in red stone is about 103 ft. in diameter and 42 ft. high. An encircling pathway of flagged stone goes round it, as is common with most Indian shrines.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The sculpture of Sanchi has two very remarkable features: "absence of any anthropomorphic figure of Buddha" (everything is "Buddhist, but it is Buddhism without Buddha") and the spirit of naturalism that infuses the art. From the Sanchi art, almost a new school born of it developed in the cave-temples, of which Ellora is the best example.

Shatrunjaya Hills.—Shatrunjaya, near Palitana in Kathiawar, is also known to the Jains as Siddhagiri or Siddhacala or the Hill of the Perfected Ones. It is the most sacred place (*tirtha*) of Shvetambara Jains. There are a great number of temples in groups on tonks or summits. The most important one is the tonk of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Batubal, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints attained *Nirvana* or absolution. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Shatrunjaya has 108 names. The principal name Shatrunjaya (the conqueror of enemies) is one of the names of Shiva. It is held that the founder of the shrine had conquered his enemies and regained his kingdom by the grace of Shiva. By way of thanksgiving he built a temple of Shatrunjaya-Shiva and dedicated the hill to the deity.

Sravana-Belgola.—A great holy seat of the Jains, especially of the Digambara sect. Bhadrabahu, a Jain apostle, passed away at this place. Jain records claim that as his disciple, Chandragupta Maurya (4th cen. B.C.), on renouncing his imperial glories came to live and die here as a Jain monk. Asoka's visit (3rd cen. B.C.) to this place is also recorded in Jain accounts. It is a picturesque spot between two hills. On the larger hill the Dodabetta or Vindhyagiri stands the figure of Gomateshvara, the largest statue in Asia carved on the spot by the sculptor Avittonemi (Arishtanemi) from a monolith of grey stone. It is 56½ ft. in height and the diameter at the broadest point is 13 ft. Five groups of Jain figures in relief are seen on a rock, near Gwalior. The largest one is 57 ft. high. The reliefs have little claim to artistic recognition.

At intervals of 12 years or more a ceremony called *Mastakabhisheka* (the anointing of the head) or *Maha-mastakabhisheka* is held, which lasts for 15 days.

The Jinanatha-pura-Basti temple, near Sravana-Belgola, built between the 10th and 12th centuries presents a good example of the finest sculptures of Jain temples in South India.

Srirangam.—Between the two-forked Kaveri river, an islet, Srirangam contains the largest temple of India, known as Koyil or the temple of the Vaishnavas. It is consecrated to Ranganatha (a representation of Vishnu). Inscriptions have been found on the temple of Chola, Pandya, Hoyasala and Vijayanagar Kings dating from the 9th to the 16th centuries. The temple had grown through all this period, if not over a little wider period. The north *gopuram* is 152 ft. high. Generally the *gopurams* are painted with representations of incarnations and mythological legends. In the Hall of thousand pillars (it may be half a hundred or a few more) the pillars have plantain-brackets. In one of the front rows of pillars are monoliths of prancing equestrian figures, spearing tigers. The great temple has grown combining seven *prakaras* of successively dwindling sizes.

Two miles south of Srirangam is Trichinopoly, known as the *Kailash* (a peak in the Himalayas and abode of Shiva) of the South. Trichinopoly is held to be a corruption of Tri-Shira-Palli or the quarters of the three-headed demon. It was the strategic capital of the Cholas. In the Fort (there is no fort now) part of the town is the Rock. The temple is consecrated to Tayumanavar (Shiva) and the Rock is also known (Tarjumanavara-malaya) by the name of the deity.

Jambukeshvaram, popularly known as Tiruvanakkawal, two miles north of Trichinopoly, has an important temple. The deity is popularly known as Appulinga or the water-phallus, because the deity in the adytum is always in water. The temple is of five prakaras (courtyards). The *mandapam* in front of Akhilandeshvari represents in carving early legends relating to the deity.

Tanjore.—Vishnu, of the Hindu Trinity, appeared as Nilamega-Perumal at Tanjore to slaughter Tanjan, a great demon. The temple of Vishnu as Nilamega is situated 1½ miles north of Tanjore. The place (Tanjai in Tamil) got its name from the demon. Tanjore had long been the capital of the Cholas and under them it grew in name and fame as a great seat of culture. Towards the close of the 10th century, Raja-Raja the Great built the Great Temple of Brihadishvara (*lit.* Great God; Shiva). The Naiks and probably the Mahrattas may have made only some quite minor contributions. The temple belongs to the earlier Dravidian style, but it is almost unique in its plan in reversing the established Dravidian order of the ascending size of the towers from the adytum to the gateway.

In the 2nd *gopuram* of the temple a Tamil inscription is said to belong to the 4th century, A.D. The shrine of Subrahmanya, a much later construction, has, for its superb ornamentations received very high appreciations. Between the 1st and 2nd *gopurams* there is a passage 170 ft. long and the 2nd *gopuram* gives entrance to the yard of the temple. There is a black granite monolith bull about 13 ft. high and 16 ft. long. This block of stone is supposed to have been transported over a distance of 400 miles.

The palace in Tanjore has an area of 30 acres. The most noticeable feature about it is an eight-storeyed *gopuram*, 190 ft. high in the 3rd quadrangle. From a distance it has all the prominence of the main tower of the Great Temple. There are two Durbar-Halls, one known as the Naik's court and the other the Mahratta's court. The Naik-Hall was built before 1614. There is a remarkable sculptural representation of a battle of the gods and the demons on the lateral parts. There is also a large number of pictures of the kings and a library of Sanskrit manuscripts.

The Tanjore Bronze Nataraja in the Madras museum is an able representation of one of the greatest conceptions of Indian art.

Taxila.—The name is a Graeko-Roman rendering of the Indian forms Taksasila and Takkasila. The Indian names literally mean a stone-cut city and the city of the Takka clan respectively. The epics record that Rama's brother Bharata conquered the country and the capital took its name from his son, Taksha. The *Mahabharata* states that the great snake-sacrifice was held at Takshasila. Buddhist records point to the highly flourishing condition of Taxila in 700-800 B.C. and in the light of the epics, the date may not be unreasonably pushed to 800-900 B.C. The oldest dateable remains discovered belong to the 4th or 5th century B.C. Surely in the 7th century B.C. Taxila had a far-famed university.

The remains of Taxila lie about the east and the north-east of Saraikela, 20 miles north-west of Rawalpindi. The remains are of three cities, "within three and a half miles of each other." Those from south-west to north-east are contained in Bhir or Vir, Hatiyal, Shiv-kap-ka-kot, Kachkot, Barkhana and Shir-Sukh-Ka-Kot. The Pir or Vir mound represents the oldest city.

Taxila presents historical records extending over a period of about 1,000 years, from the 4th or 5th century B.C. to the 5th century A.D. Seven different peoples rule a Taxila. Achaemenian and Alexandrian suzerainty have left almost no records. The Mauryan records consist mainly of almost primitive punch coins (they may be of an earlier date), jewelleries and lapidaries, which surely indicate that Indians were in that age the greatest masters in the treatment of the most refractory stones and gold and silverworks of refined workmanship.

The most imposing pile at Taxila is the Dharmarajika or the Great Tope (Stupa). It is also known as Chir (split) tope, because of the cleft driven through its centre by former explorers. Around it there are a number of Stupas, Chaityas, Vihanas, etc. The construction of the group extended over four centuries (2nd-5th). The original stupa was built in the Scytho-Parthian period and enlargements were made in the Kusha period. The most important architectural features are trefoil arches and Erothian pillars.

Indian Festivals and Observances.

Bara Wafat.—(Death on the 12th) is called in Bengal Fatiha-i-Duwazdahum (Prayers of the 12th). In Turkey and Egypt the day is known as Mauludu-'n-Nabi (Birth of the Prophet). The date is 12, Rabi I.

It is a joint celebration of the birth and the death of the Muslim Prophet. In some parts of India it is celebrated only as the birthday of the Prophet. (Jashn-i-Milad-Sharif). It is believed that his birth and death took place on the same date, although there are differences of opinion on this. It is a great day of feasting for Muslims (the Wahhabis, however, do not observe it; they regard it to be an innovation or *Bidat*). On this occasion the life story of the Prophet is recited and its points of excellence stressed. Prayers are offered for the benefit of his soul. Prayers are also read over cooked food which is then given to the poor. Some observe it on the second day of the month. As the date is disputed, the more devout read the prayers on all the days from the 1st to the 12th day of the month.

Dasara (DASHAHA=TEN DAYS).—This festival is held on the 10th of Ashwin Shuddh (Oct.). It is called *Durga Puja* or *Durgotsava*, and is supposed to relate to the autumnal equinox. The festival commemorates the victory of Devi, wife of Shiva, over the buffalo-headed demon Mahishasura. Her image is worshipped for nine days and afterwards consigned to the river. This is also the day on which Rama marched against Rawana, the demon king of Lanka (modern Ceylon). Early in the morning Hindus perform *puja* to their household gods or religious books. Marathas and Kshatriyas, or those who consider themselves of the martial race, worship their weapons and ask protection for them throughout the year in the faith that to the propitiousness of the sword, they owe every prosperity. In the afternoon they go to the temple in procession.

The day is also considered most auspicious by the Hindus to begin education of their children. The nine preceding days of Dasara are called *navaratra*, a compound word for 'nine nights'. During this period devotees of *Durga* engage a Brahman to read hymns before her image, extolling her exploits and describing her rewards to her votaries. On the ninth day, at every temple of *Durga*, the sacred fire is made and fed with rice and ghee to the chanting of *mantras*. It is customary among Bania women to keep up a dance called *garba* during these nine nights.

The celebration of Dasara is also said to owe its origin to the Pandavas (the five sons of Pandu) who selected this day as an auspicious one for making preparations for their war with their paternal cousins, the Kauravas, which is narrated in detail in the *Mahabharata*.

In modern times Dasara is observed with great pomp in Mysore State.

Dipavali (Corrupted to Divali or Dewali).—Dipa means a lamp and Dipavali means a row or collection of lamps. It is a festival of rejoicing at Lord Krishna's triumph over Narakasura, a demon. Rows of lamps at all places, sacred and secular, make a most beautiful feature on the occasion. Exhibitions of fire-works, crackers, etc., add to its festive nature.

On the 14th day of the waning moon of Kartika (Sept.-Oct.), known as Naraka or Bhuta Chaturdashi (Chaturdashi means 14th lunar day), Krishna destroyed Narakasura. The demon was, however, a great devotee of Krishna and had done severe penance to propitiate the Lord, but he had abducted 16,000 women for his harem and had to be destroyed for his sins. In view of his piety, however, the death anniversary was enjoined to be observed as a sacred day. In the morning a bath is taken and certain rites with a lamp made of rice-dust, etc., are observed. New dresses are worn and sweets are served.

Gahambars—These are traditional festivals of Iran (Persia) adopted by the Parsis, and mark the six festivals of the six seasons of the year. The first one commences on the 11th day of Ardibenesht (Oct. 15), the second on the 11th day of Tir (Dec. 14), the third on the 26th day of Shehnever (Feb. 27), the fourth on the 26th of Meher (March 29), the fifth on the 16th day of Dai (June 17) and the 6th on the 1st day of Gatha at the end of the Parsi year (Aug. 31). They were mainly agricultural festivals and necessarily formed formal seasonal celebrations. The Parsis hold public feasts on the days of the Gahambars.

Ganesh Chaturthi.—On this day was born Ganpati, or Ganesh, who is regarded as the god of wisdom and one to be propitiated for the removal of obstacles. As such he is invoked at the commencement of all ceremonies and undertakings. There are varying versions of the circumstances attending his birth. One relates that as the god Kartikavirya was created by Shiva without connubial assistance, in like manner Ganpati was formed by his consort Parvati from the turmeric and oil scraped from her body while bathing. The loss of his human head and the substitution of that of a female elephant with one tusk are also variously explained. By some his head is said to have been cut off by Shiva when he endeavoured to prevent the god from entering the chamber of Parvati when she was performing her ablutions. According to others, it was reduced to ashes by a glance from Shani (Saturn) who, with all the gods went to look at the new-born child, and it was replaced by that of the animal first found, which happened to be an elephant.

The fourth of Bhadrapad Shuddh (Aug.) is the period appointed for the celebration of this festival in honour of Ganpati's birth. His image is installed in Hindu households and offered *puja*. Some people keep the image for a day and a half; some for five or ten days, according to the wealth and wish of the householder. On the final day, the image is taken in procession and eventually committed to the river, sea or tank.

There is a legend that one day Ganpati while riding his favourite mouse had a fall, at which the moon laughed. Enraged at the insult, Ganpati cursed the moon and all who should look at her, but afterwards restricted it to one day, *viz.*, his birthday. Thus, on the day of Ganesh Chaturthi, Hindus avoid the moon lest they should incur any calamity during the year. If by any chance they happen to see the moon, they try to provoke their neighbours into reviling them in the belief that its ill-effects will stop at such abuse.

Gokulashtami.—(Also known as Janmashtami and Krishnashtami). The occasion marks the celebration of Krishna's birth on the 8th day of the dark moon in the month of *Shravana* (July-August) or *Bhadra* (Aug.-Sept.). In each case (*i.e.* either in *Shravana* or *Bhadra*) different sects observe it on either of the two consecutive days of Ashtami. At the temple of Puri a Brahmin and a dancing girl play the roles of Vasudeva and Devaki, the parents of Krishna.

To the Vaishnavites, the devotees of Vishnu, (and therefore also of Krishna who was one of Vishnu's incarnations), the occasion is a great festival. It is also observed by non-Vaishnavites, and thus sets an example of the spirit of toleration. Janmashtami is a day of fasting. A large part of the day is spent in worshipping Krishna, Shri (the consort of Vishnu) and Devaki the mother of Krishna. *Kirtans* or religious songs (relating to Krishna) make a notable feature. Dacca (Bengal) brings out a great procession on this occasion.

Grahana.—Grahana means an eclipse. Hindu astronomers were the first to declare that the earth is round and Hindu astronomy was the first to discover the scientific facts relating to eclipses. The popular tradition of other days, however, stuck in the popular mind. And the sight of an eclipse continues to suggest to the ignorant person that *rahu* (the ascending node), the trunkless demon, is devouring the sun or the moon as the case may be. Rahu in the guise of a god had attempted to share the nectar along with the gods. As soon as his tongue had tasted the nectar (a drink having the power of making those drinking it immortal), Vishnu detected the false god and struck off his head. Trunkless, up to the throat, as the nectar had passed, Rahu became immortal. Necessarily when he gulps the divine orbs they emerge out down his throat. Acceptance of the version therefore makes it an unholy sight and the defilement of the gods entails a defilement of the earth. Defilement requires a bath and a bath in holy water is held to be particularly efficacious on this occasion. As a matter of fact, two baths are required, one at the first contact of the eclipse and another when it terminates. People flock to the Ganges and other holy sites for baths are resorted to. The occasion, naturally, reminds one of death and oblations are offered to the dead. To ensure full merit of the bath, gifts must be offered after the bath. As a matter of fact gifts make an essential condition of all Hindu fasts and festivals. It would be normal to surmise that the same were to an extent ordained to ensure a spirit of charity. The period of the eclipse is a period of fasting. No food should be prepared during this period. Food prepared earlier cannot be used later.

Haj.—It means "setting out" or "tending towards," and is the term used for the pilgrimage to Mecca. The performance of the *Haj* is to all good Muslims a most cherished ambition. It is one of the five pillars of the practices of Islam (Arkan), and there are the highest Quranic injunctions for its observance. The rites of the *Haj* may be divided into three groups; *Farz* or compulsory; *Wajib* or obligatory (in a lower degree than *farz*); and optional. *Farz* compulsions are three in number; wearing of Ihram (two seamless garments, one worn round the waist and another thrown loosely over the shoulder; standing in *Arafat* and doing the *Tawaf* (circumambulation of the Ka'bah). The Wajib rites are five in number in the case of those who do not belong to Mecca; to run between Mount As-safa and Mount Al-Marwah, to remain in Al-Muzdali-fah, to cast stones to the three pillars of Mina (Ramyu'r-rijam), to perform a second *tawaf* and shave the head as the final ceremony. The month of Zu'l-Hijjah (the 12th Muslim month) is the month of the Haj.

Digitized by Arya Samaj Foundation Chennai and eGangotri

Idul-Azha (erroneously called Iduz-Zuha).—It is the Muslim counterpart of the Passover. It is enjoined in the *Quran* (xxii 33-38) and falls on the 10th Zul-Hijjah. The words of the prophet are: Man cannot (by any act) on this day propitiate God better than by shedding blood.

Idul-Azha means the (great) sacrificial ceremony or festival. The festival commemorates Abraham's offer to sacrifice the object dearest to him, his son Ishmael (not Issac), on Mount Mina close to Mecca (the Bible gives the name of the land as Moriah). Its observance is one of the necessary acts in the performance of the Haj. All adult Muslims who can afford it are required to make a sacrifice of an animal. If the animal is a big one (*e.g.*, a camel or a cow), it is allowed to be the joint offering of seven, (according to some authorities as many as seventy). It is meritorious to sacrifice one animal for each member of the family, but on economic grounds the sacrifice of one animal for a whole family is allowed. A fully grown-up and sound camel, cow, goat or sheep is considered best. The sacrifice is offered with a short prayer absolutely surrendering the soul to Allah and acknowledging His greatness as the accepted creed. The meat is distributed equally among the poor, the relatives and friends and members of the household.

In India the cow is the usual beast of sacrifice. In other Muslim countries the camel takes its place. The cow being held most sacred by Hindus, the more popular Muslim monarchs of India (possibly a few of Afghanistan as well) had stopped its slaughter out of consideration for Hindu sentiment.

'Id-ul-Fitr.—"The festival of *breaking fast*," called also *Ramazan-ki-'Id*, and "the feast of alms," is celebrated on the 1st of Shavval. On this day Muslims bathe, put on new clothes, apply antimony to the eyes, and perfume themselves; then distribute the *fitr* or *sadkah*, which is $2\frac{1}{4}$ seers of wheat, dates, or any grain used for food, to the poor or religious mendicants. All then proceed to the *Idgah*, repeating "God is great. There is no God but God." The Mulla ascends the *mimbar* or pulpit, and after a short thanksgiving reads the *Khutbah* or sermon. He then descends to the lowest step (which with the Shiahs is the third, but the fourth with the Sunnis) and recounts the virtues of the king, and prays for him. Then a general prayer is offered, and the congregation rise with a shout of *Din!*—"Faith!" and fire of muskets. The evening is spent in rejoicing and merriment.

Khordadsal.—The birthday (the 6th day of the 1st Parsi month, Farvardin, 10th Sept.) of Zarathustra, the Prophet of the Parsis. He is the earliest known founder of a great religion of faith, courage and hope. The exact date and place of his birth have not yet been fully ascertained. Probably he was born in the province of Media, Iran (Persia) about 3,000 years ago. His great sermons are preserved in the Gathas (Parsi Scriptures). He was held in great respect by the court of Gushtasp. He professed the doctrine of monotheism and held that Ahura Mazda is the Creator of the Universe. He preached the doctrine of *Asha* or piety, which would infuse in man the spirit to fight the force of evil and attain the beatific region of Ahura Mazda.

Muharram (Ar. Muharram, 'most sacred').—The mourning held annualy in remembrance of the first martyrs of Musalmans, Hasan and Husain, from whom the whole race of Sayads are descended. Abu Muhammad al Hasan and Husain were the two sons of 'Ali bin Abi Taleb, the cousin, and Fatimah, the daughter of Muhammad. The Muslims are divided into two distinct sects, called the Shiahs and the Sunnis; the former regard Ali and his descendants. Hasan Husain, Zain-ul-Abidin, Muhammad Bauqar, Jafar Sadik, and Ismail bin Jafar Sadik, as the lawful leaders after Muhammad; and the latter, the Caliphas, as Abubakar, Omar, Oosman and 'Ali—hence quarrels, animosities, and dislikes are hoarded up to be avenged during Muharram. Taziyas (a term signifying grief, applied to a representation of the mausoleum erected over the remains of Imam Husain at Karbala) made of ivory, ebony, sandalwood, cedar, and sometimes wrought in silver filigree—and indeed of every variety of material, from pure silver to bamboo and paper, according to the rank and wealth of the party—are exhibited and conveyed in procession through the streets.

Navroz, Nauroz.—Jamshed of "the seven-ringed cup," who fixed the Parsi calendar, marked the day on which the Sun enters Aries (20th or 21st March) to be the New Year's Day. It is held that he chose to make the state entry on this day to the newly founded capital of Persepolis. The festival was given the name of Id of Jamshed and it has been celebrated with the greatest eclat in both Parsi and Muslim Iran (Persia). Shah Jalaluddin commenced his administrative year from this day. The Shiahs celebrate the day as Id-i-Khilafat or the festival in commemoration of 'Ali's formal succession on this day to the Caliphate. At Hyderabad (Deccan) and Murshidabad (Bengal) the New Year's Day is observed with great pomp and splendour. For the Parsis it is only next to Pateti as a festival of social merriment and they begin the Fasli (agricultural) year on this day. Navroz is one of the three celebrated Jashans of ancient Iran. Modern Iran celebrates the festival as a national event.

Pajjusana.—A great Svetambara Jain festival. Literally it means serving with a whole-hearted devotion. Formerly it was only observed by the ascetic order, but now the laity also do so. The festival, as is common to all Jain festivals, is marked with rigorous fasting and penance.

Two schools, both of the Svetambara sect, observe the festival on slightly different dates, either from the 12th or the 13th day of the dark fortnight to the 9th or the 5th day of the bright fortnight of Bhadra (Aug.-Sept.). In either case it lasts for eight days. The more devout observe complete fasting during the whole period, while others fast on the last day only.

Pateti.—The Parsi New Year, being the first day Hormazd of the first month Farvardin (Sept. 5). Firdausi associates many historical events of Zoroastrian Iran (Persia) with this day. It is the greatest social festival of the Parsis. In the great gatherings in their Fire Temples the cause of purity and chastity is preached.

Ram-Navami.—It celebrates the birth of Rama, one of the incarnations of *Vishnu* of the Hindu Trinity, on the 9th lunar day (*navami*) of *Chaitra* (March-April). Besides Rama, his consort Sita, and brothers Lakshmana, Bharata and Shatrughna are also worshipped. Prayers are offered to them at intervals of three hours. The day is one of strict fasting. The night is spent in worshipping. The learned give discourses upon Rama's life, stressing its excellent points as examples for man to follow. A legend (the *vrata-katha*) relating to the origin of this ceremony with pointers to the merits of observing it is recited. At Puri (*Jagannath*), an incarnation of Rama (*Vishnu*), in his representative figure *Madanamohana* is dressed as Rama and worshipped with great eclat. On this day oblations are offered to the departed ones.

In some cases, preparatory ceremonies commence from the first day of the waning moon. In the evenings sermons or discourses (kathas) are delivered in the temples of Rama. The birth is celebrated at 12 noon of the ninth day. This day is observed by a great many people as the New Year's day.

Ram-Lila.—An open-air amateur dramatic representation of selected episodes from Rama's life. The performance continues all through the Navaratra (the first nine days of the bright fortnight of Asvin (Sept.-Oct.) and the Vijaya-Dashami (the tenth lunar day). Every day in the afternoon one act is played, the battle between Rama and Ravana being the most popular theme.

Ram-Lila is an important festival observed in the Hindi-speaking provinces.

Ramzan.—This Muslim fast commences from the morning after the new moon of Ramzan is first observed, and is kept each day throughout the month of this name from 4 a.m., or when the first streak of light borders the eastern horizon, till the stars are clearly discerned in the heavens. During the whole period not the slightest particle of food, or a single drop of water or any other liquid should pass the lips. The day is spent in occasional prayers, besides the usual *namaz*, and in reading the *Quran* or the life stories of the prophets. The fast is generally broken by a cooling draught, called *Dandhi*. On the 21st and 22nd the Shiahs celebrate the night of Ali, the nephew and adopted son of Muhammad, who is said to have died on one of these two nights. They perambulate the streets, carrying a *tabut* and beating their breasts. The odd ones of the last ten nights are called, *Lailat-ul-Kadr*, or 'night of power,' because it is said the *Quran* descended from heaven during one of those nights. It should be observed as a vigil.

Shiva-Ratri.—The 14th night of the dark fortnight in Megha (Janu.-Feb.) is known as the night specially consecrated to Shiva. The 13th night of the waning moon of each month is held as the night of Shiva (Shiva-Ratri). The month of Shravana (July-August) is very sacred to Shiva. Hence, Shivaratri of Magha is generally called Mahashivaratri (maha meaning great).

In the *Mahabharata*, Bhishma, the great celibate, most scholarly and valorous prince, relates that King Chitrabhanu of the Ikshvaku dynasty popularised the festival. On this day when the King was fasting, a sage suggested to him that the human soul being one with God, indulgence in pleasure to the self and not infliction of pain to it by fasting would please God best. The King explained that the self of flesh and blood was not the real self and narrated the legend of a fast. In a previous life, the King was born a hunter. One dark night he lost his way in the forest and took shelter for the night on a *bilva* or bel (Indian wood apple) tree. The hunter had no food for the whole day and was ruminating on how his family must be keenly feeling the double misery of starving and missing him. He wept bitter tears. To make himself comfortable and also to have a better view of the lie of the land and approaching game, he tore away and threw down the boughs and leaves obstructing his vision. It so happened that that night Shiva was under that *bilva* tree, and the tears and leaves fell on him. Shiva was propitiated by this act of the hunter, although unknowingly done, and declared that if anybody fasted on that day and worshipped him with offerings of water and *bilva* petals he would, on death, be accepted in Shiva's heaven.

Another account in later Puranic stories (*e.g. Linga-Purana*) narrates that a hunter spending the day imprisoned in a Shaiva monastery or temple for having failed to pay his debt, was let out on parole. His way home lay through a forest and as night grew too dark to continue the journey, he took shelter on a *bilva* tree with his store of water. Hunger, anxiety and expectation of game kept him awake all through the night. Throughout the day in the monastery he had nothing to do but listen to the incessant recitation of Shiva's name, which had made an almost indelible impression upon his weakened brain. He filled his time mumbling the term in mock fashion, plucking the *bilva* leaves and throwing them down. Often his water pot was knocked about either by his movements or the wind and its contents trickled down. Shiva happened to be resting under the tree and was propitiated. The moral is that acts of devotion, even if not meant to be so, are accepted by the Lord.

Zarthost-No-Diso.—The anniversary day of Zoroaster's death. The Parsi Prophet died a martyr's death, at the age of 77, while at prayer in a fire temple, at the hand of Turbratur. On this solemn occasion of mourning, discourses on the life and teachings of the Prophet form the most important feature.

Eastern Group Conference.

In order to co-ordinate the industrial war effort of the eastern countries belonging to the British Commonwealth of nations, a Conference known as the Eastern Group Conference was held in New Delhi in October, 1940, and was attended by delegates from Australia, New Zealand, South Africa, North and South Rhodesia, Kenya, Tanganyika, Newfoundland, Zanzibar, Burma, Ceylon, Malaya, Hong Kong and Palestine. The Indian delegation to the Conference was an official one, while the United Kingdom was represented by a Supply Mission headed by Sir Alexander Roger.

The object of the Conference was to bring all the eastern industrial countries together as a single block for the production of war materials and to make them, as far as possible, self-supporting for all supply purposes. One of the functions of the Conference was to devise means to avoid duplication. Although the work of the Conference was limited to war supply problems, conversations not concerned with war supply were conducted outside the Conference proper under the aegis of the Commerce Department of the Government of India.

Eastern Group Supply Council.—The deliberations of the Conference led to the formation of a permanent body called the Eastern Group Supply Council, under the Chairmanship of Sir Archibald Carter, with headquarters at Delhi or Simla according as the Government of India determine their headquarters. The principal function of the Council is to pool the industrial resources of the eastern countries of the British Commonwealth and regulate distribution to the various theatres of war.

Training of Indian Technicians.—The problems of war supplies have naturally stimulated industrial expansion of the country, and here India had the expert advice of the Roger Mission which made a tour of Indian industrial centres to study possibilities of expansion first-hand and offer advice. One result of this has been that many Government workshops and ordnance factories have, under expert supervision, started to manufacture new items of defence equipment. Plans have been formulated for the technical training of some 15,000 men. This has been supplemented by the Bevin Scheme, by which Mr. Ernest Bevin, the British Minister for Labour, proposed to accept several hundred men from Indian workshops for advanced training in English factories. Already a number of men have proceeded to England for training under the scheme. The highly skilled personnel that these schemes would give India should materially help in her industrial development both now as well as after the war.

India's War Supplies.—India's achievements in the field of war supplies already constitute an impressive record. According to Sir Muhammad Zafrulla Khan, steel output will soon be increased by one-third; gun production has risen five-fold and ultimately will rise forty-fold; railway works and engineering shops have achieved miracles of adaptability to intricate work for which they were never originally intended; marine propelling machinery is to be made here for the first time; India's first aircraft has been assembled; her shipyards are working all out on naval craft; production of armoured fighting vehicles is limited only by the number of imported chassis and the output of armour plate. The woollen industry, handloom and power-loom, is working to capacity and this year the cotton and woollen textile industries will produce over 300 million yards of garment cloth to a value of almost the whole pre-war defence budget.

Although this industrial expansion is primarily designed to meet war requirements, the machinery in the new factories established for the purpose will be so designed that it can be switched over to ordinary industrial purposes after the war. Unequivocal promises have been given by Government spokesmen that these new industries will be given sufficient protection to withstand unfair competition after the war.

DASS, KARMAVEER ALAMOHAN, Mill-owner, Merchant and Banker. *b.* in 1895. Proprietor of Dass Brothers. Founder and Managing Director of the Bharat Jute Mills, Ltd.; The India Machinery Co., Ltd., (incorporating the Atlas Weighbridge & Engineering Co., B. W. Scales Co., and Pal's Engineering Works, Ltd.); Chairman, Dass Bank, Ltd.; Founder, the Dassnagar Cotton Mills, Ltd., the Howrah Insurance Co., Ltd., etc., Dassnagar, Howrah. Known throughout India as the Wizard of Dassnagar, Alamohan Dass is an industrial genius in a class by himself. Born amidst poverty and deprived of school education he came to Calcutta at the age of fifteen and started life as a street hawker. After several changes in trade and occupation Alamohan took up the manufacture of machinery in India as his life's job and started with Weighbridges and Weighing Machines. Critically observant by nature and ever willing to learn, Alamohan mastered the art and science of Jute industry through the association of a friendly Mill-owner and established the renowned Bharat Jute Mills with most of the machinery manufactured in his own workshops. While his B. W. Scales Co. and Pal's Engineering Works did the spade-work, his master-piece, The India Machinery Co., Ltd., around which the industrial city of Dassnagar is fast growing is practically flooding India with India-made machineries of all kinds and purposes. He is a man of very simple habits and sweet

DESAI, RUSTOM RATTONJI, a Parsi philanthropist and a retired businessman, had started his career as a Clerk at Rs. 20 p.m. with an Indian Firm for a few months, when he got a job in a well-known British Banking Firm (still thriving), where he served for four years. He was then offered a position as the head of its Shipping Department in another British Firm (still in existence) of Engineers and Government Contractors, and was soon promoted as an Assistant Manager. In 1906 he was called to England to join his father-in-law's business there. After a couple of years, due to some disagreement he left his firm and started on his own, and established the well-known Firm of Desai Bros. Ltd. of London. In London he formulated a Scheme for the protection of both the Merchants and Manufacturers before the last War. This evoked great appreciation in English Papers such as the "British Trade Journal and Export World," and but for the Great War it would have been a great success. During the last War he improvised a novel dug-out to shelter 30 to 40 persons at a time, against Air Raids in his compound, an achievement declared by many English Papers including the *London Times*, as the work of a pioneer, and for which the "Graphic" declared him as the "One Londoner at least who has had the nous to do so." He was awarded a big silver vaze by those families who had taken protection in the above shelter. About this time Mr. Desai came out successful in a litigation of a secret verbal Charity Trust of a friend, as a result of which, a sum of Rs.60,000 was given to Parsi Charities in Bombay. On 30th January, 1915, he got his daughter's "Navjote" Ceremony performed in London in spite of orthodox opposition, setting up a precedent thereby. He was the Hon. Secretary and Treasurer of the Parsi Association of Europe for a number of years, and did very useful work in the interest of the community in London. In 1923 he created a Charity Trust of Rs.1,00,000, and devoted it to the erection of two spacious buildings for middle-class Parsis in Bombay. In 1925, when the very existence of the Parsi Colony at Dadar, Bombay, was in danger, Mr. Desai as the President of the Landlords' Association, negotiated with the Bombay Improvement Trust and the Zoroastrian Building Society, Ltd., and secured not only favourable terms for the Landlords but saved the compact entity of the Parsi Colony and earned the praise of the community, and in appreciation of which he was presented with a special address in a Silver Casket by the Association. Known amongst his friends both in India and England as an unassuming person, he resides in Bombay devoting all his time and energy to the promotion of the good of his community in every form. He is on the Parsi Panchayet Advisory Committee of "Employment Bureau", and the Committee of the Dhundha Fund. He is one of the Trustees and Hon. Secretary of the Zoroastrian Association, and a Member of the Managing Committee of the Zoroastrian Co-operative Credit Bank, and a Trustee of the Rising Star Benevolent Society and several of the Parsi Charitable Trusts. *Address:* "Dil-khush", 40, Ridge Road, Malabar Hill, Bombay.

INDORE, THE MAHARAJA HOLKAR OF, His Highness Maharajadhiraj Raj Rajeshwar Sawai Shree Yeshwant Rao Holkar Bahadur, G.C.I.E., 1935; *b.* 1908; Accession 1926; Invested with Powers 1930; *m.* 1924 with Sanyogitabai (who *d.* 13th July 1937) daughter of the Junior Chief of Kagal (Kolhapur). Educated in England, 1920-23 and again at Christ Church, Oxford, 1926-29. *Daughter:* Princess Ushadevi Holkar, born 1933. *m.* again Miss Marguerite Lawler, in September, 1938. *Address:* Indore, Central India.

INDORE: HER HIGHNESS SHRIMANT SAUBHAGYAWATI MAHARANI INDIRABAI HOLKAR is the grand-daughter of the late Rao Bahadur Anandrao Ramkrishna, J.P. and of the late Rao Bahadur Mukundrao Ramchandra, the Literary talents of the former, and the artistic excellence of the latter, are the heritage Her Highness cherishes most. Educated privately, and married to His Highness Maharaja Tukoji Rao Holkar in 1913. Has been thrice to Europe; the Western scientific method got engrafted in the Eastern philosophic outlook of life, and the mould thus formed worked wonderfully in the management of State Departments, Educational, Medical, Charitable, Household, etc., which in 1923-24 Her Highness looked after. The Ahilya Seva-Sadan of Indore, the Rajawade Historical Institute and the Ramdas Research Institution of Dhulia, the Maharastra Sahitya Parishad, the Vedic Research Society, the Dharmakosh Karyalaya and the All-India History of Indian Philosophy, the village uplift carried on in the Indore State and several others, speak volumes of the richness of the charities and the ideals of Her Highness. An all-round progress of the Mother-Country based on her former culture is the central vision of Her Highness's life. *Address:* Lalbag Palace, Indore.

JAIRAM, VALJEE, RAI BAHADUR, (1941). Landlord, mines and millowner, sole proprietor of Jairamnagar, C.P., and a great philanthropist of C.P. & Berar. *b.* 1892 in Bilaspur District (C.P.).

He is now one of the most respectable and prominent contractors of the B. N. Railway. He is a premier Mining Proprietor of the Bilaspur District in the C.P. and Berar since 1918, with his centre of business at Jairamnagar (old Paraghat). He has two Rice Mills of modern style at Jairamnagar and has also recently started a Sugar Factory there. He holds Certificates of Approval for all minerals in the C.P. and Berar and also in the whole of the Eastern States Agency. Due to his extensive business of mines, factory and mills, etc., the whole area of a vast barren land has gradually developed into a beautiful, prosperous and industrious colony and in consideration of all this the local Government have changed the name of the village, in the Settlement Papers, from Khaira to Jairamnagar, of which he is the Malgujar. The B. N. Railway Co. has also, in consideration of his loyal and long connection with the Company, changed the name of the Railway Station from Paraghat to Jairamnagar from the 1st September 1939, after his name. He has constructed for the benefit of the poor, the Valjee Primary School with Teachers' Quarters and a Charitable Dispensary with all subsidiary buildings at Jairamnagar. He has also provided a Dharamshala, wells, roads and weekly markets in the Colony. He has presented a marble mosaic flooring costing Rs. 4,000 to the Raigarh Town-Hall. He has generously contributed to each and every deserving cause, provincial, national and international. His last gift worth mention is that of a fully equipped Ambulance Car for the Red Cross to commemorate the visit of H. E. the Governor of C.P. & Berar to Jairamnagar on the 10th February 1940, when he laid the foundation stone of the Sugar Factory there. He is a member of the Executive Committee of both the District and Provincial War Committees of C.P. and Berar. In appreciation of his public service, the well-deserved honour of "Rai Bahadur" was conferred on him on the 1st January 1941 and he is the first and the only recipient of the title amongst the contractors of the B. N. Railway. *Address:* Jairamnagar (C.P.) B. N. Railway. This is the only Railway Station in India

JODHA JUNG BAHADUR MAJOR RANA, M.B.E., M.C., entered the Indian Army as a 2nd Lieut., having passed from the Imperial Cadet Corps, Dehra Dun, in November 1913. Following a period of attachment to 2-3rd Gurkha Rifles at Lansdowne and to the K. G. O. Bengal Sappers and Miners at Roorkee, he assumed command of the Tehri Garhwal State Sappers. During the Great War and after, he served in France, Egypt, Mesopotamia, Afghanistan and Waziristan. Twice wounded in France, and twice mentioned in Despatches, he was awarded the Military Cross for his Gallantry and devotion to duty in the field when serving with the 39th Garhwal Rifles. The following account of his bravery is taken from the Gazette in which the notification of the award of this decoration appeared:—"During a feint attack made by the Indian Corps to the north of La basse Canal on 13th October 1915, this officer commanded a double Company with great ability and conspicuous gallantry in the face of a fierce fire from Rifles, Machine Guns, Grenades and Bombs, and was severely wounded in the neck. On the previous evening this very gallant officer was wounded in the arm by a rifle bullet, but notwithstanding his injury he returned to the firing line to see his company through the engagement which was due to commence the next day and for which he had made all the preparations. The bravery of 2nd Lieutenant Rana Jodha Jung Bahadur was previously observed on 25th September last when he led his Company with marked gallantry and dashed right up to the German wire under very heavy rifles and Machine Gun fire." In 1916 he was

LINLITHGOW: HER EXCELLENCY THE MARCHIONESS OF, is a daughter of the late Sir Frederick Milner, Baronet, and married His Excellency the Marquess of Linlithgow in 1911. Her Excellency inherited her interest in all forms of charitable work for the welfare of the community from her father who spent many years of his life in helping those in distress, and who was affectionately known as the "Soldiers' Friend" owing to his efforts on behalf of disabled ex-Service men after the Great War, 1914-1918. Her Excellency is particularly interested in Tuberculosis and has been—and still is connected with the wonderful work done at the Popworth Village Settlement for the Tubercular in England. Her Excellency is a well-known and popular hostess in London during the season, but she prefers a country life and is never happier than when staying at her beautiful home, in Scotland, Hopetoun House, on the banks of the River Forth. Her Excellency has many interests and excels at most games. She is also a keen gardner and has a considerable knowledge of all forms of plant life. Kaiser-I-Hind Gold Medal, 1939.

PRITAM KUNWAR RANI comes of the Bedi family of the Punjab and is the granddaughter of Sir Baba Khem Singh Bedi. *b.* 1916. *Educ.:* Queen Mary College, Lahore. *m.* in 1929 the late Raja Jagat Kumar of Sahaspur Bilari Estate in the Moradabad Dist., who died of a motor car accident in 1933, leaving behind a daughter, Rajkumari Diamand Premjagat Indra Mohini. The Rani Sahiba is very interested in the present-day problems and frequently contributes to the columns of the "Leader," "Landholders' Journal" and "Feudatory and Zemindari India." Her contributions have generally been very thoughtful and inspiring and in the words of the "Pioneer" of Lucknow her power of expression is so lucid and impressive that any leader writer might envy it. There are few meetings of landholders in the provinces where she is not invited and where members of her class do not look up to her for guidance and help in organising public opinion. Her Presidential address to the fifth U.P. Zemindar Conference at Benares was appreciated by no less a man than Lord Hailey. She is the Honorary Assistant Manager of her own Estate and has been elected Vice-President of the United Provinces Court of Wards Association. She is also a non-official visitor of the Moradabad District Jail. There are very few landlords in U. P. whose name is so popular as that of Rani Pritam Kunwar. The Rani Saheba takes great interest in the Girl Guide movement and is a Lieutenant of the Nainital branch. She also inaugurated the second session of the U. P. Hindu Young League at Bareilly. Raj Kumari Indra Mohini, the only daughter of Rani Pritam Kunwar and heir to Sahaspur Bilari Estate was born on July 25, 1931. She is being educated in St. Mary Ramnee Convent at Nainital. She is well behaved and intelligent. She is also receiving tuition in Hindi and Urdu. *Address:* Sahaspur Palace, Dist. Moradabad.

PUCKLE, FREDERICK HALE, B.A., C.S.I. (1938), C.I.E. (1930). ALWAR: His Highness Maharaja Shri Sewai Tej Singhji Bahadur, the present Ruler of Alwar State, Rajputana.

Born : 19th March 1911 at Srichandpura in Alwar.

Educated : Privately.

The State was founded by Rao Pratap Singhji of Macheri who had descended through Naru from Raja Udaikaranji, Ruler of Jaipur in the fourteenth century. The Alwar Ruling family are Kachhwaha Rajputs of the Naruka sub-clan.

The following have been the rulers of Alwar State :—

(1) Maharao Raja Shri Sewai Pratap Singhji, founder of the State, 1757-1791.

(2) Maharao Raja Shri Sewai Bakhtawar Singhji, 1791-1815, entered into offensive and defensive alliance with the British Government in 1803.

(3) Maharao Raja Shri Sewai Viney Singhji, 1815-1858, rendered valuable services to the British Government.

(4) Maharao Raja Shri Sewai Shivdan Singhji, 1858-1875.

(5) Lt.-Col. His Highness Maharaja Shri Sewai Mangal Singhji, G.C.I.E., 1875-1892. The title of Maharaja as a hereditary distinction was conferred upon him.

(6) Col. His Highness Maharaja Shri Sewai Jey Singhji, G.C.S.I., G.C.I.E., 1892-1937, rendered valuable services to the British Government in the China War, Great War and the Afghan War. He was invited to attend the Round Table Conferences on Indian Constitutional Reforms and visited Europe several times. A personal salute of 17 guns and a permanent local salute of 17 guns was granted to His Highness.

(7) His Highness Maharaja Shri Sewai Tej Singhji Bahadur ascended the Gadi in 1937. His Highness takes a keen interest in the administration of the State and in the welfare of his subjects. Maharaj Kumar Pratap Singhji, heir-apparent, was born on 17th June, 1938, and Maharaj Kumar Yeshwant Singhji was born on 19th September, 1939.

The area of the State is 3,217 square miles, and the population according to the 1941 Census is 8,23,055. The revenue of the State is about Rs. 40 lacs.

BALASINOR: H.H. NAWAB SAHEB BABI SHRI JAMIATKHANJI BAHADUR, the present Ruler of Balasinor State.

Born : 10th November 1894. *Ascended the Gadi* on 31st December 1915.

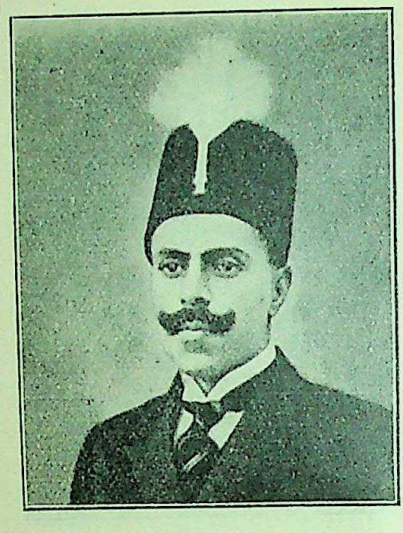
Educated : At Raj Kumar College, Rajkot, where he achieved the Diploma. Afterwards joined the Imperial Cadet Corps, Dehra Dun and returned with success. He is allowed to wear the Imperial Cadet Corps uniform. His Highness is a ruler of literary taste and can compose poetry in Urdu and Gujarathi. He is also endowed with the natural gift of writing drama and plays which are greatly admired in the province of Gujarat.

Married : First H. H. Begum Saheba Shri Subhan Bakhte Saheba, daughter of the Heir-apparent of Junagadh State, but she died. At present His Highness the Nawab Saheb has three Begum Sahebas: (1) H.H. Shri Sardar-Begum Saheba. (2) H.H. Shri Khurshed Begum Saheba. (3) H.H. Shri Zohra-Begum Saheba. The senior Begum Saheba, Sardar-Begum Saheba, the daughter of the late Thakor Saheb of Kervada, gave birth to a son in 1920, who unfortunately died in infancy. The third Zohra-Begum Saheba has given birth to four daughters.

His Highness the Nawab Saheb comes of a very ancient and well-known Babi Sunni Pathan dynasty. The ancestors of His Highness were the descendants of Sher Khanji Babi, son of Bahadur Khanji Babi, a distinguished officer in the Imperial Service at Delhi, who enjoyed a very high position at the time of the Mughal Emperors. Even to-day the same magnificent position is fully maintained. The Rulers of this clan have been famous not for their kingly pomp, dignity and splendour, but for their luxuriance of benevolence and exuberance of munificence throughout Gujarat and Kathiawar.

Military Force : 60 Cavalry, 177 Infantry and 10 guns.

Permanent Salute : 9 guns. The ruler has been granted a sanad of adoption. His Highness is also a member of the Chamber of Princes in his own right and is entitled to be received by H. E. the Viceroy.



Balasinor State is a second class State in the Bombay Presidency with high Civil and Criminal powers.

Area of the State : 189 square miles. *Population :* 52,525 in 1931.

On the outbreak of the War His Highness placed his personal services and resources of the State at the disposal of His Majesty, presented an Ambulance Car and also made Cash Contributions.

BANGANAPALLE: NAWAB MIR FAZLE ALI KHAN BAHADUR OF BANGANAPALLE is the only Muslim Ruler in South India.

Born: 9th November 1901. *Succeeded* on 6th July 1922, *Education:* St. George Grammar School, Hyderabad (Deccan); Newington Institute. Madras; Mayo College, Ajmer. *Marriages:* (1) In 1924 the only daughter of his paternal uncle (died in 1928). Two children. *Heir-Apparent:* Nawab Mir Ghulam Ali Khan Bahadur, born 12th October 1925; and Sahebzadi Sultani Begum, born 31st August 1927. (2) In 1930 the present Begum Sahiba, Ra'ees-un-nissa Begum from the family of Nawab Salar Jung Bahadur (Hyderabad). Two daughters: Sahibzadi Nargis Khatoon (Sahibzadi Pasha), born 20th August 1936 and Sahibzadi Haji Pasha, born 18th August 1938.

Recreation: Tennis, Billiards and Shikar. The Nawab Saheb Bahadur has travelled widely in India, and has made pilgrimages to the Holy Places in Iran, Iraq and Arabia.

The State pays no tribute to the Crown. The Nawab Saheb Bahadur is a member of the Chamber of Princes.

Salute: 9 guns. *Area of the State:* 275 square miles. *Population:* 39,239 (mostly Hindus). *Annual Revenue:* Rs. 3,35,546.

The State is rich in mineral resources; diamond deposits, also copper and calcite mines. "Labour is cheap, water supply plentiful and working conditions ideal," is the view expressed by geologists about the facilities afforded in regard to the working of the diamond mines. The State is also rich in slab deposits. The chief food grain is cholum. There is free medical aid and free education upto the Lower Secondary grade.

While placing all its resources at the disposal of the British Government, the Darbar has contributed a sum of Rs. 5,000 towards the War Fund and Rs. 1,543-2-10 being the sum contributed by officials and the public. Further efforts are being made to collect contributions from the public. In response to Lady Linlithgow's appeal, 178 trinkets have so far been sent to the Mint Master, Bombay.

Dewan: RAO BAHADUR M. S. MANDANNA; *Chief Judge:* P. RAJAGOPALAN, ESQ., I.C.S.; *Civil and Sessions Judge:* MR. K. ABDUR RAHMAN KHAN, M.A., B.L.; *Munsif-Magistrate:* KHAJA NAZEER HUSSAIN SAHEB; *Development Officer:* HYDER BEIG SAHEB; *State Prosecutor and Pleader:* MR. M. SHRIMANT MAHARAJ KUMAR UDAYSINH RAO GAEKWAR, B. A. (Bom.); B. A. (Cantab.), cousin of the present Ruler of Baroda.

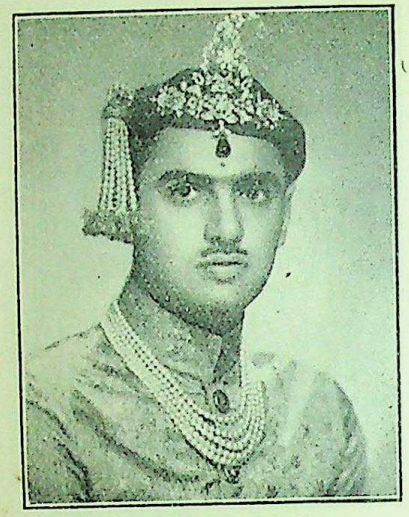
Born : at Baroda in the year 1915.

Educated under capable European and Indian Tutors, and at Motibaug Princes' School. Passed the Matriculation examination from the Baroda High School and B.A., from the Baroda College in 1936, where throughout his career he was known for his social and amiable nature and was spoken of very highly by his Principal and Professors. The Maharaj Kumar attended the Deccan College, Poona, for one academic year.

The late Prince Shivajirao, father of the Maharaj Kumar was a great personality of the ruling house of Baroda, a noble hearted prince. He was hailed as another " Ranji " in English cricket.

His mother, Princess Kamaladevi Baisaheb who hails from the famous Sardar Kadam family, is well-known for her proficiency in outdoor sports, Riding, Tennis, Badminton and many acts of benevolence.



Shri Maharaj Kumar Udayasinharao possesses in him the literary qualities, sporting gifts and generosity of his parents to which he has added the vast and varied experience of a scholar, having stayed at Cambridge for three years.

He is a sportsman in the real sense of the word. He was a popular and courteous leader of his School and College Cricket XI and a patron of some of the brilliant star-cricketers of Baroda. He is fond of shikar and is a good shot. He is also a good tennis player.

The Maharaj Kumar went abroad in 1936 for higher education and joined Jesus College, Cambridge. He was also a member of the Middle Temple and had a distinguished career both in study and sports. He returned to India after the death of his grand-father, His late Highness Maharaja Sir Sayaji Rao Gaekwar. He is now reading for the Barrister's Examination. *Address :* Motibaug, Baroda.

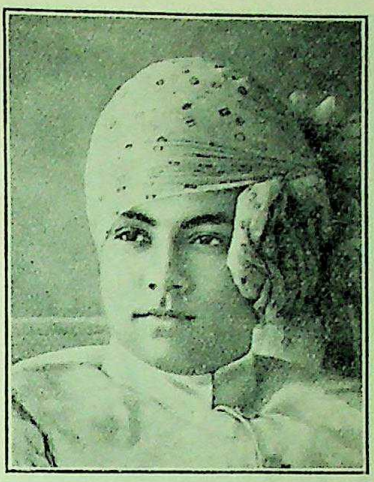
SHRIMANT MAHARAJ KUMAR KHANDERAO GAEKWAR, cousin of the present ruler of Baroda and a grandson of His Highness late Sayajirao Gaekwar.

Born : at Baroda in the year 1916.

Educated under capable European and Indian Tutors at home and at the Princes' School at Motibaug, Baroda. Passed the Matriculation from the Baroda High School in 1931 and joined the Baroda College ; coached privately for the School Certificate Examination (Senior Cambridge) which he passed in 1936 from the Lahore centre. The Prince then went abroad for higher Education ; joined his brother at Jesus College, Cambridge, as an under-graduate in 1936-37. The Maharaj Kumar possesses in him the literary qualities and sporting gifts of his illustrious parents. Unfortunately the Maharaj Kumar could not finish his studies at Cambridge due to outbreak of the War.

He is an all round sportsman, played cricket for his school and college, played in the Ranji Trophy Tournament and against Lord Tennyson's team at Baroda. He had a good season in England when he played a few matches for his college and Cambridge University against some County teams, and the West Indian touring side that visited England in 1939.

He is a member of the Willingdon Sports Club, Fenners Club, Cambridge and took part in important matches. He is good at Tennis also. He is fond of Shikar and is a great shot.



Returned home after the death of his grand-father. At present he is receiving training at the Indian Military Academy, Dehra-Dun. He is very popular and loved on account of his courteous behaviour and sweet manners.

Address : Motibaug, Baroda.

BENARES: H. H. MAHARAJA VIBHUTI NARAIN SINGH BAHADUR (minor), the present Ruler of Benares.

Born on 5th November, 1927.
Succeeded April 5, 1939.

H. H. the Maharaja being a minor, the administration of the State is carried on by a Council of Administration.

The State of Benares under its Hindu Rulers existed from time immemorial and finds mention in Hindu and Buddhist literature. In the 12th century it was conquered by Sahab-ud-din Ghori and formed a separate province of the Mohammadan Empire. In the 18th century, Raja Mansaram, an enterprising Zemindar of Gangapur, obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738 and founded the Benares State, which comprised the four Sirkars of Benares, Ghazipur, Jaunpur and Chunar. Raja Mansaram died in 1740 and his son Balwant Singh became the virtual ruler. During the next 30 years attempts were made by Safadar Jung and after him by Shuja-ud-daula of Oudh to destroy the independence of the Raja, but the latter withstood them successfully, strengthened his position and built the fort of Ramnagar on the bank of the Ganges. Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh. He was expelled by Warren Hastings. Balwant Singh's daughter's son Mahip Narain Singh was then placed on the Gadi. The latter proved an imbecile and there was mal-administration which led to an agreement in 1794 by which the lands held by the Raja in his own right, were separated from the rest of the province. The direct control of the latter province was assumed by the British Government under an arrangement by which the surplus revenue was granted to the Raja while the former constituted the Domains. On the 1st of April, 1911, the major portion of these Domains became a State. The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State. The State now consists of three districts, *viz.*, Bhadohi, Chakia and Ramnagar. H. H. the Maharaja of Benares, though a minor, is very anxious to see the successful end of the present war in favour of the British nation. The Council of Administration, Benares State, have, therefore, purchased Defence Bonds worth Rs. 1,03,500 and have also invested nearly Rs. 16,148-6-3 in subscription to H. E. the Viceroy's War Purposes Fund and Postal Saving Certificates. Efforts are in progress for the formation of Civic Guards in the Districts of Benares State. The officers and officials of the State have also contributed to His Excellency's War Purposes Fund.

BHAVNAGAR: Lt. His Highness Maharaja Raol Shree Sir Krishna-kumar Sinhji, K.C.S.I., Maharaja of Bhavnagar.

Born: 19th May 1912. His Highness is a Gohel Rajput and a direct descendant of Sajakji who is said to have settled in the country about 1260.

Educated: Harrow, England.

Married: In 1931 to Vijiaba Saheba, the 3rd daughter of Yuvaraj Maharaj Kumar Shri Bhojrajji of Gondal. Has two sons.

Succeeded to the Gadi: On the death of his father, Maharaja Sir Bhavsinhji, K.C.S.I., on 17th July 1919. Invested with full ruling powers on 18th April 1931.

Heir-Apparent: Yuvaraj Shri Veerbhadrasinhji.

Second Son: Kumar Shri Shivabhadrasinhji.

Area of the State: 2,961 square miles.

Average Annual Revenue: Rs. 1,20,28,758 including Railway.

Population (1931): 500,274.

Chief Products: Grain, Cotton, Sugar-cane and Salt.

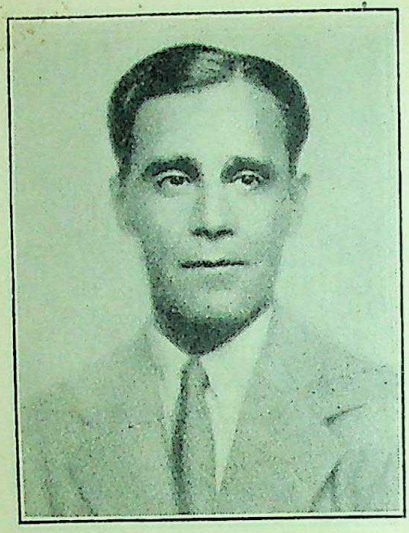
The Bhavnagar State Railway is 307 miles in length. The Port of Bhavnagar has a good and safe harbour for shipping.

The noteworthy features in the administration of the State are the entire separation of judicial from executive functions and the decentralisation of authority. The authority and powers of all the heads of Departments are clearly defined and each within his own sphere is independent of the others being directly responsible to the Darbar.

PRINCIPAL OFFICERS.

Mukhya Dewan: Mr. Anantrai P. Pattani, M.A. (Cantab.)

Naib Dewan: Mr. Natavarlal M. Surati, B.A., LL.B.



Judicial Assistant: Mr. Bhaskarrao V. Mehta, M.A., LL.B., Advocate (O.S.).

Personal Assistant: Mr. Hargovind Manishanker Trivedi, B.A., LL.B.

Salute: 13 guns. *Capital Town:* Bhavnagar.

BHOPAL: LT.-COL. HIS HIGHNESS SIKANDER SAULAT IFTIKHAR-UL-MULK NAWAB MUHAMMAD HAMIDULLA KHAN, BAHADUR, G.C.S.I., G.C.I.E., C.V.O., B.A., LL.D., the present Ruler of Bhopal, succeeded his mother, the late Her Highness Nawab Sultan Jehan Begum, in May 1926, when weighed down by age and cares of state, she abdicated in his favour. Previous to his accession, His Highness had actively participated in the administration for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice. His Highness was also the Chancellor of the Chamber of Princes during 1931-32, and attended the various sessions of the Round Table Conference in London to advise and participate in the deliberations of that body and its committees on the subject of political reform in India.

In the game of polo His Highness is well known as one of the greatest players of the generation and enjoys international fame. No less conspicuous are his achievements in administration, which works directly under his personal and active supervision.

The administration is assisted by a Legislative Council, which represents traders, cultivators, Jagirdars, and general urban interests elected through popular constituencies.

Bhopal is notable as the principal Islamic State of Malwa and in India, second only to the State of Hyderabad. It is rich in its deposits of iron, bauxite, mica, and other valuable minerals and is rapidly growing in industry.

In the present conflict as in the last Great War, the response of Bhopal has been most enthusiastic. Apart from contributions in the form of gifts, investments, and subscriptions for the purposes of a wide war effort, His Highness' gift of American Securities amounting to over £54,000 has been accepted by His Majesty for the formation of a Bhopal Flight of fighters and the expenditure on the Army already the largest single item in the State budget has now been doubled. It now accounts for no less than 25 per cent. of the total revenues of the State. The 20th (Bhopal) Field Ambulance, a hospital unit equipped on a first class scale and the Sultania Infantry are already in the field. The latter has been replaced by another unit, while a complete Mechanical Transport Unit has received its initial training and is now on active service.

In March 1941, His Highness visited the Middle Eastern front where he inspected the British and Indian Forces in the field, and was present at the famous assault which ended in the subjugation of Keren in Eritrea.

Salute : 19 guns. (21 guns within the State). *Area :* 7,000 sq. miles. *Population :* 754,000. *Heiress-Apparent :* The Princess Gauhar-i-Taj Surayya Jah Nawabzadi Abida Sultan, Bahadur. Other daughters of His Highness : Princess Mihr Taj Nawabzadi Sajida Sultan and Princess Qamar Taj Nawabzadi Rabi'a Sultan.

EXECUTIVE COUNCIL.

President : A. M. Mu'tamad-us-Sultan, Rai Bahadur, Raja Oudh Narain Bisarya, Bahadur, Member, Revenue Department. *Members :* A. M. Mushir-al-Mulk Ali Qadr Qazi Ali Haider Abbasi (Political) ; A. M. Mr. Shuaib Qureshi, M.A. (Oxon.), LL.B., Bar-at-Law (Education and Robkarikhas) ; A. M. Amin-ul-Mulk Walaqadr Mr. Salamuddin Khan, B.A., LL.B. (Law and Justice, Commerce and Industry, P.W.D., and Publicity Bureau) ; A. M. K. F. Hayder (in-charge of Finance).

PRINCESS ABIDA SULTAN—SURNAMED AFTER HER RENOWNED GRANDMOTHER, HER HIGHNESS THE NAWAB SULTAN JAHAN BEGUM, C.I., G.C.S.I., etc., is the eldest daughter of His Highness the present Ruler of Bhopal and Begum-consort, Her Highness the Nawab Maimuna Sultan Shah Banu Begum Sahiba. The Princess who is officially entitled the Nawab Surayya Jah Gauhar-i-Taj Begum is the heiress-apparent to the throne.

Born : On the 28th August 1913. She was brought up and educated in Bhopal under the enlightened guidance of her illustrious grandmother. In 1933, the Princess was married to Nawab Sarwar Ali Khan Sahib of Kurwai, and has one son.

With her special knowledge of the humanities of classical Arabic and Persian, the Princess combines the best accomplishments of the western education which she received under tutors of outstanding abilities. She is well known as an accomplished musician, a fine rider and polo player, a good shot, and an entertaining conversationalist quite at home in a large variety of modern topics.

For some years past, the Princess is being initiated in the art of administration under the care and guidance of her own talented father, His Highness the present Ruler of Bhopal. During this period she has held charge of the Private Estate of His Highness as Chief Secretary in the Department of Deori Khas which is entrusted with the administration of the estate and large schemes of Agricultural Development. She is now the President of the Bhopal State Cabinet, a new body created since the beginning of the war to undertake the charge of administration in any emergency which might entail, in the exigencies of war services, the presence of His Highness in the field. At present, all matters of State Administration decided by the Executive Council are submitted to this body, which functions under the direct supervision of His Highness the Ruler after whose approval the decisions taken by it become operative.

STATE CABINET.

President : Princess Abida Sultan Nawab Surayya Jah Gauhar-i-Taj Begum Sahiba.

Members : A. M. Sir Joseph William Bhore, K.C.S.I., K.C.I.E., C.B.E., C.I.E., Economic Adviser to His Highness ; A. M. Mu'tamad-us-Sultan Rai Bahadur Raja Oudh Narain Bisarya, B.A., Member, Revenue Department and President, State Council, Bhopal ; and A. M. Nasir-ul Mulk Sir Syed Liakat Ali, Kt., M.A., LL.B., Ex-Minister-in-Attendance to His Highness.

MAJOR NAWABZADA FAKHR-UL-MULK, SAIDUZ-ZAFAR KHAN, elder son of the late General Nawab Mohsin-ul-Mulk, Obaidullah Khan, C.S.I., and the nephew of H.H. The Ruler of Bhopal.

Born : January, 1907.

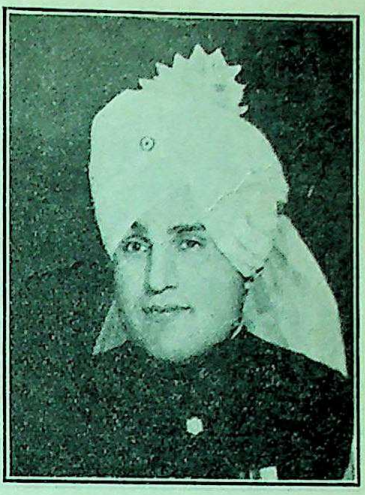
Educated : Privately.

Received Military training with the 1st Battalion "The Black Watch" (42nd Royal Highlanders) ,1931-32 and was attached to "Staff Head Quarters," Mhow, C.I., 1932-33.

He was Military Secretary to His Highness the Nawab of Bhopal from 1934-35 and Commanding Officer, "Bhopal Sultania Infantry", 1935-36.

At the outbreak of the present European War, the Nawabzada offered his personal services and placed all the resources of his private estates at the disposal of His Majesty's Government. The Nawabzada has donated Rs.10,000 and Rs.500 per month for the duration of the War to His Excellency the Viceroy's War Fund, and has also made a number of other contributions. He has recruited over 300 able bodied men for (52) Bhopal Motor Transport Unit, which is now being raised at Bhopal.

He takes a keen interest in public welfare and private and local institutions. Quite recently he made a grant of Rs.1,44,000 to the "Aligarh Muslim University" towards the enlargement of higher technical education. He is a Member of the Court, Muslim University, Aligarh.



The Nawabzada has travelled extensively in England and the continent as well as in India. He is a very keen sportsman and owns a large string of race-horses. He is joint owner of the famous "Mas D' Antibes," winner of 2 Viceroy's Cups and one King Emperor's Cup in 1936 and 1937 respectively, also owner of "Zuyder Zee" whose successes on the Indian Turf are well known. He owns a very good Stud at Bhopal, where horse-breeding is now flourishing.

Other Recreations : Big game hunting, Tennis and Yachting, also Commodore of the Bhopal Yacht Club.

Address : Said Manzil Palace, Bhopal, C.I.

MAJOR NAWABZADA IMAD-UL-DAULAH YEMIN-UL-MULK RASHIDUZZAFAR KHAN, B.A., younger son of the late General Nawab Mohsin-ul-mulk Obaidullah Khan, C.S.I. and the nephew of His Highness The Ruler of Bhopal.

Born : November 1908.

Educated : Privately, later joined the Muslim University, Aligarh. Graduated in 1932 with a brilliant career. Was the Secretary of the Historical Society which toured many historic places all over India under his secretaryship. Captain of the Muslim University Hockey XI in 1932.

Received administrative revenue training in Bhopal. He was responsible for colonisation work entrusted by H. H. the Ruler.

Being a keen lover of art and literature, he has been responsible for elevating the literary standard of Bhopal to a great height by patronising the leading Urdu poets in India.

At the outbreak of the present War the Nawabzada offered his personal services and placed all the resources of his private estates at the disposal of His Majesty's Government. He has just completed a course of Military training in the C.I. States O.T.C. at Indore, with remarkable success. He donated Rs. 10,000, and Rs. 500 per month for the duration of the War to H. E. the Viceroy's War fund, also generously to other War purposes. The Nawabzada takes a keen interest in education and is always contributing towards private and local charitable institutions. Together with his brother he recently donated Rs. 1,44,000 to the Muslim University, Aligarh, for the enlargement of higher Technical Education. Is a Member of the Court, Muslim University, Aligarh.

Sports : Being the Vice-President of the All-India Hockey Federation, the Nawabzada takes a very keen interest in Hockey. The famous "Bhopal Wanderers XI" owes its very existence to the Nawabzada's generous help and support. The Nawabzada owns a fine string of racehorses, and it will be recalled that his famous "Mas D'Antibes" won two Viceroy's Cups and one King Emperor's Cup in 1936 and 1937 respectively.

The foundation of a Stud at Bhopal where horse breeding is now flourishing under his personal care is the outcome of his idea.

Other Recreations : Big game hunting, yachting, and tennis. Vice-Commodore of the "Bhopal Yacht Club." He has travelled extensively both abroad and in India.

Address : Said Manzil Palace, Bhopal, C.I.

BIKANER: GENERAL HIS HIGHNESS MAHARAJADHIRAJ RAJ RAJESHWAR NARENDRA SHIROMANI MAHARAJA SRI GANGA SINGHJI BAHADUR, G.C.S.I., G.C.I.E., G.C.V.O., G.B.E., K.C.B., A.D.C., LL.D., the present Ruler of Bikaner, was adopted by his brother, the late Maharaja Sri Dungar Singhji Bahadur. A fine type of Rathore Rajput, he affords an admirable example of what modern training can do for an Indian Prince. He is the twenty-first Ruler of Bikaner since its foundation by Rao Bikaji in 1465 A.D., and is worthily upholding the traditions of his illustrious house for gallantry and loyalty. The figure twenty-one is regarded by Indians as a very lucky number and it has proved to be so for the Bikaner State, because the Maharaja has not only brought it to a pitch of efficiency and prosperity but in his time Bikaner has ranked among the foremost States of India and proved to the world what pillars of strength the Princes can be to the Empire. The services rendered by His Highness' Government form one of the brightest chapters in the history of British connection with India.

Born : On 13th October 1880.

Succeeded to the Gadi on 31st August 1887, and assumed full ruling powers in 1898.

Educated : In 1889 he entered the Mayo College at Ajmer, studied there till 1894. His Highness' career at the College, where he won seven medals and many other prizes, was exceptionally brilliant.

His Highness represented India at the Imperial War Cabinet and Conference held in England in 1917 and at the Peace Conference in 1919; was one of the signatories to the Treaty of Versailles by virtue of his appointment as one of the Plenipotentiaries, Commissioners and Procurators in respect of the Indian Empire by His Imperial Majesty the King-Emperor under the Royal Sign Manual and Signet; received the Freedom of the Cities of London, Edinburgh, Manchester and Bristol; represented

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the Ruling Princes of India at the Assembly of the League of Nations, 1924; was leader of Indian Delegation to the Assembly of the League of Nations, 1930; was one of the three representatives of India at the Imperial Conference, 1930; and was a Member of the Indian States Delegation to the Indian Round Table Conferences, London, 1930-31 and 1931-32.

The Rathore clan of Rajputs has always been a race of warriors. It was by means of the sword that His Highness' ancestors conquered and maintained, sometimes against over-whelming odds, the territory that has now come down to His Highness. The warlike spirit of the race has remained intact and on more than one occasion the Maharaja has proved himself a worthy scion of the distinguished race of warriors to which he belongs.

The establishment of the Walter Nobles High School for boys, Her Highness the Maharani Nobles' Girls' School and the Dungar College, besides 6 State High Schools, including one for girls, and 3 State-aided High Schools, are outstanding monuments of His Highness' zeal for the spread of knowledge. Education, in all its stages and to all classes of subjects, is imparted free in the State. Grants-in-aid to educational institutions and libraries and scholarships for higher studies are awarded on a generous scale. The enactment of free compulsory primary education, the opening of a large number of Girls' Schools, the progress of the Boy Scout Movement, the opening of Libraries, specially the King-Emperor George V Silver Jubilee Library, are among other features of the progress made by the State in education.

The State possesses in the Capital two large and thoroughly well-equipped General Hospitals, one for men and one for women and children, costing over Rs.15 lakhs. These Hospitals are under the charge of doctors of eminence and are recognised as two of the leading institutions in India. There are common to both the Hospitals —

an X-Ray and Radium Institute,
Pathological Department,
Ophthalmic Department,
Dental Department, and
Ear, Nose and Throat Department,

all under highly qualified specialists.

There is also a well equipped separate T. B. Hospital in the Capital.

The State also maintains an efficient Medical Department which through the agency of 49 hospitals and dispensaries provides adequate medical relief throughout the territories of His Highness. A Maternity and Child Welfare Centre also functions in the City.

It is not possible, in the space at our disposal, to detail all the measures of reform carried out by His Highness as the record has been one of phenomenal progress and development. Great improvements have been made in every branch of the administration and continuous attention is being paid to measures for securing the happiness and good government of the people. While the revenue has shown a marked increase, the expenditure on the nation-building activities has kept pace with the increased revenue.

No Indian Prince is better known or more honoured in the Empire than His Highness Maharaja Ganga Singhji who has to his credit a brilliant record of service to the British Crown which is neither surpassed nor equalled by any other Ruler of India. It is said that the path of duty is the path of glory, but in these days of scientific progress the discharge of duty alone without the power of brain, industry and sacrifices cannot help a leader in the position of the Maharaja of Bikaner, to rise to his fullest power. He has attained his unique position not only by a strict application to duty but by marvellous driving power that has been the surprise of those who came in contact with him. His Highness won the affection of his people during the long period of his brilliant and honourable rule by his constant industry, strenuous labour and sacrifices for their best interest. There have been times in his remarkable career when the strain of work has impaired his robust health but he has refused to quit his post. A Prince who can conceive and execute a gigantic scheme costing several crores of rupees for fertilizing the barren and thirsty soil of Bikaner desert, whose income, not very many years ago, was only 20 lakhs of rupees, cannot but be a great genius; but this remarkable achievement does not stand alone; another sum of over four crores of rupees has been spent on railways, and to-day there is a network of railway in the State, the total open mileage being 852·29 miles. When to those are added the large sums of money spent for public welfare, modern educational institutions and well-equipped modern hospitals, one obtains an idea of the enormous stride of progress in Bikaner and the benefits which the people have derived from the benevolent rule of one of the greatest Rulers that Rajputana or any other part of India has produced. Compare the State as it is now with what it was twenty years ago, and the rapidity of the extent of progress it has made becomes still more obvious. The achievements of Maharaja Ganga Singhji will form enduring monuments of his services to the State.

Digitized by Arya Samaj Foundation Chennai and eGangotri

His Highness was one of the first Ruling Princes in India to introduce a civil list for the governance of his personal expenditure, which he revised with the idea of increasing the benefits to his subjects. For some time he held the finance portfolio in his own hands and managed with the greatest magnanimity and with the one object to make his subjects the better able to meet the strain which the irrigation works had placed upon them. The brilliant results of his loving labour for his beloved subjects during the best years of His Highness' life are patent in the great schemes which have been brought into existence, and for all the money laid out a substantial return is assured apart from the increased prosperity which the irrigation brings to the public.

That a Ruler possessed of such rare distinction and rarer sense of duty, who has served his State in a spirit of whole-hearted devotion, worked for the promotion of its economic interest day in and day out and who has served the Empire with distinction on many historical occasions should also be a valuable asset to his own Order is natural and not at all surprising. He has been unsparing in his efforts to maintain the rights, the privileges and the dignity of the members of his own Order, and as a distinguished Chancellor has served the Chamber of Indian Princes with a spirit of devotion and ability that has left a permanent mark in the history of that Chamber.

His Highness the Maharaja of Bikaner has shown how the reform giving his people an active share and interest in the management of their country, may be introduced without belittling the dignity and rightful position of their reigning Prince, but rather with the effect of enlarging his happiness by giving him the supreme pleasure of watching his subjects grow in prosperity and contentment and of knowing in his innermost heart that his care and labour have made that possible and brought it about. By such exalted service all India is helped upon her way. For his devotion to India His Highness is entitled to the grateful acknowledgment of all who love India as their Motherland.

His Highness completed the 53rd year of his reign in 1940.

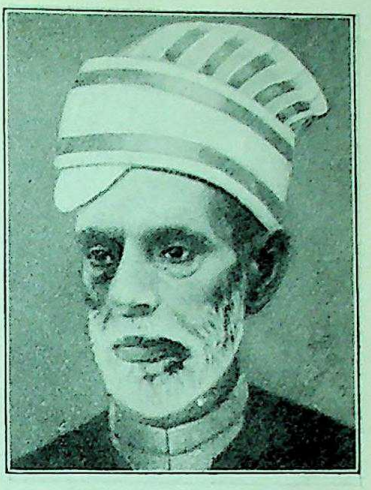
CHITRAL: MAJOR H. H. MEHTAR SIR MOHAMMAD NASIR-UL-MULK, K.C.I.E., the present Ruler of Chitral.

Born : 29th September 1897.

Nationality : The Chitral dynasty trace their descent to Amir Taimur (the famous Tamerlane) through his grandson Sultan Hussain, the Emperor of Herat. Mirza Ayub, the grandson of Sultan Hussain, came to Chitral as an exile and married the daughter of the then ruler of Chitral who proudly styled himself the descendant of Alexander the Great. The issue of the marriage was the founder of the present dynasty.

Educated : First privately and then in the Islamia College, Peshawar, where he received the Chelmsford Gold Medal for being first in B.A. examination. His Highness also had military training and was attached as Hon. Officer to the Royal 13th Frontier Force Rifles, 6th Battalion, from 1926 to 1931. His Highness was with the Political Department from 1931 to 1936 when he succeeded to the *Gadi*. His Highness is officially styled as "Mehtar" but his own subjects address him as "Badashah".



The Ruling family is staunchly loyal to the British Crown. In war and peace the Rulers have given undeniable proof of their devotion. In 1919 in alliance with the British Government Forces, His Highness commanded the Chitral State Army and occupied the Afghan Cantonment at Birkot and captured guns and other war materials as mentioned in Government despatches. In 1924 when his father His late Highness had gone on a pilgrimage His Highness acted as Regent and administered the State very successfully, and the Government on his request granted 1,000 more rifles for the State forces. On the return of his father His Highness was appointed as Governor of the Mastuj Province, which post he retained till his succession in 1936. In 1926 His Highness was appointed as Hon. Lieutenant in the Indian Army. In 1932 His Highness was one of the two delegates representing the British Government on the Boundary Commission with the Afghans. In January 1934 His Highness was made an Hon. Captain. In 1940 His Highness was promoted to Honorary Majorship in the Indian Army.

His Highness is interested in the study of general science and also composes Persian verses. His Highness has written a book of more than 2,000 Persian verses on the bearings of the Theory of Cosmic and Biological Evolution on Islam, which has been published

Salute : 11 guns. *Area of the State :* 4,000 sq. miles.

COCHIN: H. H. SRI KERALA VARMA, Maharaja of Cochin State.

Born: 29th Vrischigam, 1039 M. E.

Educated: Privately.

Ascended the Musnad: 13th April, 1941.

Heir: H. H. Ravi Varma, Elaya Raja.

Cochin is a maritime Indian State lying in the South-west corner of India.

Salute: 17 guns.

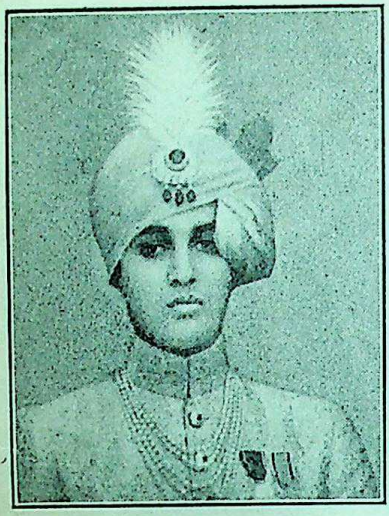
Area: 1,480 sq. miles.

Population: 1,422, 426.

A substantial measure of responsible government has been introduced in Cochin. The Government of the State is now carried on by His Highness the Maharaja through the Diwan in relation to 'reserved subjects' and through a Minister responsible to the Legislature appointed under the Government of Cochin Act in relation to 'transferred subjects.' A Legislative Council with a predominant non-official majority and elected on a very wide franchise has been constituted.

In point of education the State takes the first place among the Indian States and Provinces. It owns 3 Colleges, 52 High Schools, 124 Lower Secondary Schools and 525 Primary Schools.

The State maintains 57 Hospitals and Dispensaries. Local administration is carried on by six Municipalities, three Town Councils and 86 Panchayats in the villages.



A contribution of Rs. 1 lakh for War Purposes Fund and Rs. 2,000 each for Red Cross and St. Dunstan's has been made. A contribution of Rs. 20,000 representing the savings effected in the expenditure for the Installation of H. H. the Maharaja has also been made towards H. E. the Viceroy's War Fund. Besides, the State has offered to contribute Rs. 10,000 every month to the Viceroy's War Purposes Fund for the entire duration of the War. A committee to collect funds from the public in aid of War Purposes is at work, and it has already collected over a lakh of rupees. A sum of about Rs. 95,000 has already been paid from the collections made by this committee.

Diwan: Sir R. K. Shanmukham Chetty, K.C.I.E. (on leave preparatory to retirement). Mr. K. Achyutha Menon, Secretary to Government is in charge.

Minister: Dr. A. R. Menon, M.B. Ch. B. (Edin.).

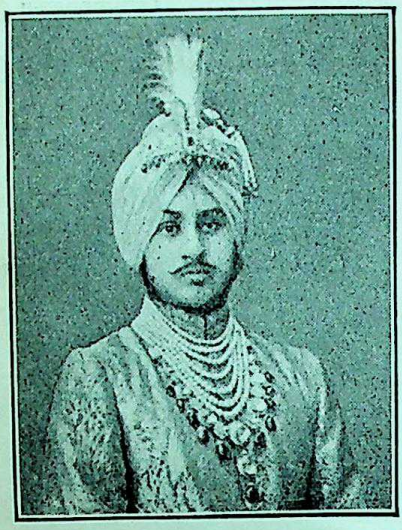
DUNGARPUR: H. H. RAI-I-RAYAN MAHARAJA-DHIRAJ MAHARAWAL SHRI SIR LAKSHMAN SINGHJI BAHADUR, K.C.S.I., the present Ruler of Dungarpur.

Born: on the 7th March, 1908 and succeeded his father on the 15th November, 1919. His Highness married the granddaughter of the Raja of Bhinga on the 8th February, 1920. He was educated at the Mayo College, Ajmer, where he passed the Diploma Examination and studied up to the first year of the Post Diploma course. In addition to winning prizes at school His Highness had the distinction of getting the Sword of Honour. After leaving the Mayo College, in May 1927, he proceeded on a short visit to Europe returning in October 1927. His Highness was invested with full ruling powers on the 16th February, 1928. In March of the same year he married a second time a daughter of His late Highness Maharaja Sir Madan Singh Bahadur of Kishengarh. His Highness has three Maharaj Kumars and four Princesses. The Heir-apparent Maharaj Kumar Shri Mahipal Singhji Bahadur was born on the 14th August, 1931. His Highness has three brothers. He was created K.C.S.I. in 1935.



The Rulers of Dungarpur belong to the Gehlot-Ahara Clan of the Sisodia Rajputs and are the eldest branch of the House of Udaipur. The separation of the Dungarpur House from the House of Mewar dates from Vikram Samvat 1228 (A.D. 1171), when Rawal Samant Singh, Ruler of Mewar and the eldest son of Rawal Kshem Singh, left his patrimony and migrating south slew Chaurasimal, the Parmar Ruler of Vagad, the ancient name for the Country comprising the present States of Dungarpur and Banswara with its Capital at Batpatrak or Baroda. The early rulers of whom Devpaldev and Virsingh are worthy of special note, gradually extended their territory by driving out the Parmars from Galiakot and Arthoona. It was Maharawal Dungar Singh who founded the present Capital and named it Dungarpur after himself. Of subsequent rulers, Maharawals Gopinath and Somdas are noteworthy for the resistance they offered to the Sultans of Gujerat and Malwa.

On the death of Maharawal Udai Singh I, a warrior of great repute, who fell fighting against the Emperor Babar in 1528 A. D. at the battle of Khanwa, the State of Vagad was split up, the portion to the west of the river Mahi with the Capital, Dungarpur being retained by the elder son, Prithvi Raj, and the eastern portion, now forming the State of Banswara, going to the younger son, Jagmal.

Area: 1,460 sq. miles. *Population*: 227,500. *Average Revenue*: Rs. 8,00,000. *Salute*: 15 guns.

active service. A special reserve of 100 men and a State Service Company 300 Strong have been raised. Faridkot Militia 523 Strong to be armed and housed in special fortified posts and a Camel Corps of 168 have also been raised.

CASH CONTRIBUTIONS.

1. His Excellency the Viceroy's War Purposes Fund, Rs.1,00,000 from the State.

2. Local War Purposes Fund over Rs. 40,000 from the members of the Ruling family, Officials and Non-officials of the State.

3. St. Dunstan's Fund, Rs.5,000 from the State and about Rs.3,600 from the Officials and Non-officials of the State.

4. Lady Linlithgow's Gold and Silver Trinket Fund. A sum of Rs.9,000 was remitted to defray the cost of two Ambulances, one from the ladies of the Ruling Family and the other on behalf of the women of Faridkot.

Out of this sum Rs.3,168 have been contributed by the members of the Ruling Family and other ladies of the State and the balance by the State.

5. Lord Mayor's Fund, Rs.5,000.

6. A ten ton steam road roller has been supplied to the Government.

7. £7,500 have been invested in the 3% National Defence Bonds (British War Savings Movement).

8. A sum of Rs.5,00,000 has been invested in the Government of India Defence Bonds of 1946.

9. Faridkot Troops Comforts Fund, Rs.15,600 from the Officials and Non-officials of the State.

Kanwar Manjitindar Singh Sahib Bahadur :—

The younger brother of His Highness Raja Brarbans Bahadur, born on 22nd February 1916, educated at the Aitchison Chiefs' College, Lahore, is Minister to His Highness.

PRINCIPAL OFFICERS.

Chief Secretary : Sardar Bahadur Sardar Indar Singh, B.A.

Home Secretary : Sardar Bahadur Sardar Fateh Singh.

Judicial & Revenue Secretary : Khan Sahib Maulvi Abdul Aziz, B.A., LL.B.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

nominated. The Samant Sabha will be formed of 40 members of whom 20 will be elected and the remainder nominated including officials not exceeding 12. The method of election to both the Houses is direct. The subjects of Gwalior Durbar are entitled to fundamental rights of good citizens and possess the various civic liberties which include liberty of speech and liberty of the press, liberty of association and liberty of conscience.

Gwalior now claims to be one of the few advanced States which have taken practical steps in associating the public voice with the administration of the State by reserving a seat in the Council of Ministers for a non-official person, and by the appointment of Mr. Takhatmal, a leading lawyer of Bhilsa and prominent public worker as Minister for Rural Welfare and Local Self-Government.

Since the present Ruler assumed powers, vigorous impetus has been given to all-round moral and material progress. The construction of the Harsi Reservoir costing about 1½ crores, a proposal to construct an up-to-date Female Hospital and the sanction of one crore of rupees for rural reconstruction are the landmarks in the history of Gwalior. The network of roads has been utilised by the motor bus service run by the Gwalior and Northern India Transport Company, and those places which were unconnected are now being joined with important highways. To bring Gwalior closer to the outer world, His Highness has recently sanctioned the construction of a Seaplane Base, which will serve as a halting Station on the Imperial Air Line at Madhav Sagar and an Aerodrome at Maharajpur.

His Highness was one of the first rulers in India to place the army and resources of the State at the disposal of His Majesty the King-Emperor, and it is in keeping with the traditions of his House and with his own military training that he offered his personal services also. Immediately after the outbreak of the present war Gwalior took steps to sponsor effective measures, such as were taken in British India, by promulgating rules for the safety of the public, registration of European subjects, restriction of the movements of foreigners and control of the Press and price control in order to prevent profiteering. The pick of his splendid army was offered by His Highness to the British Government, and six Units—the 3rd Gwalior Lancers, the Mountain Battery, the 4th Gwalior Infantry Regiment, the 2nd Infantry, 'B' Battery and the Gwalior Transport have left the State and are already serving with British Indian troops. A thousand recruits have been enlisted to provide reinforcements and bring units upto depot strength. Besides the contributions in men and material, His Highness has both given and invested handsome amounts towards the successful prosecution of the war, with an approximate total reaching 40 lacs of rupees so far.

HYDERABAD: HIS EXALTED HIGHNESS, RUSTOM-I-DOWRAN, ARASTU-I-ZAMAN, LT.-GENERAL MUZAFFAR-UL-MULK WAL-MAMALIK, NAWAB SIR MIR OSMAN ALI KHAN BAHADUR, FATEH JUNG SIPAH SALAR, Faithful Ally of the British Government, NIZAMUD-DOULA, NIZAM-UL-MULK ASAF JAH, G.C.S.I., G.B.E., NIZAM of Hyderabad and Berar.

Born: 1886. *Ascended* the throne: 1911. *Educated:* Privately.

Married: In 1906 Dulhan Pasha, daughter of Nawab Jehangir Jung, a nobleman, representing a collateral branch of the Nizam's family.

Heir: HIS HIGHNESS NAWAB MIR HIMAYAT ALI KHAN BAHADUR, AZAM JAH, Prince of Berar.

Area: 100,465 square miles. *Population:* 17,877,986 (1931). *Revenue:* Actuals for 1939-40: 914.06 lakhs. Estimated for 1940-41: 926.51 lakhs. *Salute:* 21 guns.

The State has a Legislative Council of twenty members, eight of whom are elected and an Executive Council of six officials with a President. It maintains its own paper currency and coinage, postal system, railways and army. It has a University with six Arts Colleges including one for women and Colleges for Engineering, Medicine, Law and Teaching. It has also an Honours College affiliated to Madras University, a College for Jagirdars and a College of Physical Education. There are also a Village Industries Training Centre, a Central Technical College and an Observatory. The establishment of a State Bank is contemplated in the near future. The State is of great historical and archæological interest, as within its limits, are situated many old capitals of ancient and mediæval Deccan Kingdoms, famous forts, temples, mosques and shrines and the wonderful Buddhist sculptures and paintings of Ellora and Ajanta.

In order to afford the people more effective association with Government, constitutional reforms of a far-reaching character were announced on 17th July, 1939. They are based for the most part on the recommendations of a predominantly non-official Committee. Under the new reforms scheme, a much enlarged Legislative Assembly, with an elected majority and a specific list of matters within its purview, is to be established. The basis of representation both for the Assembly and for all the local bodies will be functional with joint electorates. The new constitution also provides for the setting up

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

of a number of Advisory Committees on such subjects as Religious Affairs, Finance, Education, Agriculture, Industries, etc., to advise the Members of Government concerned on those matters, for the reconstitution of the Hyderabad Civil Service Committee, the setting up of Appointment Boards to control recruitment to Government services, and the establishment of Panchayats, and the reconstitution and expansion of existing District Boards and Town Municipalities. A new press legislation is also on the anvil.

When the Reforms come to be fully implemented there will be 16 District Boards, 12 Jagir and Illaqa Boards and 100 Municipal and Town Committees and 2,000 Panchayats, not to mention the Legislative Assembly itself, Appointment Boards for all Departments, a reconstituted Civil Service Committee, 7 Statutory Advisory Committees dealing with such important matters as Finance, Industries, Education, Agriculture, Religious Affairs and Sanitation, the District Conferences meeting every year in all the Districts.

Hyderabad and War : Foremost among the units of Princely India, Hyderabad is in the forefront of all Indian States and even many British Indian provinces in the matter of her practical contribution to the war effort of the country. No sooner hostilities broke out in Europe than His Exalted Highness the Nizam, the " Faithful Ally " of the British Government, in keeping with the traditional policy of the House of Asaf Jah, offered unstinted co-operation and placed his services and the entire resources of his Dominions at the disposal of the British Government. Inspired by the noble example set by their beloved Ruler, the people of Hyderabad also have voluntarily put their shoulders to swell the war effort of the State.

Not only has His Exalted Highness placed his Delhi and Bombay palaces at the disposal of the Government of India for war purposes, but has also donated £50,000 from the " Sarf-e-Khas " (personal) Estate for aerial warfare and made a contribution of Rs. 5 lakhs to the Viceroy's Fund. This is in addition to the contributions totalling £150,000 made by H. E. H.'s Government to the Air Ministry in London; investment of Rs. 50 lakhs in the Government of India interest-free Defence Bonds and the monthly contribution of Rs. 1½ lakhs to defray the expenses of the Hyderabad regiments (a cavalry unit and an infantry battalion) stationed in British India for purposes of internal security. A noble addition made to these generous contributions is the placing of a sum of Rs. 20 lakhs at the disposal of the Admiralty for the provision of a corvette for combating the submarine menace in the " Battle of the Atlantic."

This does not, however, by any means exhaust the list of measures which have been and are being taken by the Government and people of Hyderabad to contribute their quota to the country's war effort. A special organization has been created and entrusted with the task of aligning Hyderabad industries with the war effort. The N. S. Railway workshops are manufacturing war materials and are being assisted in the task by the Public Works and the Commerce and Industries Department. The Road Transport Department of the Railway is training mechanics and drivers for the Indian Army. Hyderabad

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

also has the distinction of having an elementary flying training school, opened recently at the Begampet Aerodrome. The institution, established at a capital cost of Rs. 1,75,000, will turn out 100 pilots every year.

But this is not all. As has already been stated, public response to appeals for funds has been very encouraging indeed. Nearly Rs. 3½ lakhs have so far been contributed to the Hyderabad War Purposes Fund, while the Hyderabad Hurricane Fund started with an appeal from the Rt. Hon'ble Sir Akbar Hydari and the Resident at Hyderabad has yielded nearly Rs. 20½ lakhs. Many notable contributions have been made from these funds for general war and relief purposes in England as well as elsewhere in Europe. Moreover, the entire countryside has been galvanized into activity and an extensive network of District and Taluqa Committees set up to help in the co-ordination of war relief activities.

Capital: Hyderabad—Population 466,894 (1931). It is the fourth largest city in the Indian Empire. The city is beautifully situated on the banks of the river Musi, with fine public buildings, broad cemented roads, good electricity and water supply and an efficient bus service run by the State Railway. Among interesting places are the Char Minar, the Mecca Masjid, the fort and tombs of Golconda, the large artificial reservoirs—the Osman Sagar and the Himayat Sagar and the Osmania University.

EXECUTIVE COUNCIL.

H. H. General Walashan Nawab Mir Himayat Ali Khan, Azam Jah Bahadur, Prince of Berar, Heir-Apparent to H. E. H. the Nizam of Hyderabad and Berar.

Born : February 22nd, 1907. Early education was entrusted to eminent scholars, Indian and European, and military training was supervised by the late Major-General Nawab Sir Afsarul-Mulk Bahadur. Showed special aptitude for all forms of manly sport, and excels in polo, tent-pegging, pig-sticking and hunting. A fine shot and a keen all-round sportsman. Has also received thorough training in administrative work, both executive and judicial.

His Highness married Durr-e-Shahvar, the only daughter of H. M. the Califa Abdul Majid II. Her Highness received the title of Durdana Begum from H. E. H. the Nizam, after marriage. Her Highness received her education under the scholarly care of her father, and besides being well-versed in various languages, is a keen student, an able speaker and an excellent painter. Their Highnesses have travelled extensively in Europe, and in 1937, represented H. E. H. the Nizam at H. M. the King Emperor's Coronation. Following the Berar Agreement of 1936, the hereditary title of H. H. the Prince of Berar has been conferred on the Heir-Apparent. Honorary Degree of LL.D. has been conferred on His Highness by the Osmania and the Aligarh Muslim Universities.

His Highness was appointed Commander-in-Chief of the Hyderabad State Forces in 1934, and has associated himself whole-heartedly with measures designed to enhance the efficiency of the Army. Among the more important schemes put into execution during his period of office, are the introduction of New Terms of Service, construction of a Central hospital, establishment of a Cantonment at Mominabad, reorganisation of the Military Medical Service, and the supply of free rations to all units. A number of reforms have been introduced in the Irregular Forces of the State, which are also under His Highness' command. His Highness keeps in close touch with the administration, and is particularly interested in rural uplift activities, and in social and educational developments. His recent tour of famine-stricken areas evoked memorable scenes. His speeches command wide interest, both on account of their simple unaffected language, and because of the sympathy and understanding he brings to bear on the various problems.

IDAR: H. H. MAHARAJA DHIRAJ SHREE HIMMAT SINGHJI OF —The Idar House was founded 200 years ago by two brothers of the Maharaja of Jodhpur. His Highness Maharaja Shree Himmat Singhji is the 10th of this illustrious line.

Born: On 2nd September 1899. Succeeded to the *Gadi:* 14th April, 1931.

Married: Shree Jawahar Kunwar Sahiba, the eldest daughter of Raja of Khandela in the Jaipur State in 1908.

His Highness received his education at Mayo College, Ajmer, where he remained for 5½ years, leaving it after a brilliant career in 1916. He attained his diploma standing first in the list of candidates from all the Chiefs' Colleges in India and was awarded His Excellency the Viceroy's medal. He won every class prize from the fifth to the diploma, five prizes for English and eleven others for various subjects. He won prizes in each division in succession for riding, and represented the College against the Aitchison College for 3 years at tent pegging, and also at tennis. For several years he was captain of one or other of the junior football or cricket elevens, and he was one of the best and keenest polo players in the college.

As will be seen, he upheld his family tradition as a horseman. From boyhood he was keen on hunting and pigsticking and before he had joined the College at the age of 10, he had accounted for many a panther and bear to his own rifle. His Highness now keeps a racing stable and has had many successes. These active sports are not his only recreation for he has a good ear for music and is interested in painting and photography.

On leaving the college, His Highness Maharaja Shree Himmat Singhji took an active part in the State administration being appointed to His late Highness' Council, and later for several years was in charge of the administration under His late Highness' personal directions. He gained further practical experience from an extensive tour throughout India in 1929-30. He was therefore well qualified to take up his responsibilities as Ruler of his State when he ascended the *Gadi* of Idar. Since his accession in 1931, many schemes of improvement have been inaugurated which concern the social welfare of his subjects, their education, industries and agriculture. His Highness has embarked on an ambitious programme of reform and advancement which it is expected his experience and keen personal interest will enable him to carry through successfully.

His Highness has two sons, Maharaja Kumars Shree Daljit Singhji and Amar Singhji, the eldest Maharaja Kumar Shree Daljit Singhji, the heir-apparent, was born in 1917.

On the outbreak of War His Highness placed all the resources of the State at the disposal of the Government. His Highness is giving Rs. 25,000 annually for the Viceroy's War Purposes Fund. The State has also presented its two Aircraft—a Monospar and a Hornet Moth to the Government. Rs. 4,777-9-9 including Rs. 1,509 as annual contributions were contributed by the members of the Ruling Family and the Jagirdars of the State towards the War Purposes Fund. Rs. 500 were presented on behalf of the ladies of the State towards Her Excellency's Trinket Fund. A Central War Committee has been established which is making every effort for the collection of funds.

Salute: 15 Guns. *Area:* 1,669 sq. miles. *Revenue:* Rs. 22.99 Lakhs.

INDORE: His Highness Maharajadhiraj Raj Rajeshwar Sawai Shree Yeshwant Rao Holkar Bahadur, G.C.I.E., Maharaja of Indore.

Born : 6th September 1908.
Accession : 26th February 1926.
Investiture : 9th May 1930.
Educated : In England 1920-23 and again at Christ Church, Oxford, 1926-29.
Married : In 1924 a daughter of the Junior Chief of Kagal (Kolhapur). Her Highness Maharani Sanyogita Bai died in July 1937.
Daughter : Princess Ushadevi, born 20th October 1933.
His Highness married Miss Marguerite Lawler in September 1938.

Delegate to the R.T.C. in 1931.
Area of State : 9,902 square miles. *Population :* Over 15,00,000.
Revenue : Rs. 1,21,81,100.
Salute : 19 guns (21 guns within the State).
Address : Indore, Central India.
Recreation : Tennis, Cricket and Shikar.

At the outbreak of hostilities in Europe, H. H. the Maharaja placed the entire resources of the State including the State Army and his personal services at the disposal of the British Crown. His Highness donated a sum of Rs. 5,00,000 and placed it at the disposal of H. E. the Viceroy for being utilised in any manner towards war purposes His Excellency thought best. Subsequently H. H. the Maharaja and his Government, in keeping with the traditions of the illustrious house of Holkar and the close ties that bind it with the British Crown, intensified the State war effort and took various measures with a view to contribute to the utmost degree towards the effective prosecution of the war and the speedy success of the cause for which the British Empire has been compelled to take up arms against the ruthless and unscrupulous Nazi aggression.

Besides the various administrative measures that were considered necessary for the maintenance of peace and order, His Highness's Government deputed the ear-marked Holkar Transport Corps to Jhansi for undergoing preliminary training in the beginning of the year 1940 and in June 1940, two Companies of the 1st Battalion with the Battalion Headquarters were made available for service with His Majesty's Forces if and when required. Subsequently in July 1940, under special orders of H. H. the Maharaja, the whole of the 1st Battalion was placed at the disposal of the Crown and steps have

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

been taken to bring up all units of the Holkar State Forces to full strength. The fullest co-operation is being offered to the Government of India in a number of matters connected with the war, *e.g.*, facilities for recruitment of war personnel for different work including technical personnel such as Motor Mechanics, etc.

Liberal contributions were made towards the War Relief Fund, the Defence Savings movements and the British Red Cross, Indian Red Cross and the St. Dunstan's Fund. H. H. the Maharaja also sanctioned the purchase of Interest Free Defence Bonds of Rs. 3,00,000, and all Government servants of the State getting not less than Rs. 50 p.m. have offered to pay a day's salary every month towards the purchase of Defence Bonds and Savings Certificates.

In July 1940, H. H. the Maharaja offered the " Air Speed Envoy " aeroplane to the British Air Ministry for war purposes and the offer was gratefully accepted by the British Air Ministry.

The scheme regarding conferment of Emergency Commissions was brought to the notice of young men desirous of entering Military service during the war and several candidates and officers have been recommended for the purpose. A number of applications for war service from members of the public as well as from State servants including Sub-Assistant Surgeons employed in the State Medical Department have been forwarded to the British Indian Authorities. His Highness has also sanctioned a donation of £2,000 towards the Lord Mayor's Air Distress Fund. Recently His Highness has also sanctioned the purchase of 3% Government of India Defence Bonds for Rs. 1,00,000.

NASIR ALI KHAN—LT.-COL. BIRJIS QADR NAWABZADA MOHAMMAD SAHIB BAHADUR, is His Highness' eldest son and heir-apparent of Jaora.

Born on 16th May 1906.

In his early age, he received his education in Mayo College, Ajmer, and Daly College, Indore, and subsequently at home under the tutorship of Major P. F. Norbury, D.S.O., I.A., a retired British Officer. The Nawabzada left for England in 1925 where he joined the agricultural college at Cirencester. He successfully received education at the Cirencester College and obtained his Diploma. He was a brilliant sportsman at the College and won his "Blue" in Hockey. He was Captain of the Hockey eleven of the College for 3 years and of the tennis team for 2 years. He was also a prominent member of the cricket eleven.

He returned home in 1932 and began to take keen interest in the State Administration and was appointed Member of the State Council in charge of the Revenue Department, which portfolio he held for nearly five years. During this period he officiated several times as the Chief Minister of the State.

On the outbreak of the present European war he contributed a sum of Rs. 3,000 from his own private purse for the prosecution of the war, and also gave substantial donations to the Red Cross and various other War Funds.

On the occasion of the Silver Jubilee of His Imperial Majesty the late King Emperor George V in 1935 he held several public meetings and collected a large sum for the Silver Jubilee Fund which was remitted to the Government of India. He received the Silver Jubilee medal in 1935, and His Imperial Majesty the King George VI Coronation Medal in 1937.

The Nawabzada has three children, 2 sons and one daughter.

Recreation : Polo, Hunting, Shooting, Golf and Tennis.

Address :—Machchhi Bhawan Palace, Jaora, C.I.

JUNAGADH: CAPTAIN H. H. SIR MAHABAT-KHANJI RASULKHANJI III, G.C.I.E., K.C.S.I., Nawab Saheb of Junagadh, comes from the Babi (Yusufzai Pathan) family.

Born: 2nd August 1900.

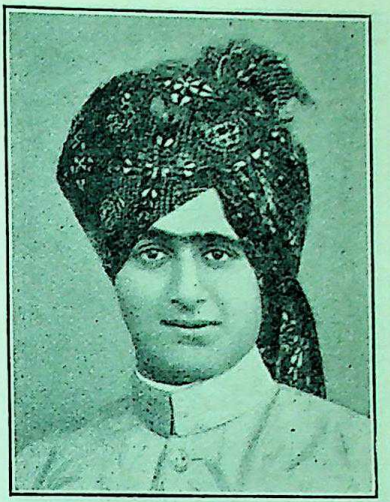
Educated: Preparatory school in England and at Mayo College, Ajmer.

Area: 3,337 sq. miles. *Population:* 670,515. *Principal Port:* Veraval. *Revenue:* Rs. 1 Crore. *Salute:* 15 guns personal and local.

Indian States Forces—Junagadh State Lancers, Mahabatkhanji Infantry.

On the outbreak of the war, H. H. the Nawab Saheb placed all the resources of the state at the disposal of His Majesty. The state has made liberal contributions, both in men and money. Rs. 2,50,000 have been contributed from the state, and Rs. 16,000 from the public. An aeroplane was presented to the Government and a cheque for £5,000 has been given to purchase a Spitfire. State servants who have been called for service are given special terms in regard to their service, leave, pension, etc.

A War Committee has been appointed with Sub-Committees to make further collections to the War Gifts Fund, to induce people to subscribe to War Loans for which promises have gone up to Rs. 2,00,000, to prevent false rumours and organise Civic Guards. A Ladies Committee formed under the patronage of the Begum Sahebas collected Rs. 4,000 and many silver and other articles for Her Excellency's Silver Trinket Fund. A further sum of Rs. 1,000 was collected from a Cinema Show for homeless Children in England. Coastal watching has also been undertaken by the state at 8 Coastal places where men watch the appearance of enemy vessels. One Guard of infantry is posted at Verawal and landing ground at Junagadh. One section of the Hotchkiss Gun and two sections of Infantry are posted at Verawal for defence at state expense.



All state servants contribute 1% of their pay every month for War Gifts Fund from January 1941.

A further sum of Rs. 2 lacs has been contributed by the State to the War Fund. Out of this amount two Spitfires to be named "*Lady Linlithgow*" and "*Dilawar*" are to be purchased and out of the balance of about Rs. 66,000 half the amount has been allotted to "Lady Linlithgow Silver Trinket Fund" and half to "King George's Fund" for sailors in England.

A Lucky Bag Lottery in aid of the War Gifts Fund was started in the state. Rs. 20,000 were realised from the sale of Tickets, out of which Rs. 15,000 were allotted to the War Gifts Fund.

KALAT : CAPTAIN H. H. Mir Haji Sir AHMAD YAR KHAN, G.C.I.E. ; BEGLAR BEGI, AMIR-UL-AMARA, GHALIB JANG BAHADUR, KHAN of Kalat.

Born : 1904. *Educated :* Privately by special tutors. Received Military training in the regular army ; served as Captain and Adjutant in Zhob Militia. His Highness speaks Iranian, Pushtu, Baluchi, Brohi, Urdu, and English languages fluently.

Hobbies : Riding, Hunting and Motoring.

Succeeded to the Khanate : September 1933.

Married : In 1933, the daughter of Sardar Ali Jan a scion of Muhammadzai, the royal family of Afghanistan.

Heir-Apparent : Prince Muhammad Daud Khan, born 1940.

Salute : 19 guns (Hereditary).

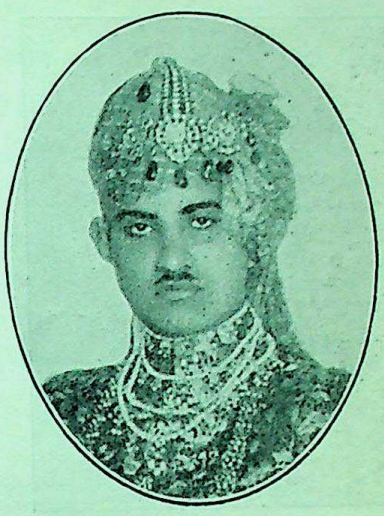
His Highness belongs to the Ahmadzai family which came into power in 1666-67, when Mir Ahmad I (after whom the family is named) took possession of Kalat after defeating the Moghul governor and consolidated practically the whole of Western and Southern Baluchistan into an organised state. The independence of Kalat was formally recognised by the British Government by the Treaty of 1876, when the Khan promised loyal co-operation with the Government.

Kalat is the third largest State in India and occupies an important strategic position. It extends from British Baluchistan on the north to the Arabian Sea in the south and from Sind in the east to Iran in the west.

Area of the State : 73,278 sq. miles. *Population :* 3,42,101 (according to 1931 census).

His Highness takes a very keen interest in the moral and material welfare of his subjects and contributes a sum of Rs. 50,000 out of his privy purse for the advancement of education, which is now free in all stages, primary, middle, high, Theological and Industrial, throughout the State.

Kalat town the Capital of the State, is 91 miles from Quetta and is 6,783 feet above sea level. The winter headquarters are at Dhadar, 16 miles from Sibi. Pasni, Jiwani, Sonmiani and Gwadar are seaports.



The administration of the State is divided into two sections : the *Wizarat* and the *Durbar*, the former in charge of the Wazir-i-Azam and the latter entrusted to the Chief Secretary.

Wazir-I-Azam : MAJOR L. A. G. PINHEY, I.A.

Chief Secretary : QURASHI AHMAD ALI SADIQ, M.A., B.T., LL.B.

KHAIRPUR: His Highness Mir Faiz Mahomed Khan Talpur, the present Ruler of Khairpur State.

Born: 4th Jan. 1913.

Educated: At Mayo College, Ajmer.

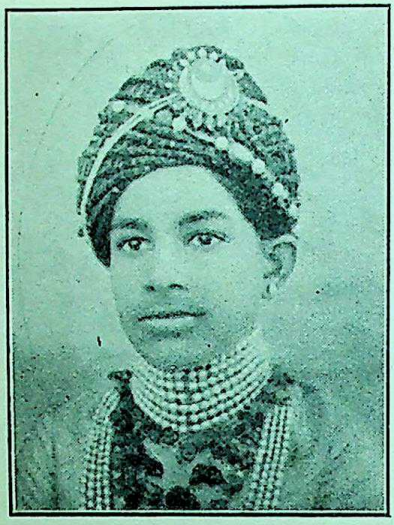
Succeeded: December 1935 on the demise of his father His Highness Mir Ali Nawaz Khan Talpur.

The Rulers of Khairpur are Muslim Talpur Balochs and belong to the Shia sect. Previous to the accession of this family on the fall of the Kalhora dynasty of Sind in 1783, the history of the State belongs to the general history of Sind. In that year Mir Fatehali Khan Talpur established himself as Ruler of Sind and subsequently his nephew, Mir Sohrab Khan Talpur, founded the Khairpur Branch of the Talpur family. In 1882 the individuality of Khairpur State was recognised by the British Government.

Khairpur is a first-class State. It is the only State in Sind. The Ruler is entitled to a salute of 15 guns outside and 17 guns inside the State.

Area: 6,050 square miles, a large portion of which is desert.

Population: 227,168.



Current annual income: Rs. 28,20,250.

Minister: Khan Bahadur Syed Ijaz Ali, M.B.E.

Address: Khairpur Mir's, Sind, N.W.R.

KOLHAPUR: The Ruling House of Kolhapur is descended from the younger branch of the Great Shivaji, the founder of the Maratha Empire and the Maharajas have the distinctive honorific title of "Chhatrapati Maharaja."

On account of the demise of His late Highness Sir Shri Rajaram Chhatrapati Mahrajasaheb on the 26th November 1940, leaving only a daughter, the question of succession to the *Gadi* by the announcement of the recognition of the successor by the British Government is pending settlement at present.

His late Highness married (1) Shri Tarabai Maharanisaheb, the Senior Maharani Saheba, (grand-daughter of the late Maharaja Sir Shri Sayajirao Gaekwar of Baroda and sister of His Highness Shri Pratapsinh Gaekwar, the Maharaja of Baroda), to whom a Princess was born on the 5th October 1940, and (2) Shri Vijayamala Maharanisaheb of Tanjore, the Junior Maharani Saheba.

The State pays no tribute.
Dynastic Salute : 19 guns.
Area : 3,217.1 sq. miles.
Population : 9,57,127.
Gross Revenue : Rs. 1,27,09,558.

Represented at two Round Table Conferences by the Prime Minister, Meherban Rao Bahadur D. A. Surve. There are nine Feudatory Jahagirs under the Ruler's Suzerainty. The State leads in Social and Religious Reforms. Justice: There is an independent High Court, established under a Charter. Industries and Commerce: Shri Shahu Chhatrapati Spinning and Weaving Mills, the Kolhapur Sugar Mills and the Bank of Kolhapur. Railway owned entirely by the State; Film industry, etc. Work on the Radhanagari Hydro-Electric Scheme has also recently been actively commenced.

Education : Rajaram College, Sykes Law College, Maharani Tarabai Teachers' College, Vernacular Teachers' Training College, and numerous other Institutions, both technical and academic. Special facilities for backward and untouchable classes, there being no fees for Harijan students of both the sexes, and Female Education free upto secondary stage; thereafter, in the Arts and Science College, half fees for State subjects and full fees for Female students not belonging to the State, excepting Harijans, whose education is free. Local Self-Government is entirely in popular hands. A Legislative Assembly for the entire Principality (including all the Feudatory Jahagirs), is in process of inauguration. The State Troops comprise the Kolhapur Infantry under British Command, and the State Cavalry. Kolhapur City ("The Southern Benares") is noted for its religious sanctity and architectural grandeur. There are Historic Temples and Hill-Forts in the State, and it abounds in places of natural beauty and in valuable mineral deposits, particularly bauxite.

COUNCIL OF ADMINISTRATION.

Meherban Rao Bahadur D. A. Surve, *Prime Minister and President of the Council*; Meherban S. A. Indulkar, B.A., *Revenue Member*; Meherban D. M. Bhosle, *Deputy Prime Minister and Home Member*; Meherban Rao Bahadur R. P. Savant, B.A., LL.B., Bar-at-law, *Judicial Member*.

LIMBDI is one of the Western India States enjoying full powers of internal sovereignty. Maharana Shri Manguji, second son of Shri Harpal Deo Makwana was the founder of the Limbdi House and established his *Gadi* first at Jambu from where it was later removed to Shiani and finally to Limbdi all of which places are within Limbdi territory. Limbdi is thus one of the original independent houses of the Jhala dynasty.

The State has 51 villages under its full jurisdiction at present. It owns 34 Talukdari villages situated within the British Collectorate of Ahmedabad which constitute what is known as the Khadol Barwala Mahal. The average annual income of the State calculated on the basis of the net income for the last five years is Rs. 7,00,000 inclusive of the income of its non-jurisdictional villages.

His Highness Maharana Shri Digvijayasinhji expired at the age of 44 on the 6th January 1941 leaving a minor son of only one year of age. The question of administration during the minority of the present Thakore Saheb Shri Chhatrasalji is under consideration of the British Government.

Reforms.—With a view to secure an increasing measure of association of the people with the administration, a wholly elected 'Shaher Sabha' has been instituted in the Town of Limbdi and Village Panchayats also wholly elected, have been organised in the jurisdictional villages.

STATE OFFICIALS.

Dewan : Raj Kumar Shri Fatehsinhji, M.A. LL.B. (Cantab.), Bar-at-Law, F.R.G.S.

Khangi Karbhari : Raj Kumar Shri Ghanshyamsinhji.

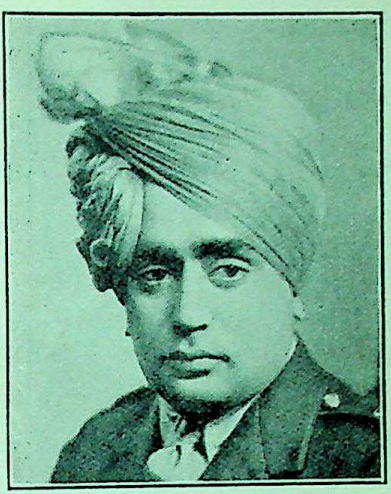
Chief Medical Officer : Raj Ratna Dr. Keshavlal T. Dave, L.M. & S.

Deputy Karbhari : Tazmi Sardar Rana Shri Jivansinhji Malubha, G.B.V.C.

Revenue Commissioner : Tazmi Sardar Rana Shri Narsinhji Amarsinhji.

Political Secretary and Sar Nyayadhish : Bhudardas N. Jajal, B.A., Bar-at-Law.

Educational Inspector : Amratlal Devnath Pandya, B.A.



First Class Magistrate and Munsiff : Amratlal C. Mehta, B.A., LL.B.

Superintendent of Police : Prabhatsinh Verabhai Jhala.

State Engineer : Valji Chhaganlal.

MAIHAR: RAJA SIR BRIJNATH SINGHJI DEO BAHADUR, K.C.I.E., the present Ruler.

Born on 22nd February 1896. *Succeeded* on the 16th December 1911. *Educated* at Daly College, Indore.

Married thrice. The first Rani Sahib died in 1930, has two sons and three daughters, the eldest Rajkumarisaheba has been married to the Rajasahib of Diara (U.P.)

Heir-Apparent: YUVRAJ GOVIND SINGHJI is being educated at the Mayo College, Ajmer.

Salute: 9 guns. *Area*: 407 sq. miles. *Population:* 68,991. *Annual Revenue:* Nearly 5 lacs.

Lime and its derivatives form the chief industry of the State and a company has just been floated for the manufacture of Cement and its bye-products. The agricultural and horticultural produce of the State include food grains, oil seeds, sugar-cane, fruit, etc., etc. The presence in the State of inexhaustible deposits of the finest Limestone almost on the surface, with the railway passing through its heart from end to end is a promising factor for a wide industrial development, while there still remain very good prospects for industries like the manufacture of oil, soap, sugar, alcohol, dry ice and the like.

A thorough overhauling of the State machinery and remodelling it on up-to-date British Indian lines, a Council with a majority of non-officials and presided over by the Ruler (established in 1928) to run the administration of the State, construction and remodelling of the town, administrative buildings, palace, Guest-Houses and roads, Electricity, Irrigation Canals, Schools for free education and Charitable Hospitals are some of the conspicuous improvements that mark the progressive and prosperous regime of the present Ruler.

The War contributions of the Rajasahib have indeed been very generous and received repeated appreciation of H. E. the Viceroy. The Ruler and the Ranisahibas are paying Rs. 1,150 per month from their privy purse every month since the beginning of the War, which, along with the Ruler's lump contribution, has exceeded Rs. 22,000 upto December '40. The Rajasahib has placed his furnished houses at Mashobra (Simla), and Pachmarhi at the disposal of H. E. the Viceroy to be used as Convalescent Homes for the Army. The Ruler set a noble example before his subjects by offering his personal services twice and has since offered three candidates for Emergency Commission, one Sub-Assistant Surgeon, one Engineer, several M. T. Drivers and about a dozen candidates for the posts of Civilian Supervisors in Mechanical Transport Workshops and Ordnance Factories.

MAYURBHANJ: MAHARAJA SIR PRATAP CHANDRA BHANJ DEO, K.C.I.E., Maharaja of Mayurbhanj.

Born: February 18, 1901.

Succeeded on the 23rd April 1928 on the demise of his elder brother.

The Maharaja is a member of the Chamber of Princes by his own right.

Educated: At Mayo College, Ajmer, and Muir Central College, Allahabad.

Married: On the 25th November 1925, the daughter of Maharaj-kumar Sirdar Singhji of Shahpura, Rajputana.

Heir-apparent: TIKAIT PRADEEP CHANDRA BHANJ DEO.

Area of State: 4,243 square miles. *Population:* 9,89,887.

Revenue: Rs. 34,00,000. *Salute:* 9 guns.

Mayurbhanj ranks first in point of population among the States of the Eastern States Agency, numbering 42, 23 of which are known as Orissa States, 16 as Chhatisgarh States, and 3 as Bengal States. The Ruling family is the head of the Bhanja Vansi Kshatriyas of Orissa and claims to belong to the solar line. The emblem of the State is a peacock and the State crest is a pair of peacocks seated on either side of a shield which bears the devices of a trident, a bull, the crescent moon and a lotus in full bloom. The geographical and strategic position of the State constituted it an important buffer State at the time when the East India Company and the Mahrattas were engaged in a struggle for supremacy in Eastern India and Mayurbhanj supported the British cause. During the Mutiny of 1857, the ruler of Mayurbhanj again distinguished himself as a loyal ally of the East India Company.

The administrative machinery of the State is modelled generally on British Indian lines—Judicial independence being secured under a full-powered High Court. The State is rich in mineral and forest resources—iron ore mining undertaken by the Tatas forming the principal industry. The State maintains an Industrial School and the Mayurbhanj Tussar Textiles and Cottage Industry products receive appreciation both in India and abroad. The systematic Geological

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and Botanical surveys conducted with a view to improving the potential resources of the State are likely to yield valuable results. There are 3 major irrigation schemes working at present and new projects are being undertaken yearly to provide facilities of water supply both for irrigational and drinking purposes. In order to improve the economic condition of the agriculturists, the State has opened an Agriculture Department, established granaries and passed several legislative measures besides making liberal annual grants of loans. Free medical relief is being offered by a fully equipped hospital at the Capital with several dispensaries spread all over the State. Primary education is also free. Scholarships are given liberally and an increased expansion of educational institutions has given a great impetus to the spread of literacy. The State is rich in antiquities. The recent discovery of palæolithic sites and other archæological finds testify to its ancient civilization and culture. The State maintains an Aviation Department and a well-equipped aerodrome near Baripada, the capital town.

With a view to bringing the people of the State into closer touch with the administration the Maharaja has inaugurated 5 Praja Sabhas. These representative assemblies consist of a majority of members elected on the basis of adult male franchise and represent all shades of local opinion in matters concerning the welfare of the people in general. The opening of the Mayurbhanj State Bank, installation of electricity and water-works at the capital, telephonic communications all over the State, construction and remodelling of administrative buildings, along with the above, mark the progressive and prosperous regime of the present ruler.

Besides placing his personal services and resources of the State at the disposal of His Majesty, the Maharaja has contributed his own five-seater bi-plane D.H. 90 Dragonfly to the Viceroy's war purposes fund and has purchased Defence bonds to the value of Rs. 62,500 apart from making several donations to the value of about Rs. 3,000 to the Red Cross and other War Funds. The Mayurbhanj Central War Efforts Committee with its branches is doing very useful work. The Maharaja has recently directed the issue of a war supplement to the State Gazette for dissemination of authentic war news.

NARSINGARH: H. H. RAJA SHRI VIKRAM SINHJI SAHEB BAHADUR, K.C.I.E., the present Ruler of Narsingarh State, C. I.

Born : 21st Sept., 1909. Succeeded his father on the 23rd April, 1924. Invested with full ruling powers on the 7th Oct., 1929. *Educated :* At Daly College, Indore & Mayo College, Ajmer. Passed Diploma Exam. in April 1927. Received administrative training in Mysore Govt.

Married in 1929 the daughter of the heir-apparent of Kutch State.

Continental Tours : Undertook 3 tours during the years of 1928, 1933 & 1936, with a view to familiarise himself with the various systems of Government, and incorporate such measures of public utility as may improve the administration of the State.

Area : 734 sq. miles. *Annual Income :* Rs. 9,50,000. *Population :* 113,873 (per 1931 census). *Salute :* 11 guns.

After the assumption of powers, H. H. effected many reforms with unprecedented success. Legislation with regard to child marriage, Nukta ceremony, begar system and juvenile offences, has been enacted. Local self-govt. has been thrown open to the public, with the result that the Municipalities have a majority of elected members.

The State has made much progress during the regime of the present Ruler who takes a personal interest in the day-to-day administration. Recently, a High Court, Edwards' Bridge, Culverts & Irrigation tanks have been constructed. Efforts are being made to better the condition of the agriculturists. Taccavi loans are granted lavishly every year. His Highness graciously made a general remission of more than Rs. 10,00,000. His Highness and his popular Government are doing their best towards the War efforts. So far, more than Rs. 25,000 have been contributed from the state to various war funds, and further efforts are in progress. H. H. The Maharani Sahiba takes a keen interest in the welfare of her subjects. The Maharani Sahiba has been an inspiration to the ladies of the State who have organised themselves into a Ladies' Club, under the kind patronage of Her Highness, and are furthering the humanitarian activities of the Red Cross Society. Articles of comfort for the soldiers fighting abroad are being prepared and sent to the Central Body. *Recreations :* Tennis, Billiards, Shooting & Driving.

Executive Council : President—H. H. the Maharaja; Members : Mr. Bramhadeen, B.A., LL.B. (Judicial) ; Rai Sahib Raghubar Dayal (Revenue) ; Mr. Abdul Qadir, B.A., LL.B. (Home) ; Maharaj Prabhunath Sinhji (General).

PARTABGARH: His Highness Maharawat Sir Ram Singhji Bahadur, K.C.S.I. of Partabgarh.

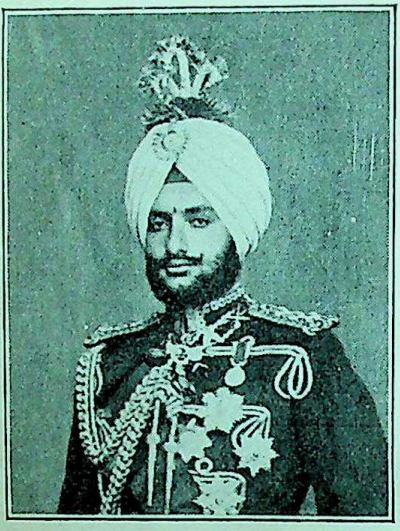
Born: In 1908.

Succeeded to the Gadi: In 1929.

Dynastic Salute: 15 Guns.

Partabgarh State, also called "Kanthal" was founded in the 16th century by a descendant of Rana Mokal of Mewar.

The town of Partabgarh was founded in 1698 A. D. by Maharawat Partabsingh, the ancient Capital being at Deolia among the Hills. In the time of Maharawat Sawant Singh (1775-1844), "Kanthal" was invaded by the Marathas, but the Maharawat arranged to buy off the Holkar by agreeing to pay Rs. 72,700 *Salam Shahi*, which were being coined in Partabgarh and were accepted as legal tender throughout the surrounding territories, in place of Rs. 15,000 formerly paid to Delhi. The first connection of the State with the British Government was formed in 1804. The earlier Treaty having been cancelled by Lord Cornwallis, a fresh Treaty was entered into in 1818. Holkar, by the Treaty of Mandsore ceded to the British Government "all claims of tribute and revenue of every description, which he had or might have had upon the Rajput Princes," according to which Partabgarh paid the stipulated Rs. 72,700 *Salam Shahi* (converted later to Rs. 36,350 British Coin) to the British Government. As the said amount of Cash Contribution was found to be excessive, it has been reduced to Rs. 27,500 from the year 1937-38.



Partabgarh enjoys the high Izzat of being one of the Treaty States in India and possesses plenary jurisdiction. The highest administrative and executive office is termed "Mahakma Khas", presided over by the Ruler and the Dewan of the State. There is a duly graded judiciary under a separate High Court Judge, who is unconnected with the Executive. Annual average revenue Rs. 5,72,000.

PRINCIPAL OFFICERS.

Dewan: Mr. Tribhovandas J. Raja, M.A., LL.B.; *Naib Dewan:* Shah Manaklal, B.A., LL.B.; *Kamdar Khasgi:* Shah Mannalal; *High Court Judge:* Mr. Hem Chandra Sogani, B.Sc., LL.B., Advocate; *Private Secretary to His Highness:* Mr. Pheerozeshaw Fardoonji; *Revenue Officer:* Babu Shyam Swarup Bhatnagar; *Civil & Criminal Judge:* Babu Mohanlal Agrawal, B.A., LL.B.; *Superintendent of Customs & Excise:* Maharaj Balwant Singh; *Medical Officer:* Dr. Jiwanlal P. Parikh, L. M. & S.; *Educational Officer:* Mr. Wamanrao Gopalji Kale, B.A.; *State Accountant:* Shah Amritlal; *Treasury Officer:* Munshi Fatehlal; *Superintendent of Police:* Purohit Jagdishlal; *P. W. D. Officer:* Mr. Natwarlal Jha.

PATIALA: His Highness Farzand-i-Khas Daulat-i-Inglishia Mansur-ul-Zaman Amir-ul-Umra Maharajadhiraj Raj Rajeshwar Shri Maharaja-i-Rajgan Shri Yadavindra Singhji Mahendra Bahadur Yadu Vanshavatans Bhatti Kul Bhushan, the present Ruler of Patiala, which is the largest of the Phulkian States and the premier State in the Punjab.

Born : 7th January, 1913.

Succeeded : 23rd March, 1938.

His Highness is an alround sportsman—a first class shot, a great angler, a crack tennis player and a superb cricketer. He was awarded the All-India Colours in 1933 when he played against the Australian Cricket Team at Bombay.

Since his accession to the Gadi His Highness has introduced many reforms calculated to improve the material well-being of his people. Extension of medical facilities through the opening of touring dispensaries, abolition of "Game Preserves", remission of arrears in land revenue, passing of Small Towns Act, addition of a Maternity Ward costing Rs. 75,000 to the Rajindra Hospital, building of an Olympic Stadium at Patiala and the establishment of Cement Works; these are some of the important measures recently introduced.

The State is rich in antiquities, especially at Pinjour, Sirhind, Bhatinda, Narnaul, etc. It possesses valuable forests. One hundred and thirty eight miles of broad-gauge Railway line have been constructed by the State at its own cost.

The State maintains three colleges including one for girls and ten High schools. Primary education is free throughout the State.

His Highness maintains a Contingent of two Regiments of Cavalry and four battalions of Infantry, also one Battery of Horse Artillery. Since the State entered into an alliance with the British Government it has rendered military and financial help on all critical occasions. Its proud record of service during the last Great War is unsurpassed. No sooner was the present War declared than His Highness placed his services and the entire resources of the State at the disposal of the British Government. The 1st Rajindra Sikhs, the 2nd Yadavindra Infantry, the 1st Rajindra Lancers and the 56 M. T. Company have already proceeded on active service. The State has also provided 4,000 recruits for the Indian Army.

His Highness has subscribed Rs. 2 lakhs to the Viceroy's War Purposes Fund, Rs. 5,000 to St. Dunstan's Fund for the blind, £1,000 for the relief of Air Raid Victims, Rs. 1,000 to King George Fund for Sailors and Rs. 1,000 to the Aeroplane Fund started by the Simla District War Committee. The State servants and landlords have invested about Rs. 7 lakhs in the Interest-Free War Loans. This has been supplemented by handsome donations from the gentry and businessmen.

As the leader of the Sikhs His Highness issued a special appeal to his community to render all possible help in securing an early victory to British arms. To give an impetus to recruitment amongst Sikhs His Highness donated Rs. 51,000 with a monthly contribution of Rs. 1,000 to the Khalsa Defence of India League recently formed under the patronage of His Highness. Only recently His Highness donated a sum of Rs. 5,000 to the Greek Relief Fund, and in a meeting of the Khalsa Defence of India League held at Simla on 13th June, His Highness promised to raise 4,000 recruits from his State for the Indian Army in addition to the 4,000 recruits already supplied.

Area of the State : 5,932 square miles.
Population : 1,625,520.
Gross Annual Income : Rs. 1,57,00,000.
Salute : 17 guns.
Permanent local Salute : 19 guns.

PATNA: MAHARAJA RAJENDRA NARAYAN SINGH DEO, the present Ruler of Patna State.

Born: 1912.

Ascended the Gadi: 1933.

Educated: At Mayo College, Ajmer, where he passed the Chiefs College Diploma Examination at the head of successful candidates and at St. Columba's College, Hazaribagh, where he passed the Intermediate Arts Examination of the Patna University, topping the list of successful candidates of that institution.

Married: In 1932 the daughter of His late Highness the Maharajadhiraj of Patiala.

History: Maharaja Ramai Deo, a direct descendant of Prithwi Raj Chauhan, the last Hindu Emperor of India, founded the State of Patna about 1159 A.D. The Maharajas of Patna have enjoyed the hereditary title of Maharaja from the very beginning. Patna State is identical with the ancient "Dakshina Koshala," which was the kingdom of Kusha, the second son of Rama. Its various architectural ruins bear testimony to the ancient culture and civilization which flourished there in the olden times. The State was taken under British protection in 1803 and it has remained ever since extremely loyal and is well known for its uniform devotion to the British Government. Patna is a well governed and progressive State and all its valuable resources are spent on works of public utility. It possesses very good educational and industrial institutions. Subject to certain exemptions, primary education is compulsory for all boys and girls between the ages of 6 and 11. It has a fully equipped Hospital and a X-ray and Electrotherapy Institute at the Capital, with several outlying Dispensaries and two Child Welfare Centres. There are telephone and telegraph connections in the important places of the State. It has beautiful valleys having enchanting scenery and an abundance of Shikar of all kinds of birds and beasts, particularly tigers. The Maharaja is a member of the Chamber of Princes in his own right and takes keen interest in the administration.

Heir-Apparent: Yuvaraj Raj Raj Singh Deo. *Area of the State:* 2,511 sq. miles. *Population:* 6,32,221. *Revenue:* Rs. 15,00,000. *Salute:* 9 guns.

ADMINISTRATION.

Chief Minister: Mr. Raj Kanwar, M.A., P.C.S. (Retd.); *Home and Development Minister:* Mr. Shri Gopal Chandra, B.A., LL.B., M.R.A.S. (London); *Revenue Minister:* Mr. Lakshman Sahani; *Chief Judge:* Rai Sahib Madan Mohan Seth, M.A., LL.B.; *Puisne Judge:* Mr. Khetra Nath Singha, B.A., B.L.; *Secretary to the Cabinet and Comptroller of Household:* Kumar Ranendra Pratap Singh Deo, B.A., B.L.; *Chief Medical Officer:* Capt. D. N. Basu, M.B., I.M.S. (Retd.); *Superintendent of Police and Shikarkhana Officer:* Virabar Sardar Bishan Singh; *Forest Officer:* Rai Saheb M. C. Gupta, D.D.R.; *State Engineer:* Sardar Keher Singh Garewal; *Superintendent of Education:* Mr. A. C. Das, M.A.; *Audit Officer:* Mr. M. G. Mukerji.

Born: 1901. Succeeded to the *Gadi:* 1908.

Educated: At the Rajkumar College, Rajkot.

Married: In 1920 Princess Rupaliba, M.B.E., daughter of the late Ruler Sir Daulatsinhji Bahadur of Limbdi.

His Highness ranks fourth among the Ruling Princes of Kathiawar enjoying plenary powers.

Club: The Maconochi Club, Porbandar.

Area: 642.25 square miles. *Population:* 1,46,564. *Salute:* 13 guns. *Revenue:* Rs. 25,00,000.

War Efforts: Soon after the outbreak of the war the State sent a donation of Rs. 100,000 to H. E. the Viceroy's "War Purposes Fund" and offered to renew the donation of Rs. 100,000 every year till the War lasts. Rs. 20,000 of the initial donation were allocated to St. Dunstan's Section of the Fund. H. H. the Maharaja has also offered his personal services. The people of Porbandar contributed Rs. 10,000 to the Western India War Plane Fund. The State is maintaining Civic Guards and making contributions to several activities connected with the War effort. For the year 1940-41 His Highness has announced donations of the aggregate total of Rs. 1,20,000 consisting of Rs. 12,500 to Lady Linlithgow's Silver Trinket Fund, Rs. 10,000 to St. Dunstan's Section for Blinded Soldiers, Sailors and Airmen of the Empire, Rs. 11,000 to the King George's Fund for Sailors, Rs. 12,000 to the Indian Comforts Fund for the Indian Troops and Indian Seamen in Europe, Rs. 12,000 to the Indian Red Cross and St. John Ambulance Association (Indian Council) for Red Cross Work for troops serving in India and sent overseas from India, Rs. 12,500 to the London Air Raid Relief Fund, and Rs. 50,000 to the Viceroy's War Purposes Fund.

MAHARAJ KUMAR SHREE LOKENDRA SINGH, HEIR-APPARENT, Ratlam State, Central India.

Born : 9th November 1927.

Active and intelligent, the young Prince is very promising and has all the qualities befitting his position in life. From his very young days he has shown signs of great mental aptitude and capacity.

In February 1934, at the age of 7, the Maharaj Kumar acted as a page to Her Excellency Lady Willingdon and he acquitted himself very creditably. He met Their Excellencies Lord Goschen, Lord Willingdon, Lord Stanley and Lord Brabourne at the time of their visits to Ratlam.

When in England in 1937, the Maharaj Kumar attended the Coronation at Westminster Abbey and had the honour to be invited to most of the functions including Garden Parties, etc., at Buckingham Palace and other places, connected with His Majesty's Coronation. Met Their Majesties the King and Queen at Windsor Castle and Buckingham Palace. Was specially presented by the Queen Mother with a mug in commemoration of the Coronation. Visited Olympia, Aldershot, Hurlingham, etc. Was present at the Empire Garden Party to witness the Polo Tournament between India *vs.* the World.

Education : Is preparing for the Senior Cambridge Examination under an European Guardian and Tutor, helped by an Indian Assistant and a Shastri. His Highness the Maharaja is himself directly supervising the Prince's education. Attended Colet Court School, Hammersmith, London in 1937 during His Highness the Maharaja's visit on the occasion of the King's Coronation.

Games and Hobbies : Riding, Polo, swimming, shooting, cricket, physical training, drill, fencing, rowing, etc. Has a very good ear for music, especially English and takes great interest in the activities of the Indian States Forces Unit called the "Lokendra Rifles," named after him.

Medals : Silver Jubilee Medal, 1935; Coronation Medal, 1937.

REWA: HIS HIGHNESS BANDHVESH MAHARAJA SIR GULAB SINGH JU DEO BAHADUR, G.C.I.E., K.C.S.I., MAHARAJA OF REWA.

Born: 1903; Ascended the gadi in 1918; invested with ruling powers in 1922.

Educated: At Daly College, Indore.

Married: In 1919 a sister of His Highness the Maharaja of Jodhpur, and again married in 1925 the daughter of His late Highness Maharaja Sir Madan Singh Bahadur, K.C.S.I., K.C.I.E. of Kishangarh.

The Maharaja is a noted sportsman and has shot 596 tigers.

He was a delegate to all the three sessions of the Round Table Conference and was also a member of the Federal Structure Committee of the Conference. He is a member of the General Council of Daly College and of the Managing Committee of King Edward Medical School, Indore.

Heir-Apparent: SRI YUVRAJ MAHARAJ KUMAR MARTAND SINGH SAHEB. *Born* in 1923.

Area of State: 13,000 square miles. *Population:* 1,820,306. (1941 census.)

Revenue: Rs. 60,00,000. *Salute:* 17 guns.

Rewa is the largest and the easternmost State in the Central India Agency. The State is bounded on the North by the Banda, Allahabad and Mirzapur Districts of the U.P., on the East by the Mirzapur District and the Feudatory State of Chhota Nagpur, on the South by the Central Provinces, and on the West by the States of Maihar, Nagod, Sohawal and Kothi. The State has a number of 'Waterfalls,' some of which, Chachai and Keoti are famous for their height and grandeur. The State is very rich in mineral resources.

On the executive side His Highness is assisted by a State Council of 7 members of which His Highness himself is the President. On the Judicial side there is a Chief Court consisting of Judges. A Raj Parishad consisting of 41 members with the number of officials and non-officials almost equal, has also been established to advise on such matters of public interest as are referred to it. His Highness takes very great interest in the administration of the State and in the development of trade and industries for which purpose he has instituted a State Bank with branches all over the State.

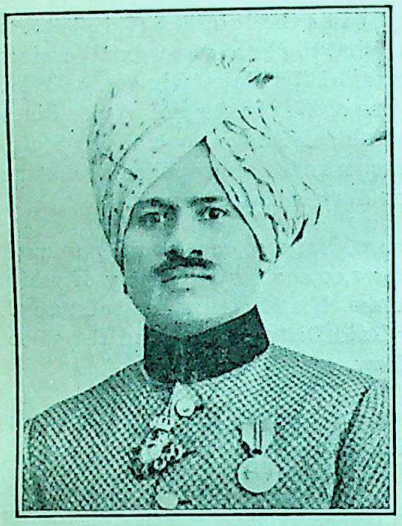
War efforts : In September 1938 when the International situation had been very grave, His Highness offered to place his personal services and his entire resources at the disposal of His Majesty in case of War. The offer was reiterated just on the eve of War in August 1939. Since then the Rewa Transport Corps has already moved out of the State, trained personnel for mechanical transport has been supplied, and some troops have been offered for garrison duty in British India.

His Highness has donated a sum of Rs. 1,00,000 for the purchase of ambulance motor cars and another 1,00,000 for the supply of grain to the Defence services. Besides these, His Highness has subscribed Rs. 10,000 to the Lord Mayor's Air Raid Distress Fund and Rs. 5,000 to the Officers' Training Course at Mhow.

One lac of bidi cigarettes and 1,000 tons of coal have also been offered for the comfort of Indian Soldiers.

MAHARAJ KUMAR SHRI MARTAND SINGHJI Heir-apparent, Rewa State.

Born : On the 15th March 1923 to Her Highness the Senior Maharani Sahiba from Jodhpur.



Education : Elementary education at Rewa under highly qualified English and Indian Tutors. Joined Daly College, Indore, in 1935 and passed the Diploma examination with distinction in several subjects in 1939. After passing the Diploma examination, joined Mayo College, Ajmer, in 1939 for further studies. Passed the Intermediate Examination of the Board of High School and Intermediate Education, Ajmer from the Mayo College in 1941.

Marriage : Betrothed to the grand daughter of His Highness the Maharao Sahib of Cutch in February 1941. The marriage will take place in February 1942.

He bagged his first tiger at the age of 13 in 1936.

SANT: MAHARANA SHRI JORAWARSINHJI, the present Ruler of Sant State. Born on 24th March 1881. Installed on the Gadi in 1896. Formally invested with full powers on 10th May 1902.

Educated in the Rajkumar College, Rajkot, and was associated with the administration of the State for more than a year preparatory to his being invested with full powers.

He is an intelligent Prince who keenly supervises the administration of the State. During his regime many improvements have been made and the State is making good progress: The revenue of the State increased—Its lands have been surveyed and regular settlement introduced—Provision for English education made for the first time and Primary and Secondary education made free throughout the State—Election system sanctioned for Municipality—Free medical relief extended by opening new dispensaries in the district. Many other improvements have been introduced during his regime such as founding of a permanent Famine Relief Fund and granting of liberal tagavi loans to the agriculturists during the time of scarcity. Money is also advanced to local merchants by way of encouragement at a low rate of interest. Other improvements of utility such as installation of electricity in the towns of Sant and Rampur, clock tower, public gardens, metalled roads in parts have also been made. The regime of Maharana Shri Jorawarsinhji has been anything but a bed of roses. Famine and lean years had made the financial condition of the State far from satisfactory; but wise management has been instrumental to keeping its head up.

The Rajaji Saheb exercises full powers and enjoys a dynastic salute of 9 guns. Primogeniture is the rule of succession to the Gadi and the Darbar's right of adoption has been recognised and confirmed by Government.

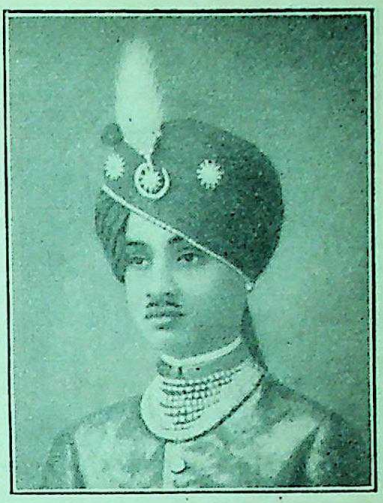
During the Great War the services of the Rajaji Saheb were appreciated by Government. The Government were also pleased to recognise the right of the Rajaji Saheb to be a member of the Chamber of Princes.

On the outbreak of the present War the Rajaji Saheb sent a message of unswerving Loyalty to the Crown and the Government. He has also contributed generously towards various War Funds totalling in all upto 31st Dec. 1940 to Rs. 32,883. A State War Committee for collection of War Funds and propaganda work has also been formed.

The Ruling Family in the Sant State belongs to the Puar or Parmar caste of Rajputs and is believed to have descended from the celebrated family of Vikramaditya and Raja Bhoj of Ujjain. They first came from Dhar and settled at Jhalod and finally about the 13th Century at Sant. The founder of the family was Rana Sant who with his uncle Limdev was forced to leave Jhalod and established himself at Sant.

With effect from the 1st April 1933, all the Bombay States were brought into Political relation with the Government of India through the Agent to the Governor-General for the Gujarat States and Resident at Baroda with headquarters at Baroda. Since then the Sant State has been in direct political relation with the Government of India.

The supervision and management of the Vaccination Department of the State has been transferred to the State from 1st December 1933, by Government and the Chief Medical Officer of the State has been appointed as the head of the department.



Unrestricted control and management of the State schools was transferred to the State by Government from 1st May 1933.

Area of the State: 394 Square Miles. *Population*: 83,531 as per census of 1931. *Revenue*: Rs. 4,02,166.

Heir-apparent: MAHARAJ KUMAR SHRI PRAVINSINHJI, born on 1st December 1907.
Acting Dewan: N. J. DIVECHA, ESQR., B.A., LL.B.

MAHARAJKUMAR SHRI PRAVINSINHJI, Heir-Apparent, Sant State, Gujarat States Agency.

Born : 1st December 1907.

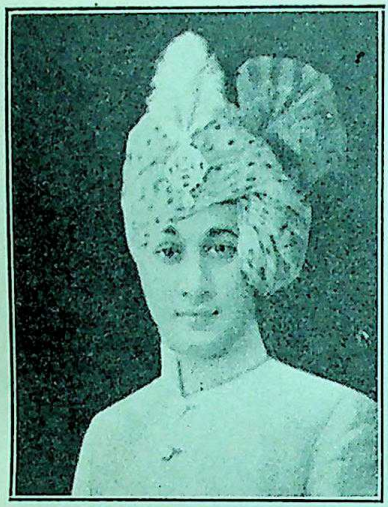
Education : Elementary education at home under highly qualified tutors. Joined Rajkumar College, Rajkot. Passed Diploma Examination of the Rajkumar College, Rajkot. Joined Princes School at Baroda and passed the School Leaving Certificate Examination of the Bombay University with distinction in 1925. Joined Baroda College. At School and College he has won several Cups, Prizes and Medals in tournaments. A good tennis and football player.

Marriage : On the 15th May 1928 married Maharajkumari Shri Rajkunverba, the eldest daughter of Maharajkumar Saheb Shri Vijayrajji, Heir-Apparent, Cutch State, Bhuj.

The Maharajkumar has travelled widely. He first sailed for England in the year 1935 to attend the Jubilee celebrations. Again sailed for England in 1937 to attend the Coronation of His Majesty King George VI and Queen Elizabeth. Toured the Continent and returned to India in 1938.

DECORATIONS.

Silver Jubilee Medal, 1935. Coronation Medal, 1937.



CLUBS.

Member of the Willingdon Sports Club, Bombay, the Royal Western India Turf Club, Bombay, and the Cricket Club of India, Bombay.

Address : Santrampur, Sant State, Gujarat.

SIRMUR: His Highness Lieutenant Maharaja Rajendra Prakash Bahadur, the present Ruler of Sirmur.

Born: 10th January 1912.

Area of the State: 1,141 square miles. Annual revenue 10,00,000. *Population:* 148,568 (Census 1931).

Salute: 11 Guns.

In recognition of his exceptional administrative abilities the present Ruler was installed to the *gadi* in November, 1933 when he was only 21 years old. He has introduced remarkable constitutional and administrative changes within the short period of seven years since he took the reins of Government. He has set up a council of Ministers who not only advise him on all important matters of administration but are also responsible for the successful running of the departments under each. He has completely separated the judiciary from the executive by creating a separate High Court with a bench of two judges. He has introduced all possible beneficent activities in the State under his personal supervision. He is easily accessible and is in constant contact even with the poorest of his subjects. Minute details of every branch of administration interest him very much. He works hard in the interest of his people and is fully keeping up the traditions of his illustrious ancestors who have ever been recognised as rulers running a model administration. He is a young man of versatile genius and has been taking keen interest in all the federal and administrative discussions affecting the States carried on in regional groups and in the Chamber. He has, since last year, been elected as a member of the Standing Committee of the Chamber of Princes.

The Rural Uplift Committee which was appointed by him in the year 1937 to make an economic survey of the State and go into the extent of rural indebtedness has submitted its report. In pursuance of its recommendations a permanent Rural Development Board has been formed. The activities of this Board cover Co-operative movement, Co-operative Banking, Marketing, Education, Medical help, Communication and Industries. The Co-operative movement has received a great impetus from the activities of this Board and is rapidly extending to all the villages. The question of Rural Indebtedness, which is only ten times the land revenue in this State as compared to the average of nineteen times in the rest of India, has been taken up seriously by this Board. This question, difficult as it is, has been tackled by an enactment, the Sirmur Relief of Indebtedness Act on the one hand and by the Nahan National Bank on the other. A Central Agricultural

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

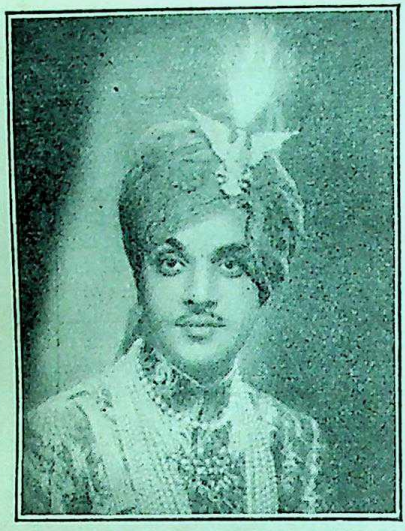
Demonstration Farm has been established in a suitable locality, and various cottage industries too are to be introduced shortly. Much useful and instructive work is done by the Chief Medical Officer and his subordinates among the rural people by means of lectures and slides on maternity and child-welfare, and village hygiene and sanitation.

Many restrictions on the shooting of wild animals have been removed. Every cultivator has been allowed free grazing for a certain number of cattle. Several important concessions and forest rights have been given to the agriculturists. The question of consolidation of holdings and fixity of tenures is being seriously considered by the Development Board. Several primary schools for boys have been opened in villages, where free primary education is imparted. A Scheme for Free Primary education of a type best suited to the needs of agriculturists is being worked out. The Mandalsa Kanya Mahavidyalaya, which was started about three years ago is now a full fledged Girls' High School.

Communications are being developed very rapidly. The construction of a main road connecting Nahan with the Tehsil headquarters of Renka a distance of about 25 miles is already under construction. Feeder roads are being developed by the District Board, and village roads are being constructed by co-operative methods in the villages where Co-operative Societies exist. In addition to the existing Allopathic Hospitals and dispensaries which exist at Nahan and at the Tehsil headquarters, and the St. John Ambulance touring doctor, qualified Vaids have been appointed to administer indigenous medical aid to the agriculturists.

The Maharaja, an all-round sportsman, takes great interest in the training and progress of the Sirmur Sappers and Miners. The Force served in Afghanistan and offered aid in Egypt. They served in Mesopotamia also, but were unfortunately shut up with General Townshend's forces in Kut, and only a small portion of the corps, which was employed at the base at Basra, escaped capture. On the outbreak of the War, His Highness hastened to place his personal services and the resources of the State at the disposal of the Government. He has also contributed Rs.50,000 to begin with, towards the Viceroy's War Purposes Fund and Rs.2,000 towards St. Dunstan Fund, and has placed the Sirmur House at Simla at the disposal of the Government. War Committee to collect subscription for the different War Purposes Funds, to provide recruits for the Army, to co-ordinate the War efforts of the Sirmur public and the different Departments of the State and to disseminate correct war news amongst the public to protect them from the false propaganda of the enemy, have been established throughout the State. The Field Co. Unit (Sirmur State Sappers & Miners) with an efficient and fully trained personnel, under the command of an excellent and veteran Officer, Major C. A. G. Rundle, M.C., left for British India, on active service on the 23rd of November 1940.

COUNCIL.



H. H. The Maharaja Saheb Bahadur. Rai Bahadur Lala Radha Kishan, M.A., P.C.S. (*Retd. Foreign and Political*). Mr. R. G. Abbhi, B.A. (N.U.), (*Revenue*). Mr. G. P. Saxena, B.A., P.C.S. (Retd.), *Law and Justice*. Mr. B. Swarup, B.A., LL.B., *Council Secretary*.

SACHIN: His Highness Muba-riz-ud-Daulah, Muzzaffer-ul-Mulk, Nusrta-e-Jung, Nawab Bahadur Sidi Mohommed Haider Mohommed Yakut Khan, Nawab of Sachin.

Born : 11th September 1909.

Succeeded : 19th November 1930.

Married: Her Highness Arjumand Bano, Sarkar-e-Aliya, Nawab Nusrat Zamani, Nawab-Begum of Sachin, the eldest sister of His Highness the Nawab of Loharu on 7th July 1930; Her Highness Alimama Sultan Nur Mahal Nawab Yaqut Zamani Begum on 23rd July 1937; and Her Highness Manzar Sultan Mumtaz Mahel Nawab Massarrat Zamani Begum on 10th May 1938.

Educated : At home and later at the Rajkumar College, Rajkot.

Sachin is the Senior Habshi State in India. The Rulers of Sachin are Habshi Mohommedans, and are the lineal descendants of Nawab Bahadur Sidi Abdul Karim Mohommed Yakut Khan I. Over a family dispute for the Throne of Janjira Sidi Abdul Karim Mohommed Yakut Khan I left Janjira and joined forces with the Peshwa. In 1791 a triple treaty was concluded between Sidi Abdul Karim Mohommed Yakut Khan I, the Peshwa, and the East India Company, on the basis of an offensive and a defensive alliance. By this Triple Alliance Sidi Abdul Karim Mohommed Yakut Khan I took the State of Sachin. The Ruler of Sachin is a Member of the Narendra Mandal (Chamber of Princes) in his own right and is internally fully Sovereign. The State pays no tribute either to the British Government or to any other State.

Sachin : The Capital of the State and a pretty town on the B. B. & C. I. Railway.

TRAVANCORE: His Highness Sri Padmanabha Dasa Vanchi Pala Sir Bala Rama Varma Kulasekhara Kiritapati Manney Sultan Maharaja Raja Ramaraja Bahadur Shamsher Jang, G.C.I.E., D.Litt., Maharaja of Travancore.

Born : 7th November 1912.

Ascended the Musnad on 1st September 1924. Invested with Ruling Powers on 6th November 1931.

Educated : Privately.

His Highness is Colonel-in-Chief of the Travancore State Forces and Honorary Colonel of the 12th Malabar Battalion.

Travancore is one of the most populous and important of Indian States and occupies the south-west corner of the Indian Peninsula. It is bounded on the North by the State of Cochin and the District of Coimbatore, on the East by the Districts of Madura, Ramnad and Tinnevelly and on the South and West by the Indian Ocean and the Arabian Sea. It is one of the most picturesque portions of India, containing an extensive hill region, numerous rivers, and a succession of backwaters and vast forests.

The State now stands in the forefront of educated India.

According to the present census the number of literates per 100 of the population is 47.7. For males, the percentage of literacy is 58.5, and for females 36.7.

Although the Ruler of Travancore is legally the source of all authority, judicial, administrative and legislative, yet for more than half a century the Maharajas have acted as constitutional monarchs, without, however, failing to maintain effective personal contact with the administration of the State. His Highness the present Maharaja, has not only sedulously adhered to these great traditions of his House, but has readily responded to all the legitimate aspirations of his subjects. In November 1936, His Highness promulgated the epoch-making Proclamation throwing open all the temples under his control and that of his Government to all classes of Hindus including those hitherto regarded as untouchables, a reform which evoked universal satisfaction and thankfulness all over the world. By another Proclamation in November 1937, a University designed specially to promote technological studies and research has been established.

The Government of His Highness have taken in hand the first instalment of a scheme of nationalising the transport system of the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

State, and have established The Travancore Credit Bank for granting long-term loans to the agriculturists and small industrialists of the State. To reduce unemployment and to exploit the immense natural resources of the State, the Government have embarked upon a programme of industrialisation.

Among the first fruits of the State's policy of industrialisation may be mentioned, the Pallivasal Hydro-Electric Scheme, the Ceramic Factory at Kundara and the Travancore Sugars and Chemicals Ltd. The last mentioned is a company incorporated in Travancore and is manufacturing, besides Sugar, 260 varieties of pharmaceutical products such as liniments, liquid extracts, liquors, pulves, spirits, syrups and specialities including Caffeinaspirin, Aspirin and lysol.

The Rubber Factory at Trivandrum has been reopened; and by entering into an agreement with the Aluminium Production Company of India Ltd., an Aluminium Smelting Factory is being constructed at Alwaye, an enterprise full of great possibilities for the future.

H. H. Maharani Setu Parvati Bayi, Mother of His Highness.

The Government of the State is conducted in the name and under the control of His Highness the Maharaja. There is a Legislature consisting of an Upper and a Lower House, with a majority of elected members and possessing large legislative and financial powers and powers of interpellation.

Among the notable legislative measures recently introduced are the Debt Relief Act, which is designed to alleviate the burden of debt and is wider in scope and application than similar enactments elsewhere, and the Trivandrum City Municipal Act which makes provision for the better management of the municipal affairs of the city through a Corporation.

On the outbreak of the war His Highness generously offered to place the entire resources of the State at the disposal of the British Government. He has not only made munificent contributions towards the War Fund but sent the First Infantry of the State Forces for active service. He has contributed six hundred and fifty thousand rupees for equipping the trawler and mine-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

sweeper, " H.M.I.S. Travancore ", for the use of the Royal Indian Navy, and donated a further amount sufficient for the purchase of 3 fighter planes for the Royal Air Force. Her Highness Maharani Setu Parvati Bayi, Mother of His Highness the Maharaja, has contributed Rs. 9,000 for equipping two Field Ambulance Units.

His Highness' benefactions include large sums of money for earthquake relief, for fight against tuberculosis and similar purposes, and annual donations to several philanthropic and scientific bodies. Amongst his other charitable works is the establishment of a home for the destitute and the infirm. He founded an Art Gallery at the capital in addition to the one he maintains in the Palace.

Trivandrum, the capital of Travancore, is a terminus of the South Indian Railway. The whole State is covered by a network of roads and canals with a well regulated system of road and water transport. There exists also a weekly air-mail service between Bombay and Trivandrum. This has been extended to Trichinopoly which is on the Madras-Colombo Air Mail Route.

Area of the State : 7,625 square miles.

Population : 60,70,790 according to the 1941 census : Total population of the city of Trivandrum 128,480.

Revenue : Rs. 285.40 lakhs.

Salute : 19 guns, local 21 guns.

Heir-Apparent :
His Highness Martanda Varma Elaya Raja.

Heir-Presumptive :
His Highness Prince Avittam Thirunal.

The Andhra University has conferred the honorary degree of D. Litt. on His Highness the Maharaja and Her Highness the Maharani. The Benares University has conferred the honorary degree of D. Litt. on Her Highness the Maharani.

His Highness' hobbies are tennis, photography and riding.

Address :
Kaudiar Palace, Trivandrum, Travancore, S. India.

Sachivott.ma Sir C. P. Ramaswamy Aiyar, K.C.S.I., K.C.I.E., LL.D., the present Dewan of Travancore.

AKALKOT: RAJA SHRIMANT VIJAYSINH FATTESINH BHOSLE, RAJA SAHEB of Akalkot.

Born: 13th December 1915.

Education: Studied at Bishop's High School, Poona. Passed the Diploma Examination of the Rajkumar College, Rajkot, with distinction in English and Science. Attended the Deccan College, Poona. Took administrative training in Bangalore for a year and a half.

Recreation: Shooting, riding, tennis, Cricket, motoring and racing. *Clubs:* Vice-Patron of the Cricket Club of India, W. I. A. A. and R. W. I. T. C.

Married in 1934 Princess Kamala Devi of Gwalior who unfortunately expired in 1934.

Area of State: 498 sq. miles. *Population:* 92,605. *Revenue:* Rs. 7,58,000.

The Ruler is extremely popular among his subjects whose welfare and prosperity are his constant concern. He has always been alive to the rapid progress in the world, and as such has established a Rayat Assembly with a non-official majority. The Assembly is empowered to move resolutions, ask questions and discuss bills of administrative and public importance. The cause of the agriculturists is nearest to the Ruler's heart and orders have been issued by him to devise means to ameliorate their lot. A Debt Conciliation Act is going to be placed in the forthcoming Session of the Assembly. Nearly Rs. 3½ lakhs have been advanced in loans to agriculturists from the State Jowari Fund and Land Bank. Large sums have been set apart for village uplift every year. Social legislation has been introduced into the State the chief of which is the Akalkot Harijan Act and the Widow Remarriage Act. Primary education in village schools is imparted free since the year 1937. To girls of all castes and creeds both primary and secondary education is free. Scholarships and free education are given to poor and deserving students. Voluntary military training has been newly introduced in the schools. There is an independent High School for girls. There is a fully equipped Hospital at the Capital and the same has been enlarged recently. A touring dispensary has been started for giving medical relief to villagers. The Akalkot Water Works constructed at a cost of 12 lakhs supply water

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

to the capital. Electrification of the town took place about 10 years back. There is a Municipality at Akalkot and a Taluka Local Board. Town planning and removal of congestion in the town is going on rapidly. A development scheme of town-extension is in progress and all possible facilities are being given for the same to the people.

Akalkot is an important trade centre. Last year's imports and exports were 178,294 and 422,708 maunds respectively. All possible facilities such as leasing of land, supply of water and electricity at concessional rates, etc., are afforded to the different industries in the State and as a result, the Match Factory, the oil producing mill, soap factory, cotton ginning, hosiery, and other industries started in the State limits are working satisfactorily. These industries, apart from reducing unemployment, have become a veritable boon to the agriculturists as they absorb large quantities of agricultural produce.

Shirmant Raja Saheb is a member of the Chamber of Princes in his own right.

Immediately after the declaration of War Shrimant Rajasaheb made an announcement that all the resources of the State were at the disposal of His Majesty's Government and donated Rs. 5,000 towards H. E. The Viceroy's War Purposes Fund. A Central Committee with sub-committees has been established under the presidentship of the Dewan to systematically organise the various war activities such as collection of funds, propaganda and recruitment, etc. There has been a good response from the people who are contributing with willingness their mite to the War Purposes Fund and the Defence Loans. The War Gifts Committee up till now have collected about Rs. 4,000 to Rs. 5,000 by way of securing a charity performance from the Shivaji Samrat Circus and by raising a rupee fund in aid of war. Rs. 30,000 have been invested by the public in the Defence Loans. Prior to the appointment of committees an appeal by the State Government for contribution to the Red Cross and St. Dunstan's Institutions was made to the State subjects and the public willingly contributed Rs. 6,000 for the above fund.

Besides these, numerous donations were announced by Shrimant Rajasaheb and the Dowager Ranisaheb to several institutions for war purposes.

An appeal was issued by the Darbar to the fighting classes of the State to get themselves enlisted as recruits and as a result a good number of subjects have been recruited in the army. The publication of News Bulletins and other materials supplied from the Publicity Agency has been taken up by the State Publicity Department and circulated to almost all the villages.

Dewan : CAPTAIN G. B. DESHMUKH.

BHADARWA: SHRIMANT (NAMDAR) THAKORE SAHEB SHREE NATVERSINHJI RANJITSINHJI, Ruler of Bhadarwa.

Born : 19th November 1903.

Succeeded to the Gadi : 26th April 1935 and formally invested with powers on 7th October 1935.

Educated : At Rajkumar College, Rajkot.

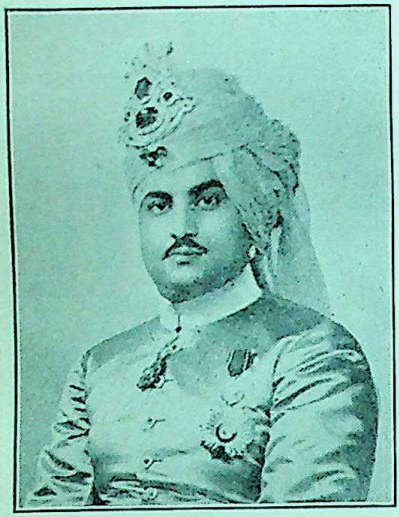
Area : 27 Square miles, excluding several Wantas in the Baroda State.

Population : 11,048.

Revenue : Rs. 1,14,000

Married on 14th December 1930, Shree Jijirajkuverbasaheb of Rajpur (Kathiawar).

The State enjoys full Civil powers, and in Criminal matters up to 7 years R. I. and fine up to Rs. 10,000. The Ruler is a Representative Member in the Chamber of Princes. He is entitled to be received by the Governor of Bombay.



Survey settlement has been introduced, and farmers are given rights over the lands. The Deccan Agricultural Relief Act is, with necessary modifications, applied to the State with a view to giving relief to the farmers. Education and Medical relief are free throughout the State. The Judiciary and Executive are separate in the State. The Child Marriage Restraint Act has been introduced in the State. The State Police Force has been thoroughly reorganised, and arrangements have been made to train it by qualified and efficient hands. There is one middle school in the capital. The capital is supplied with electricity and pipe water. The State maintains an adequate and efficient staff. A sanitary board has been established in the Capital for public sanitation and street lighting.

War Services : During the last Great War, the State sent several recruits, and contributed liberally to the various war funds. The State has always been loyal to the benign British Government, and the present Rana Saheb has steadfastly adhered to his family tradition. The Rana Saheb placed all the resources of the State at the disposal of the crown, on the outbreak of the present War. He has also contributed Rs. 3,696-8-0 in cash, and has sanctioned a monthly contribution of Rs. 200 towards the War Purposes Fund, till the successful termination of the War. He has also given 459 Tolas of Silver to H. E. Lady Linlithgow's Silver Trinket Fund. He was a Patron, and made a donation of Rs. 251 to the Grand Fete organised by The Gujarat Agency, and Baroda Cantonment, for the War Purposes Fund.

Address : Bhadarwa (Gujarat States Agency).

DARBHANGA: HONY. COL. THE HON'BLE DR. SIR KAMESHWARA SINGH, K.C.I.E., (1933); LL.D., (Allahabad University) 1937; D.Litt. (Benares Hindu University), 1937; Hony. Colonel of 11th Bn. 19th Hyderabad Regiment, 1940; Hony. Colonel Bihar Regiment, 1941; Maharajadhiraja of Darbhanga.

Born: 28th November, 1907, Succeeded his father The Hon'ble Maharajadhiraja Sir Rameshwara Singh Bahadur, G.C.I.E., K.B.E., D.Litt., 1929.

Is the premier nobleman and leading magnate in Bihar; Delegate to the two sessions of the Indian Round Table Conference held in London, 1930 and 1931; nominated Member of the Council of State, twice; elected 1937; is the head of the Maithil Brahmins in India; is the Life-President of the Maithil Mahasabha; President, All-India Landholders' Federation; Bengal Landholders' Association; Life-President of the Bihar Landholders' Association; General President of Sri Bharatdharma Mahamandal; elected Pro-Chancellor, Benares Hindu University, twice; Life-member of the Allahabad University and Benares Hindu University courts; nominated President of the Bihar Sanskrit Association, thrice; President of the Bihar Sanskrit Re-organisation Committee; Vice-Patron, Benares Hindu University; Bihar and Orissa Research Society; and Academy of Fine Arts, India; Vice-President, Provincial War Board, Bihar; President, King George V. Anti-Tuberculosis Association, Bihar; Fellow of the Royal Society of Arts; Fellow of the Royal Empire Society; Member, East India Association; Life-member, Empire Parliamentary Association, London; Appointed member, National Defence Council 1941.

Recreations: Polo, Tennis, and Motoring.

Clubs: Marlborough, London; Chelmsford, Delhi & Simla Royal Calcutta Turf; Calcutta South, Calcutta.

WAR EFFORTS:

The Maharajadhiraja pledged his unqualified support to His Majesty's person and throne immediately on the outbreak of the present War.

Apart from the sum of 1 lakh of rupees which the Maharajadhiraja donated to the Viceroy's War Purposes Fund soon after the outbreak of the hostilities, he presented a dozen ambulances to His Majesty the King-Emperor on the occasion of his official birthday in 1940 at a cost of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

over Rs. 50,000 ; donated Rs. 10,000 for the construction of an institute for the Officers of the British Regiment in Ranchi ; Rs. 4,000 for the Red Cross and St. John's and Rs. 1,000 for St. Dunston's Fund ; Rs. 5,000 for amenities of Hindu and Sikh soldiers serving overseas on the occasion of Duserah and presented a Publicity Van to the Darbhanga War Board ; Rs. 5,000 to the King George's Fund for sailors ; £ 5,000 towards the purchase of a Fighter Plane to the Royal Air Force to be called 'Sarkar-I-Tirhut I' with a promise of replacing the same if lost ; and Rs. 1,40,000 for another fighter plane to the Indian Air Force called Sarkar-I-Tirhut II, which is the ancestral designation of the House of Darbhanga. He sent £ 1,000 to the Lord Mayor of London for relief of air-raid sufferers.

But the most notable of these donations was that of £ 15,000 which the Maharajadhiraja placed at the disposal of Her Majesty the Queen-Empress in the name of his wife, the Maharani-adhirani Sahiba, who died in October last. The late Maharani-adhirani Sahiba took a great interest in the War efforts and was full of admiration for the courage, forbearance and sacrifice shown by the women of the Empire. In making this donation the Maharajadhiraja merely carried out one of her wishes. She was in fact most anxious to contribute her bit to the work of the women of the Empire. Her Imperial Majesty the Queen-Empress was graciously pleased to contribute this amount as follows :—

£ 5,000 to the National Y.W.C.A. for recreation huts and amenities for Army nurses with British Expeditionary Force in the Middle East ;

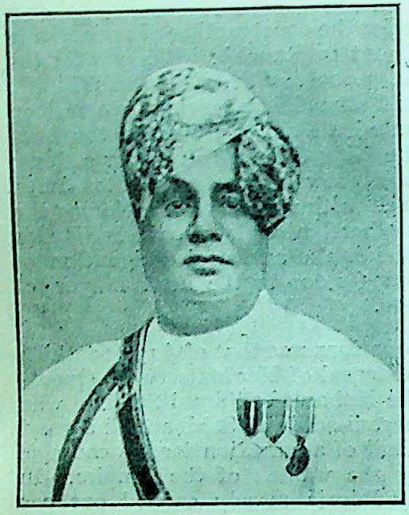
£ 7,500 to a special Fund administered by the Royal College of Nurses for relief of civilian nurses who have suffered through the War ;

The balance of £ 2,500 as follows :—

£ 1,500 towards hostels and comforts for Indian Merchant Seamen ;

£ 900 to agencies chosen by Her Majesty working for bombed out persons whose houses have been destroyed by bombing and whose need is very urgent ; and

£ 100 for purchase of wool for comforts for Indian soldiers serving with the British Expeditionary Forces.



The Maharajadhiraja has further supplemented this gift with £ 2,500 for knitted woollen comforts to troops serving abroad as the object was especially dear to the late Maharani-adhirani Sahiba.

He has recently given another plane called Sarkar-I-Tirhut III to the Royal Air Force and a sum of Rs. 33,000 to the Viceroy's War Purposes Fund which amount His Excellency The Viceroy has earmarked for the benefit of the Indian soldiers serving overseas.

Besides these, he has purchased Defence Bonds to the extent of Rs. 10 lakhs, and contributed the entire Nazar he received on the last Duserah day to the War Fund.

GARRAULI: DIWAN BAHADUR CHANDRABHAN SINGH, the present Chief of Garrauli, Bundelkhand.

Born: 2nd April 1883.

Succeeded his grandfather Diwan Bahadur Parichat on 19th October 1884, receiving administrative powers in 1910.

Educated at Rajkumar College.

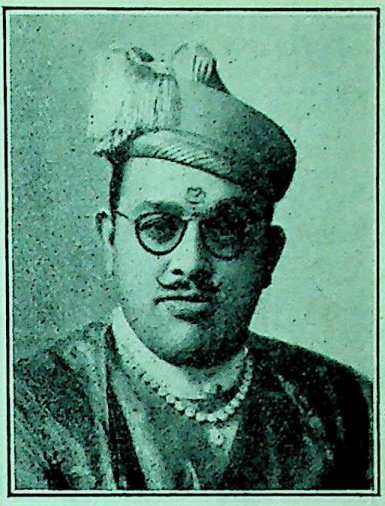
Married: the daughter of the Jagirdar of Semaria in Panna State. Has two sons, Kunwar Raghuraj Singh, born in 1910 and Kunwar Pratap Singh born in 1919.

The Ruling family claims descent from Gopal Singh who was one of the most active and daring of the military adventurers who opposed the occupation of Bundelkhand by the British Government. He was given a Jagir and sword of honour by Maharaja Keshore Singh of Panna State. The hereditary title of the chief is "Diwan Bahadur."

The Ruler exercises limited criminal powers. He and the Heir-apparent are exempted from the arms act throughout the whole of India. His mother was honoured with the title of Rani in 1901. The Chief Saheb attended the Coronation Durbar at Delhi in 1911.

On the outbreak of the war the Chief Saheb offered his personal services and placed all the resources of the state at the disposal of His Majesty. He has contributed Rs. 1,000 towards the various war funds and has promised a yearly contribution of Rs. 300 for the duration of the war.

The Heir-apparent Kunwar Raghuraj Singh has joined the Army after completing his education at Daly College, Indore. He is a second Lieutenant in the 11/9th Jat Regiment, Kamptee. The second son Kunwar Pratap Singh has passed his Diploma examination from Mayo College, Ajmer.



Garrauli is in Bundelkhand Agency with its Capital at Garrauli situated on the right bank of the river Dhasan five miles from Nowgong. There are 18 villages in the State. There is a recognised aerodrome in Garrauli proper.

Population: 5,837. *Revenue:* Rs. 36,000.

Address: Garrauli, C.I.

JATH: LT. RAJA SHRIMANT VIJAYASINHRAO RAMRAO *alias* BABASAHEB DAFLE, R.I.N., Raja of Jath State.

Born on 21st July 1909.

Ascended the Gadi on 12th January 1929.

Family History: Jath is one of the ancient Satara States. The Ruling family is a high class Maratha and claims descent from Satvajirao Chavan, Patil of Daflapur to whom a Deshmukhi Watan was granted by Ali Adilshah, King of Bijapur in 1670. The Jahagirs of Jath and Karajagi Paraganas were conferred upon him by King Adilshaha of Bijapur in the year 1680.

The Raja Saheb was educated for some time in the Deccan College when he was suddenly called back owing to the serious illness of his father the late lamented Shrimant Ramrao Amritrao *alias* Abasaheb Dafle. The Ruler exercises full Civil and Criminal powers over his State. During the short period of his rule he has evinced keen interest in the welfare of his subjects by introducing various reforms such as an independent High Court, a Local Board, etc.

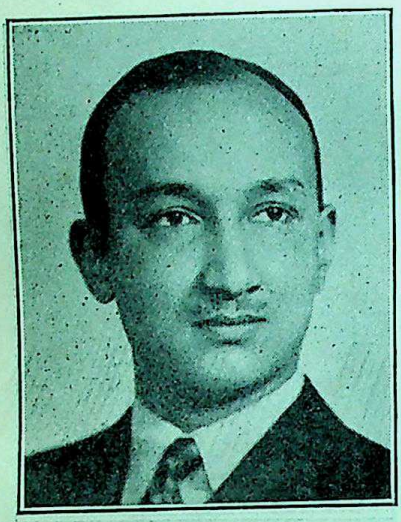
Married: Princess Lilavati Raje, the eldest daughter of the late Rajesaheb of Akalkot in 1929.

In 1932, he visited England to attend the Third Round Table Conference on the invitation of the Secretary of State for India. He is an all round sportsman and a good cricketer. He takes keen interest in Scouting.

Recently he was promoted Lieutenant in the Royal Indian Navy and has already undergone the requisite course of Naval Training.

Capital: JATH. *Population:* 91,099.

It is midway between Miraj and Bijapur and is in direct political relation with the Government of India through the Deccan States Agency.



Area: 981 square miles.

Revenue: Rs. 4,25,000.

Dewan: V. B. Mardhekar, Esqr., M.A.

KAWARDHA: THAKUR DHARMRAJ SINGH, the present THAKUR SAHEB of Kawardha State.

Born: 1910. Educated at the Rajkumar College where he took the Chiefs' Diploma in 1931. Installed on the *Gadi* 1932.

The Thakur Saheb has travelled extensively in India, England and Europe. He is a keen tennis player and rider.

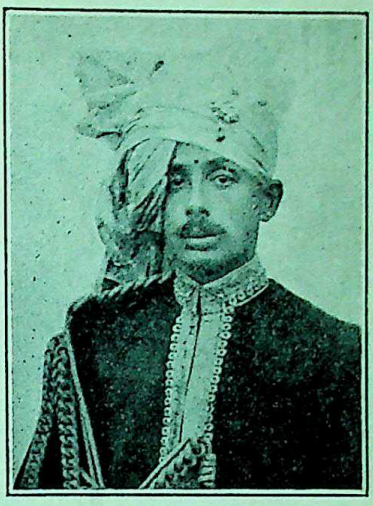
There is a well-equipped hospital and a first-class guest house in Kawardha. The Thakur Saheb has also built for himself a palace worthy of the traditions of Kawardha. Some of his ancestors are well-known in the State for building temples and tanks and the present ruler has spent large sums in preserving and maintaining old temples. The State has some of the best shooting grounds in India and really good Sal and Teak forests.

The administration of the State is conducted on modern lines and the Thakur Saheb takes personal interest in all the affairs of the State. He is very fondly liked by his subjects. The Baigas, an old aboriginal tribe, lead a happy and contented life and the Thakur Saheb is anxious to preserve their identity.

The Thakur Saheb has contributed generously to the war funds and offered his personal services to the British Government. He and his people have contributed Rs.9,000 to H. E. the Viceroy's Fund. The Rani Saheb has subscribed to Rs.10,000 worth of Defence Bonds. A sum of Rs.101 per month is contributed on behalf of the Yuvaraj Saheb, who is only 8 years old, to the Viceroy's Fund. Rs.2,000 was donated to the Silver Jubilee Fund and a remission of Rs.25,000 was made as a measure of relief to the subjects on the occasion of the Silver Jubilee of His late Majesty.

The capital of the State is Kawardha which has a representative Municipal Committee. The Municipality has recently constructed for itself a new building to house its offices. The building was opened by Major Burnett, Political Agent, Chhattisgarh States.

The Thakur Sahib has two sons and a daughter. The elder son and heir-apparent is studying at the Rajkumar College. The Thakur Sahib's younger brother is studying for the Bar in Dublin.



Area of the State: 805 sq. miles. *Population:* 77,253.

KHAIRAGARH: RAJA BIRENDRA BAHADUR SINGH, Ruler of Khairagarh State.

Born: 9th November 1914.

Succeeded to Gadi: On 22nd October 1918. Invested with powers on 10-12-1935.

Educated: At Rajkumar College, Raipur, Ewing Christian College, Allahabad and Mayo College, Ajmer.

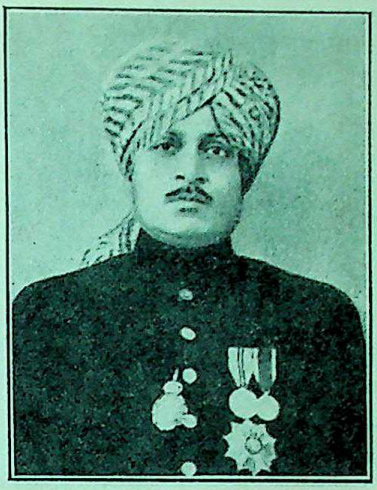
Married: In May 1934 to the daughter of Raja Pratap Bahadur Singh Ju Deo, C.I.E., of Pertabgarh Estate (Oudh).

Heir-Apparent: Shri Ravindra Bahadur Singh. *b.* 29th December 1940.

Recreations: Shooting, Tennis, Cricket.

Population: 173,829. *Area:* 931 sq. miles. *Revenue:* Rs. 5,80,000.

General: Since his accession in 1935, the Raja Sahib has introduced many beneficial reforms. Making primary education free, extending medical relief to the remote corners of the State, establishment of Debt Conciliation Board, constitution of Village Panchayats, formation of Advisory Board consisting of 9 non-officials, execution of works of public utility costing Rs. 10,000 annually, grant of many concessions in forest and agriculture Departments, holding of agricultural exhibitions annually, equipping the newly constructed Hospital with an Iron Lung, an Ultra-violet and Infra-red and a Diathermy Apparatus, appointment of an Agricultural Officer to offer expert advice to the agriculturists and formation of Panchayat grain Kothis are some of the many improvements effected. The Raja Sahib is presenting a Swimming Bath to the Rajkumar College, Raipur, at a cost of Rs. 20,000. The Ruler is a member of the Chamber of Princes in his own right.



Immediately on the outbreak of the War, the Raja Sahib offered the entire resources of the State in men and money. Defence Bonds for Rs. 1,02,600 have been purchased and Rs. 25,000 have been donated to the War Purposes Fund. The Raja Sahib donates Rs. 500 per month from his privy purse for the duration of the War. Public subscriptions amounting to about Rs. 9,475 have been realized and sent. Donations to Red Cross and St. Dunstan's Sections of War Purposes Fund were also made. State Officers and others have volunteered one day's pay every month as long as the War lasts. The Raja Sahib sent Rs. 621 to the Lord Mayor's Fund, London, and his brother Rajkumar Bikram Bahadur Singh also donated Rs. 501.

MIRAJ: (JR.) MEHERBAN SHRIMANT SIR MADHAVRAO HARIHARRAO *alias* BABASAHEB PATWARDHAN, K.C.I.E. (1936), Raja of Miraj Junior State, is the 2nd son of the late Shrimant Balasaheb Patwardhan, Chief of Kurundwad Senior. He was selected by the Bombay Government for the chiefship of the Miraj Junior State, and was adopted in December 1899, by Lady Parwatibaisaheb, the mother of the late Chief, Laxmanrao Annasaheb, who died prematurely on the 7th of February 1899.

Born: In 1889. *Educated:* At the Rajkumar College, Rajkot. Was invested with full powers on the 17th of March 1909.

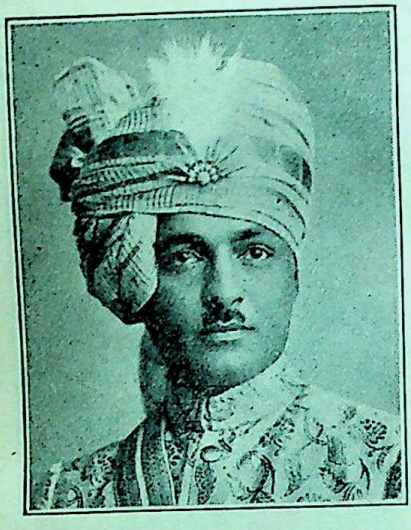
Marriage: Married Shrimant Saubhagyavati Thakutaisaheb, daughter of the late Meherban Krishnarao Madhavrao Peshwe of Bareilly. Has three sons and three daughters.

Heir-apparent: Eldest son Kumar Shrimant Chintamanrao *alias* Balasaheb, born in 1909 on the 3rd December. Married. Second son Kumar Hariharrao *alias* Dadasaheb, born in 1911 on 23rd May. Third son Kumar Krishnarao *alias* Appasaheb, born in 1916 on 9th May.

Recreation: Daily Muscular Exercise, Tennis and Shikar.

Area: 196½ square miles. *Population:* 40,686. *Revenue:* Rs. 3,68,515. *Capital Town:* *Budhgaon* (5 miles from Sangli).

Rao Bahadur V. V. Yargop, B.A., LL.B., Diwan of the State, is the Raja Saheb's sole Minister.



The Raja Saheb received the Silver Coronation Delhi Darbar Medal in 1911. The hereditary title of "Raja" was conferred upon him on 9th June 1938. He is entitled to be received by the Viceroy.

The State was placed in direct political relations with the Government of India from 1st April 1933. The State can try its own subjects as well as the subjects of other States for capital offences and can make its own legislature.

On the declaration of the war Shrimant Raja Saheb placed all the resources of the State at the disposal of H. E. the Viceroy. The Darbar has contributed Rs. 4,500 to H. E. the Viceroy's War Purposes Fund, Rs. 1,000 to the Red Cross Fund and has purchased interest-free bonds worth Rs. 2,000. War Committees have been formed in every Taluka. The Darbar is also enlisting recruits for the Indian Forces. Every effort is being made to persuade people in the State to invest their money in Defence Bonds and Saving Certificates, etc.

KUMAR, SHREE SHAIKH MAHOMED NASIRUDDIN, the Heir-apparent of Mangrol.

Born: on the 9th of August 1916.

Having completed his early education at home under special tutors, he joined the Rajkumar College, Rajkot in 1930 and studied there till 1934. He then went to Dehra Dun and joined Col. Brown's Cambridge School to prepare himself for the senior Cambridge examination. He remained at Dehra Dun from 1934 to 1936. He proceeded to England in 1937. In England he was under the guardianship of the well-known cricketer and litterateur Mr. R. J. O. Meyer, who is also a Cambridge man, for about two years and there passed his School Certificate with credit. He was then accepted by the Cambridge University in 1938, and he got first class in his first year of the tripos. He came to India in August 1939 for the vacation and was to proceed again to England for the completion of his educational term at Cambridge, but unfortunately the war broke out and he could not go back and finish his remaining terms.

In April 1940 he married the younger sister of the Nawabsaheb of Manavadar.

He is taking a keen interest in the State affairs and assists his father to a great extent in the State administration. The Sheikh Saheb has delegated some of his powers to him.

While in England he played Cricket for two years for the County of Northamptonshire. His highest score was 42 not out against Sussex. He also played in the last Pentangular Cricket Tournament in Bombay and on his first appearance, gave a good account of himself by scoring 64 against the Parsis and 44 against the Rest. His principal recreations are Cricket, Hockey, Tennis, Shooting and Hawking.

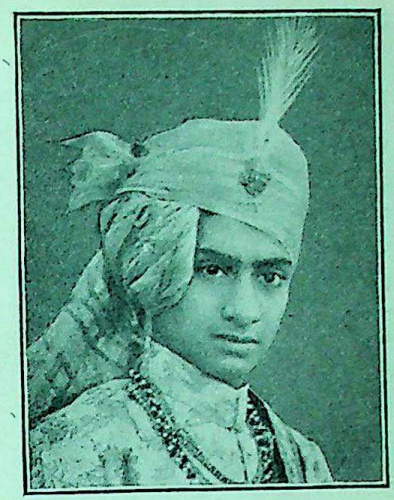
PALASNI: RAJPARMAR SHREE CHANDRASINHJI JITSINHJI, the present Ruler of Palasni State.

Born: 7th February 1889.

Succeeded on 16th November 1929.

The State exercises full Revenue Jurisdiction and has also the following Jurisdictional Powers:—

Hereditary Powers: Civil—To hear suits upto Rs. 500. Criminal—3 months imprisonment, simple, rigorous or both, and a fine of Rs. 200.



Personal Powers: Civil—To hear suits upto Rs. 1,000. Criminal—Six months imprisonment, simple, rigorous or both and a fine of Rs. 250.

Excise and Revenue: Full unlimited powers. The State maintains its own Jail and the offenders at the State limits tried even by the Sessions Court, are handed over to the State, to be kept in their jail. The jail is managed as per laws in British India.

Recent Changes: The State has given to its subjects tenancy and proprietary rights. This was an unique change, as all tenants were formerly tenants-at-will. The Agency authorities commended this action of the State. The State has published rules for payments to labourers, etc., employed on State work. The old inequitable system of 'Veth' has been totally abolished. The State has been placed under the direct supervision of the Political Agent, Rewa Kantha. The old levies of about 7 types, recoverable from tenants have been abolished. The Naswadi—Palasni road is being developed. The boring of a deep well in the Palace garden has immensely increased the water supply. This excess is now being used for irrigation purposes. It is hoped that this will yield very good results. The Palace has now been electrified. Lighting the thoroughfares is also being worked out. The State has a dispensary building. People of the State as well as neighbours take advantage thereof. Special attention is being paid to the development of cottage industries and to persuade the farmers to utilize their spare time in some good side occupation. Plantation of mangoes and Sugarcane is being encouraged. The soil is fertile. Wells and ponds are being constructed at suitable points to help the farmers.

HEIR-APPARENT: YUVRAJ SHREE SARDARSINHJI was born on 6th October 1919. He is studying for the Senior Cambridge Course. He is connected by marriage ties to a very well-known Jadeja Rajput family of Kathiawar.

A second son was born on 22nd April 1939 and is named "Veerbhadrasinhji."

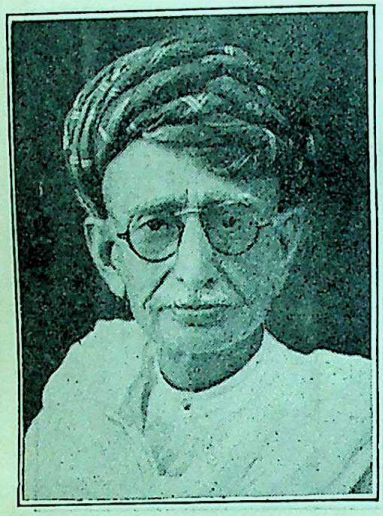
War Efforts: The State takes very keen interest and fully sympathises with the War efforts, and has always given a helping hand to the British Government. The State's loyalty is exemplary.

Chief Official: The State affairs are looked after by the Chief ably assisted by his Karbhari Mr. Deviprasad Someshwar Trivedi.

Palasni is the Capital of the State.

Area: 12 square miles.

Population: 3,119 souls according to the census of 1941 A.D.



Revenue: Rs. 35,000 (*i.e.* thirty-five thousand rupees.)

The State is situated in Rewa Kantha, under the Gujarat States Agency. The Rulers belong to the Rajparmar clan of Rajputs. The ancestors of the Rulers of Palasni, migrated from Malwa and in the year 1096 Jagdev Parmar founded the Capital at Patan. In the year 1120, the Nephew of Jagdev Parmar by name Randhirji defeated the Bhils at Tandulja and secured for himself a Thakorate of twelve villages near Rajbodeli. Then the ancestor of the Parmar family went to Palasni. The Palasni Gadi was thus founded in the year 1489, by Askaranji, the son of Karanji. This is the present State of Palasni, and the present Ruler is the direct descendant of the famous Jagdev Parmar's family. The State was quite independent and enjoyed full plenary jurisdiction, before it came into British connection in the year 1825 A.D. Succession is governed by the rule of Primogeniture.

The Judiciary is conducted on exactly the same lines of the British Government. British-Indian Laws are followed. The State has powers to frame its own laws. The decision of the Chief is non-appealable and final. The Thakore Saheb personally looks after the revenue and financial portfolios. The Karbhari sees to the Judicial, Political, Alienation and other subjects. The division of work is being harmoniously carried out and the people have all confidence in the prompt and speedy remedy available at all times.

PATDI : DARBAR SHRI NARANSINHJI SAHEB, Ruler of Patdi State.

Born : 21st November 1873. Succeeded to the *Gadi* on the 1st February, 1940 on the death of the late minor ruler D. S. Raghuvirsinhji. On the auspicious occasion of his accession remission of 25 per cent. of the outstanding Taccavi and the total remission of the State share in the Agtar produce was made, as also some amounts to various charitable institutions and War Funds were given.

The ruler has three sons,
(1) Yuvraj Shri Pratapsinhji.
(2) K. S. Ranjitsinhji.
(3) K. S. Bhanusinhji.

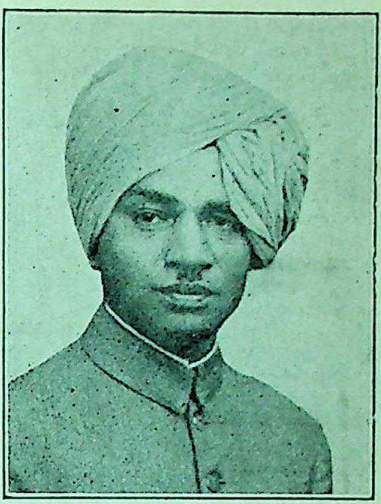
Succession is governed by the rule of primogeniture.

The Darbar Shri has had considerable administrative experience under his experienced predecessor D. S. Surajmalji. He takes interest in agriculture and rural uplift and devotes considerable attention to his subjects living in the villages. In this work the Yuvraj Shri who has good experience of agriculture and horticulture is of great service to him. Patdi, the capital of the State has one Anglo-Vernacular School, two vernacular schools (Gujarati and Urdu) and two Girls' Schools. In the villages 7 vernacular schools are maintained by the Local Board and eight by the State.

There are no taxes nor Veth (forced labour) in the State. The State supplies free Electric street lighting, medicine and bore pipe water. The State encourages education by scholarships, grant of school-fees and books to poor students. In these days of scarcity the State has made liberal advances of Taccavi and free distribution of grains, clothes, etc., and also opened relief works.

Most of the Kharaghoda Salt Works which were formerly known as the Patdi Mitha Agar (Salt-Works) belong to this State but they are at present held by the Government of India on lease.

The State enjoys jurisdiction as under :—



Criminal : 3 years' rigorous imprisonment and fine upto Rs. 5,000. Civil : Upto Rs. 10,000. *Area :* 165 square miles. *Population :* 16,573. *Revenue :* Rs. 3,03,000 (Average).

PRINCIPAL OFFICERS.

YUVRAJ SHRI PRATAPSINHJI, Personal Assistant to the Ruler.
K. S. BHANUSINHJI, Revenue Officer and Chief Kamdar.
K. S. KISHANSINHJI, General Supervisor and Treasury Officer.
Mr. GAURISHANKER M. BHATT, B.A., LL.B., Advocate, Nyayadhish and Huzur Secretary.

PHALTAN (DECCAN STATES AGENCY): MAJOR RAJA SHRIMANT MALOJIRAO MUDHOJIRAO *alias* NANASAHEB NAIK NIMBALKAR, Maratha (Kshatriya), Raja of Phaltan.

Date of Succession: 17th October 1916.

Invested with full powers: 15th November 1917.

Hereditary title of "Raja" conferred on the 1st January 1936.

Born: 11th September 1896.

Education: Obtained Diploma of the Rajkumar College, Rajkot.

Married: 18th December 1913, Shri-Abaisaheb, Shrimant S. Laxmidevi, Rani Sahiba, born 17th November 1901; daughter of Shrimant Raje Shambhusinhrao Amarsinhrao Jadhavrao, *Saranjamdar* of Malegaon Bk., District Poona.

Heir: Shrimant Pratapsinh Bapusaheb. *Born:* 13th July 1923. *Area:* 397 sq. miles. *Population:* 71,745 (1941). *Net Revenue:* Rs. 15,43,611 (1940-41).

The State of Phaltan is a full-powered State with powers of life and death. It dates its origin from 1284 A. D. It is ruled by the same Ruling Family—the House of Naik Nimbalkars—from its foundation to the present day. It was related by several matrimonial alliances to the House of Bhonsales to which Shivaji, the Founder of the Maratha Empire, belonged.

Shrimant Raja Saheb is an enlightened Ruler and takes keen interest in the administration. The State is governed by a Constitution granted by the Raja Saheb in 1929. The State Legislative Council consists of 15 members of whom 10 are elected. The Executive Council consists of three Members of whom one is appointed from among the elected members of the Legislative Council.

Industries: The principal industry is Sugar. During 1939-40 season the Phaltan Sugar Works, Ltd., manufactured 13,738·4 tons of sugar.

War Effort: On the eve of the outbreak of the present war Shrimant Raja Saheb offered to place at the disposal of the Crown all his humble resources. Since the beginning of the war the Durbar has been contributing Rs.1,000 per month to H. E. the Viceroy's War Purposes Fund. The Durbar has also subscribed Rs. 3 lakhs to the 3 per cent. Defence Bonds, and Rs. one lakh to the three year interest-free Defence Bonds.

EXECUTIVE COUNCIL.

RAO SAHEB K. V. GODBOLE, B.A., LL.B., Dewan and Home Member, *President.* MR. B. L. LIKHITE, M.A., LL.B., Finance Member, *Vice-President.* MR. S. R. BHONSALE, B.A., LL.B., Law Member.

SANDUR: RAJA SHRIMANT YESHWANTRAO HINDURAO GHORPADE, MAMLAKATMADAR SENAPATHI, Ruler of Sandur.

Born: 1908. Ascended the *Gadi* in 1928. Assumed the reins of Government in 1930.

Married: On 22nd December 1929 the eldest daughter of Umadat-Ul-Mulk, Raj Rajendra Lieut.-Col. Maloji Narsingh Rao Shitole Deshmukh, Rustumjung Bahadur of Gwalior. *Heir-Apparent:* Shrimant Yuvaraj Murar Rao Raje Ghorpade, born 7th December 1931. *Second Son:* Shrimant Rajkumar Ranjit Sinh Raje Ghorpade, born 16th February 1933. *Daughter* Shrimant Rajkumari Nirmala Devi Raje Ghorpade, born 8th February 1934. *Third Son:* Shrimant Rajkumar Vijayasinh Raje Ghorpade, born 18th October 1937. *Fourth Son:* Shrimant Rajkumar Shivrao Raje Ghorpade, born on 13th September 1940.

Sandur is an Indian State in South India ruled by the Mahratta Dynasty of the Gootyker Ghorpades. The Ruling House of Sandur belongs to the family of the Ghorpades, which is identical with that of the Bhonsles of Satara; and according to the family tradition their ancestors acquired the surname of Ghorpade during the Bhamini dynasty for having scaled an impregnable fort in the Konkan with the aid of an iguana known in Marathi as "Ghorpad." The honorific title of Ghorpade was acquired by Bheemasinha, the grandson of Rana Ugrasen, who was the common ancestor of Chatrapathi Shivaji Maharaj, the founder of the Maratha Empire, and of the Mudhol and Sandur branches, both of which were descended from Bheemsinha. Subhakrishna the founder of the branch of Chatrapathi Shivaji Maharaj, and Karnasinh, the father of Bheemsinha Ghorpade were both descended from Ugrasen. Bhonsle Ghorpade Hindurao's family of which the Ruler of Sandur is a descendant is the elder branch of the family. This family greatly distinguished itself under Shivaji Maharaj, his son and his grandson, and for the useful services rendered to the House of Satara, the Jaghir of Gajendragad with the title of "Hindurao," was conferred on them. Siddoji, the son of Bhyrji Hindurao, was the founder of Sandur, having conquered the same in 1728 from a Poligar of the Bedar tribe. This family "holds the estate of Gajendragad and Sandur in its possession long anterior to Maratha Sovereignty." Raja Siddojirao Ghorpade conquered Sandur and Kudatini in the early 18th century. He was also receiving tribute from the Poligar of Harapanahalli. Sandur State formed a part of the possessions of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Siddojirao's son Murar Rao renowned in history as the famous "Chief of Gooty." During the time of Raja Murar Rao Ghorpade, Sandur reached the zenith of its territorial expansion and was a Power to be reckoned with among the various belligerents for political supremacy in South India. Speaking of the extent of the territory and sway held by Raja Murar Rao Ghorpade, Rao Saheb G. S. Sardesai, the famous Historian of the Mahrattas, has observed thus: "Stray notices of the Ghorpades in Karnatak are discovered in old papers here and there, and refer to such places as Sondha, Bednur, Savanur, Shira, Shrirangapatnam, Chittaldrug, Gutti, Sondur, Guntakal, Kadappa, Trichinopoly and as far as Chennapatna (Madras) and Pondicherry on the east coast. The career of Murar Rao appears to claim all this region as his legitimate heritage, acquired by the heroism and often by the blood of the several members of the large Ghorpade Family. It was the great Shivaji who first traversed this large territory, and after him, it was the valour of the Ghorpades that prevented in it the extinction of the Maratha Power." Sir Philips Gibbs writing as recently as June 1938 has described the signal assistance rendered by Murar Rao to Lord Clive at the siege of Arcot thus: "It happened that, on the flanks of Raja Saheb's Army, a tribe of wild Mahratta Horsemen, under a Chief named Murar Rao, was watching the progress of the siege, with increasing admiration. Clive sent out messengers to him, and his joy may be imagined when the Indian chieftain expressed his willingness to unsheath his sword in aid of so gallant a captain. All that night Clive and his men awaited a renewal of the assault, but when morning came, the enemy were no more to be seen, and the glittering array of the Mahratta tribesmen moved through the mist of dawn to do honour to the man who was to be famous henceforth as Sabat Jung." Orme, a contemporary British Historian described the Sandur troops to be "the best soldiers of native Indians at this time in Indostan." In the Mysore Treaty V of 1782 the British have observed thus: "The Company will reserve to themselves the liberty of reinstating the Family of Murar Rao in the Country of Gooty," a promise which yet remains to be fulfilled. The Ruler of Sandur for the first time came into political relations with the British in 1817, and Munro described the Ruler of Sandur to be "as much a Sovereign in his own valley as any Prince in India." The State has the status of a Treaty State by virtue of the Treaty of 1847 with the East India Company regarding Ramgad cantonment jurisdiction. The Ruler of Sandur is one of the 146 important Ruling Chiefs who received the Sanads of Adoption in 1862. The State possesses powers of life and death and is unfettered in the exercise of its sovereignty. The State pays no tribute to the Crown and is free from all pecuniary demands.

The State has rich mineral wealth particularly manganese, iron and gold.

The Ruler is the fountain head of all authority, Judicial, Executive and Legislative. The Government of the State is conducted in the name of the Huzur through an Executive Council. A State Council has been constituted in 1931 with a predominant non-official majority.

It has the right to initiate legislation, to move Resolutions and to ask questions. An independent Chief Court has been constituted under the Sandur Chief Court Act, II of 1932 and arrangements have been made with the Madras Government to lend the services of the District and Sessions Judge, Bellary, for appointment as the Nyayadhish of the Sandur Chief Court. The Sandur Chief Court can state cases to the Federal Court. A further step in constitutional advance has been taken by the Ruler in reviving the ancient body known as the Darbar which is as old as the State itself, and which is now charged with the governance of the State as a second Chamber. By a Proclamation issued in 1933, the Ruler has thrown open all temples, religious institutions, wells, schools and all Government institutions to the Harijans. Village Panchayats have been constituted in every village throughout the State, on which devolves a large measure of local administration. With a view to enable the representatives of the people to maintain close touch with, and influence the every day administration of the State, a Standing Committee has been constituted from among the members of the Darbar and the Prajamandal—State Legislatures—with a view to help the administration in an advisory capacity. The Police and State Forces have been re-organised in 1939.

War Efforts.—The Ruler has invested a sum of Rs. 50,000 in interest free War Bonds and has placed at the disposal of His Majesty, for the duration of the war large areas in the State containing manganese and iron ore deposits free of all rents and royalties for being utilised in the manufacture of munitions. He has also issued an appeal to the Marathas to join the army in large numbers. He has also placed certain buildings at Ramgad (Ramandrug) at the disposal of His Majesty for the purpose of Prisoners' camp or other war purposes. A Trinket Fund started by Shrimant Sow : Matoshri Ranisaheb Maharaj has received a very generous response from the Mahila Samaj and the ladies in the State. A State War Board with three sub-committees has been constituted to aid the successful prosecution of the war.

The Ruler presided over the Karnatak Sammelan in 1938. He presided over the Inter-Group Sports & Tournaments of the University of Bombay in December 1940. He unveiled the statue of Tanaji Malusre at Sinhgad in February 1941. The Ruler presided over the All-India Maratha Educational Conference in April 1941.

SURGUJA: MAHARAJA RAMANUJ SARAN SINGH DEO, C.B.E., Maharaja of Surguja, E.S.A.

Born: 1895, ascended the *Gadi* on the 31st December 1917. Has 2 sons from the first Maharani Sahiba. *Heir-Apparent:* Maharaja Kumar Ambikeshwar Saran Singh Deo, born in 1910 and Maharaj Kumar Chandikeshwar Saran Sing Deo, B.A., born in 1914. After the death of the first Maharani Sahiba, married again in 1922, a niece of the present Maharaja of Nepal from whom he had a son who has gone in adoption as the Ruling Chief of Udaipur State. Has Visited Europe and East Africa. A keen sportsman having bagged a record number of tigers.

Area: 6,055 sq. miles. *Population:* 502,058. Revenue including the income of the subordinate holders, about Rs. 12 lakhs.

Surguja is the second largest State in the Chhattisgarh States Agency, very rich in mineral wealth, containing extensive deposits of coal, mica, iron ore, limestone, bauxite, lead, marble and ochres. Within its limits are situated the Mainpat and Samri tablelands which are about 4,000 ft. above sea-level. The Ramgarh caves, containing inscriptions in Pali characters belonging to the 2nd century B.C., are at a distance of 32 miles from Ambikapur, the capital of the State.

The State has an Advisory Council consisting of 50 elected and 35 nominated members. The Maharaja is assisted in his administrative work by an Executive Council which includes besides the important Heads of Departments two non-officials. The State has a High Court of its own and the subordinate judiciary is staffed by law graduates. The State has several well-equipped Hospitals, Veterinary and Touring Dispensaries, a High School, 2 Middle Schools and 62 Primary Schools. The subjects have been entrusted with local Self-Government in the shape of elected Municipal Committees and Praja Sabhas. The raiyats are contented and law-abiding. The Maharaja possesses progressive views and has contributed liberally to His Excellency's War Fund. Rai Sahib H. L. Varma, B.A., M.B.E., is the Minister of the State. *Address:* Ambikapur.

TALCHER: Raja K. C. B. Harichandan, the present Ruler of Talcher State.

Born: 9th June 1880.
Succeeded on 18th Dec. 1891. Assumed ruling powers, 9th June 1901.

The State of Talcher was established at the end of the 12th Century by Raja Naranhari Singh Deo, a scion of the Raja Thakur family of Jaipur. The Rajas of Talcher never submitted to the sovereignty of Puri or the Maharathas and they all along maintained their independence. The British Government recognised their independence and entered into treaty relations with the great-grandfather of the present Ruler in 1803. Raja Dayanidhi Birabar Harichandan helped the British Government with his troops in quelling the Angul rebellion. The present ruler placed himself and the resources of the State at the disposal of the British Government during the Great War, he also helped in quelling the Daspalla and Keonjhar rebellions.

The administration is conducted under the personal supervision of the Raja Saheb. He is easily accessible to all his subjects and gives a patient hearing to those who seek redress from him. He takes keen interest in improving the administration and conducting it on modern lines. Besides many administrative and constitutional reforms the Raja Saheb also introduced three Byabastha Parisadas in the State during the year 1939 with 50% elected members.

The State maintains an independent judiciary. There is a Municipality at the headquarters of the State which is controlled by a Committee of Officials and non-officials. Roads are lighted by electricity. Education is compulsory in the State. There are 75 primary Schools, one H.E. School and one Sanskrit Vidyalya. There are six dispensaries including one travelling dispensary and one Ayurvedic Dispensary.

The State is noted for its coal mines which cover 224 square miles of which 8 square miles are now being worked by Railways and a Bengal English Firm. There is a match factory in the State.

Area: 399 square miles. Population: 86,368 souls according to 1941 census.

Annual Income: Rs. 8,97,668 (gross).

Heir-apparent: Yuvaraj Sree Hruday Chandra Deb, born on 27th February 1902. Educated in Ravenshaw College, Cuttack, at present in charge of the Judiciary in the State.

Pattayet: Promode Chandra Deb, second son of the Ruler and Revenue Minister, State Magistrate and Chief Executive Officer.

Secretary: Babu J. Mishra.

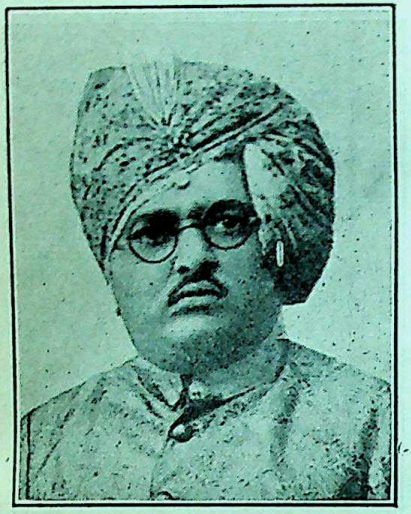
THANADEVLI: DARBAR SHREE AMRAWALA, the present ruler, belongs to the Jaitani branch of Wala Kathis.

Born: 28th November 1895. *Educated:* at the Rajkumar College, Rajkot. *Succeeded* to the *Gadi* on the 12th May 1922.

Thanadevli is the premier State of Wala Kathis. The Darbarsaheb exercises full civil and criminal jurisdiction over his subjects. The administration of the State is conducted under the personal supervision of the Darbar Saheb. He is easily accessible to all his subjects and gives a patient hearing to those who seek redress from him. Thus he has won the goodwill, respect and gratitude of his subjects. His charities and hospitalities deserve admiration. The State has a Silver Jubilee Memorial Hospital with two free wards for indoor patients, Post and Telegraph Office, Three well constituted Judicial Courts and 15 Schools. Scholarships are also granted to deserving students. Works of Public utility have been constructed. There are the Laxman Nivas Palace for Darbar Saheb's residence, Ram Vilas for noteworthy guests, Power House and Amar Vijaya Club. Municipal Board, Gramya Panchayat, Sarpunch committee and free Library have been introduced. Liberal concessions, and remissions and occupancy rights are granted to agriculturists and sale rights over immovables to other subjects. The State has its own Gir Forest, abode of Gir Lions and Panthers.

War Efforts: Monthly donation of Rs. 300 since the outbreak of the war and Rs. 1,000 to W. I. S. War Plane fund by the State and Rs. 2,100 have been contributed by State subjects and servants. Civic guards under the chairmanship of K. S. Ramwala have been organised.

Heir-Apparent: K. S. Ramwala, born on 8th March 1920, at present receiving practical training in the State Administration. *Second Son:* K. S. Harsurwala, born on 6th October 1931.



Area of the State: 117·32 square miles. *Population:* 16,005 as per 1931 census. *Annual Revenue:* Rs. 3,00,000.

CHIEF OFFICIALS.

Acting Chief Karbhari and Sar Nyayadhish: MR. MANSUKHLAL D. MEHTA, B.A., LL.B. *Deputy Karbhari:* MR. VISHNULAL H. BUCH. *Huzur Secretary and Nyayadhish:* MR. TRIMBAKLAL P. JOSHI, B.A., LL.B. *Medical Officer:* DR. V. K. BAM, M.B.B.S. *Police Superintendent:* MR. KANTHADJI RAJMALJI.

VADIA: DARBAR SHRI SURAGWALA SAHEB, the present Chief of Vadia State, Western Kathiawar Agency, is aged 36. He belongs to the Virani Branch of Kathis. The Kathis once dominated the whole province of Kathiawar and the province since then, has been named Kathiawar.

Area : 92 square miles.

Revenue : Rs. 3 lakhs.

The Darbar Saheb married A. S. Kunvarbaisaheb in 1921 and has two sons and two daughters. The rule of primogeniture governs succession. The heir-apparent Kumar Shri Krashnakumar Saheb is aged 10 and is getting educational training at the hands of an experienced and competent retired Educational Officer of W. I. S. Agency, Rao Saheb M. S. Dwivedi.

The Darbar Saheb has earned the reputation of a progressive and benevolent ruler and takes personal and keen interest in the administration of the State. Reforms of far-reaching importance—medical, social, economic, educational and political—have been inaugurated by him.

The subjects of the State enjoy the benefits of free education, free medical relief, Child Marriage Restriction Act, the Farmers' Relief Act, the State Bank, prohibition and an electric power house.

The growth of industrial concerns are adding to the prosperity of trade and commerce. Match-factory, Oil mill and ginning factories are among other industrial concerns.

The Darbar Saheb has contributed Rs. 5,000 towards His Excellency the Viceroy's War Purposes Fund and Rs. 501 towards the Western India States War Plane Fund.

Contributions have also been made by the public of Vadia towards the Western India States War Plane Fund and the Red Cross Society, Western India States Rajkot Branch, Rajkot.

AJODHYA: Raja Jagdambika Pratap Narain Singh of Ajodhya. Hereditary Raja recognised by the British Government.

Born : October 1904. Adopted son of Mahamahopadhya Maharaja Sir Pratap Narain Singh Sahib, K.C.I.E. Succeeded to the *Gadi* on 19th June 1938.

Ajodhya Raj comprises 756 villages and is situated in the districts of Fyzabad, Gonda, Sultanpur and Barabanki. The Raj pays as Government revenue and cess Rs. 4,60,864.

Ajodhya being the ancient capital of the kingdom of Shri Ram Chandra holds a unique place in the hearts of millions of Hindus and is one of the principal centres of pilgrimage in Northern India. Religious sanctity is also attached to the person holding the *Gadi* of Ajodhya Raj. This Raj was greatly augmented by the grant of Talukas in Gonda by the British Government for meritorious and conspicuously loyal services rendered at the time of the sepoy mutiny of 1857 by Rajai Rajgan Maharaja Sir Man Singh Bahadur Qaimjung, K.C.S.I., the great-grandfather of the present Raja. Amongst the Taluqdars of Oudh the Raja of Ajodhya has the third seat in Darbars, the first two being held by Their Highnesses the Maharaja of Kapurthala and the Maharaja of Balrampur.

The House of Ajodhya has been prominent in its traditional loyalty to British Government as well as for public charity and patronage to the fine arts and poetry. Raja Jagdambika Pratap Narain Singh after completion of his education in Colvin Taluqdars College at Lucknow in 1927 underwent a thorough training in the management of the Raj. He was given the King's commission in the Indian Army which he resigned in 1931 on account of ill health. Raja Sahib served as a member of U. P. Legislative Council from 1931 to 1936. He was a special Magistrate for about 8 years and Chairman, District Board, Fyzabad, 1936-39. He has contributed liberally to the funds raised for the present war and has enlisted many recruits to the Indian Army. The Raja Sahib is a member of the Provincial and District War Boards; Advisory Committee of Indian Territorial Force; Chairman of Dist. Rural Development Association; and member of the Central Assembly. The Raja Sahib holds strictly orthodox religious views and is personally deeply religious. In recognition of his learning and patronage thereof the title of Vidya Vachaspati was conferred on him by the All-India Pandit Parishad in 1933. Benign qualities of his head and heart have made him a popular figure in public life. Raja Sahib is a keen sportsman and a motorist. At present he has only one daughter.

Address : Ajodhya.

AMOD: SIRDAR NAWAB SIR NAHARSINGJI ISHWARSINGJI, M.L.A., 1st Class Sirdar of Gujarat and Thakore Saheb of Amod.

Born: 2nd April 1877. Ascended the *Gadi* on the 9th May 1901.

Married: the daughters of the Thakore Sahebs of Nepad and Virpur and the sister of the Thakore Saheb of Kerwada.

Annual Revenue: Rs. 1,53,541. *Area of holdings:* 18,985 acres. He was a Member of the Bombay Legislative Council for 9 years, and the Legislative Assembly of Delhi for four years from 1931. Visited Italy, Switzerland, France, England and Scotland in 1933 where he studied the problems of County Councils and Agriculture, and was presented to His Majesty the late King. He was Honorary 1st Class Magistrate for many years and President of the Broach District Local Board for some considerable time.

He is recognized as a leader of the Muslim Community and was elected President of the All-India Moslem Rajputs Conference held at Ambala in 1930, and is at present standing President of that body. Also elected President of the Anjuman Himayate Islam 41st Anniversary, Lahore, in 1927. He is also the President of the Gujarat Landholders' Association established in 1938 and standing Vice-President of the Broach Anjuman-I-Islam.

In the order of precedence he has the privilege of being the head of the Molesalam Garasias in Gujarat, is head among the Thakores in the district of Broach, and second among the Sirdars and Talukdars of Gujarat. He takes a lively interest in the spread of education and Islamic philosophy and has always stood for Hindu-Muslim Unity and sound liberal politics and social reform.

The distinguished title of "Nawab" was conferred in 1929 in appreciation of his various public services. His steadfast loyalty and deep reverence to His Majesty are well-known. Knighted, 1938.

He is the Vice-President of the Broach District War Committee supervising the work of the various committees in different directions. He has contributed Rs. 1,100 to the War Gifts Fund and also intends to give an ambulance. He prevailed upon the Gujarat Landholders' Association to give Rs. 1,000 to the War Gifts Fund when H. E. the Governor of Bombay visited Ahmedabad in 1939. The Begum Saheba has promised to donate a further sum of Rs. 500 to the War Gifts Fund. During the last war his efforts towards recruiting men and collecting money were very much appreciated by the Government and he was presented with a sword of honour and many badges.

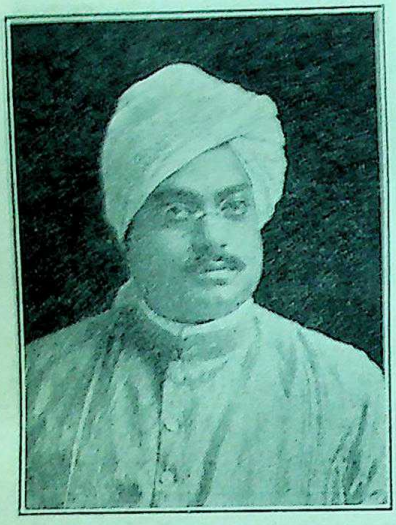
DALMIA, SETH RAMKRISHNA. *Born :* 1893. *Married :* 1910, Durgadevi. Shreemati Rama, his only child, is married to Seth Shanti Prasad Jain.

Seth Ramkrishna Dalmia's schooling was desultory, but by assiduous home study, he mastered principles of economics and finance and also acquired a good knowledge of English, Hindi, Bengali and Gujarati. His knowledge of Hindu scriptures and philosophy is very extensive.

He became interested in industries in 1931 and started within a few weeks two huge sugar factories which rank among the biggest of their kind in India. In 1934 he bought another sugar factory equally large and in 1936, purchasing the largest block of Bharat Insurance shares, acquired its management. To the sugar factory at Dalmianagar he has added three more units, a paper mill, a chemical plant and a cement factory. He entered the cement industry in 1937 and within a very short time established cement factories all over the country—Dalmianagar in Bihar, Dalmia Dadri near Delhi, Dalmiapuram in South India, Dandot in the Punjab and Karachi; Dalmianagar and Karachi factories being the largest single unit plants in India. During the initial stages he faced keen competition but in spite of heavy odds, he succeeded in setting the industry on to a prosperous future by dint of his untiring energy, patience and determination, coupled with valuable efforts of other eminent business magnates. The Dalmia concerns are managed by his younger brother—Seth Jai Dayal Dalmia and his son-in-law—Seth Shanti Prasad Jain, both of whom have an idolatrous regard for him.



Seth Ramkrishna Dalmia is of simple, austere habits. He eats the plainest food, wears pure homespun and his personal expenses are confined to the barest necessaries of life. He works from early morning till late at night, keeps himself abreast of latest developments in world politics, trade and industry and devotes hours daily to a comparative study of religion and ethics. He has rare oratorical gifts; his *ex tempore* speeches enthral his hearers and carry them with him.

His charities run into millions. Following the precepts of the Gita, he gives because he should and makes no distinction of caste or creed in dealing out his charities. The yearly income of a Trust created by him is utilised in awarding scholarships to promising youngmen for scientific studies in India and abroad. He spends lavishly in providing amenities of life to labour employed in his factories.

Having monumental achievements in the realm of trade and industry to his credit, Seth Dalmia views them with a sense of detachment and sincerely believes that he is one of those through whom God fulfils Himself. *Address :* Dalmianagar (Bihar).

DINAJPUR: THE HON'BLE CAPTAIN MAHARAJA JAGADISH NATH RAY, F.R.S.A., of Dinajpur.

Born: December 28th, 1894. *Educated*: At the Hindu School and Presidency College, Calcutta, and has had military training. He was appointed to be an Officer in the Indian Land Forces from January 1924, by His late Imperial Majesty King George V. He became attached to the 11/19th Hyderabad Regiment, I.T.F., as an honorary Lieutenant, and is now an honorary Captain of the Force.

The Maharaja Saheb was for several years the Chairman of both the District Board and the Municipality of Dinajpur. He was elected a member of the Bengal Legislative Council, 1930, and nominated a member of the Council of State, 1933. He is President of the All-India Kayastha Conference representing five million Kayasthas, a Vice-President of the British Indian Association and President of the East Bengal Landholders' Association. His voluntary monthly contribution of Rs. 100 to the War Fund since the commencement of the war has been greatly appreciated.

Raja Ganesh, the ostensible founder of the Dinajpur Raj, defeated the Mussalman ruler of Bengal and occupied the *mussnad* in the beginning of the 15th century. The Raj descended in 1642 from the Dutta family of Ganesh to Raja Sukdev Ray, a scion of Ghosh family. Sukdev's son Prannath was given the title of Maharaja Bahadur by Emperor Aurangzeb. His grandson Ramnath obtained it as a hereditary distinction in 1745. He owned numerous muskets and many pieces of cannon, some of which are still preserved with care. His grandson Maharaja Bahadur Radhanath's sanad was given under the hand and seal of the first British Governor-General of Bengal. Shyammohini, the talented widow of Maharaja Taraknath, received the title of Maharani, and her son Maharaja Bahadur Sir Girija Nath Ray, K.C.I.E., left the *gadi* in 1919 to his son, the present Maharaja.

The great temple of Kantanagar on the Dinajpur-Darjeeling Road—which Dr. Buchanan visited between 1807 and 1814 and declared as "by far the finest in Bengal,"—was built by the Maharaja Bahadurs Prannath and Ramnath Ray. Maharaja Jagadish Nath is a devoted Vaishnab and his contributions towards religious, cultural and charitable institutions are too numerous to mention.

Son and heir: MAHARAJ-KUMAR JALADHI NATH RAY. *b.* January 18th, 1928; died March 4th, 1941. *Personal Assistant*: BABU ABINASH CHANDRA ROY. *Revenue Secretary*: Rai Saheb NALINI MOHON SINHA. *Private Secretary*: MR. SUDHANSU BOSE. *Address*: Dinajpur Rajbati, E.B.R., & 95, Russa Road, Calcutta.

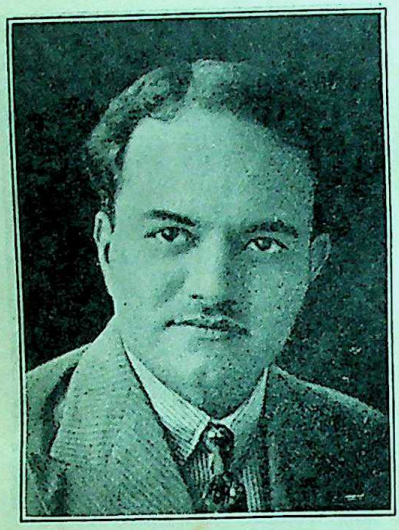
HARKISONDASS LUKHMIDASS, ESQ., J.P., is the proprietor of the well-known firm of Messrs. Harkisondass Lukhmidass, Share & Stock Brokers.

He set up the firm in 1932 by becoming a member of the Bombay Stock Exchange and within less than a decade has earned for himself a distinguished name both among the Stock Exchange fraternity and the commercial community. He combines in himself those personal qualities which bring success in business as well as affection of those with whom he comes in contact. His personal charm and magnetism easily win for him the trust and confidence of those he meets. His utter devotion to duty and sound business instinct strengthens the relationship so formed.



Mr. Harkisondass was born in Bombay on 31st October 1904. He was educated at the Bharda New High School and then joined his father's firm of Freight Brokers, well-known in freight line as Messrs. Aspinwall Lukhmidass & Company. Soon after he was taken as a partner. He joined freight business at the early age of 18 and his association with his father's business which continued for ten years, enabled him to come in contact with many businessmen as well as shipping and export houses. Due to diversion of export trade from Bombay to other Indian ports and to general world depression, he turned his attention to the Stock Exchange in 1932. Mr. Harkisondass is also a member of the East India Cotton Association and the Bombay Bullion Exchange. The training of his father combined with his own abilities helped him to bring the firm to its present position.

The firm of Messrs. Harkisondass Lukhmidass is today among the front-line firms on the Bombay Stock Exchange. It has set before itself the aim of specialising in genuine investment business for which a Stock Exchange primarily exists. For promotion of such business, correct information should be supplied to the investing public and Mr. Harkisondass has made it a point to develop a statistical department which publish from time to time Wall-Charts as well as Special Surveys of industries.

Mr. Harkisondass has displayed a broad progressive outlook in business activities and in other walks of life as is evident from the financial assistance he has given privately to many institutions and individuals. *Address :* 17, Carmichael Road, Bombay.

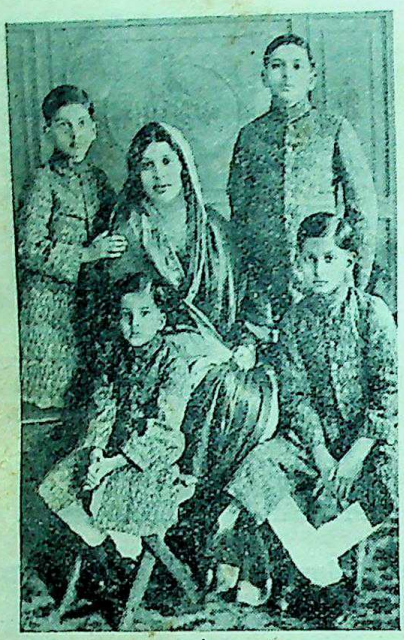
JAGDISHGARH: Rai Bahadur Jagdish Narain Singh is a popular landlord and the owner of Jagdishgarh Estate, Padrauna, Dist. Gorakhpur, which extends over many districts of the U. Provinces and Behar such as Gorakhpur, Ballia, Gazipur, Azamgarh and Champaran.

He comes from the Gaharwar family which is a very ancient one and in which Rai Nath Rai was very eminent in the time of Aurangzeb who rewarded him with arms and a grant of 33 villages.

Born in 1885, and received all round education at home under the direct supervision of his father. He was made Rai Bahadur in 1923 for his meritorious services, and is the holder of several gold and silver medals.

He always takes an active interest in the management of his Estate and has a soft corner for his tenants. For their welfare, the Raja Bahadur of Padrauna and he have jointly established many public benefactions in Padrauna among which may be mentioned the Victoria Memorial Dispensary, Travelling Dispensary, Peace Memorial Park, the Silver Jubilee Club and Library, Anathalaya and Buildings for the Local Vernacular Schools for boys and girls. The Local Udit Narain Kshattriya High School has been endowed by them with landed property having an income of Rs. 8,000 annually. In general, rural uplift works receive his enthusiastic attention and occupy his time. He is an Hony. Munsiff for life and a widely travelled man. His tour of the continent, where he came in contact with many important personages, has left an impression on him.



He is a born engineer and business man. He gave an impetus to the trade of Padrauna by starting a scheme for the Industrial and Agricultural Development of his Estate at an early age. On his own and independent initiative he established the Padrauna Raj Krishna Sugar Works Ltd., Padrauna, in the year 1921 of which he is Managing Director, and the Vishnu Pratap Sugar Works Ltd., Khadda, and The Jagdish Sugar Mills Limited, Kathkuiyan, in the year 1933. Other local capitalists were also encouraged by him to start sugar factories in the vicinity. He is a Director of many Sugar Mills, and Insurance Companies. The Estate Sugarcane Farms, the largest in the Province, are worked by experts under his direct supervision.

He has subscribed Rs. 725,000 to the War Purposes Fund and other allied Funds and has invested Rs. 25,000 in War Loans out of which Rs. 10,000 are without interest. He is holding meetings all over his estate and has installed a Wireless Receiving Set in the Padrauna market to broadcast news from Delhi and London in Hindustani to the public.

Address: Jagdishgarh Estate, Padrauna, Distt. Gorakhpur.

JAIRAZBHOY, MRS. AL-HAJJA KHOORSHID KHANUM QASSIM ALI, J.P., Bombay. *Born* in 1903; educated in Rangoon; married the late Al-Haj Qassim Ali Jairazbhoy, J.P., on 4th May 1919 at Bombay amidst great rejoicing. She is one of the leading society ladies, taking a keen interest in welfare and charitable work. As a member of the Bombay Presidency Women's Council and National Council of Women in India and of the Advisory Committee of Cama Hospital she has rendered useful services. Mrs. Khoorshid Qassim Ali is also a prominent figure in all the activities connected with the Princess Victoria Mary Gymkhana. She is a very intellectually gifted lady. She was a remarkablel help-mate to her husband, who was an ardent and zealous follower of the Prophet of Islam. She takes particular interest in the education of Muslim women, besides taking a leading part in the welfare movements of her sex, particularly of her own community. She possesses a winning manner and is a charming hostess. She performed the Haj in company with her husband in 1932 and took films of the Haj Ceremony and the different scenes of Mecca and Medina with quotations of the Quran inscribed. During the world tour which she undertook in 1933 accompanied by her husband, these films were shown by her at different places in Europe and America and were greatly admired and appreciated. In recognition of her social and charitable work, Government was pleased to appoint her a Justice of the Peace of the town and Island of Bombay. She has written a book "Muhammad, the Seal of the Prophets", dedicated to her loving husband to whose kindly help the completion of this pamphlet was chiefly due. The booklet is only a glimpse from the life of the Prophet Muhammad (may peace be on him) a more extensive book by her late husband entitled "Muhammed: A Mercy to all the Nations" is very instructive. There are several very interesting chapters, one of which is a special one on the Advent of the Prophet Muhammad, as prophesied in the Scriptures of World Religions with original references from the Bible, Atharva Veda, Bhavishya Purana and Zend-Avestas. She has just returned from England where she had gone to live for an indefinite period to educate her four sons who were in one of the public schools there. She is a member of the Inter-Religious Fellowhip in which she takes keen interest. *Address*: Goolshanabad, Pedder Road, Bombay.

KOTWARA: RAJA SYED SAJID HUSSAIN, M.A. (Edin.), M.L.A. of Kotwara.

Born: 1910.

Educated: La Martiniere College and Edinburgh University.

Married: 1937, Princess Selma Sultan, grand-daughter of H. I. M. the Caliph, Sultan Murad V.

History: Kotwara Raj was established by Rajas—Gopal Singh and Saroop Singh about 200 B.C. Deobunder and Anhalwara Patan (of Somnath fame and a centre of world trade) also remained capitals. This family once ruled India from Cambay to China. In 1488 Raja Mull embraced Islam. In 1680, Raja Baz Khan lost the kingdom to Aurangzebe, but some of the lands were restored to Raja Tarbiat Khan in 1779. The male line of the 84th Raja Madar Buksh Khan (1827-57) became extinct. His daughter was married to Syed Nazar Hussain, a Prince of Yaman. Their son was the grandfather of the present Raja. Well-read and widely travelled, the present Raja of Kotwara is very popular. He is deeply interested in philosophy and fine arts and is himself a poet in Urdu.

He is the Vice-President of the Kheri War Board. He takes a very keen interest in the collection of War Funds.

Recreations: Motoring, Riding.

Private Secretary: L. S. Harooray, B.A.

Addresses: Anhalwara Palace, Kotwara Raj and Kotwara House, Lucknow.

KUREISHY: RAFIUSHAN IFTIKHARUL MULK, KHAN BAHADUR, LT.-COL., HAJI MAQBOOL HASSAN, M.A., LL.B., Home Minister, Bahawalpur Government: belongs to a respectable family of the Kureish of Arabia. Though hailing originally from the Meerut District, his ancestors had long settled in the State, before he was born at Bahawalpur in 1900. He received his early education in the State, and, later on, joined the Muslim University, Aligarh, where he passed his M.A., LL.B. in 1925. From his earliest childhood he exhibited traits which gave promise of his future eminence.

His personal magnetism made itself felt in the sphere of his employment, where he won the golden opinions of his colleagues as well as the ruler under whom he served. He began his career in 1925, when he joined the personal staff of His Highness the Nawab Ruler Bahadur of Bahawalpur as an Aide-de-Camp. But, it did not take long to discover that the young incumbent had in him the makings of a capable administrator. Accordingly, in less than two years from the date of his appointment, he was promoted to the rank of Assistant Military Secretary. But this was only a stepping stone, as in January 1930 he was given the combined office of Private and Military Secretary, with the additional charge of the portfolios of Education and Municipalities, and was, subsequently, raised to the status of Minister-in-Waiting. In 1932 he paid a visit to England and other Western countries in company with His Highness the Nawab Ruler Bahadur—a visit which he repeated in 1935 and in 1936. The beautiful volume in which he has chronicled the impressions of his first itinerary is an eloquent testimony of his great powers of observation and expression. He has also been to the Near East and performed the holy pilgrimage. Recently, his services to the State were recognised by the Government by the grant of the title of Khan Bahadur, which is the first distinction of its kind to be conferred upon a purely Riyasti Vizier in the State. He is also the recipient of many decorations and distinctions from the State, and is His Highness the Nawab Ruler Bahadur's representative in the Senate of the Punjab University.

During the 10 years of his incumbency he has been in charge of several departments, and in each he has left the impress of his personality in the shape of many useful administrative reforms which he introduced from time to time. It is due mainly to his efforts that the Chief Court of Bahawalpur has been raised to the Status of High Court. He is a very capable and efficient administrator, having won the highest praise of both the ruler and the ruled by his politeness, impartiality, and keen sympathy with the people of the State. He is immensely popular with all classes of His Highness's subjects.

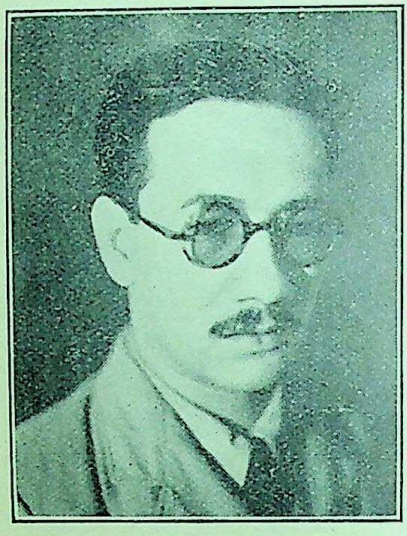
LIAQAT HYAT KHAN: NAWAB, SIR, Kt., K.B.E., K.B., is the eldest surviving son of the late Hon'ble Nawab Mohammad Hyat Khan, C.S.I., of Wah in the Attock District, Punjab.

He entered the Punjab Government Service in 1909 as a Deputy Superintendent of Police and received unusually early promotion to the Imperial Police where he held several important appointments with conspicuous success. His services were recognized by the grant of the King's Police Medal and the titles of Khan Bahadur and O.B.E., as also a grant of land from Government. During the visit of H. R. H. the Prince of Wales to Lahore, he was put in charge of the special arrangements. His services in this connection received special commendation from His Royal Highness (now Duke of Windsor) and H. E. the Viceroy.

In 1923 his services were lent to H. H. the Maharaja of Patiala as Home Secretary but His Highness soon raised his status to that of Home Minister and placed under his control some of the most important departments of the State. It was as Home Minister that Sir Liaqat distinguished himself as an officer of high administrative capabilities. He gave effect to a considerable number of measures which have already had, or are likely to have in future, far-reaching results in improving the condition of agriculture and industry in the State. In 1928 his services were recognised by the Government by the grant of the high title of "Nawab" which is now a rare distinction.



During the Dalhousie Enquiry, it was Nawab Sir Liaqat Hyat who was responsible for the conduct of the Patiala State case and the very meritorious services rendered by him in that connection were gratefully recognised by His late Highness. Besides other rewards of a personal character Sir Liaqat was elevated to the positon of Prime Minister and given the status of the premier *Jagirdar* in the State. In all the work connected with the Round Table Conferences and Federal discussions Sir Liaqat had been very intimately associated. He represented the State twice at the Round Table Conference and again as a delegate to the Parliamentary Joint Select Committee.

He was Knighted in 1933 and in 1934 His late Highness conferred on him the Honorary Rank of General. In 1939 His Majesty the King Emperor conferred on him the Order of K.B.E. He retired from the Patiala State Service in April 1940.

Sir Liaqat has been closely connected with the work of the Chamber of Princes during the last few years. His politeness, impartiality and keen sympathy with the people of the State, made him immensely popular with all classes of His Highness' subjects.

MEHTA, P. N., L.T.M., A.M.S.T., Gold Medalist, Managing Director, Shree Ram Mills Ltd., Bombay. One of the most successful of the students of the V. J. T. Institute from which he passed out in 1897 with the highest scholarships for the first two years, and Lord Reay Gold Medal with Honours Diploma. From 1898 to 1905 he worked as a Weaving Master in sole charge of his departments in The New Great Eastern Mills, Ltd., Bombay, Late Mr. Nansukhbhai Bhaghubhai's Mills, Ahmedabad, and The Presidency Mills and The Colaba Land & Mills at Bombay, when he left for England for further study of Textile manufacture. Was the first to obtain the Government of India State Technical Scholarship in 1905 and proceeded to Manchester and obtained the certificate in the Faculty of Technology of the Victoria University and Honours Diploma of the Municipal College of Technology of that City. At the City and Guilds of London Examination he obtained the highest award of the Silver Medal and Money Prize in Carding and Spinning and also first class Honours, and Bronze Medal in dyeing of Cotton Yarn and Piece-goods and First Class Certificates in various textile manufacturing and designing subjects and in bleaching, dyeing printing and finishing of Textile fabrics. Returned to India in 1908 when he was appointed Textile Expert to the Government of Bombay to organise and conduct a survey of the hand-loom weaving industry in the Presidency. This was completed in 1909 from which period, Mr. Mehta has been acting as Technological expert and adviser to different cotton Mills in India and is also interested in the import of English yarns, piece-goods and Textile Machinery.

Since 1909, devoted his wholehearted attention in introducing in India the weaving of fine piece-goods with the help of fine yarns imported to India of 40s to 120s counts. Met with considerable success and his help and assistance has been always in request from Mills, in Bombay, Ahmedabad, Rajputana, Bengal and other towns of India.

When Mr. P. N. Mehta returned to Bombay from England at the end of 1907, he found his late father, Mr. Nusserwanji K. Mehta established as a sole Cloth Selling Agent of various Mills in Bombay and Ahmedabad, *viz.*, The Kurla, The Globe and Lord Reay Mills in Bombay for all the markets of India. For all the Mills of Late Seth Mansukhbhai and Seth Lalbhoy Dalputbhoy of Ahmedabad, he was their sole Cloth Selling Agent for Calcutta and Bombay Markets. He was also for some period the Cloth Selling Agent for the Calcutta Market of the Maneckji Petit, the Bomanji Petit and the Dinshaw Petit Mills of Bombay. In 1907, Mr. P. N. Mehta was invited by his father to join him and help him in his business of sole Cloth Selling Agent, and worked for his father till the latter died in 1913 when this business was closed. Mr. P. N. Mehta besides his business as importer of English yarns and piece-goods, carried on business as a Cloth Merchant buying his requirements from local Mills of India till the end of trade boom in 1920, when he closed his business as a Cloth Merchant. He has done very useful service to this country by advising and helping to introduce the spinning of fine yarns and the weaving of fine cloth all over India, and his services and advice have always been available and offered free of cost to all his clients, acquaintances and friends. He is at present doing business as: (1) Importer of cotton, spun silk and Art Silk yarns and Piece-goods from England, the Continent of Europe, China and Japan: (2) Importer of Textile Machinery for the Weaving, Dyeing, Bleaching and Finishing of Cotton Piece-goods; (3) Cloth Selling Agent for Local Mills; (4) Managing Director of Shree Ram Mills Ltd., Bombay.

In 1935 he bought the Crescent Mills of the Currimbhoy Groups with the help of his friends and converted it into a fine spinning and weaving Mill complete with up-to-date Bleaching, Dyeing and Finishing Machines. This mill is successfully working and spins only fine yarns from 50s to 120s average about 65s counts and cloth made out of the same.

Besides his commercial and manufacturing business he takes great interest in social and public activities, specially for the benefit of the Parsee unemployed. He has made liberal contributions both privately and publicly to help various social and other institutions to relieve distress and to help those who are willing to work and improve their prospects. He has donated large sums to Dr. Massina's Hospital. He has built a cheap rent chawl for the benefit of Parsees, has founded a Lying-in-Hospital at Udwada, and is engaged in promoting employment centres to educate and give employment to the Parsee unemployed. *Address:* Cook's Building, 324, Hornby Road, Fort, Bombay.

NANPARA AND MOHAMDI RAJ: RAJA SAIYID MOHAMMAD SAADAT ALI KHAN, is the only son of the late Raja Saiyid Mohammad Ashfaq Ali Khan, in his time a poet of great repute and author of numerous books, and the late Rani M. Sarfaraz Begum of the Mohamdi Raj, Oudh.

During the last World War the late Rani Saheba helped the British Government with men and money. The Lucknow University, the King George's Medical College as well as the Prince of Wales Zoological Gardens at Lucknow are indebted to the late Rani Saheba for her munificent and liberal donations.

The present Raja inherited Nanpara from his maternal grandfather, Raja Sir Jang Bahadur Khan, Kt., C.S.I. The title of Raja was conferred on the Nanpara House in 1763 by the Nawab Shuja-ud-Daula, the King of Oudh and has since been recognized by the British Government as hereditary.

Born in 1904. *Educated* at the Colvin Taluqdars' College, Lucknow, to which is added the vast experience of a traveller and broad out-look having visited the continent of Europe, England and the Near East frequently. The Raja Saheb succeeded to the Nanpara *Gadi* in 1911.

The Raja is well-known for his drive against illiteracy. The Saadat High School recently established at Nanpara marks his great winning stroke towards liberalizing education in his Raj. The Lady Hallett Women's Hospital established recently at Nanpara conspicuously marks his humane feeling towards his subjects and his deep interest in all social and civic matters.

He is fond of Shikar and is an excellent shot. Has 29 tigers to his credit. He plays tennis, polo and swims equally well. He is a member of well-known clubs such as Bagatella Club, Paris, Tennis Club, Touring Club, Racing Club and Royal Automobile Club of France; Indian Gymkhana Club, London, Queen's Club, London, Willingdon Sports Club, Bombay and Imperial Gymkhana and Chelmsford Club, New Delhi. He is a patron of the U.P. Aero Club. He is a member of the U.P. Legislative Assembly.

Heir-Apparent, Nanpara Raj: Asif Saadat Ali Khan.
Heir-Apparent, Mohamdi Raj: Arif Saadat Ali Khan.
Dewan: C. R. Coombs, Esq.
Address: Nanpara Palace, Lucknow.

Born : 1901. *Educ. :* At Central Model School and Forman Christian College, Lahore. Took his B.A. Hons. Degree of the Punjab University in 1923.

Brother : Sahabzada Mohammad Hussain Khan Qizilbash.

Succeeded his uncle Khan Bahadur Nawab Mohammad Ali Khan, C.S.I., on the 22nd February 1935.

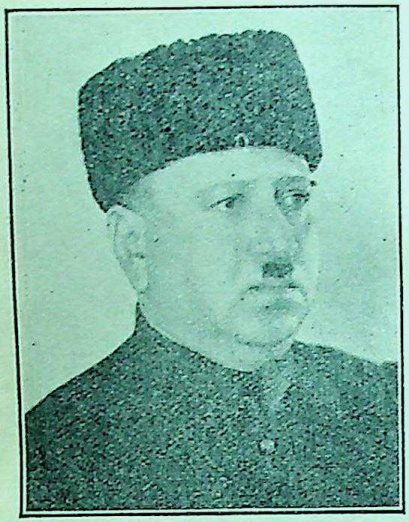
Married in 1936, the daughter of Mirza Bahadur Mirza Mohammad Sadiq Ali Khan, a premier Chief of Oudh and has got a son and a daughter.

Heir : Nawabzada Fateh Ali Khan.

Estates : Taluqdari Estate of Nawab Gunj Aliabad Dist., Bahraich in Oudh, Rakh Juliana in Lahore Districts in the Punjab and Kerbala and Hoor Hosain Estates in Iraq (Arabia).

The Sardar has travelled widely in the Near and Middle East and knows English, Arabic, Persian, Punjabi and Urdu very well. He has a good taste for History, particularly Islamic History. He is deeply interested in education, social reforms, politics and estate management. He is a whole time worker and never tires of performing any arduous task. Simple living and high thinking is his 'Motto.'

He is an Hony. Bench Magistrate at Bahraich, and a Special Magistrate of Nanpara, a non-official visitor of Jails, Director of the Central Exchange Bank Ltd. of Lahore, Trustee of Maharaj Singh High School of Bahraich. He is in charge of Muharram Dul-Dul Procession of Lahore and other ecclesiastical activities and is an Hony. General Secretary of Madrasatul Waizeen of Lucknow, the central institution of the Immamia sect in India. In 1937 he was awarded a Coronation Medal.



Hobbies : Gardening and Reading. *Recreation :* Tennis and Shooting.

History : The Sardar is a grandson of the late Nawab Sir Nawazish Ali Khan and Nawab Sir Fateh Ali Khan and traces the history of the family to the days of Nadir Shah when one of his ancestors was Governor of Kandahar. In 1839 Nawab Ali Raza Khan became a friend of the British and fought on their side at Mudki, Feroze Shah and Sobraon and raised a troop of cavalry which was later on embodied in the well-known Hodson's Horse, for which he was awarded the estate known as Nawab Ganj Aliabad Estate, Oudh, comprising 147 villages. A pension was also granted to him which was later replaced by a grant of property known as Rakh Khamba.

Address : Nawabganj Aliabad, Bahraich Oudh, and Mubarak Haveli, Lahore.

NAWAB MUHAMMAD MOIN-UD-DIN KHAN, NAWAB MOIN-UD-DOWLA, BAHADUR, the only son of the late Nawab Sir Asman Jah Bahadur, one of the three great Paigah Nobles of the Hyderabad State, was born in Hyderabad (Deccan) in the year 1891. Nawab Moin-ud-Dowla's Paigah or feudal state covers an area of 1,821 square miles and has a population of 276,533, while its annual revenue amounts to Rs. 22 lakhs. He carries on the administration with the help of a Council consisting of a President and two Members.

In 1919 Nawab Moin-ud-din Khan Bahadur was given the title of Nawab Eyanath Jung, and in 1922 the title of Nawab Moin-ud-Dowla. In 1923 he was appointed Minister in charge of the Industrial Department and also a Member of the Executive Council. The next year he was given charge of the Military Department and in 1927 he resigned the post, for, by an order of His Exalted Highness the Nizam, his Paigah Estates were released from the Court of Wards and he was made the Amir of the Sir Asman Jahi Paigah.

Though at one time a keen rider, Polo Player and Racing Noble, Nawab Moin-ud-Dowla Bahadur's present main recreation is shooting. He is also passionately fond of watching cricket, and he has done much to encourage the game and raise its standard not only in Hyderabad (Deccan) but in the whole of India. The All-India Gold Cup Cricket Tournament, which was started 10 years ago as a result of his munificence, attracts to Hyderabad most of the best Cricketers in India. The last M.C.C. and Australian fixtures in Secunderabad, Deccan, were also due to his keen interest in Cricket and his generosity.

NAWAB SALAR JUNG BAHADUR (MIR YUSUF ALI KHAN), one of the premier noblemen of Hyderabad, Deccan, and the sole representative of the illustrious family of Sir Salar Jung the Great of Mutiny fame.

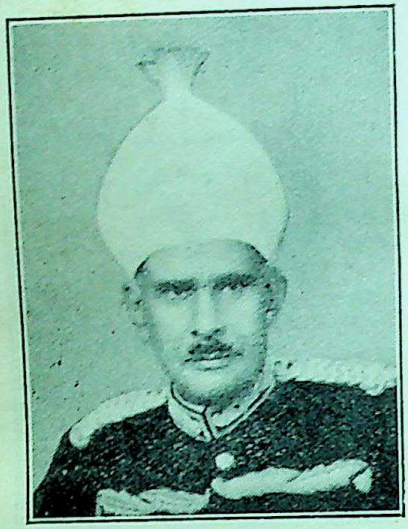
Born : 13th June 1889 at Poona.

Educated : At Nizam College. Was Prime Minister between 1912-15 ; has travelled all over Europe, Iraq, Persia, Syria, Palestine, etc.

Area of Estate: 1,480 square miles. *Population:* 202,739.
Revenue : Over Rs. 15 lakhs.

Administration is divided into several departments on modern lines, and is under the direct control of the Nawab Saheb who personally supervises the work.

Family History : About the middle of the 17th century the great-grandfather of the Nawab Saheb migrated from Medina to the Adil Shahi kingdom of Bijapur where he settled and married into a noble's family. After the fall of the kingdom, the members of the family took service under the Moguls. Later on they transferred their allegiance to the family of the Nizams and served them as Prime Ministers, who are as follows :—



(1) Shair Jung, (2) Ghayur Jung, (3) Dargah Khuli Khan Salar Jung, (4) Mir Alam, (5) Munirul-Mulk, (6) Sirajul-Mulk, (7) Sir Salar Jung I, (8) Sir Salar Jung II, (9) the present Salar Jung.

The Nawab Saheb has given a 'Hurricane' to the British Government and it bears his name amongst the Hyderabad squadron.

Address : Hyderabad (Deccan).

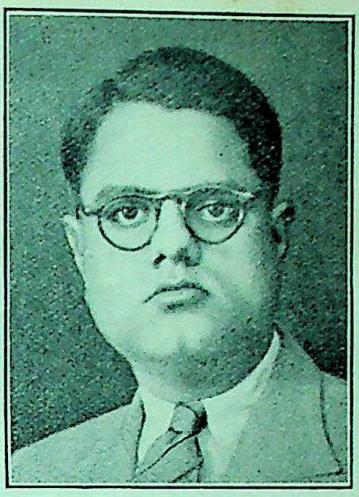
NAWAB TILAWAT JUNG BAHADUR, SAHIBZADA MIR TILAWAT ALI KHAN, B.A. (Punjab).

Born in 1880.

Descendant of the Jr. Branch of the Ruling family of Hyderabad, his grandfather being the second son of Nizam III of Hyderabad. Those who come in contact with him can detect the physical and mental characteristics of his Turkoman lineage. The Nawab Saheb is also one of the premier Nobles of the State who are exempted from the Arms Act of British India.

Beginning his service with the State as First Asstt. to the Home Secretary, he held various posts of trust and responsibility, such as Chief Inspector of Schools at Headquarters, Commander and Pay Master of the household and Body Guard Troops of H.E.H. the Nizam, etc. He was a member of the Legislative Council of the State representing the City Municipality and afterwards a nominated member on behalf of the Sarfikhas. He was Cabinet Minister in charge of Public Works Department and Medical Department; Secretary and Sadrul Maham of Sarfikhas; Member of the Executive Council with Revenue and Local Fund and Agriculture portfolios. He has been responsible for the introduction of Service Stamps, Money Order and Savings Bank systems in the Postal Department of the State. The suggestion for the early completion of the Kazipet-Belharsha Railway line which links up the N. S. Railway with Delhi and Madras Chord line originated from him and he prevented the extension of the contract with the N. G. S. Railway Company to 1954 which made it possible for the Nizam's Government to acquire and take over the control of the Railway in 1930.



Though not entrusted with any portfolio at present in the administration of the State, the Nawab Sahib still serves as a member of the Sarfikhas Committee which manages the administration of the Crown lands and the household departments of the Ruler.

Sahibzada Mir Akbar Ali Khan, the Nawab Saheb's only son, was born in 1909. He graduated from the Madras University and was awarded a special European Scholarship by the Gracious Command of H.E.H. the Nizam. He joined Trinity College and returned to Hyderabad with the Economics Tripos Degree of Cambridge University.

Address: The City, Hyderabad, Dn.

NEMIVANT, GOVIND RAO, B.A., son of Ram Rao Nemivant, is the fifth descendant of the ancestor of the family—one of the ancient illustrious and historical Hindu noble families of Hyderabad, Deccan.

Family History : Raja Nemivant Bahadur rendered heroic and meritorious services to the British and the Nizam in the famous battle of Kharda and a number of other battles that were fought against Tipu Sultan. He was the Attorney of Nawab Arastu Jah Bahadur, the famous Prime Minister of Asaf Jahi Dynasty. It is a historical fact that when the Peshwas had detained the Nawab in Poona, Raja Nemivant Bahadur was instrumental in procuring his release and conducting his safe return to Hyderabad. In recognition of this service, he was granted the Killedari of Ousa, the Jagirs and Mansabs, with all its paraphernalia of Umari, Nowbat and Roshan Chowki, and was honoured with the title of Raja Nemivant Bahadur. These services to the State were even recognised and appreciated by the British Government. His son held an important and responsible post in Saraf-e-Khas Mubarak. One of his descendants, Raja Janardhan Rao Bahadur, was appointed to an important military post and his younger brother Raja Hari Har Rao Bahadur, for his excellent Urdu and Persian calligraphy, was conferred with the hereditary post of Tosha Khana Mubarak, and was also the custodian of Royal Jewellery. Raja Ram Rao Bahadur, another well-known descendant of the family, was appointed Talukdar during the Zilla Bandi and also enjoyed the two important posts mentioned above. Thus it is evident that faithful and meritorious service to the State and the Crown is the hallmark of distinction of this family.

Born : 30th August 1910. *Educated :* At Madarse-Alia and Nizam College, Hyderabad, Dn., graduated from Ferguson College, Poona, in October, 1937.

Govind Rao Nemivant is a lover of art and literature. He is very fond of collecting good literary books and works of art for his home library. Befitting the established tradition, his is the burning desire to hold an important and responsible post in the State, suitable to his high rank and position. He is interested in manly games like riding and swimming and himself plays tennis well. He helps with an open hand many of the public institutions in the State and has also contributed liberally to the War Fund.

Address : Malkajgiri, Hyderabad-Deccan.

PANCHAKOTE RAJ: RAJA SRI SRI KALYANI PROSAD SINGHA DEO.

Born : 16th March 1899.

Married : The only daughter of the Taluqdar of Antu, in Protapgarh District.

Succeeded : On the 29th September 1938, succession is by primogeniture.

Heir-apparent : Sri Sri Sankari Prosad Singha Deo.

The Raj is one of the most ancient in India. Founded as early as 81 A.D. by Maharaja Damodar Sekhar, a direct descendant of Bikromaditya, who came from Dhar in Central India. The Raj was an independent state, and first paid a tribute to Mahomedan rulers in 1632-33 and even during the British period it was semi-independent, until the permanent settlement of 1793. Various minor principalities, now large Estates, used to be under its suzerainty and the old bond persists in sentiment. At one period of history the home of the family, until recently a ruling family, was Panchet Hill, not far from Asansol. The present seat is Kashipur (Manbhum), Rly. Station, Adra, B.N.R. and the palace is one of the finest buildings in Bihar.

The family is known throughout India for its munificence, its extensive charitable and religious endowments, and the devotion of the tenantry to the head of the noble house.

The Raja is a good sportsman. He takes keen interest in administrative affairs, public works and in the development of his vast estate. He takes personal interest in the welfare of his tenants, particularly in the matter of education.

He maintains a free Sanskrit College and a Charitable Dispensary, and also contributes liberally to the local Schools. He has contributed Rs. 50,000 to the War Fund.

In recognition of his war and other Public Services the title of Raja was conferred on him by the Government of India in 1941.

Manager : Mr. Pannalal Bose, M.A. (District and Sessions Judge, Retired). *Private Secretary :* Mr. Subodh Kumar Mitra, M.Sc., B.L.

Area : nearly 3,000 square miles comprising extensive properties—including valuable mines—in Manbhum, Burdwan, Ranchi, Bankura, Orissa, Calcutta and Benares.

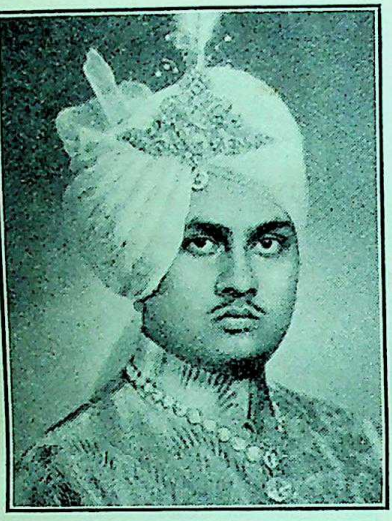
PARLAKIMEDI: CAPTAIN MAHARAJA SRI SRI SRI KRISHNA CHANDRA GAJAPATHI NARAYANA DEO, M.L.C., Maharaja of Parlakimedi, Ganjam District.

Born: 26th April 1892.



Educated: At Maharaja's College, Parlakimedi and Newington College, Madras.

Area: 698 sq. miles.

The Maharaja Saheb was a member of the Royal Commission on Agriculture; a delegate to the First Indian Round Table Conference; an associated member of the Orissa Boundary Committee and was selected in 1933 as a representative of the All-India Land-Holders' Association to give evidence before the Parliamentary Joint Select Committee in London. He is an Honorary Adviser and Visitor to the Agricultural College, Coimbatore. He has been taking a prominent part in commercial and industrial advancement and owns a Railway Line of 59 miles. He maintains a Salt Factory at Pundi measuring 300 acres and owns a big Rice Mill, a First Grade College, and Sanskrit College, three large Girls' Schools for Oriya and Telugus, an Agricultural Demonstration Farm and Veterinary Hospital. He has to his credit a long list of magnificent public services. He contributed Rs. 1,00,000 to the Research Institute, Coonoor, and Rs. 20,000 to Post-Graduates for Research work in food and commercial crops at Coimbatore Government College of Agriculture. During the Great War he subscribed Rs. 3,10,000 towards War Loans and Funds and recruited men both for Combatant and Non-Combatant Forces. He holds an Honorary Commission in the Land Forces since 1918. In recognition of his meritorious services and the interest taken in improving the condition of his Samasthan and its people he was awarded the title of Rajah (personal) in 1918, Rajah (hereditary) in 1922, Maharaja (personal) on 1-1-1936, Honorary 2nd Lieutenant in 1918 and subsequently promoted to the rank of Captain. The Maharaja Saheb is keenly interested in big game hunting having bagged many panthers and tigers besides other wild animals and is also a keen cricketer. He is a member of several important Clubs in the Madras Presidency and of the East Indian Association, London. He was returned unopposed to the Orissa Assembly on 23-1-1937. He was called upon to form the first Ministry in Orissa. The Maharaja Saheb was elected as President, District Board, Ganjam, Chatrapur, in 1936. The Maharaja is a member of the Provincial & District War Committees of Madras & Orissa and has contributed about Rs. 20,000 towards War Funds in addition to rendering help in recruiting work. He recently contributed £5000 to the Orissa War Fund for the purchase of a Fighter Plane.

RAMGARH RAJ: MAHARAJA KAMAKSHYA NARAIN SINGH BAHADUR of Ramgarh Raj, Bihar.

Born: 10th August 1916, Assumed full control, 10th August 1937.

Educated: at the Rajkumar College, Raipur, and afterwards at Mayo College, Ajmer.

Married: Princess Lalita Rajya Lakshmi the eldest daughter of H. E. General Shingha Shumshere Jung Bahadur Rana, S.M.N.T., S.P.G., D.B., Minister Extraordinary and Envoy Plenipotentiary of the King of Nepal at the Court of St. James, London and the niece of H. M. the King of Nepal.

The Ramgarh Raj is situated in the District of Hazaribagh in Bihar. It consists mostly of hills, forests and lands brought under cultivation. Its climate all round the year is simply delightful. It has beautiful valleys with picturesque scenery and attracts a large number of visitors every year from the neighbouring Provinces. There are numerous waterfalls, hot-springs and antiquities that bear witness to its glorious past all of which are easily accessible by car. Padma, the present Capital, has all the amenities of modern life.

The ancestors of the present Maharaja Bahadur were Rathor Rajputs and trace their descent from Maharaja Manikchand, a brother of the illustrious Maharaja Jaychand of Kanouj. In 1368 A.D. Singh Deo came from Khairagarh Kanti in Bundelkhand to this part of the country and established a new Kingdom, the capital of which was Urda in the Pargana of Karanpura. During the reign of Maharaja Dalel Singh the capital of the Raj was removed first to Badam and then to Ramgarh where Maharaja Ram Singh built a fort which is still in existence. Since then the Raj has been known as Ramgarh. Maharaja Tej Singh Bahadur, however, removed the capital to Ichak and from there it was removed in 1873 to Padma, the present capital. The Maharajas of Ramgarh rendered valuable services to the Crown, and helped in suppressing the Mutiny of 1857 and the Santal insurrection. The long line of successive Maharajas of Ramgarh duly enjoyed and exercised even during the Mohammadan rule in India the rights and privileges of a Sovereign Power.

The present Maharaja from his very infancy showed promise of his future greatness. He was very industrious and hard-working and had an unquenchable thirst for learning. Immediately after assuming

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

charge of the Raj in August 1937 prior to which the Raj was managed by the Court of Wards the Maharaja Bahadur diverted his full attention to the interest of the Raj and by his manifold benevolent activities has become extremely popular among his Raiyats. He tries to keep himself in direct touch with all his subjects especially the poorer section and hence he is accessible to all. During the last three and half years the Maharaja Bahadur has worked day and night, often going to the interior parts of the Raj and each time inaugurating some new scheme to foster the growth of a healthy and progressive peasantry. His methodical ways of living have resulted in his infinite capacity and constant desire for hard work. His chief pleasure is to be at his office table where he works harder and longer than the hard-worked officials of the Raj. The Raj is making good progress in all directions. The Maharaja Bahadur has brought about a remarkable change in the life of Ramgarh people. His driving force is making itself felt in every direction.

The Maharaja Bahadur is a sportsman, a public man and a distinguished scholar. His extensive travels throughout India has enabled him to conduct the administration on highly progressive and efficient lines. The famous congress sessions were held here in Ramgarh last year and even the important congress leaders were full of praise at the cordial relations existing between the Maharaja and his subjects.

Raj Crest.

The Raj is trying to render all possible help to Agricultural Exhibitions in shape of Melas, etc., at Ramgarh and Chatra —the two big centres of the Raj. The Raj owns three hospitals, one High School, one Middle School and one Primary School and gives monetary help to almost all other schools and dispensaries run by the District Board. In addition to these the Raj has Travelling Dispensary Vans under eminent Doctors to render first aid to the tenants and is employing a number of qualified Vaids to administer indigenous medicines to the Agriculturists.

The Maharaja Bahadur has already made his mark in the public life of Bihar. He was the Chairman of the Reception Committee of the All-India Kshattriya Mahasabha which was held last year in Patna. He is a member of the General Council of the Rajkumar College at Raipur, nominated by H. E. the Governor of Bihar to represent the landlords of Chota Nagpur and South Bihar and was later on elected to the Managing Committee. Recently he was elected President of the Provincial Hindu Mahasabha. He is Vice-President of the Bihar Landholders' Association and the Hazaribagh War Committee. He is also a Member of the Executive body of the Bihar War Committee. All public causes receive the willing support of the Maharaja Bahadur and the following donations testify to his generosity :—

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Rs. 1,00,000 to the Bihar Earthquake Relief Fund ; Rs. 1,00,000 to the George VI Coronation Fund ; Rs. 67,000 for the Indoor Hospital Building at Hazaribagh ; Rs. 40,000 for the Nurses' Ward in the Mission Zenana Hospital, Hazaribagh ; Rs. 25,000 to the Prince of Wales Fund ; Rs. 15,000 to the Leprosy Fund ; Rs. 10,000 to the Thanks Giving Fund ; Rs. 14,102 to the Zenana Mission Hospital at Hazaribagh ; Rs. 25,000 to the King George V. Memorial Fund ; Rs. 25,000 to different Schools and Hospitals in the Raj ; Rs. 9,000 to the poor and destitute when the Maharaja Bahadur was touring in the Raj recently ; Rs. 50,000 to the Viceroy's War Purposes Fund ; Rs. 2,000 Bihar Flying Club.

The Tikkait Sardar (*Heir - Apparent*) was born on the 27th of January 1938 amidst great rejoicings of the people of Ramgarh. To make the occasion remembered for many years to come the Maharaja Bahadur was pleased to announce valuable concessions to the tenants and accordingly when he went on tour he sanctioned a grand sum of Rs. 50,000 to finance the Agricultural and irrigational works in the Raj.

The Heir-Apparent is being brought up with the utmost care under the strict but affectionate supervision of the Maharajmata Sahiba (mother of the Maharaja Bahadur). During the 3rd Birthday a District Sports meeting (first of its kind in Padma under the patronage of the Maharaja Bahadur) was held and the Tikkait Sardar while acknowledging gracefully the greetings of the Winners distributed all the trophies himself amidst great cheers and to the amusement of guests and visitors.

The Maharani Sahiba is the worthy spouse of a talented husband. Like her husband she is benevolent by nature and takes part in all public charities. Recently she contributed a handsome amount from her private purse to meet all expenses for the construction and maintenance of a maternity and child-welfare centre in Padma, the foundation stone of which was laid by Lady Hallett, the wife of the then Governor of Bihar.

Maharajmata Sahiba is the mother of the present Maharaja Bahadur and the eldest daughter of the late Raja Saheb of Porahat. She is very fond of music, painting and needlework and takes great interest in the social and educational uplift of women. It was at her instance that her father started a Girls' School and a fairly large Zenana Hospital in his Capital. She has travelled extensively in India, England and the Continent of Europe.

Rajmata Sahiba, grandmother of the present Maharaja Bahadur is better known as the " Grand old Lady " of the Raj. From her very

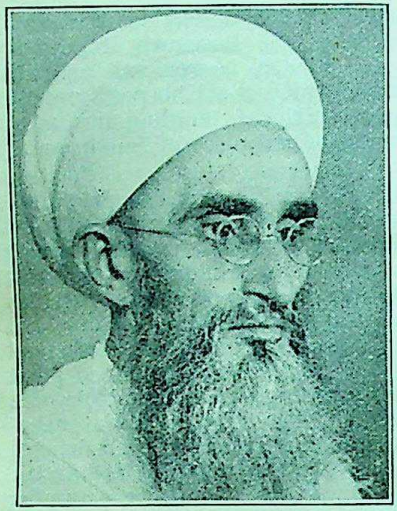
infancy she has been brought up in the midst of a religious household and she has rightly kept the tradition of the Ramgarh Raj family by her numerous charities, which are sure to be remembered with respect. From the income of her estate which is a Khorposh grant to her by the Raj she has constructed a magnificent building in Padma which is known as "Shreenagar" and is a real piece of Indian art.

Lieutenant Kumar Basant Narain Singh, M.R.A.S. (Eng.), F.R.E.S., F.R.H.S. (Lond.), M. A.M.N.H., M.N.G.S. (U.S.A.), is the younger brother of the Maharaja Bahadur and was born in 1918. He was educated along with his brother at the Rajkumar College, Raipur and Mayo College, Ajmer. The attachment and affection between the two brothers is so great that they are living together as members of a common household. The Kumar is an enthusiastic sportsman and a good shot, has bagged several tigers in the Raj forests. He is the Chief Secretary of the Raj, a member of the Executive Committee of the Bihar Landholders' Association, Vice-President of the Rural Reconstruction Association, Hazaribagh and the District Scouts Commissioner for Hazaribagh. He has recently been made an Honorary Lieutenant of the 11-19th Hyderabad Regiment. He has made extensive tours in various foreign countries.



Area : 5,000 sq. miles. *Population :* 900,000. *Income :* About Rs. 12,00,000.

Raj Secretariat, Padma.

Chief Secretary : Hon. Lt. Kumar Basant Narain Singh, M.R.A.S. (Eng.), F.R.E.S., F.R.H.S. (Lond.), M.A.M.N.H., M.N.G.S. (U.S.A.). *Adviser and Dewan :* Chowdhary Roshan Lal. *Chief Manager :* Rai Bahadur Pandit G. S. Upadhya, B.A. *Manager :* Babu Jugal Kishore Prasad. *Huzur Secretary and Hon. SAIYEDNA, TAHER SAIFUDDIN SAHEB, H. H. SARDAR (Mullaji Saheb), High Pontiff of Dawoodi Bohra Shia Mohommedan Community and First Class Sardar of the Deccan. *Born :* At Surat on 5th August 1885. *Succeeded* : 1915. Silver Jubilee of accession celebrated all over India 1940.

He is the 51st incumbent of the pontifical office of Dai-l-Mutlaq. He derives his succession from Prophet Mohommed (peace be upon him), through his descendents the Fatemide Caliphs of Egypt. Nearly 900 years back, owing to political upheavals in Egypt, the last Fatemide Caliph Imam Saiyedna Taiyeb retired into seclusion while his Dawat was transferred to Yemen where the incumbents ruled as Sultans. From Yemen the 23rd Dai transferred the seat of Dawat to India. In India, the Dais were the recipients of high honour and enjoyed special privileges from the Moghul Emperors. They were also accorded royal honour by the Peshwas, the Holkars and the Scindias. The East India Company counted the Saiyednas among the Indian nobility. His Holiness besides being a First Class Sardar of the Deccan enjoys all the concomitant privileges, including exemption from the operation of the Arms Act and personal appearance in Civil Courts. Has eleven sons and eight daughters. Heir-apparent ; Prince Mohommedbhaisaheb Burhanuddin is the 52nd in line.

He wields supreme command and jurisdiction, civil and religious, over the members of his community, who owe him allegiance and are bound to obey him and abide by his decisions, which are absolute and final. He appoints his deputies, called Amils, in every town wherever his followers live to maintain a constant contact with them. His Holiness is a liberal patron of Education, Arts and Industry and has established a separate department to administer the 350 Madressahs, including High Schools with hostels attached to them. At these Madressahs free education is imparted to children. He is an eminent Arabic Scholar and one of the greatest exponents of Islamic culture. Every year during the month of Ramzan, he writes a brochure in Arabic on religious and philosophical subjects. These writings are acknowledged masterpieces of Arabic literature. His charities and benevolence know no bounds. Amongst his multifarious munificences the construction of Quibla in Masjid-e-Aqsa at Jerusalem, the preparation of Kiswat, *i.e.*, an artistic carpet of silver brocade for the covering of the inner walls of the Holy Kaaba, at Mecca, the presentation of Gold and Silver Zarih (sepulchres) to the Mausoleas of the Saints of Najaf and Kerbala at Iraq and also the erection of a Minaret outside the shrine of Moulana Hussain the Martyr of Islam, are a few striking examples. *Address :* Saifi Mahal, Malabar Hill, Bombay.

SAYANA : DIWAN BAHADUR NARAYANRAO VITHAL.

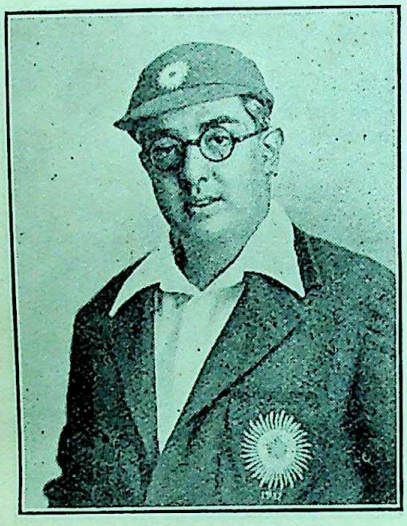
Born : 2nd January 1902.

The Diwan Bahadur is the son of the late Seth Vithal Sayana, a well-known building contractor of Bombay, who undertook the construction of such important public buildings as the Prince of Wales Museum, the General Post Office, the Science Institute, Sir Cawasji Jehangir Hall, the Small Causes Court and numerous others, and who during his lifetime donated a sum of Rs. 51,000 to the Maharashtra Education Society, Poona, and was renowned for his charitable disposition.

Diwan Bahadur Narayanrao entered the business of his father at the comparatively young age of 18, and since then, has executed constructional work worth many lakhs of rupees.

He has donated a sum of Rs. 2½ lakhs for building a civil hospital at Thana, the foundation of which was laid in 1935 by His Excellency the late Lord Brabourne, the then Governor of Bombay. It was named "Vithal Sayana Hospital" to perpetuate his father's memory, and opened by the late Lord Brabourne in 1936. He also runs a free dispensary at Thana since 1927 in memory of his mother, the late Gangoobai Vithal Sayana, and it is open to all without any distinction of caste or creed. Diwan Bahadur Narayanrao is very religious and a devotee of the Deity "Dattatreya" whose temple he has constructed at Thana.

He has founded a free library in the compound of his temple at Thana and recently he donated a large number of books to the Telugu Free Library, Bombay. He takes a keen interest in education and sports and is a life-member of the Cricket Club of India. Simple, generous and kind-hearted, he helps the poor and the needy, and his annual expenses in charities alone amount to more than Rs. 15,000.



The Government of India conferred on him the title "Diwan Bahadur" in the year 1937.

He donated Rs. 15,000 for the Vithal Sayana Telugu Gymkhana at Kamatipura and built a Pavilion which was opened by Sir J. C. Beaumont, Chief Justice of Bombay on 13th July 1940. As Chairman of the War Relief Committee he raised Rs. 50,000 from Thana District for the War Gift Fund. In 1940 he was nominated by the Government of Bombay as a Justice of the peace.

Address : Vithal Sayana Building, Bombay 2.

VIZIANAGRAM, MAHARAJ KUMAR SIR VIJAYA, M.L.A. (U.P.) of Vizianagram, owner of "Benares Estates" in the U.P. "Vizy" (as he is known in the field of Sport) was Captain of the Indian Cricket XI which toured Britain in 1936, Patron of Indian Sport; ex-minister, U.P. Government; has travelled extensively in Europe and America. *Married:* in 1923 has two daughters. His father established many charitable institutions and was for some time a Member of the Madras Legislative Council; his grandfather and great-grandfather were members of the Imperial Legislative Council. Both of them had enjoyed the personal distinction of "His Highness" and also a salute of 13 guns and 19 guns respectively. They had both established many charitable institutions in Benares, Allahabad and other places and the former had also built a fountain at Hyde Park, London. The Town Hall at Benares, the Library known as Carmichael Library, Benares; the Vizianagram Hall in Muir College at Allahabad are a few of the many acts of munificence of the Vizianagram House. His nephew the present Raja Maharaj Manya Sultan Bahadur of Vizianagram, who is a minor, is the only Zemindar in India who has a salute of 11 guns in the district of Vizagapatam. The distinction "Maharaj Manya Sultan Bahadur" was conferred by the Moghal Emperors and was subsequently recognised as a hereditary family title by the British Government.

Born: On 28th December 1905; *Educated:* at the Princes' College, Ajmer, and Haileybury College, England. Whilst he was at the Princes' College, Ajmer, he won his Colours at Tennis and Cricket, and set up a record, as he was the youngest student to get a double (Panchranga), and this record has not yet been broken. In 1934 he stood for election to the Central Assembly from the Landholders' Constituency of the United Provinces, and was returned unopposed. On the eve of the inauguration of the reforms he stood for election to the U. P. Provincial assembly in 1936 and was returned by a large majority. One of the well-known big game hunters in India and has reached the coveted figure of a century of tiger. He was appointed interim Minister of Justice of the United Provinces Government under the New Act, 2nd April 1937. He has been a member of the Court of the Benares Hindu University since 1935 and was elected to the Executive Council unanimously in 1940. He was called upon by Sir S. Radhakishan, Vice-Chancellor of the University to accept the highest Blue-ribbon of the University as a special mark of distinction of the convocation of 1940.

WAI: NAWAB GULAMJILANI BIJLIKHAN OF WAI.

Born : 28th July 1888.

Succeeded : October, 1894. Termination of minority administration 1909.

Married : The youngest sister of H. H. The Nawab of Jaora, 29th July 1909, and the present Begumsaheba in 1912. The former died in 1930.

Educated : At the Rajkumar College, Rajkot, and served in the Imperial Cadet Corps, Dehra Dun, for two years. He was invited to rejoin the Corps during the Coronation of the late King Emperor in 1911.

The founder of the family held a high command in the army of the Emperor Aurangzebe who invaded the Deccan and conquered the kingdom of Bijapur. When the Emperor returned from Bijapur to Satara, Nawab Bijlikhan was left at Wai for the protection of the territory conquered from the Marathas. For carrying out successfully several expeditions and political Missions he was rewarded by the grant of a Jagir. He died in 1700 and was succeeded by his son Sheik Miran I. In 1708 when Shahu, the grandson of Shivaji, returned from Delhi and approached Satara he was opposed by Tarabai, his aunt. Nawab Sheik Miran I espoused Shahu's cause and placed him on the throne of Satara. In return for this service he received the Parganas of Erondol and Daryapur, and the highest honours that the Chatrapati could bestow upon him. When Raghuba, the father of the last Peshwa, was sent as a state prisoner to Kopergaon in the Ahmednagar District, Sheik Miran II held both father and son in captivity till 1796 when Baji Rao was brought to Poona by Maharaja Daulat Rao Scindia of Gwalior.

In 1820 after the conquest of the Deccan by the British Government the possessions of this family were restored under a Treaty dated 3rd July 1820 and included the pargana of Erondol, and numerous tracts of land in the Deccan, all the territory in the Nizam's Dominion being resumed. The present Chief Nawab Gulamjilani Bijlikhan takes precedence over all the first class Sardars in the Deccan. He was an additional member of the Bombay Legislative Council for two years till 1920, and member of the Legislative Assembly from 1921 to 1923. He was elected Vice-President of the Bombay Presidency Muslim League, and is permanent President of the Satara District Anjuman Islam. He was appointed an Hon. A.D.C. to H. E. The Governor of Bombay in 1929, and was for some time President of the State Council, Jaora State.

Address : The Palace, Wai.

WALIUR RAHMAN, Khan Bahadur Moulvi, B.L., a Tea Planter and Zemindar of Jalpaiguri. Born in July, 1861, in the famous Kazi family of Cheora, District Tipperah. He received his early education in his native village, graduated in Arts and in Law from the Presidency College, Calcutta, and the Government College, Dacca, respectively. He is the third Muslim graduate of the Tipperah District. He lost his father while yet a boy but was brought up by his uncle the late Khan Bahadur Moulvi Rahim Bakhsh. *Married:* Begum Manija Khatun, youngest daughter of the late Kazi Mahammad Asghar of Cheora in May, 1889. Has six sons and three daughters. He joined the Jalpaiguri bar in December, 1890, and practised law there for about 30 years. While at the bar he became connected with the tea industry of which his uncle was the pioneer among Indians. By dint of zeal, industry, frugality and honesty, he has now become the sole proprietor of several tea gardens and holder of a considerable number of shares of Jt. Stock Companies and owner of extensive Zemindary and other properties in Bengal and Assam. He has served in an honorary capacity in public bodies and organisations and participated in all social and loyal political movements in Jalpaiguri. He is a Life Member of the Sir Salimullah Muslim Orphanage at Dacca and has endowed two beds, the Lady Carmichael Bed and the Lady Jackson Bed in the female section of the Jalpaiguri General Hospital. He contributed Rs. 5,000 towards King George V Jubilee Fund, part of which together with other contributions have enabled the X-Ray installation in the Jalpaiguri General Hospital to be made. He has established a charitable dispensary at Walipur in the Darrang district in Assam and has been maintaining it at his own cost. In Cheora he has built a fine mosque and excavated tanks which supply pure drinking water to the people. He has done many other works of public utility. For his public services, munificence and loyalty he has been honoured with the title of Khan Bahadur. The naming of two nice buildings he has built in Jalpaiguri as "Nur Manzil" and "Alima Manzil" is very strong testimony of his love and esteem for his father and mother respectively. Though now in his 80th year he is still active and is himself managing his vast estates with the help of some of his sons. He is still acting as a Director in 12 joint stock tea companies and is known as "The tea magnate" of Jalpaiguri. He is going to convert his properties into a Private Joint Stock Company consisting of himself, his wife and children.

Address : "Alima Manzil," Jalpaiguri.

YUSUF: NAWAB SIR MUHAMMAD, Kt., Barrister-at-Law, is the biggest and most influential landholder in the eastern districts of the United Provinces. He is a hereditary Nawab and has been a member of the Legislative Council since the inauguration of the Montagu-Chelmsford Reforms in 1921. He was appointed a Minister in 1926 and continued in that office for nearly 12 years until the introduction of the Provincial Autonomy. He was also in the Interim Ministry formed under the new constitution. He has travelled widely and has made a special study of the people and problems of the United Provinces. He has rendered great public service by infusing a real spirit of self-government in the local bodies which has enabled and encouraged them to discharge their duties and obligations towards the public more effectively and efficiently. His personal interest and guidance in the affairs of the local bodies has been responsible for greater amenities to the public. It was through his patronage that the U.P. District Boards' Conference was originated and has been working so successfully.

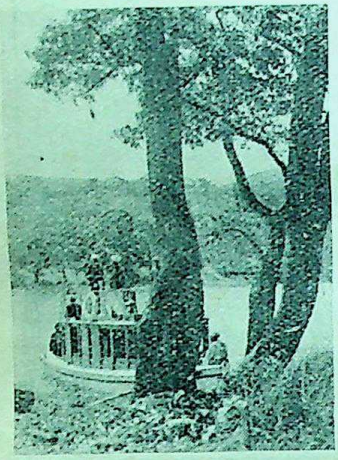
The high standard of the provincial roads that the province can rightly boast of is the result of the continuous and untiring efforts of Nawab Sir Muhammad Yusuf in the Public Works Department. The great progress made by the Public Health Department, the increasing efficiency and popularity of the Medical Department, the growth of the co-operative movement and the general efficiency of the Registration and Veterinary Departments are all due to his sound and efficient administration during the last 12 years. He has always shown the spirit, initiative and enthusiasm for the good of the people and the province.

His services in the cause of the landholders are too well-known to be reiterated. In the well-being and uplift of the zemindars and the tenants he has always evinced keen and personal interest. An active worker of the Agra Province Zemindars' Association, he carried on an intensive campaign throughout the province and did his best to consolidate the position of the zemindars. In fact, it would be no exaggeration to say that the Agra Province Zemindars' Association is a lasting monument to his untiring and zealous efforts.

Several educational and religious institutions owe their existence to his generous and charitable disposition. His courtesy and obliging nature have won for him a popularity which is coveted by so many to-day. He has always been very popular in the Council and during his term of office as Minister wielded enormous influence over the members of the Legislative Council. He is the best speaker on Government benches and his influence in the councils has proved beyond a shadow of doubt that he is a pillar of real strength both to the Government and the public at large.

He is one of the most influential leaders of the Muslim community of All-India importance. He has contributed in no small measure in maintaining and consolidating the solidarity of the Mussalmans in India and has helped them in following a wise and sound policy in the interests of the country. He has rendered signal services to the Muslim community and by dint of his patriotism, is held in high esteem by persons of all schools of thought.

He is universally liked and respected both by officials and non-officials—Muslims and non-Muslims—and in him one can find a real example of a selfless worker who is always striving to do some real good to the people. His impartiality is well-known and he commands the confidence of the Hindus and Muslims alike in these provinces.



Address: 57, Newberry Road, Lucknow; 2, Nawab Yusuf Road, Allahabad; Urdu Kothi, Jaunpur.

BOMBAY'S SARTORIAL ARTISTS A. R. DIAS & Bros.

IN their 32 years of business A. R. D. have won many laurels for their superlative work. A "seamless suit," created by the head of the firm, and sent to the Indian Catholic Exhibition of Arts and Crafts, in 1932, won the highest award, the Exhibition's gold medal. H. E. Sir Frederick Sykes, the then Governor of Bombay, who declared open the Exhibition, took special interest in the exhibit and complimented Mr. A. R. Dias on his skill and ability.

CORRECT STYLISTS FOR MEN.

Not only does A. R. D. mean a first-rate selection of materials, and accessories, with master-craft in cut and finish. A. R. D. means expert advice on the new men's styles of England and America. Close touch with their agents abroad maintains for A. R. D. that little "extra" that makes all the difference. And well-dressed men know that A. R. D. is the established Bombay centre for all that is new and correct in men's style.

EVERYTHING FOR MEN.

A trip to A. R. D.'s is always a pleasure, and a temptation to buy, too. For the shelves are always well-stocked with a fine display of attractive new wear, from studs and links to new felt hats and evening wear.

Take ties, for example; at A.R.D.'s there's always a grand choice, the finest in cravats from Europe and America.

The shirt stock, too, leaves nothing much to be desired. A.R.D. always have plenty of ready-made shirts and collars from the finest English and American houses. But, best of all is A.R.D.'s made-to-measure shirting service.

A.R.D. have always taken special care to stock the newest and best in quality headwear. There are excellent topees, and the famous English and American ranges of hats in many smart shades of soft velour and felt.

Besides, there are dress accessories of every description—all well and conveniently displayed. The establishment is situated at 105, Esplanade Road, opp. the Clock Tower.

"It is for development along these lines that an insurance institution should strive."

"COMMERCE,"
19th June, 1937.

HISTORY OF THE SOCIETY

ESTABLISHED 1871

THE BOMBAY MUTUAL LIFE ASSURANCE SOCIETY, LTD.

THE humblest beginning an insurance enterprise ever had was the Bombay Mutual's. Way back in 1870, seven earnest men with a total initial capital of seven rupees ventured to work the idea of life assurance on "mutual" basis. This meant that the enterprise would be run by the members for the members, that there would be no shareholders to take the bulk of the profits, that there would be equality of power for all participating. These lofty ideals have been rigidly adhered to, all through these last 69 years of the Society's existence.

In March 1871, the little enterprise was registered as a Joint Stock Company with limited liability. Within seven days of incorporation, policies were issued

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Umakant S. Desai, Esq., M.A.
Chairman.

involving a liability of a lakh of rupees ! This left the members in a quandary as to what would happen if a claim had to be met in the near future. Thereupon, every member agreed to pay upto Rs.5,000 in order to make up any contingent shortage. Fortunately, no claim was registered till 1874 when the funds of the Society were more than sufficient to cover it.

SURPRISE BONUS

In 1895, membership having increased, funds had soared to such a high figure that the Board of Directors thought it wise to refund 15 per cent. of the total premiums paid. And what a pleasant surprise it was for members !

AGENCY

The Society had no agents. It relied on the public to voluntarily step forward and become members. It was only in 1918 that the first Sole Agents for the whole of India were appointed.

In 1928, the Board of Directors took over the management from the Sole Agents and paved the way towards representing the Society in almost every important centre of business in India, Burma, Ceylon and British East Africa.

HIGH REPUTATION

By its straightforward business policy, prompt payment of liabilities and judicious management the Society has earned a fine reputation in the public.

The Society is unique in being the only institution established in India to give bonuses to policyholders right from its inception. It has always been the aim of the Society to give honest advice to prospective policyholders.

Here, then, is an institution whose stability and integrity inspire confidence ; an institution whose services extend even beyond policyholders—to their dependents.

A full Calendar will be found at the beginning of this book. Below are given details of the other Calendars in use in India.

The *Jewish* Calendar is in accordance with the system arranged A.D. 358. The Calendar dates from the Creation, which is fixed as 3,760 years and 3 months before the beginning of the Christian Era; the year is Luni-solar.

The *Mahommedan*, or era of the Hejira, dates from the day after Mahomet's flight from Mecca, which occurred on the night of July 15, 622 A.D. The months are Lunar.

The *Fasli* year was derived from a combination of the Hejira and Samvat years by the order of Akbar; it is Luni-solar. The *Bengali* year seems also to have been related at one time to the Hejira, but the fact of its being Solar made it lose 11 days each year.

The *Samvat* era dates from 57 B.C., and is Luni-solar. The months are divided into two fortnights—*sudi*, or bright and *budee*, or dark. Each fortnight contains 15 *tithis*, which furnish the dates of the civil days given in our calendars.
